Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 1747 North Market Blvd., Suite 225, Sacramento, CA 95834, www.bppe.ca.gov, toll-free telephone number (888) 370-7589 or by fax (916) 263-1897. As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling 888-370-7589 toll-free or by completing a complaint form, which can be obtained on the bureau's Internet Website, www.bppe.ca.gov.

I. Overview

INTRODUCTION

Platt College traces its origin to the state of Missouri and to the original school's founding in Saint Joseph in 1879. Today, Platt College has four Southern California campuses located in Los Angeles and the Inland Empire. These campuses were originally branches of Platt College, San Diego. The Los Angeles campus achieved main campus standing in 1989. The Ontario campus opened in 1997 as a branch location of the Los Angeles campus. The Riverside campus opened in 2011 as a branch of the Los Angeles campus. The Anaheim campus opened in 2016 as a branch location of the Los Angeles campus.

PHILOSOPHY

Achieving excellence one student at a time.

Platt College is dedicated to the principle that education is the foundation for personal and professional growth and that students should have the opportunity to develop to their full potential.

MISSION

Platt College provides a balanced program of instruction necessary to acquire the specialized knowledge and skills needed for success. The dynamic requirements of employers, as well as the individual needs of the student body, mandate that the College upgrade and enhance each area of study on a continuing basis.

II. Admissions Procedures and Requirements

All applicants for admission to Platt College are required to visit the campus for a personal interview with the Admissions Department, complete an application form, and tour the facility to view the classrooms, equipment, and samples of student work.

All applicants must provide proof of a valid high school diploma, GED, or High School proficiency exam. Platt will use all available resources to ensure the validity of all forms of proof of graduation from accredited institutions.

Applicants are required to take a standardized entrance examination that measures language and numerical skills and achieve a passing score on the examination. Veterinary Technician Alternate Route Certificate applicants are not required to complete the entrance examination.

NOTE: Passing scores vary by program, and an outline of what the passing score is for each program is available from the Admissions Department. Certain programs may also have additional program-specific admissions requirements. Applicants may obtain additional requirements for each program from the Admissions Department.

Platt College – Alhambra Distance Education program enrolls prospective students throughout the year. The Distance Education enrollment process is conducted exclusively online and via phone conversations. All enrollment requirements for Distance Education programs match the enrollment requirements for Platt College ground programs. All prospective distance education students take the Distance Education Online Assessment prior to being accepted to Platt College.

Platt College prohibits discrimination (including harassment) against any individual on the basis of race, color, religion (including religious dress/grooming practices), creed, sex (including pregnancy, childbirth, breastfeeding and/or related medical conditions), age, national origin, marital or registered domestic partnership status, veteran status or military status, sexual orientation, gender, gender identity, gender expression, physical or mental disability, including genetic characteristics or genetic information, medical condition, ancestry or any other characteristic protected by state or federal law or by local ordinance.

The Platt College's policy for students with disabilities is based on the provisions of Section 504 of the Rehabilitation Act of 1973 (Section 504) and Title III of the Americans with Disabilities Act of 1990 (ADA). Section 504 states that no qualified individual with a disability shall, on the basis of disability, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity which receives federal financial assistance. Section 504 defines a "qualified individual with a disability" as an individual with a disability who meets the academic and technical standards requisite for admission or participation in the recipient's program or activity. Under Section 504, Platt College is required to provide reasonable and appropriate academic adjustments, auxiliary aids and services to qualified students with disabilities that are necessary to avoid discrimination on the basis of disability. Similar to Section 504, the ADA also prohibits discrimination on the basis of disability. Under the ADA, Platt College is required to provide auxiliary aids and services, and reasonable modifications to its policies, practices, and procedures that are necessary to avoid discrimination on the basis of disability.

As required by federal law, Platt College will provide academic adjustments, auxiliary aids and services (collectively, "academic accommodations") to ensure that it does not discriminate on the basis of disability. Academic accommodations are determined based on the student's disability and individual needs. Academic accommodations may include modifications to academic requirements that are necessary to ensure that students with disabilities are provided an equal educational opportunity. In providing academic accommodations, Platt College is not required to lower academic standards or modify academic requirements that can be demonstrated as being essential to the instruction being pursued by the student or to any directly related licensing requirement. In addition, Platt College is not required to provide academic accommodations that would fundamentally alter the nature of a service, program, or activity, or that would result in undue financial or administrative burdens considering Platt College's resources as a whole.

Platt College will not ask applicants or current students if they have a disability. The disclosure of a disability is voluntary on the part of the student. If a student with a disability wishes to receive academic accommodations, it is the student's responsibility to inform Platt College of the disability and to follow the procedures outlined herein during the enrollment process to request the academic accommodations.

In addition, Section 504 and ADA prohibit harassment based on disability that creates a hostile environment by interfering with or denying an individual's ability to participate in or benefit from a program, service, or activity. Platt College will promptly investigate any allegations of a hostile environment based on disability, take prompt and effective action to end the harassment and prevent it from recurring, and where appropriate, remedy the effects on the individual who was harassed. Individuals may file a complaint of disability harassment by contacting Feedback@PlattCollege.edu.

Not all programs are offered at all Platt College locations. Program availability is subject to change at the discretion of the College. Please see the Campus President for current program offerings at each Platt College location.

Denial of Admission or Re-entry

Platt College reserves the right to deny admission or re-entry to any applicant or student the College, at its discretion, determines is either: a) unlikely to benefit from its programs, b) discloses or is found to possess an adverse background that disqualifies them from (a) participation in clinical/practicum or externship experiences required in a program or (b) employment opportunities in the field for which the program is intended to prepare them, or c) whose presence on campus or in the online academic environment is considered by the administration to be disruptive and/or potentially harmful to Platt College students, faculty, and/or staff.

Admittance Requirements - Eligibility

In order to enroll with Platt College, a prospective student must be a citizen of the United States or an eligible non-citizen as classified by the Department of Homeland Security.

In addition, applicants must be at least 18 years of age at the time of admission and possess a high school diploma, GED (or equivalent). If a prospective student is less than 18 years of age, they may be permitted to enroll if they obtain parent or legal guardian signature of approval or demonstrate that they are otherwise covered under state emancipation statutes.

NON-MATRICULATING STUDENTS

Occasionally an individual wishes to take single courses at Platt College without seeking admission as a degree or diploma seeking student. Such students may enroll in individual courses as a 'Non-Matriculated Student' (NMS), provided they hold a high school diploma or GED and meet all of the required Admission policies including all testing requirements for the corresponding program listed in the College Catalog. Certificate programs are not eligible for non-matriculating status.

Such non-matriculated students are not eligible for any form of financial assistance. They must comply with all policies and procedures contained in the College Catalog. Re-enrollment as a non-matriculated student may be denied if the student's GPA falls below 2.0. A maximum of 24 quarter credits taken as a non-matriculated student may be applied toward a Platt College degree or diploma, however taking courses as a non-matriculated student does not constitute admission to a program nor does it guarantee the applicability of those courses toward a degree or diploma in the future. See Transferability of Credits section of the College Catalog for transfer credit policies.

Tuition charges for non-matriculated students in a degree or diploma program will be \$400 per quarter credit. This fee will include all needed books and supplies. Tuition and fees for enrolled course(s) must be paid in full within the add / drop period.

Platt College does not maintain any written agreements with any other institutions or organizations to provide a portion of the educational program. Platt College does not currently have any articulation agreements in place.

INTERNATIONAL STUDENTS

Platt College is approved to enroll international students by Student and Exchange Visitor Information System (SEVIS). For international students, official transcript translation and evaluation from a member of the National Association of Credential Evaluation Services (NACES) is required. A grade of "C" (2.0) or higher is required to be considered for transfer credit into Diploma, Associate and Bachelor programs. In addition, remedial/developmental coursework is not eligible for transfer.

International students must complete an international admissions application to be considered for enrollment. In addition, international students must provide all documents required by SEVIS and Platt College and meet any program admission requirements.

Visa and Immigrant Documentation Requirements:

International students must provide the Designated School Official (DSO) with the following documents at the time of enrollment (prior to start):

- Form I-20 – Certificate of Eligibility for Nonimmigrant Student Status
- International Student Visa (F-1 or M-1)
- Passport
- Form I-94 – Arrival / Departure Record

Platt College does not offer any visa services as such there are no additional fees associated.

Proof of English Language Proficiency

All international student applicants must provide Platt College with proof of English language skills to pursue enrollment with Platt College. International students can either: a) provide, in the form of official transcripts, successful completion of coursework from an accredited high school or English language school certified with SEVP, b) take either of the approved proficiency exams and meet the minimum score requirements. The TOEFL (Test of English as Foreign Language) and IELTS (International English Language Test System) are the approved proficiency exams.

A minimum score of 550 on the paper-based and 84 on the internet-based TOEFL test is required as proof of proficiency in English. This test must be submitted directly from the testing organization to the campus, sent to the attention of the DSO, where the international student is applying.

A minimum score of 6 on the TOEFL IELTS test is required as proof of proficiency in English. This test must be submitted directly from the testing organization to the campus, sent to the attention of the DSO, where the international student is applying.

If the native language of the international student is English, and Platt College can confirm the native language, then the student is not required to take the TOEFL test. There is no limit to the amount of times a student can take the test. TOEFL test scores are valid for two (2) years after the test date. The official scores become part of the permanent student record once the student has enrolled with the College.

Financial Affidavit or Proof of Financial Support

International students must provide proof of financial support or financial affidavit that tuition and living expense can be covered. The following are acceptable proofs:

- Bank statements or letters from sponsors showing said evidence that tuition can be covered including living expenses for a minimum of one (1) year.
- Completed financial affidavit signed by the prospective international student and sponsor(s).

Proof of High School or Secondary School Graduation

All applicants must provide proof of a valid high school diploma, GED, or High School proficiency exam. Platt will use all available resources to ensure the validity of all forms of proof of graduation from accredited institutions.

Transfer of Credits from Postsecondary School

International students requesting transfer of credits from a postsecondary school must have the official transcript evaluated and translated (if applicable) from a member of the National Association of Credential Evaluation Services (NACES) or the Association of International Credential Evaluators, Inc. (AICE).

All instruction at Platt College is provided in English only.

ACCREDITATION AND APPROVALS / LICENSURE

Platt College is accredited by the Accrediting Commission of Career Schools and Colleges (ACCSC). Platt College Los Angeles and its branch campuses in Anaheim, Ontario and Riverside, California, are co-educational proprietary institutions owned and operated by Platt College Los Angeles, LLC, a Delaware limited liability company.

This institution is a private institution approved to operate by the California Bureau for Private Postsecondary Education. Approval to operate means the institution is compliant with the minimum standards contained in the California Private Postsecondary Education Act of 2009 (as amended) and Division 7.5 of Title 5 of the California Code of Regulations.

All information in this college catalog is current, correct, and certified by the Officers of Platt College Los Angeles, LLC.

III. Financial Aid Information

Platt College has never filed for bankruptcy petition, operated as a debtor in possession or had a petition of bankruptcy filed against it under Federal law.

FINANCIAL AID

Eligible applicants may benefit from the following federally sponsored programs, which provide grants, loans, and federal work-study to cover portions of tuition and fees:

- Federal Pell Grant
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Direct Subsidized and Direct Unsubsidized Student Loans – The Student Loans offer flexible repayment options, including, but not limited to standard repayment, graduated repayment, extended repayment, income-based repayment, pay as you earn repayment, income contingent repayment, income sensitive repayment plans and loan forgiveness benefits. Stafford loans are available to students who meet all the requirements set by the Department of Education.
- Direct PLUS (parent) Loans
- Federal Work-Student (FWS)

Cal Grant and Federal awards are subject to all Title IV regulations and restrictions, additional disclosures and loan information are available in the Platt College Student and Consumer Handbook.

Please Note: Federal and state annual award amounts are subject to change from year to year, and are dependent on prior education, specific student family situations, and student enrollment status. Additional information on federal student aid loan limits is available in the Student and Consumer handbook, however because eligibility is determined on a case-by-case basis, the financial aid advisors are the best resource for your specific financial aid information.

Platt College also administers Veterans Administration Educational Assistance, selected state grants, and some private scholarships. Please schedule a visit with a Financial Aid Advisor who can review your personal information and provide details on what sources of funding are currently available.

Students receiving Veterans Administration benefits must have all prior education and training evaluated upon enrollment. Credit will be awarded where applicable with the program being shortened accordingly. The student and the Department of Veteran Affairs will be notified.

Platt College can also provide private education loans through various third-party lenders. Applicants may be required to complete a credit application to determine approval status. All private loans are subject to variable interest rates set by each lender that can increase or decrease over time depending on the market conditions. Private loans have a range of interest rates for each borrower depending on the borrower's credit rating. Some lenders may have fees for each loan borrowed. Borrowers should contact their private student loan lender with any questions.

If a student obtains a loan to pay for an educational program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund, and if the student has received federal student financial aid funds, the student is entitled to a refund of the money's not paid from federal student financial aid program funds.

COLLEGE REFUND POLICY

Student's Right to Cancel

1. A student has the right to cancel his or her agreement for a program of instruction, without any penalty or obligations, through attendance at the first class session, or the seventh (7th) day (calendar days) after enrollment, whichever is later. After the end of the cancellation period, you also have the right to stop school at any time; and you have the right to receive a prorated refund if you have completed 60 percent or less of the scheduled hours in your program's current payment period through the last day of attendance. For students enrolled in any Distance Education program, you have the right to cancel the enrollment agreement and receive a full refund before the receipt of any lessons or materials for the course have been received.

2. Cancellation may occur when the student provides a written notice of cancellation submitted by mail or by hand delivery at one of the following campus locations:

- ALHAMBRA CAMPUS:
- Platt College, 1000 South Fremont Ave, Suite A9W Alhambra, CA 91803
- ANAHEIM CAMPUS:
- Platt College, 1400 S Douglass Road, Suite 125, Anaheim, CA 92806
- ONTARIO CAMPUS:
- Platt College, 3700 Inland Empire Boulevard Ontario, CA 91764
- RIVERSIDE CAMPUS:
- Platt College, 6465 Sycamore Canyon Blvd., Ste. 100, Riverside, CA 92507

3. The written notice of cancellation, if sent by mail, is effective when deposited
4. The written notice of cancellation need not take any particular form and however expressed; it is effective if it shows that the student no longer wishes to be bound by the Enrollment Agreement.
5. If the Enrollment Agreement is cancelled the school will refund the student any money, he/she paid, and less any deduction for equipment not returned in good condition, within 45 days after the notice of cancellation is received.

Withdrawal from the Program

You may withdraw from the school at any time after the cancellation period (described above) and receive a prorated refund if you have completed 60 percent or less of the scheduled hours in your program's current payment period through the last day of attendance. The refund will be less a registration or administration fee not to exceed \$250.00, and less any deduction for equipment not returned in good condition (good condition does not include equipment that a seal is broken, log-on occurred, or is marked or damaged in any way), within 45 days of withdrawal. If the student has completed more than 60% of the period of attendance for which the student was charged, the tuition is considered earned and the student will receive no refund.

For the purpose of determining a refund under this section, a student shall be deemed to have withdrawn from a program of instruction when any of the following occurs:

- The student notifies the Campus Academic Dean or Registrar through the Academic Dean's office of the student's withdrawal or as of the date of the student's withdrawal, whichever is later.
- The institution terminates the student's enrollment for failure to maintain satisfactory progress in his or her program of study; failure to abide by the rules and regulations of the institution; absences in excess of maximum set forth by the institution for his or her program; and/or failure to meet financial obligations to the School within established timeframes.
- The student has failed to attend class for fourteen (14) consecutive calendar days (excluding scheduled campus wide breaks greater than 5 days) from their last day of attendance.
- The student has failed to return on the specified day appointed on the approval for a leave of absence without notifying campus officials.

For the purpose of determining the amount of the refund, the date of the student's withdrawal shall be deemed the last date of recorded attendance. The amount owed equals the daily charge for the program (total institutional charge, minus non-refundable fees, divided by the number of days in the program), multiplied by the number of days scheduled to attend, prior to withdrawal.

For the purpose of determining when the refund must be paid, the student shall be to have withdrawn at the end of 14 days.

For programs beyond the current "payment period," if you withdraw prior to the next payment period, all charges collected for the next period will be refunded. If any portion of the tuition was paid from the proceeds of a loan or third party, the refund shall be sent to the lender, third party or, if appropriate, to the state or federal agency that guaranteed or reinsured the loan. Any amount of the refund in excess of the unpaid balance of the loan shall be first used to repay any student financial aid programs from which the student received benefits, in proportion to the amount of the benefits received, and any remaining amount shall be paid to the student.

If the student has received federal student financial aid funds, the student is entitled to a refund of moneys not paid from federal student financial aid program funds before federal student financial aid funds are returned.

Date of Determination That the Student Withdrew

- a. For the purpose of determining the date the student withdrew and the amount owed for educational services rendered and equipment received, the student shall be determined to have withdrawn from the program on the date when any of the following occurs: The student notifies the office of the Academic Dean by telephone, in person, or in writing, to provide official notification of their intent to withdraw.
- b. The school terminates the student's enrollment.
- c. The student has failed to attend class for fourteen (14) consecutive calendar days (excluding scheduled campus wide breaks greater than 5 days) from their last day of attendance. In this case, the date of determination will be the business day following the fourteenth calendar day after the last date of recorded attendance.
- d. The student fails to return from an approved leave of absence. In this case the date of determination is the date the student was scheduled to return.
- e. For VA benefit considerations, the Date of Determination will be the student's last day of attendance.

Withdrawal Date for the Return of Title IV Funds

Note that the withdrawal date used to calculate the return of Title IV funds is the student's last day of attendance not the institution's date of determination that the student withdrew. This means that a student receiving Title IV funds is only eligible to receive funds proportional to the number of calendar days in the payment period up through the last date of attendance, subject to the regulations listed in the Return of Title IV Funds section below.

Note: A student who is on approved leave of absence retains in-school status for purposes of Title IV funding. However, the student should be aware that if he or she does not return from an approved leave of absence, that some or all of the grace period of the loan could have been used up, as the Title IV withdrawal date is set retroactively to the last date of attendance.

Return of Title IV & State Grant Funds Policy

Effective 10/7/00, all financial aid (Title IV) recipients who withdraw and have completed less than 60% or less of the payment period for which they have been charged, are subject to the new federal refund regulations per 34 CFR 667, 682, 685, published November 1, 1999.

If the student has received federal student financial aid funds, the student is entitled to a refund of moneys not paid from federal student financial aid funds.

1. Federal regulations state that the amount of a Title IV refund is based on the percentage of Title IV funds earned by the student at the time of withdrawal. In order to determine whether Title IV funds must be returned, the school must calculate the following: To determine the percentage of the payment period completed, the number of days* attended in the payment period is divided by the total days* in the payment period.

**Days = calendar days for purposes of this formula, and therefore include weekends and holidays. Only scheduled breaks of 5 days or more, and approved leave of absences are excluded.*

2. The net amount of Title IV funds disbursed, and that could have been disbursed for the payment period, is multiplied by the percentage of the payment period completed. The result is the amount of earned Title IV aid.

3. The earned aid is subtracted from the aid that was actually disbursed to, or on behalf of the student.

4. The institution will return the lesser of the total unearned aid or the unearned institutional charges for the payment period.

5. Unearned aid is allocated back to the Title IV programs in the following order as specified by law:

- a. Direct Unsubsidized Loan Program;
- b. Direct Subsidized Loan Program;
- c. Direct PLUS Loan Program

If excess funds remain after repaying all outstanding loan amounts, the remaining excess shall be credited in the following order:

- a. Federal Pell Grant Program;
- b. Federal SEOG Program;
- c. State Grants (i.e. Cal Grants and/or other State assistance awarded);
- d. Other Federal assistance awarded under this title for which return of funds is required.

If a student earns more Title IV funds than were disbursed at the time of withdrawal, the student may be eligible to receive additional loan or grant funds. In such a case, Platt College will confirm with the student whether any additional funds owed should be disbursed, or if the student wishes to limit his/her indebtedness and have the funds returned to the Department of Education.

Note: After the institution has allocated the unearned aid, any amount received by the student from a grant program is reduced by 50%. Unearned loan funds received by the student are paid back as per the term of the borrower's promissory note.

In determining the refund policy to apply to any student situation, Platt College uses both the federal return of Title IV policy and state refund policy calculations as they apply to any student who has dropped from the program. The state refund policy is applied to all students that drop from the college. The federal return of Title IV policy is applied to all students who have dropped from the college that receive Title IV funds and who have completed less than 60% of the payment period. In these cases, the larger of the calculations is used to determine the amount of the Title IV funds to be returned.

Remaining Account Balance after Credit Adjustments and Return of Title IV Funds

If the amount the student has paid for his or her program of instruction is more than the amount he or she owes for educational services rendered and equipment received, then a refund will be made within 45 days from the date of determination that the student withdrew. If any portion of the student's charges

were paid from the proceeds of a loan, then the refund will be sent to the lender or to the agency that guaranteed the loan, if any. The refund will first be used to repay any student financial aid programs from which the student received benefits, in proportion to the amount of benefits received. Any remaining balance will be paid to the student. If the amount the student has paid for his or her program of instruction is less than the amount he or she owes for educational services rendered and equipment received, then he or she must make arrangements with Student Accounts to pay the balance due. Unpaid balances will be sent to a collection agency if payment arrangements are not made.

Family Educational Rights and Privacy Act (FERPA)

Under the authority of the Family Educational Rights and Privacy Act of 1974 (the Buckley Amendment), students have the right to inspect and review all of their educational records except for the following:

1. Financial records of students' parents
2. Confidential letters of statements placed in the file prior to January 1, 1975
3. Psychiatric or medical records retained by a professional for medical purposes
4. Students records by instructors or administrators maintained and accessible only to instructors and administrators.

In accordance with the Act, eligible students have the right to inspect and review their records within forty-five (45) days after the student submits a written request. Platt College shall not permit disclosure of information, except directory information, from educational records or personally identifiable information, except to individuals, agencies or organizations identified by the Act. A student requesting that directory information not be disclosed must submit written notification to the school. Students may waive all or a portion of the Act by indicating, in writing, that Platt College may communicate with specific persons or may release specific information. If the student wishes to allow this waiver, forms are available through the Registrar or Academic Dean.

Veteran's Education Benefits

Platt College proudly administers VA education benefits, including the Yellow Ribbon Program, to qualified students. We are committed to maintaining the Principles of Excellence established by Executive Order in April of 2012. Effective 8/1/19, as part of the Veterans Benefits and Transition Act of 2018, 38 U.S.C. § 3679, Platt College will comply with the requirements of 38 U.S.C. § 3679(e):

1. Platt College will permit any covered individual to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility (COE) for entitlement to educational assistance under chapter 31 or 33 and ending on the earlier of the following dates:

- a. The date on which the U.S. Department of Veterans Affairs (DVA) provides payment for a course of education to an institution
- b. The date that is 90 days after the date on which the educational institution certifies for tuition and fees following receipt of the COE from the student

2. Platt College will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from the DVA under chapter 31 or 33.

NOTE: A Covered Individual is any individual who is entitled to educational assistance under chapter 31, Vocational Rehabilitation, or chapter 33, Post 9/11 GI Bill® benefits.

"GI Bill®" is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill.

Detailed information regarding VA processes and requirements can be obtained at each campus from the VA Certifying Official.

Institutional Matching Grant

Platt College participates with various federal, state, local and non-profit agencies as well as private industry to offer assistance to those students approved for funding through a variety of external sources. For those students accepted for sponsorship by certain agency programs, Platt College makes available an institutional matching grant. Institutional matching grants are available to those students who meet Platt College's admissions and academic requirements and who are sponsored by governmental and non-profit organizations dedicated to the promotion of education and training. Students receiving institutional matching grants will be notified of the award prior to the start of classes. The institutional matching grant is paid to a student's account each payment period. The grant is applied to a student's account at the time tuition is billed. If a student does not complete a period of enrollment for which the grant was awarded, the College will prorate the amount of the institutional match based on the institution's refund policy. The assistance offered may vary by the agency requirements. Grant amounts may vary among the Platt College campus locations, depending on outside agency sponsorship and the availability of agency budgeted funds. Information regarding available funding should be obtained directly from the agency from which you are seeking assistance or the Financial Aid Office at the Platt College campus.

GRAPHIC DESIGN

Diploma, Associate and Bachelor of Arts

Graphic Design is a form of visual communication using art, words, and technology to convey an idea. Through the use of type, color, symbols, illustrations, and photography, the graphic designer creates images used by advertising agencies, publishing firms, design studios, print companies, newspapers, magazines, corporate art departments, desktop publishing, multimedia presentations, and web pages.

Platt College's curriculum provides a balanced program of instruction necessary to succeed in today's graphic design industry. Each area of study is reviewed on a regular basis to ensure that the College is keeping current with the needs of employers and changing industry trends.

First term students learn practical foundation skills in design, color theory, typography, print production, and basic drawing. Students in intermediate and advanced terms build on their foundation skills and use computer technology to produce design solutions for a wide variety of projects. Throughout the entire program, the graphic designer's role in the business world is emphasized. Planning, scheduling, collaboration, job search skills, and portfolio development help to prepare students for their professional life.

Vocational Objective

Upon successful completion of the program, students will have acquired the technical knowledge and creative skills for an entry-level position, with growth potential, in the field of graphic design.

Industry Occupations

These include production artist, graphic designer, illustrator, layout artist, and computer artist. Other related positions deal with photo manipulation, typographical design, presentation graphics, prepress production, and design assistant. Some environments in which graphic designers normally work are advertising agencies, publishers, corporate in-house art departments, and design studios, package design companies, printing companies, newspapers, magazines, and sign companies. Students will also be prepared to pursue freelance work in any of the above areas.

SCHOOL OF

VISUAL COMMUNICATION

Bachelor of Arts

Concentrations: 2D Print

The Bachelor of Arts in Visual Communication (BAVC)

develops professionals who take concepts and then create visual imagery by employing type, illustration, sound, music, photography, and animation. The visual communicator impacts virtually every aspect of modern life whether by products purchased, entertainment individuals enjoy, or the ways in which people communicate. Graduates of the Bachelor of Arts in Visual Communication degree program will produce a professional quality portfolio that will make them candidates for entry-level employment in the myriad of industries related to visual communication.

The BAVC program includes coursework in architectural 3D, video production, 3D character development, 3D texturing and lighting, advanced 3D animation, advanced drawing, advanced motion graphics, video compositing, motion capture, web design, and dynamic web design.

The program concludes with interactive courses in portfolio preparation designed to better prepare graduates to conduct effective interviews, self-marketing, as well as produce a highly professional and competitive portfolio.

Vocational Objective

Upon completion of requirements for this degree, students will have expanded knowledge of multimedia, as well as an understanding of how to apply aesthetic concepts and design techniques in the creation of interactive media. This knowledge will enhance students' creativity and expertise, enabling them to produce exciting digital content for an interactive portfolio which will demonstrate their artistic and technical design skills in an entry-level position with potential employers.

Industry Occupations

The 2D Print specialization prepares graduates for entry-level employment in occupations such as graphic designer, Web 2D artist, and illustrator. These positions might typically work on designing branding campaigns, creating marketing collateral and packaging, and other areas of marketing and advertising design.

Bachelor of Arts in Visual Communication— 2D Print Specialization

2500 Hours / 189 Quarter Credit Hours / Approximately 31 months

Upon successful completion of a program of instruction, the graduate will be awarded a Bachelor of Arts in Visual Communication degree provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. For the Visual Communication 2D Print Specialization program, a presentation-quality portfolio must be presented, reviewed, and approved by a committee appointed by the Dean of Academics or designee. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

CRIMINAL JUSTICE

Diploma, Associate of Arts and Bachelors of Arts

Security is a high priority in the United States, and the need for qualified professionals in this area is greater than ever. The Bureau of Labor Statistics projects that growth in the fields of corrections, private investigation, probation, and homeland security will increase in the coming years. The challenges presented to homeland security have increased the complexity of these tasks, making the need for highly trained and prepared applicants even more important.

Platt College has developed a comprehensive curriculum in the Criminal Justice program that includes Introduction to Law & Ethics, Corrections, Private Security, Criminal Law, Criminology, Criminal Investigations/Report Writing, Psychology of Criminal Behavior, Juvenile Justice, Contemporary Issues in Criminal Justice/Terrorism, and Forensics. Students are introduced to many tasks commonly used by Criminal Justice professionals, using visual, auditory, and tactile/kinesthetic approaches.

Vocational Objective

Platt College provides each student with valuable education and highly marketable skills. The Criminal Justice program will provide students with a broad understanding of the criminal justice system, and prepare them for entry-level positions in private security, investigations, corrections, probation, and other related fields.

Industry Occupations

The field of criminal justice offers some very exciting and rewarding career opportunities. With new breakthroughs in forensic technology and an ever evolving domestic and international criminal justice landscape, it's almost a guarantee a career as a law enforcement or criminal justice professional will be anything but boring. There is an ever-expanding list of criminal justice and law enforcement career opportunities that welcome individuals with diverse educational and professional backgrounds. Whether you're interested in criminology, psychology, political science, social work, engineering, forensics, chemistry, law or even accounting, you'll find a criminal justice career suited to your interests and skill set.

Diploma in Criminal Justice

900 Hours / 78 Quarter Credits / Approximately 11 months

Upon successful completion of the program of instruction, the graduate will be awarded a Diploma in Criminal Justice, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and complete and sign all documentation prior to being approved for graduation.

BUSINESS MANAGEMENT

Diploma, Associate and Bachelor of Arts

The **Business Management** program at Platt College is designed to provide job skills to graduates interested in working in a broad spectrum of business-related fields, including sales, marketing, operations, finance, accounting, human resources, or office administration.

The focus of our curriculum is to build essential business skills through in-depth instruction on core business functions. Key topics covered include:

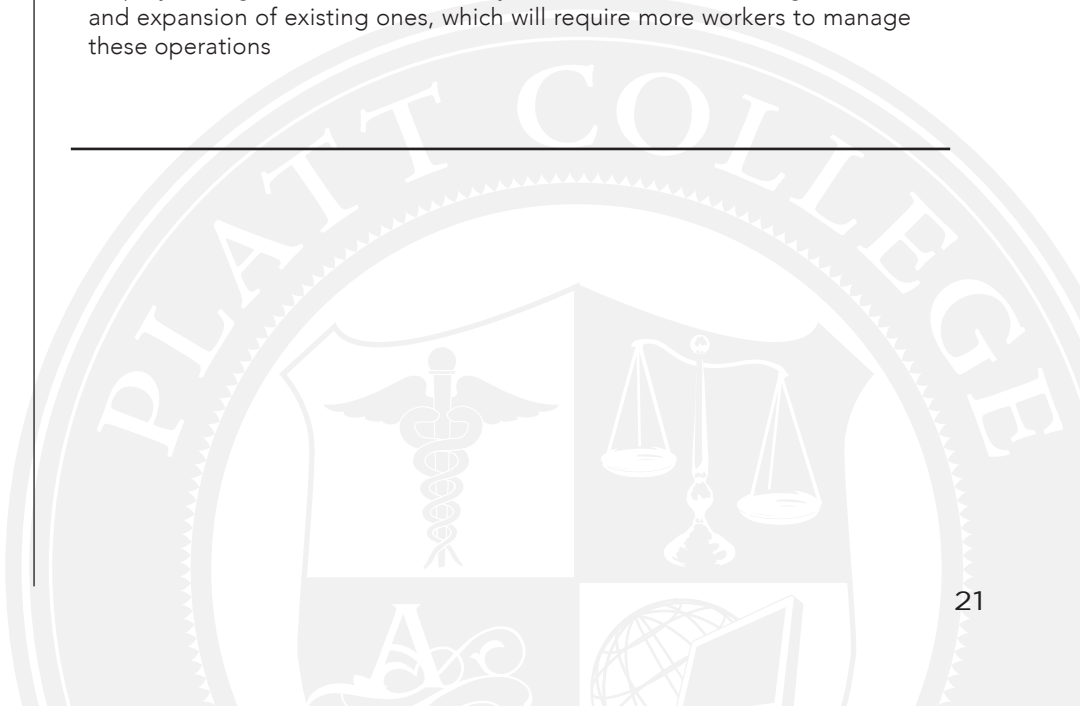

- Basic accounting and bookkeeping
- Marketing and sales effectiveness
- Managing and motivating employees
- Business law
- Becoming an entrepreneur
- Application of selected business software

Vocational Objective

The Business Management program is intended to provide useful job skills for graduates seeking to start their own business, or to work in an entry-level position in a variety of industries requiring business-related skills.

Industry Occupations

Employment growth will be driven by the formation of new organizations and expansion of existing ones, which will require more workers to manage these operations

Diploma in Business Management

750 Hours / 75 Quarter Credit Hours / Approximately 10 months

Upon successful completion of a program of instruction, the graduate will be awarded a Certificate in Business Management, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C). In addition, all students must meet with Career Services and complete and sign all documentation prior to being approved for graduation.

HEALTH CARE MANAGEMENT

Bachelor of Arts

(for applicants with a related Academic associate degree or above)

Health Care Management — The Platt College School of Medical Sciences Bachelor's program in Health Care Management helps students gain the skills they need to pursue managerial positions in the health care field. The Bachelor of Arts in Health Care Management is designed for applicants with an Academic associate degree or above.

The program is designed to broaden the health care management skill set of individuals who have previously completed their Associate or bachelor's degree in a related Health Care field. Our curriculum helps students:

- Improve their analytical, problem-solving, and critical thinking skills
- Develop a solid foundation in business fundamentals
- Gain familiarity with the theory and application of current healthcare management techniques
- Develop a better understanding of individual and group dynamics in a healthcare setting

Admissions Alert - In addition to meeting the eligibility criteria described elsewhere in this catalog, this program has additional requirements for admission which include:

- Wonderlic (BST) minimum passing score of Verbal 205, Quantitative: 215, Total Overall Minimum Score of 500
- In-person interview with the Academic Dean
- Submit a personal statement/essay
- Submit transcripts and GPA from previous educational experiences

Vocational Objective

The Health Care Management program is designed to broaden the leadership skills of individuals who have previously completed their Academic associate degree in a health-related major for entry-level positions.

For students coming from a health care background, the program builds on clinical and administrative skills learned in health-care Associate's programs.

Industry Occupations

Most medical and health services managers work in offices in healthcare facilities, including hospitals and nursing homes, and group medical practices.

Bachelor of Arts in Health Care Management (Degree Complete)

1,200 Hours / 100 Quarter Credit Hours / Approximately 15 months

Upon successful completion of a program of instruction, the graduate will be awarded a Bachelor of Arts degree in Health Care Management provided all financial obligations to the school have been met and a minimum grade point average has been maintained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and complete and sign all documentation prior to being approved for graduation.

RESPIRATORY THERAPY

Associate of Science

Respiratory Therapy or Respiratory Care is the treatment, management, control, diagnostic evaluation, and care of patients with deficiencies or abnormalities of the cardiopulmonary system, such as bronchitis, asthma, emphysema, and other forms of obstructive and restrictive diseases. The Respiratory Care Practitioner is a vital part of the medical team. They are among the first persons called to give treatment and care in emergency situations. Practicing under the direction of a physician, respiratory therapists assume primary responsibility for all respiratory therapeutic and diagnostic procedures.

They evaluate and treat all types of patients ranging from premature infants whose lungs are not fully developed to elderly people whose lungs are diseased. In clinical practice, many of their daily duties include: Assessing lung and breathing disorders and recommending treatment methods; interviewing patients and doing chest physical exams; obtaining sputum specimens for analysis; drawing and analyzing arterial blood specimens; performing pulmonary function tests; care in hospitals in areas such as: intensive care units, emergency rooms, newborn and pediatric units, and operating rooms. Nursing care facilities, doctor's offices, pulmonary rehabilitation facilities, home health care services, smoking cessation programs, asthma education programs, sales, and air transport are some of the areas of employment available to our graduates.

The Respiratory Therapy Program at Platt College's Ontario and Alhambra Campuses currently hold the status of "Continuing Accreditation" as granted by the Commission on Accreditation for Respiratory Care (CoARC). The CoARC mailing address is 264 Precision Blvd, Telford, TN, 37690 and is available via phone at 817 283 2835 or through its website at www.coarc.com.

NOTE: All Respiratory Care practitioners in the state of CA must be licensed by the CA Board of Respiratory Care prior to employment. The following requirements for licensure are excerpted from the Respiratory Care Board of California's website and are current as of July 2015. Additional information may be found at the Board's website at www.rcb.ca.gov.

APPLICATION FOR LICENSURE OVERVIEW

Students will have an opportunity to sit for National Board for Respiratory Care (NBRC) Respiratory Therapy Board Exams after the completion of all graduation requirements. The following is additional information regarding those exams:

Therapist Multiple Choice (TMC):

- Candidate passes at the low cut – Earn the Certified Respiratory Therapist (CRT) credential.
- Candidate fails; candidate can take the TMC 3 times without waiting. Must wait 120 days for subsequent attempts.
- Candidate passes at the high cut – Earn the Certified Respiratory Therapist (CRT) credential and will become eligible to sit for the Clinical Simulation Exam (CSE).

Clinical Simulation Exam (CSE):

- Candidate passes the CSE – Earn the Registered Respiratory Therapist (RRT) credential.
- Candidate fails; candidate can take the CSE 3 times without waiting. Must wait 120 days for subsequent attempts.

*Once the application for the TMC and/or the CSE is accepted by the NBRC, the candidate has 90 calendar days to attempt the exam. If the candidate fails to schedule an exam appointment with the 90-day period, the application and fees are forfeited.

Respiratory Care Practitioner (RCP) License Requirements:

- Must earn the RRT credential to obtain the RCP license from the Respiratory Care Board of California.
 - The RRT credential is not required in all states to obtain a license
- Complete a California Law and Ethics course
- Complete Live Scan (must clear FBI and DOJ)
- Complete the RCP application (must include official transcripts)

Costs associated with taking the exams are covered by the institution for all first attempts.

Admissions Alert: In addition to meeting the eligibility criteria described elsewhere in this catalog, this program has additional requirements for admission which include:

- A passing score of an Allied Health standardized exam (HESI) minimum average score of 70
- In-person interview with the Program Director
- Submit a personal statement
- Submit transcripts and GPA from previous educational experiences
- Pass a criminal background check
- Meet minimum physical requirements
- Have the ability to pass drug testing at any point during their enrollment

Vocational Objective

Upon successful completion of the program, graduates may be employed as entry-level Respiratory Care Practitioners in acute care hospitals in areas such as: intensive care units, emergency rooms, newborn & pediatric units, and operating rooms. Nursing care facilities, doctor's offices, pulmonary rehabilitation facilities, home health care services, smoking cessation programs, asthma education programs, sales, and air transport are some of the areas of employment available to our graduates.

Industry Occupation

Most respiratory therapists work in hospitals.

Associate of Science in Respiratory Therapy

1995 Hours / 135 Quarter Credit Hours / Approximately 20 months

Upon successful completion of the program of instruction, the graduate will be expected to meet the following standards:

- To demonstrate comprehension of relevant information and the ability to evaluate and apply this knowledge in their role as performed by registered respiratory therapists (RRT).
- To demonstrate the technical skills necessary to fulfill the role of an RRT.
- To demonstrate professionalism and personal behavior consistent with medical standards and employer expectations.

The Respiratory Therapy Associate of Science Degree will be awarded to graduates of the program, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

DIAGNOSTIC MEDICAL SONOGRAPHY

Associate and Bachelor of Science

Diagnostic Medical Sonography is the process of using high frequency sound to create images of specific areas of the body. The scope of practice includes those procedures, acts, and processes permitted by law, for which the individual has received education and clinical experience, has demonstrated competency, and has completed the appropriate credentialing. A properly trained Diagnostic Medical Sonographer must have knowledge of anatomy, patient care, and pathology, as well as the skills to manipulate a variety of sophisticated instruments

Admissions Alert: In addition to meeting the eligibility criteria described elsewhere in this catalog, this program has additional requirements for admission which include:

- A passing score of an Allied Health standardized exam (HESI) minimum average score of 70 and Wonderlic test
- In-person interview with the Program Director
- Submit a personal statement
- Submit transcripts and GPA from previous educational experiences
- Pass a criminal background check
- Meet minimum physical requirements

Vocational Objectives

The Diagnostic Medical Sonography program is designed to prepare competent entry-level general sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Students are also prepared for entry-level employment as Diagnostic Medical Sonographers in a clinical setting. The program includes both didactic and clinical components. Coursework includes use of Sonography relevant to gynecology, obstetrics, abdominal subjects, superficial structures, and vascular applications. Clinical experience is completed when students' extern in an affiliated medical center, physician's office, or medical clinic, under direct supervision. During the externship component, students will be evaluated on critical thinking in a clinical setting, effective communication, problem solving skills, and other clinical tasks.

Industry Occupations

Most diagnostic medical sonographers and cardiovascular technologists and technicians, including vascular technologists, work full time. Most others worked in physician's offices and medical and diagnostic laboratories.

Associate of Science in Diagnostic Medical Sonography

2,060 Hours / 120 Quarter Credit Hours / Approximately 18 months

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Science degree in Diagnostic Medical Sonography, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C), complete 960 hours of externship and meet all attendance requirements. In addition, all students must meet with Career Services and complete and sign all documentation prior to being approved for graduation.

DIAGNOSTIC MEDICAL SONOGRAPHY

Bachelor of Science

Diagnostic Medical Sonography is the process of using high frequency sound to create images of specific areas of the body. The scope of practice includes those procedures, acts and processes permitted by law, for which the individual has received education and clinical experience, has demonstrated competency, and has completed the appropriate credentialing. A properly trained Diagnostic Medical Sonographer must have knowledge of anatomy, patient care, and pathology, as well as the skills to manipulate a variety of sophisticated instruments.

Admissions Alert: In addition to meeting the eligibility criteria described elsewhere in this catalog, this program has additional requirements for admission which include:

- A passing score of an Allied Health standardized exam (HESI) minimum average score of 70
- In-person interview with the Program Director
- Submit a personal statement
- Submit transcripts and GPA from previous educational experiences
- Pass a criminal background check
- Meet minimum physical requirements

Vocational Objective

The Diagnostic Medical Sonography program is designed to prepare students for entry-level employment as Diagnostic Medical Sonographers in a clinical setting. The program includes both didactic and clinical components. Coursework includes use of Sonography relevant to gynecology, obstetrics, abdominal subjects, superficial structures and vascular applications. Clinical experience is completed when students' extern in an affiliated medical center, physicians' office, or medical clinic, under direct supervision. During the externship component students will be evaluated on critical thinking in a clinical setting, effective communication, problem solving skills, and other clinical tasks.

The Health Care Management specialization introduces students to the management of organizations in the healthcare setting, and is designed to help students:

- Gain familiarity with the U.S. healthcare system
- Improve communication, analytical, problem-solving, and critical thinking skills
- Develop a solid foundation in business fundamentals

Upon successful completion of the program, graduates will be prepared to sit for the Sonography Principles and Instrumentation exam (SPI) and Abdomen/OBGYN portion of the American Registry of Diagnostic Medical Sonographers (ARDMS) certification examination for Diagnostic Medical Sonographers.

NOTE: At the time of this writing, ARDMS certification is voluntary and not required for employment in the state of California as a Diagnostic Medical Sonographer. Testing eligibility is at the sole discretion of ARDMS. Applicants are strongly encouraged to check with ARDMS (www.ardms.org) for the latest requirements.

Industry Occupations

Most diagnostic medical sonographers and cardiovascular technologists and technicians, including vascular technologists, work full time. Most others worked in physician's offices and medical and diagnostic laboratories.

Bachelor of Science in Diagnostic Medical Sonography – Health Care Management

2740 Hours / 178 Quarter Credit Hours / Approximately 27 months

Upon successful completion of the program of instruction, the graduate will be awarded a Bachelor of Science degree in Diagnostic Medical Sonography, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

MEDICAL ASSISTING

Associate of Science

Medical Assistants are multi-talented Health Care industry professionals. These individuals possess a broad scope of knowledge and skills that makes them ideal professionals for any clinical care setting.

Medical Assistants are skilled in performing routine clinical and administrative procedures for physician's offices, outpatient clinics and other health care facilities. Some of these clinical skills include venipuncture, injections, physical therapy, and electrocardiography among others. Medical administrative duties include billing, coding, scheduling, transcription, and many more administrative duties.

Vocational Objective

The intent of the Medical Assisting programs is to provide an enriched learning opportunity that will prepare the student for entry-level employment in the health care industry. Students in the Medical Assisting programs will graduate with a professional knowledge, skills, and practical experience in Medical Assisting acquired during their studies at Platt College. Employment opportunities open to the graduates of the Medical Assisting programs include: Medical Assistant, Medical Administrative Assistant, Podiatric Medical Assistant, and Ophthalmic Medical Assistant. Industries that will be interested in these graduates include, but are not limited to, ambulatory settings such as medical offices, clinics and hospitals, nursing homes, medical supply companies, home health agencies, insurance companies, pharmaceutical companies.

Industry Occupations

Most of these assistants work in physicians' offices, hospitals, outpatient clinics, and other healthcare facilities.

Associate of Science in Medical Assisting

1260 Hours / 95 Quarter Credit Hours / Approximately 15 months

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Science in Medical Assisting, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

MEDICAL ADMINISTRATIVE SPECIALIST

Associate of Science

Medical Administrative Specialists perform a variety of tasks necessary to running a smooth, effective medical office. These individuals focus on many administrative procedures of medical offices, outpatient clinics, hospitals, and other health care facilities

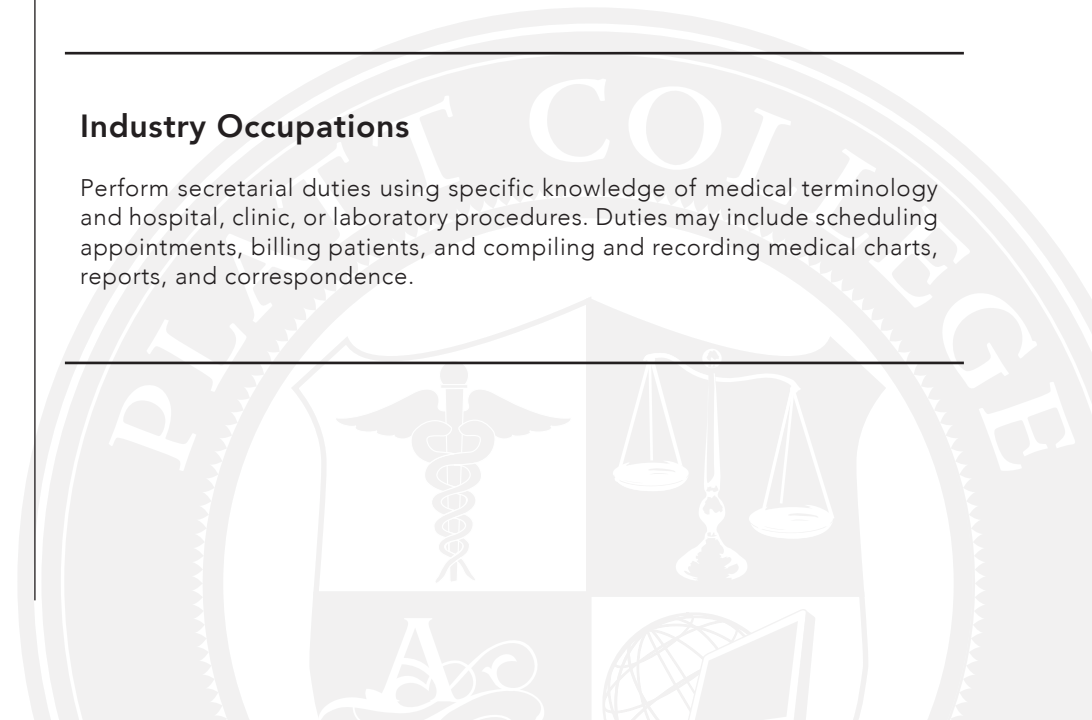

Some of these skills include billing, coding, scheduling, transcription, office finance, human resources and computer skills. Medical Administrative Specialist students will learn the skills that may lead to becoming an office manager in a clinical setting.

Vocational Objective

The intent of the Medical Administrative Specialist programs is to provide an enriched learning opportunity that will prepare the student for entry-level employment in the health care industry. Students in the Medical Administrative Specialist programs will graduate with a professional knowledge, skills, and practical experience in the health services field acquired during their studies at Platt College. Employment opportunities open to the graduates of the Medical Administrative Specialist programs include: Medical Administrative Assistant, Podiatric Medical Administrative Assistant, and Ophthalmic Medical Administrative Assistant. Industries that will be interested in these graduates include, but are not limited to, ambulatory settings such as medical offices, clinics, nursing homes, medical supply companies, home health agencies, insurance companies, pharmaceutical companies.

Industry Occupations

Perform secretarial duties using specific knowledge of medical terminology and hospital, clinic, or laboratory procedures. Duties may include scheduling appointments, billing patients, and compiling and recording medical charts, reports, and correspondence.

Associate of Science in Medical Administrative Specialist

1210 Hours / 90 Quarter Credit Hours / Approximately 15 months

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Science; Medical Administrative Specialist provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

VOCATIONAL NURSING

(*Full-time program only offered at the Alhambra Campus. Part-time (nights and weekends) only offered at the Riverside Campus.)

Diploma and Associate of Science

Vocational Nursing — The mission of the Vocational Nurse Program is to train students in the skills needed to pass the National Council Licensing Exam for Practical Nursing and become successfully employed in a healthcare setting.

The vocational nurse program provides students with the theory, interpersonal, laboratory skills and clinical experience to prepare them for a career as a vocational nurse. Lecture and skills laboratory take place on campus while the clinical training takes place at various health care facilities. The vocational nurse functions as a member of the health care team who provides basic nursing care, administers medications, reports and documents patient signs and symptoms, and carries out therapeutic and rehabilitative measures. Upon successful completion of the program, the student is eligible to take the National Council Licensing Exam for Practical Nursing (NCLEX-PN) to become licensed as a Vocational Nurse (LVN).

Vocational Objective

- Provide the student with the theory, skills, and clinical exposure to successfully pass the NCLEX-PN examination and work as an entry-level vocational nurse in an acute care hospital, skilled nursing or long-term care facility.
- Provide students with the skills necessary to report data to assist in the identification of problems and develop outcomes in patient-centered plans of care.
- Train student to become a vital member of a healthcare team.
- The Board of Vocational Nursing and Psychiatric Technicians (BVNPT) maintains their own list of requirements for eligibility for licensure as a Vocational Nurse. At the time of publication, the Vocational Nursing program at Platt College meets all BVNPT requirements. For a full and complete list of requirements please visit https://www.bvnpt.ca.gov/applicants/summary_vn.shtml#sectiona for the most current list of requirements.

An applicant for a licensed vocational nurse license shall comply with each of the following:

- (a) Be at least 17 years of age.
- (b) Have successfully completed at least an approved course of study through the 12th grade or the equivalent thereof as specified by the board.
- (c) Have successfully completed the prescribed course of study in an approved school of vocational nursing or have graduated from a school which, in the opinion of the board, maintains and gives a course which is equivalent to the minimum requirements for an approved school of vocational nursing in this state.
- (d) Not be subject to denial of licensure under Section 480.

(Amended by Stats. 2011, Ch. 338, Sec. 6. (SB 539) Effective January 1, 2012.)

Industry Occupations

These may include entry level vocational nurse in an acute care hospital, skilled nursing or long-term care facility.

Diploma in Vocational Nursing (Full-time program)

1613 Hours / 101.5 Quarter Credit Hours / Approximately 15 Months

Upon successful completion of a program of instruction, the graduate will be awarded a Vocational Nurse Diploma provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Associate of Science in Vocational Nursing (Part-time program)

1843 Hours / 124.5 Quarter Credit Hours / Approximately 33 Months

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Science degree in Vocational Nurse provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

HEMODIALYSIS TECHNICIAN

Hemodialysis (Certificate)

The Hemodialysis Technician program is designed to prepare students for employment as Hemodialysis patient care technician or as a dialysis technician. By learning what dialysis is, how it was developed, how it is used, and how to maintain the equipment, students will be able to help patients with renal disease receive safe and effective dialysis treatment. Dialysis technicians work with people whose kidneys no longer work properly or at all.

The Hemodialysis Technician operates machines that remove wastes, salt, and extra water from a patient's blood while keeping safe levels of certain chemicals. Dialysis patients generally use the machine for about four hours, three times each week. The technicians prepare patients for dialysis, monitor them and the machine during dialysis, and perform required procedures when dialysis is completed.

Vocational Objective

- To educate students on the role of the dialysis team (physician, nurse, technician, renal dietitian and social worker);
- To provide accurate information regarding infection control and standard precautions, dialysis procedures, water treatment systems, dialysis machines and machine functions so that students can care for dialysis patients;
- To introduce students to a dialysis clinical setting where they work with other healthcare professionals;
- To educate students on the legal and ethical implications related to employment in a clinical or hospital dialysis facility; and
- To prepare students to take and pass the CDC exam or any of the CMS approved national certification examinations and work as an entry level dialysis technician in hospitals under the supervision of a registered nurse or in dialysis units run by private companies.

Industry Occupations

These may include entry level certified Hemodialysis Technician positions in a hospital, or dialysis clinic.

Hemodialysis (Certificate)

296 Clock Hours / Approximately 3 Months

Upon successful completion of a program of instruction, the graduate will be awarded a Hemodialysis Certificate provided all financial obligations to the school have been met. Courses in the Certificate in Hemodialysis program are pass / fail courses. To pass a course, a student must receive 70% or better.

Core Courses		Clock Hours
CHT101	Hemodialysis Technician	96
CHT102	Hemodialysis Clinical Rotation	200
Program Total		296

CERTIFIED NURSE ASSISTANT

Certificate

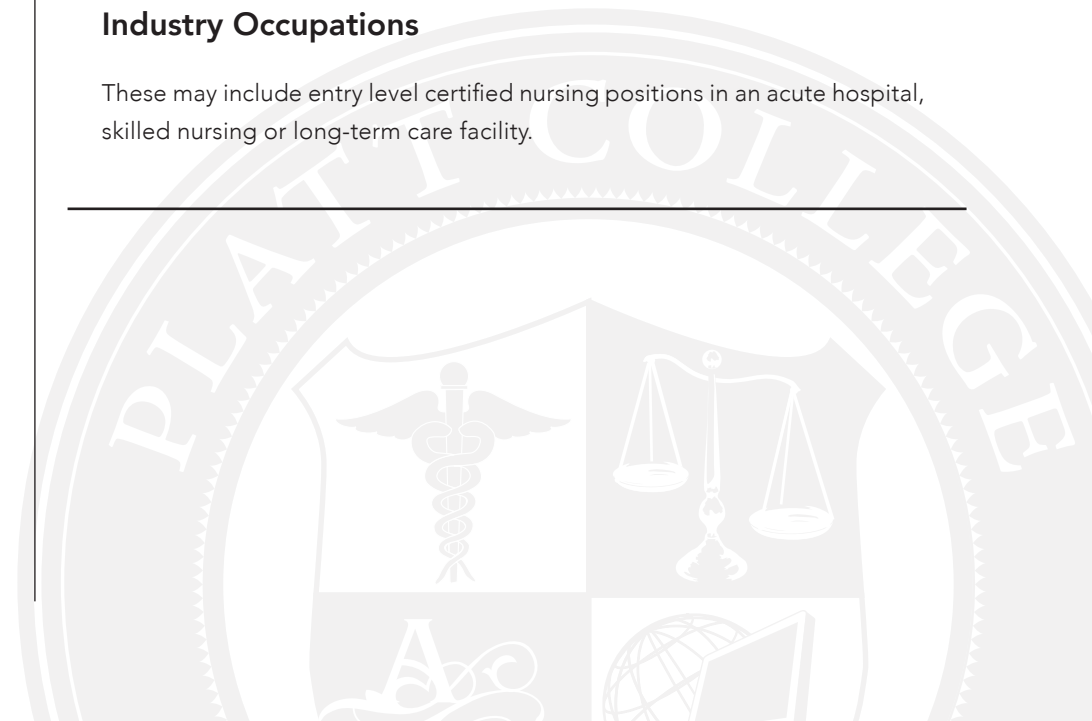

The **Certified Nurse Assistant program** provides the initial steps for entering the healthcare field. Our faculty will assist each individual in their educational efforts towards becoming a CNA.

Vocational Objective

The intent of the Certified Nurse Assistant Certificate program is to provide an enriched learning opportunity that will prepare the student for entry-level employment in the health/home care setting. Students in the Certified Nurse Assistant Certificate program will graduate with a professional knowledge, skills, and practical experience in Certified Nurse Assistant acquired during their studies at Platt College. Graduates of the Certified Nurse Assistant Certificate program will be ready for sit for their CNA license exam.

Industry Occupations

These may include entry level certified nursing positions in an acute hospital, skilled nursing or long-term care facility.

Certificate for Certified Nurse Assistant

164 Hours / Approximately 2 Months

Upon successful completion of a program of instruction, the graduate will be awarded a Certified Nurse Assistant Certificate provided all financial obligations to the school have been met. Courses in the Certificate in Certified Nurse Assistant program are pass / fail courses. To pass a course, a student must receive 70% or better.

Core Courses		Clock Hours
CNA100	Certified Nurse Assistant	164
Program Total		164

VETERINARY TECHNOLOGY

Associate of Science

Veterinary Technicians assist Veterinarians in providing medical care to animals. The Veterinary Technician is a vital part of the animal-care team, performing critical tasks that assist in diagnosis and treatment.

Samples duties include:

- Recording patient histories
- Preparing the patient for examination or surgery
- Providing vaccinations
- Administering medications
- Taking vital signs and blood samples
- Preparing tissue samples
- Expose and develop radiographs and assist with ultrasounds
- Performing laboratory procedures such as urinalysis and blood counts and taking blood samples
- Assisting in surgery
- Providing and assisting with anesthesia
- Providing post-operative care and nursing care to sick and injured animals

Veterinary technologists and technicians assisting small-animal practitioners usually care for small pets, such as cats and dogs, but can perform a variety of duties with mice, rats, sheep, pigs, cattle, monkeys, birds, fish, and frogs.

Besides working in private clinics and animal hospitals, some veterinary technicians work in research facilities under the guidance of veterinarians or physicians. In this role, they may administer medications; prepare samples for laboratory examinations, or record information on an animal's genealogy, diet, weight, medications, food intake, and clinical signs of pain and distress. Some may sterilize laboratory and surgical equipment and provide routine postoperative care.

Admissions Alert: In addition to meeting the eligibility criteria described elsewhere in this catalog, this program has additional requirements for admission which include:

- Wonderlic (BST) minimum passing score of Verbal 205, Quantitative: 215, Total Overall Minimum Score of 500
- In-person interview with the Program Director
- Submit a personal statement
- Meet minimum physical requirements

Vocational Objective

The Veterinary Technology Program at Platt College is designed to prepare graduates for competency as Veterinary Technicians. On completion of the program, graduates will be able to demonstrate comprehension of relevant information and the ability to evaluate and apply this knowledge in their role as entry-level Veterinary Technicians. They will be able to demonstrate the technical skills necessary to fulfill the role of a Veterinary Technician and will demonstrate professionalism and personal behavior consistent with medical standards and employer expectations.

Industry Occupations

Veterinary technologists and technicians work in private clinics, laboratories, and animal hospitals. Their jobs may be physically or emotionally demanding. Many work evenings, weekends, or holidays.

Associate of Science in Veterinary Technology

1,681 Hours / 115 Quarter Credit Hours / Approximately 19 months

Upon successful completion of the program of instruction, the graduate will be awarded an Associate of Science in Veterinary Technology provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0(C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Health & Fitness and Exercise Science

Associate of Science, Diploma and Avocational

The Health & Fitness and Exercise Science programs is to train students in the skills needed to sit for a national standard personal trainer certification and gain entry-level employment in the Health & Fitness field.

Health & Fitness professionals provide the guidance to help clients achieve their personal health, fitness and performance goals via the implementation of exercise programs, nutritional recommendations and suggestions in lifestyle modification. To achieve this, they perform individualized assessments, and design safe, effective and individualized exercise and conditioning programs.

Vocational Objectives

- Provide the student with the theory, skills, and clinical exposure to successfully sit for a nationally accredited personal trainer certification
- Prepare the student to gain entry-level employment as a health & fitness trainer at a fitness training facility
- Provide the student with the skills necessary to assist fitness clients in improving their health & fitness and improve fitness performance through personal training programs, including exercise routines, corrective exercise, and nutrition.

Industry Occupation

Many health and fitness trainers work in educational settings, such as colleges, universities, elementary schools, and secondary schools. Others work in hospitals, fitness centers, or physicians' offices, or for professional sports teams.

Associate of Science in Health & Fitness Trainer

1,055 Hours / 92 Quarter Credit Hours / Approximately 15 months

Upon successful completion of the program of instruction, the graduate will be awarded an Associate of Science in Health & Fitness Trainer provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0(C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Personal Fitness Trainer Cert Prep and CPR and First Aid

50 Hours / Approximately 2 months

Upon successful completion of instruction for the avocational course, the completer will be awarded a Certificate of Completion in the Avocational Course provided all financial obligations to the school have been met. The avocational courses is pass / fail courses. To pass a course, a student must receive 70% or better.

Core Courses		Clock Hours
HFT250	Certification Prep and First Aid & CPR	50
Avocational Course Total		50

Occupational Therapy Assistant

Associate of Science

An Occupational Therapy Assistant (OTA) works in collaboration with and under the supervision of an occupational therapist to support the client's health and participation in life through engagement in occupation. Occupational therapy practitioners enable clients of all ages to live life to its fullest by helping them promote health, and prevent—or live better with—injury, illness, or disability.

The occupational therapy assistant assists with assessments, implements intervention plans, and documents care. Occupational therapy assistants may work in a variety of settings including hospitals, skilled nursing facilities, assisted living facilities, public schools, early intervention programs, hospice, home healthcare, and private practice clinics. Occupational therapy assistants may assume varied roles including staff OTA, director of rehabilitation, academic faculty, and activities director. An Occupational Therapy Assistant may develop and use his skills to work in niche fields including ergonomic assessment, home modification, assistive technology, and personal wellness.

Vocational Objectives

- Provide students with the theory, knowledge, technical skills, and clinical exposure to successfully pass the National Board for Certification in Occupational Therapy (NBCOT) examination in order to become nationally Certified Occupational Therapy Assistants (COTAs) and eligible to work as entry-level practitioners.
- Ensure students have the ability to demonstrate comprehension of the necessary theory, knowledge and clinical exposure required of an occupational therapy assistant and apply this knowledge as an entry-level occupational therapy assistant.
- Teach students the necessary technical skills required of an occupational therapy assistant and ensure students are able to demonstrate the technical skills necessary to fulfill the role of an occupational therapy assistant.
- Instill in students, professionalism and personal behavior consistent with medical standards and employer expectations. Ensure students are able to demonstrate high degree of professionalism and positive personal behavior.

Industry Occupation

The state of CA requires a background check with Live Scan as part of the license application. Criminal background issues must be cleared by CBOT to obtain a CA license. Refer to CA Board of Occupational Therapy for information on applications <https://www.bot.ca.gov/applicants/application.shtml>.

Associate of Science in Occupational Therapy Assistant

1926 Hours / 131.50 Quarter Credits / Approximately 20 months

Upon successful completion of the program of instruction, the graduate will be awarded an Associate of Science in Occupational Therapy Assistant, provided all financial obligations have been met, and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and complete and sign all documentation prior to being approved for graduation.

INFORMATION TECHNOLOGY

Associate of Science in Information Technology
Diploma in Web Development Programming and Coding
Bachelor of Science in Cybersecurity

The Information Technology program is intended to provide useful job skills for graduates seeking an entry-level position in technology infrastructure design, implementation, support, or maintenance. To that end, the curriculum is broadly focused on two main areas: personal computer fundamentals (hardware, software, and operating systems), networks (hardware, software, administration, security, and implementation) .

The intent is to provide graduates with a solid grasp of information technology fundamentals as well as preparing them to contribute immediately in technical tasks such as: personal computer setup, maintenance, administration, and repair, and network implementation, administration, daily operations, security, and programming.

Vocational Objective

- Provide the student with the theory and skills to successfully pass industry-standard certification examinations.
- Prepare the student to gain entry-level employment as an Information Technology professional

Industry Occupation

Most people work in a variety of organizations and companies or various sizes.

Cybersecurity

Bachelor of Science

The Bachelor of Science in Cybersecurity program is intended to provide students with useful job skills for students seeking entry-level positions in cybersecurity or ethical hacking and penetration.

The program focuses on providing the students with the skill set and knowledge in networking, digital forensics, incident response, cybersecurity and ethical hacking. Students need to have an Associate Degree in Information Technology as part of the admissions requirements.

Vocational Objective

The Bachelor of Science in Cybersecurity will prepare students for entry-level positions in a wide variety of areas in the technology field. Upon completion of the program, students will have acquired the technical knowledge and work skills necessary to serve employers as security specialists, security consultants, ethical hacker, penetration tester, homeland security specialist, cybersecurity specialist, computer forensics technician or cybersecurity analyst.

Industry Occupation

Most people work in a variety of organizations and companies or various sizes.

Bachelor of Science in Cybersecurity (Degree Complete)

2537 Hours / 194.50 Quarter Credits / Approximately 13 months

Upon successful completion of the program of instruction, the graduate will be awarded a Bachelor of Science in Cybersecurity provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

VIII. Platt College Hybrid Programs

Platt College is approved to offer hybrid programs at each campus. Hybrid programs are programs that offer some courses onsite (campus based) and others courses are offered via the distance education setting through the Learning Management System (LMS). There are specific courses that are designated as onsite courses and others that are designated as distance education courses. The distance education courses are identified with DE in the course title (i.e. ENGDE101).

Platt College Los Angeles, LLC. is licensed to offer the following programs by means of Distance Education (DE) by the Bureau for Private Post-Secondary Education (BPPE):

- Business Management Associate of Arts
- Criminal Justice Diploma
- Criminal Justice Associate of Arts
- Diagnostic Medical Sonography Bachelor of Science
- Medical Administrative Specialist Associate of Science

All onsite courses will follow the same schedule and process as other onsite programs. All distance education courses will follow the same schedule and processes laid out below for distance education.

Distance Education Instructional Schedule:

The Distance Education environment is open 24/7. The school week is Monday through Sunday. The first week of the start may vary depending on the start date for the term. All postings and lecture material are available 24/7 via the Learning Management System, Canvas. Each faculty member will provide specific office hours that designate when they are available for questions or elaboration of material. This will be provided in addition to the two face to face sessions through the Canvas platform.

Distance Education Library

The Platt College Library / Learning Resource Center offers a comprehensive collection of resources made available to our students in various publication formats to support our academic programs. Our students have 24 hours access to our online resources on the home page of each course:

- www.lirn.net

Technology System Requirements

All distance education students will be required to have a device that supports the following technology system requirements:

- Screen Size:
 - A minimum of 1024 x 600
 - This is the average size of a netbook. If you want to view Canvas on a device with a smaller screen, you can use the Canvas mobile application. Please note that not all Canvas functions can be performed on the Canvas mobile application.
- Operating Systems:
 - Windows XP SP3 or newer
 - Mac OSX 10.6 or newer
 - Linux – ChromeOS
- Minimum Computer Speed and Processor:
 - Use of a computer greater than 5 years old is highly discouraged, use a newer computer when possible
 - 1 GB of RAM
 - 2 GHz processor
 - Internet requirements - You must have access to a minimum of 2Mbps Upload and Download bandwidth speeds. Some testing processes will not function on public networks, such as Libraries or Internet cafes. You will need to be able to have access to the internet on a private connection in testing situations. Internet hotspots or tethered cellphone connections are not supported.
- Screen readers –
 - Mac – Voice over (latest version for Safari)
 - PC – JAWS (latest version for Internet Explorer 10 & 11) or NVDA (latest version for FireFox)
 - There is no screen reader support for Canvas in Chrome
- Mobile Operating System Native App Support:
 - iOS 7 or newer
 - Android 2.3 or newer
- Students need to have access to a webcam with microphone built-in or external for a desktop or laptop. Chromebooks, tablets and cell phones are not supported.

Distance Education Resources

- **Tutoring**
Students in need of academic assistance on-line may arrange for tutoring by calling or e-mailing their instructor, Program Director, Student Services or Dean. Tutoring is by appointment. There is no cost to the student for tutoring.
- **Placement Services**
Distance Education services are supported by the Career Services Department located at the Alhambra campus, who are available via email, phone, and chat.
- **Distance Education Online Assessment**
All potential distance education students will be required to complete a Distance Education Online Assessment prior to discussing programs with an Admissions Representative. The Distance Education Online Assessment is a tool used to help the Admissions Representative better understand the technical knowledge of a student and to better assist them with educational decisions.

Hybrid Admissions Process

Admissions Process and Procedure for Business Management – Associate of Arts

1. Leads for potential students are received through various means.
2. Admissions representative contacts the potential student via telephone, text message or email.
3. Student completes the Distance Education Online Assessment Tool.
4. Admissions representative discusses Platt College, admission requirements, the distance education program and format.
 - a. Admissions requirements include proof of a GED or high school diploma.
 - b. Program information discussed is the program requirements, length of program, Wonderlic testing (entrance exam) process.
5. If student successfully passes the Wonderlic test, student is informed if they are accepted or not.

Admissions Process and Procedure for Criminal Justice – Diploma and Associate of Arts

6. Program Director interview is completed.
7. Student is informed if they are accepted or not.

Distance Education Attendance and Late Assignment Policy

For distance education courses, attendance is based on submitting assignments through Platt College's learning management system, assessments or exams, or weekly assigned discussion questions. Attendance is taken twice a week throughout a module. The first attendance period is 12:01 am Monday through 11:59 pm Wednesday, Pacific Standard Time (PST). The second attendance period is 12:01 am Thursday through 11:59 pm Sunday, Pacific Standard Time (PST). Students must submit a gradable item during each attendance period. New students are not required to post on the first day of a module start, if the module starts on a Thursday or Sunday.

A gradable item includes, but is not limited to, the posting of a threaded discussion question, submission of any course assignment through the learning management system, submission of a quiz or exam, or any other course related activity that is graded. All assignments are graded throughout the course module and the grades are posted in the learning management system where students can track their progress

throughout the module. All gradable items need to be submitted by the due date and are graded prior to the end of the grading period and will be reflected in the final grade for the course.

With the exception of the policies listed below, all of Platt College policies and procedures listed through the Academic Catalog apply to all Hybrid students.

All assignments must fully meet all requirements set by the instructor to be considered complete and submitted on time. Upon submission of a student's assignment, discussion post or other related course work, the instructor will provide feedback within 72 hours with consideration to holidays should they fall within that 72 hour.

Late assignment submittals may not be accepted depending on the course policy. As such, accepted late submittals may be subject to a reduction in grade. Late assignments submittals must be approved by the instructor and Academic Dean.

All late assignments submissions are up to the discretion of the instructor to accept them. An instructor has a right to refuse a late assignment submission for the following reasons:

- Student does not communicate with the instructor prior to the assignment deadline
- Student does not provide proper documentation of reason for assignment being late
- Student is habitually late in submitting assignments

Assignments, discussion questions and quizzes / exams are subject to the following deductions:

- 1 to 7 days late lose 10%
- 8 to 14 days late lose 25%
- 15 to 21 days late lose 50%
- 21 days or more late lose 75% or refusal of submission (up to the discretion of the instructor)

Live lecture assignments in the distance education environment are a gradable item. Students must attend and participation a minimum of 50 minutes of a 60-minute session to receive credit. It is up to the discretion of the faculty on how the points distributed.

BUSINESS MANAGEMENT

Associate of Arts

The Business Management program at Platt College is designed to provide job skills to graduates interested in working in a broad spectrum of business-related fields, including sales, marketing, operations, finance, accounting, human resources, or office administration.

The focus of our curriculum is to build essential business skills through in-depth instruction on core business functions. Key topics covered include:

- Basic accounting and bookkeeping
- Marketing and sales effectiveness
- Managing and motivating employees
- Business law
- Becoming an entrepreneur
- Application of selected business software

Vocational Objective

The Business Management program is intended to provide useful job skills for graduates seeking to start their own business, or to work in an entry-level position in a variety of industries requiring business-related skills.

Industry Occupations

Employment growth will be driven by the formation of new organizations and expansion of existing ones, which will require more workers to manage these operations.

Associate of Arts in Business Management

1000 Hours / 100 Quarter Credit Hours / Approximately 13 months

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Arts in Business Management, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C). In addition, all students must meet with Career Services and complete and sign all documentation prior to being approved for graduation.

Core Courses		Quarter Credits
BM100	Introduction to Business Management	5.0
BM105	Business Applications (documents and presentations)	5.0
BM110	Business Applications (spreadsheets and databases)	5.0
BM115	Business Math	5.0

SOCDE101	Sociology	5.0
Program Total		100.0

CRIMINAL JUSTICE

Diploma and Associate of Arts

Security is a high priority in the United States, and the need for qualified professionals in this area is greater than ever. The Bureau of Labor Statistics projects that growth in the fields of corrections, private investigation, probation, and homeland security will increase in the coming years. The challenges presented to homeland security have increased the complexity of these tasks, making the need for highly trained and prepared applicants even more important.

Platt College has developed a comprehensive curriculum in the Criminal Justice program that includes Introduction to Law & Ethics, Corrections, Private Security, Criminal Law, Criminology, Criminal Investigations/Report Writing, Psychology of Criminal Behavior, Juvenile Justice, Contemporary Issues in Criminal Justice/Terrorism, and Forensics. Students are introduced to many tasks commonly used by Criminal Justice professionals, using visual, auditory, and tactile/kinesthetic approaches.

Vocational Objective

Platt College provides each student with valuable education and highly marketable skills. The Criminal Justice program will provide students with a broad understanding of the criminal justice system, and prepare them for entry-level positions in private security, investigations, corrections, probation, and other related fields.

Industry Occupations

The field of criminal justice offers some very exciting and rewarding career opportunities. With new breakthroughs in forensic technology and an ever evolving domestic and international criminal justice landscape, it's almost a guarantee a career as a law enforcement or criminal justice professional will be anything but boring. There is an ever-expanding list of criminal justice and law enforcement career opportunities that welcome individuals with diverse educational and professional backgrounds. Whether you're interested in criminology, psychology, political science, social work, engineering, forensics, chemistry, law or even accounting, you'll find a criminal justice career suited to your interests and skill set.

Diploma in Criminal Justice

900 Hours / 78 Quarter Credits / Approximately 11 months

Upon successful completion of the program of instruction, the graduate will be awarded a Diploma in Criminal Justice, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and complete and sign all documentation prior to being approved for graduation.

Core Courses		Quarter Credits
LAW101	Introduction to Law	4.0
CJ140	Introduction to Report Writing	4.5
CJ145	Corrections 1	4.5
CJ155	Private Security 1	4.5
CJ165	Introduction to Criminal Law	4.5

DIAGNOSTIC MEDICAL SONOGRAPHY

Bachelor of Science

Diagnostic Medical Sonography is the process of using high frequency sound to create images of specific areas of the body.

The scope of practice includes those procedures, acts and processes permitted by law, for which the individual has received education and clinical experience, has demonstrated competency, and has completed the appropriate credentialing. A properly trained Diagnostic Medical Sonographer must have knowledge of anatomy, patient care, and pathology, as well as the skills to manipulate a variety of sophisticated instruments.

Vocational Objective

The Diagnostic Medical Sonography program is designed to prepare students for entry-level employment as Diagnostic Medical Sonographers in a clinical setting. The program includes both didactic and clinical components. Coursework includes use of Sonography relevant to gynecology, obstetrics, abdominal subjects, superficial structures and vascular applications. Clinical experience is completed when students' extern in an affiliated medical center, physicians' office, or medical clinic, under direct supervision. During the externship component students will be evaluated on critical thinking in a clinical setting, effective communication, problem solving skills, and other clinical tasks.

The Health Care Management specialization introduces students to the management of organizations in the healthcare setting, and is designed to help students:

- Gain familiarity with the U.S. healthcare system
- Improve communication, analytical, problem-solving, and critical thinking skills
- Develop a solid foundation in business fundamentals

Upon successful completion of the program, graduates will be prepared to sit for the Sonography Principles and Instrumentation exam (SPI) and Abdomen/OBGYN portion of the American Registry of Diagnostic Medical Sonographers (ARDMS) certification examination for Diagnostic Medical Sonographers.

NOTE: At the time of this writing, ARDMS certification is voluntary and not required for employment in the state of California as a Diagnostic Medical Sonographer. Testing eligibility is at the sole discretion of ARDMS. Applicants are strongly encouraged to check with ARDMS (www.ardms.org) for the latest requirements.

Industry Occupations

Most diagnostic medical sonographers and cardiovascular technologists and technicians, including vascular technologists, work full time. Most others worked in physician's offices and medical and diagnostic laboratories.

Bachelor of Science in Diagnostic Medical Sonography – Health Care Management

2740 Hours / 178 Quarter Credit Hours / Approximately 27 months

Upon successful completion of the program of instruction, the graduate will be awarded a Bachelor of Science degree in Diagnostic Medical Sonography, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Medical Administrative Specialist

Associate of Science

Medical Administrative Specialists perform a variety of tasks necessary to running a smooth, effective medical office. These individuals focus on many administrative procedures of medical offices, outpatient clinics, hospitals, and other health care facilities.

Some of these skills include billing, coding, scheduling, transcription, office finance, human resources and computer skills. Medical Administrative Specialist students will learn the skills that may lead to becoming an office manager in a clinical setting.

Vocational Objective

The intent of the Medical Administrative Specialist programs is to provide an enriched learning opportunity that will prepare the student for entry-level employment in the health care industry. Students in the Medical Administrative Specialist programs will graduate with a professional knowledge, skills, and practical experience in the health services field acquired during their studies at Platt College. Employment opportunities open to the graduates of the Medical Administrative Specialist programs include: Medical Administrative Assistant, Podiatric Medical Administrative Assistant, and Ophthalmic Medical Administrative Assistant. Industries that will be interested in these graduates include, but are not limited to, ambulatory settings such as medical offices, clinics, nursing homes, medical supply companies, home health agencies, insurance companies, pharmaceutical companies.

Industry Occupations

Perform secretarial duties using specific knowledge of medical terminology and hospital, clinic, or laboratory procedures. Duties may include scheduling appointments, billing patients, and compiling and recording medical charts, reports, and correspondence.

Associate of Science in Medical Administrative Specialist

1210 Hours / 90 Quarter Credit Hours / Approximately 15 months

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Science; Medical Administrative Specialist provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

VIII. Platt College Distance Education (DE)

Platt College offers its distance education program through its Alhambra Campus. Platt College – Alhambra Distance Education program is licensed to offer the following programs by means of Distance Education (DE) by the Bureau for Private Post-Secondary Education (BPPE):

- Certificate in Veterinary Technology Alternate Route - DE
- Associate of Science in Veterinary Technology - DE
- Bachelor of Science in Respiratory Therapy (Degree Completion) – DE
- Bachelor of Arts in Criminal Justice - DE
- Bachelor of Arts in Business Management – DE
 - Business Management Concentration
 - Project Management Concentration
 - Accounting and Finance Concentration
- Bachelor of Science in Cybersecurity - DE

Platt College – Alhambra Distance Education programs are available for student enrollment in the following states:

- Arizona
- California
- Colorado
- Florida
- Idaho
- Massachusetts
- Nevada
- Utah
- Virginia

If a student relocates to a state that Platt College is not licensed or accredited in, the student will be dropped from the program.

Distance Education Instructional Schedule:

The Distance Education environment is open 24/7. The school week is Monday through Sunday. The first week of the start may vary depending on the start date for the term. All postings and lecture material are available 24/7 via the Learning Management System, Canvas. Each faculty member will provide specific office hours that designate when they are available for questions or elaboration of material. This will be provided in addition to the two face to face sessions through the Canvas platform.

Distance Education Library

The Platt College Library / Learning Resource Center offers a comprehensive collection of resources made available to our students in various publication formats to support our academic programs. Our students have 24 hours access to our online resources on the home page of each course:

- www.lirn.net

Technology System Requirements

All distance education students will be required to have a device that supports the following technology system requirements:

- Screen Size:
 - A minimum of 1024 x 600
 - This is the average size of a netbook. If you want to view Canvas on a device with a smaller screen, you can use the Canvas mobile application. Please note that not all Canvas functions can be performed on the Canvas mobile application.
- Operating Systems:
 - Windows XP SP3 or newer
 - Mac OSX 10.6 or newer
 - Linux – ChromeOS

- **Minimum Computer Speed and Processor:**
 - o Use of a computer greater than 5 years old is highly discouraged, use a newer computer when possible
 - o 1 GB of RAM
 - o 2 GHz processor
 - o Internet requirements - You must have access to a minimum of 2Mbps Upload and Download bandwidth speeds. Some testing processes will not function on public networks, such as Libraries or Internet cafes. You will need to be able to have access to the internet on a private connection in testing situations. Internet hotspots or tethered cellphone connections are not supported.
 - o Screen readers –
 - Mac – Voice over (latest version for Safari)
 - PC – JAWS (latest version for Internet Explorer 10 & 11) or NVDA (latest version for FireFox)
 - There is no screen reader support for Canvas in Chrome
- **Mobile Operating System Native App Support:**
 - o iOS 7 or newer
 - o Android 2.3 or newer
- Students need to have access to a webcam with microphone built-in or external for a desktop or laptop. Chromebooks, tablets and cell phones are not supported.

Distance Education Resources

- **Tutoring**

Students in need of academic assistance on-line may arrange for tutoring by calling or e-mailing their instructor, Program Director, Student Services or Dean. Tutoring is by appointment. There is no cost to the student for tutoring.

- **Placement Services**

Distance Education services are supported by the Career Services Department located at the Alhambra campus, who are available via email, phone, and chat.

- **Distance Education Online Assessment**

All potential distance education students will be required to complete a Distance Education Online Assessment prior to discussing programs with an Admissions Representative. The Distance Education Online Assessment is a tool used to help the Admissions Representative better understand the technical knowledge of a student and to better assist them with educational decisions.

Distance Education Admissions Process

Admissions Process and Procedure for Veterinary Technology – Associates of Science

6. Leads for potential students are received through various means.
7. Admissions representative contacts the potential student via telephone, text message or email.
8. Student completes the Distance Education Online Assessment Tool.
9. Admissions representative discusses Platt College, admission requirements, the distance education program and format, and program.
 - a. Admissions requirements include proof of a GED or high school diploma.
 - b. Program information discussed is the program requirements, length of program, Wonderlic testing (entrance exam) process, essay requirements, and Program Director interview.
10. If student successfully passes the Wonderlic test, they are then scheduled for the Program Director interview and provided information for submitting the essay.
11. Program Director interview is completed.
12. Student is informed if they are accepted or not.

Admissions Process and Procedure for Veterinary Technician Alternate Route – Certificate

1. Leads for potential students are received through various means.
2. Admissions representative contacts the potential student via telephone, text message or email.
3. Student completes the Distance Education Online Assessment Tool.
4. Admissions representative discusses Platt College, admission requirements, the distance education program and format.
 - a. Admission requirements include proof that they are employed in the field and have a GED or high school diploma.
 - b. Program information discussed is the program requirements, length of program, admission requirements.

Admissions Process and Procedure for Respiratory Therapy – Bachelor of Science (degree completion)

8. Leads for potential students are received through various means.
9. Admissions representative contacts the potential student via telephone, text message or email.
10. Student completes the Distance Education Online Assessment Tool.
11. Admissions representative discusses Platt College, admission requirements, the distance education program and format.
 - a. Admission Requirements include an associate degree in respiratory therapy and proof of CRT / NBRCT exam passing rates.
 - b. Program information discussed is the program requirements, length of program, Wonderlic testing (entrance exam) process, essay requirements, and Program Director interview.
12. If student successfully passes the Wonderlic test, they are then scheduled for the Program Director interview and provided information for submitting the essay.
13. Program Director interview is completed.
14. Student is informed if they are accepted or not.

Admissions Process and Procedure for Criminal Justice – Bachelor of Arts

1. Leads for potential students are received through various means.
2. Admissions representative contacts the potential student via telephone, text message or email.
3. Student completes the Distance Education Online Assessment Tool.
4. Admissions representative discusses Platt College, admission requirements, the distance education program and format.
 - a. Admission Requirements include an associate degree in the health care field.
 - b. Program information discussed is the program requirements, length of program, Wonderlic testing (entrance exam) process, essay requirements, and Program Director or Academic Dean interview.
5. If student successfully passes the Wonderlic test (with a score of 500 or greater).
6. Student is informed if they are accepted or not.

Admissions Process and Procedure for Business Management (all concentrations) – Bachelor of Arts

1. Leads for potential students are received through various means.
2. Admissions representative contacts the potential student via telephone, text message or email.
3. Student completes the Distance Education Online Assessment Tool.
4. Admissions representative discusses Platt College, admission requirements, the distance education program and format.
 - a. Admission Requirements include an associate degree in the health care field.
 - b. Program information discussed is the program requirements, length of program, Wonderlic testing (entrance exam) process, essay requirements, and Program Director or Academic Dean interview.
5. If student successfully passes the Wonderlic test.
6. Student is informed if they are accepted or not.

Distance Education Attendance and Late Assignment Policy

For distance education courses, attendance is based on submitting assignments through Platt College's learning management system, assessments or exams, or weekly assigned discussion questions. Attendance is taken twice a week throughout a module. The first attendance period is 12:01 am Monday through 11:59 pm Wednesday, Pacific Standard Time (PST). The second attendance period is 12:01 am Thursday through 11:59 pm Sunday, Pacific Standard Time (PST). Students must submit a gradable item during each attendance period. New students are not required to post on the first day of a module start if the module starts on a Thursday or Sunday.

A gradable item includes, but is not limited to, the posting of a threaded discussion question, submission of any course assignment through the learning management system, submission of a quiz or exam, or any other course related activity that is graded. All assignments are graded throughout the course module and the grades are posted in the learning management system where students can track their progress throughout the module. All gradable items need to be submitted by the due date and are graded prior to the end of the grading period and will be reflected in the final grade for the course.

With the exception of the policies listed below, all of Platt College policies and procedures listed through the Academic Catalog apply to all Distance Education students.

All assignments must fully meet all requirements set by the instructor to be considered complete and submitted on time. Upon submission of a student's assignment, discussion post or other related course work, the instructor will provide feedback within 72 hours with consideration to holidays should they fall within that 72 hour.

Late assignment submittals may not be accepted depending on the course policy. As such, accepted late submittals may be subject to a reduction in grade. Late assignments submittals must be approved by the instructor and Academic Dean.

All late assignments submissions are up to the discretion of the instructor to accept them. An instructor has a right to refuse a late assignment submission for the following reasons:

- Student does not communicate with the instructor prior to the assignment deadline
- Student does not provide proper documentation of reason for assignment being late
- Student is habitually late in submitting assignments

Assignments, discussion questions and quizzes / exams are subject to the following deductions:

- 1 to 7 days late lose 10%
- 8 to 14 days late lose 25%
- 15 to 21 days late lose 50%
- 21 days or more late lose 75% or refusal of submission (up to the discretion of the instructor)

Live lecture assignments in the distance education environment are a gradable item. Students must attend and participate a minimum of 50 minutes of a 60 minutes session to receive credit. It is up to the discretion of the faculty on how the points are distributed.

Veterinary Technology DE

Alternate Route Associate of Science

Veterinary Technicians assist Veterinarians in providing medical care to animals. The Veterinary Technician is a vital part of the animal-care team, performing critical tasks that assist in diagnosis and treatment. Samples duties include:

- Recording patient histories
- Preparing the patient for examination or surgery
- Providing vaccinations
- Administering medications
- Taking vital signs and blood samples
- Preparing tissue samples
- Expose and develop radiographs and assist with ultrasounds
- Performing laboratory procedures such as urinalysis and blood counts and taking blood samples
- Assisting in surgery
- Providing and assisting with anesthesia
- Providing post-operative care and nursing care to sick and injured animals

Veterinary technologists and technicians assisting small-animal practitioners usually care for small pets, such as cats and dogs, but can perform a variety of duties with mice, rats, sheep, pigs, cattle, monkeys, birds, fish, and frogs.

Besides working in private clinics and animal hospitals, some veterinary technicians work in research facilities under the guidance of veterinarians or physicians. In this role, they may administer medications; prepare samples for laboratory examinations, or record information on an animal's genealogy, diet, weight, medications, food intake, and clinical signs of pain and distress. Some may sterilize laboratory and surgical equipment and provide routine postoperative care.

Admissions Alert: In addition to meeting the eligibility criteria described elsewhere in this catalog, this program has additional requirements for admission which include:

- Wonderlic (BST) minimum passing score of Verbal 205, Quantitative: 215, Total Overall Minimum Score of 500
- Interview with the Program Director
- Submit a personal statement
- Meet minimum physical requirements

Vocational Objective

The Veterinary Technology DE Program at Platt College is designed to prepare graduates for competency as entry-level Veterinary Technicians. On completion of the program, graduates will be able to demonstrate comprehension of relevant information and the ability to evaluate and apply this knowledge in their role as Veterinary Technicians. They will be able to demonstrate the technical skills necessary to fulfill the role of a Veterinary Technician and will demonstrate professionalism and personal behavior consistent with medical standards and employer expectations.

Industry Occupation

Veterinary technologists and technicians work in private clinics, laboratories, and animal hospitals. Their jobs may be physically or emotionally demanding. Many work evenings, weekends, or holidays.

Certificate in Veterinary Technician Alternate Route DE

325 Hours / Approximately 6 months

Upon successful completion of the program of instruction, the graduate will be awarded a Veterinary Technician Certificate DE provided all financial obligations to the school have been met. Courses in the Certificate in Veterinary Technician Alternate Route DE program are pass / fail courses. To pass a course, a student must receive 70% or better.

Core Courses		Clock Hours
VTARDE101	Basic Sciences, Terminology and Calculations for Veterinary Technicians	65
VTARDE102	Dentistry and Pharmacology for Veterinary Technicians	65
VTARDE103	Surgical Nursing and Anesthesia	65
VTARDE104	Small and Large Animal Nursing, Pathology	65
VTARDE105	Emergency/Critical Care Nursing and License Exam Preparation for Veterinary Technicians	65
Program Total		325

Associate of Science in Veterinary Technology DE

1,675 Hours / 125 Quarter Credit Hours / Approximately 19 months

Upon successful completion of the program of instruction, the graduate will be awarded an Associate of Science in Veterinary Technology provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0(C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Core Courses		Quarter Credits
VTDE101	Introduction to Veterinary Technology	4.0
VTDE102	Veterinary Medical Terminology and Calculations	4.5
VTDE103	Veterinary Anatomy & Physiology I	4.0
VTDE104B	Veterinary Anatomy & Physiology II / III	6.0

RESPIRATORY THERAPY

Bachelor of Science (Degree Complete)

The Bachelor of Science in Respiratory Therapy is designed for applicants with an Academic Associate degree or above in Respiratory Therapy.

Respiratory Therapy or Respiratory Care is the treatment, management, control, diagnostic evaluation, and care of patients with deficiencies or abnormalities of the cardiopulmonary system, such as bronchitis, asthma, emphysema, and other forms of obstructive and restrictive diseases.

Respiratory Therapy or Respiratory Care is the treatment, management, control, diagnostic evaluation, and care of patients with deficiencies or abnormalities of the cardiopulmonary system, such as bronchitis, asthma, emphysema, and other forms of obstructive and restrictive diseases. The Respiratory Care Practitioner is a vital part of the medical team. They are among the first persons called to give treatment and care in emergency situations. Practicing under the direction of a physician, respiratory therapists assume primary responsibility for all respiratory therapeutic and diagnostic procedures. They evaluate and treat all types of patients, ranging from premature infants whose lungs are not fully developed to elderly people whose lungs are diseased. In clinical practice, many of their daily duties include:

Assessing lung and breathing disorders and recommending treatment methods; interviewing patients and doing chest physical exams; obtaining sputum specimens for analysis; drawing and analyzing arterial blood specimens; performing pulmonary function tests; providing complex therapy requiring considerable independent judgment such as managing ventilators and artificial airway devices; giving emergency care to patients who are victims of a heart attack, stroke, drowning, or shock; and educating patients and families about lung disease.

Respiratory Therapists are experts in aiding the breathing process through the use of oxygen and medical gases, humidifiers, aerosols, ventilators/life support systems, chest physiotherapy, cardiopulmonary resuscitation, and artificial airways. They maintain, assemble, sterilize, and test all medical and auxiliary equipment in these functions. Respiratory Care Practitioners work with patients in the hospital surgical and medical wards, emergency rooms, outpatient department, intensive care units, neonatal nursery, and skilled nursing facilities and in-home care.

Admissions Alert: In addition to meeting the eligibility criteria described elsewhere in this catalog, this program has additional requirements for admission which include:

- Associates degree in Respiratory Therapy
- Currently licensed to practice Respiratory Therapy
- In-person interview with the Program Director
- Submit a personal statement (essay questions)
- Submit transcripts and GPA from previous educational experiences

Vocational Objective

Upon successful completion of the program, graduates may be employed as Respiratory Care Practitioners in acute care hospitals in areas such as: intensive care units, emergency rooms, newborn & pediatric units, and operating rooms. Nursing care facilities, doctor's offices, pulmonary rehabilitation facilities, home health care services, smoking cessation programs, asthma education programs, sales, and air transport are some of the areas of employment available to our graduates.

The Respiratory Therapy Bachelor's degree completion program is designed to prepare the practicing Respiratory Therapist for advancement into a supervisory or management position in the health-care field.

Industry Occupation

Most respiratory therapists work in hospitals.

Bachelor of Science in Respiratory Therapy DE (Degree Complete)

1110 Hours / 93 Quarter Credit Hours / Approximately 15 months

Upon successful completion of the program of instruction, the graduate will be awarded a Bachelor of Science in Respiratory Therapy degree provided that all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

CRIMINAL JUSTICE

Bachelors of Arts

Security is a high priority in the United States, and the need for qualified professionals in this area is greater than ever. The Bureau of Labor Statistics projects that growth in the fields of corrections, private investigation, probation, and homeland security will increase in the coming years. The challenges presented to homeland security have increased the complexity of these tasks, making the need for highly-trained and prepared applicants even more important.

Platt College has developed a comprehensive curriculum in the Criminal Justice program that includes Introduction to Law & Ethics, Corrections, Private Security, Criminal Law, Criminology, Criminal Investigations/Report Writing, Psychology of Criminal Behavior, Juvenile Justice, Contemporary Issues in Criminal Justice/Terrorism, and Forensics. Students are introduced to many tasks commonly used by Criminal Justice professionals, using visual, auditory, and tactile/kinesthetic approaches.

Vocational Objective

Platt College provides each student with valuable education and highly marketable skills. The Criminal Justice program will provide students with a broad understanding of the criminal justice system, and prepare them for entry-level positions in private security, investigations, corrections, probation, and other related fields.

Industry Occupations

The field of criminal justice offers some very exciting and rewarding career opportunities. With new breakthroughs in forensic technology and an ever evolving domestic and international criminal justice landscape, it's almost a guarantee a career as a law enforcement or criminal justice professional will be anything but boring. There is an ever-expanding list of criminal justice and law enforcement career opportunities that welcome individuals with diverse educational and professional backgrounds. Whether you're interested in criminology, psychology, political science, social work, engineering, forensics, chemistry, law or even accounting, you'll find a criminal justice career suited to your interests and skill set.

Bachelor of Arts in Criminal Justice DE

2350 Hours / 214 Quarter Credit Hours / Approximately 30 months

Upon successful completion of a program of instruction, the graduate will be awarded a Bachelor of Arts degree in Criminal Justice, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C). In addition, all students must meet with Career Services and complete and sign all documentation prior to being approved for graduation.

Cybersecurity DE

Bachelor of Science (Degree Complete)

The Bachelor of Science in Cybersecurity DE program is intended to provide students with useful job skills for students seeking entry-level positions in cybersecurity or ethical hacking and penetration.

The program focuses on providing the students with the skill set and knowledge in networking, digital forensics, incident response, cybersecurity and ethical hacking. Students need to have an Associate Degree in Information Technology as part of the admissions requirements.

Vocational Objective

The Bachelor of Science in Cybersecurity DE will prepare students for entry-level positions in a wide variety of areas in the technology field. Upon completion of the program, students will have acquired the technical knowledge and work skills necessary to serve employers as security specialists, security consultants, ethical hacker, penetration tester, homeland security specialist, cybersecurity specialist, computer forensics technician or cybersecurity analyst.

Industry Occupation

Most people work in a variety of organizations and companies or various sizes.

Bachelor of Science in Cybersecurity DE (Degree Complete)

2537 Hours / 194.50 Quarter Credits / Approximately 13 months

IX. Academics and Student Services

Graduation Requirements

In Platt College's effort to provide students a balanced program of instruction, it allows for students to take a program that best fits their needs. The following is a list of programs and terminology that is associated with them in order to help students accomplish their educational goals.

- **Bachelor of Science Degree = BS Degree**
- **Bachelor of Arts Degree = BA Degree**
- **Associate of Science Degree = AS Degree**
- **Associate of Arts Degree = AA Degree**
- **Diploma = Short Program that is TIV / financial aid eligible**
- **Certificate = Short Program non – TIV / financial aid eligible**

Upon successful completion of their program of instruction, the graduate will be awarded one of the following documents of completion, provided all financial obligations to the school have been met. To graduate, a student must meet all attendance requirements and attain a minimum cumulative grade point average as required by their specific program. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all pre-graduation documentation prior to being approved for graduation.

SCHOOL OF GRAPHIC DESIGN:

(For Graphic Design, and Visual Communication programs, a professional-quality portfolio must be presented, reviewed, and approved by a committee appointed by the Dean of Academics or designee.)

Diploma in Graphic Design

(Note: This program is only offered at Platt's Ontario campus)
 950 Hours / 66.5 Quarter Credit Hours (Approximately 13 months)

Associate of Arts Degree in Graphic Design

1200 Hours/91.5 Quarter Credit Hours (Approximately 15 months)

Bachelor of Arts in Visual Communication - 2D Print Specialization

2500 Hours / 189 Quarter Credit Hours (Approximately 31 months)

- 2D Print Specialization

SCHOOL OF BUSINESS AND LEGAL STUDIES:

Diploma in Criminal Justice

900 Hours / 78 Quarter Credits (Approximately 11 months)

Diploma in Criminal Justice (Hybrid)

900 Hours / 78 Quarter Credits (Approximately 11 months)

Associate of Arts in Criminal Justice

1150 Hours / 103 Quarter Credit Hours (Approximately 15 months)

Associate of Arts in Criminal Justice (Hybrid)

1150 Hours / 103 Quarter Credit Hours (Approximately 15 months)

Bachelors of Arts in Criminal Justice

2350 Hours / 214 Quarter Credit Hours (Approximately 30 months)

Bachelors of Arts in Criminal Justice DE

2350 Hours / 214 Quarter Credit Hours (Approximately 30 months)

Diploma in Business Management Program

750 Hours / 75 Quarter Credit Hours / Approximately 10 months

Associate of Arts in Business Management Program

1000 Hours / 100 Quarter Credit Hours / Approximately 13 months

Associate of Arts in Business Management Program (Hybrid)

1000 Hours / 100 Quarter Credit Hours / Approximately 13 months

Bachelor of Arts in Business Management Degree Program

2000 Hours / 200 Quarter Credits / Approximately 25 months

- Business Management Concentration
- Accounting and Finance Concentration
- Project Management Concentration

Bachelor of Arts in Business Management DE Degree Program

- Business Management Concentration
- Accounting and Finance Concentration
- Project Management Concentration

SCHOOL OF MEDICAL SCIENCES:

Bachelor of Arts in Health Care Management (Degree Complete)

1200 Hours / 100 Quarter Credit Hours (Approximately 15 months)

Associate of Science in Respiratory Therapy Degree

1995 Hours / 135 Quarter Credit Hours (Approximately 20 months)

Bachelor of Science in Respiratory Therapy DE (Degree Complete)

1110 Hours / 93 Quarter Credit Hours (Approximately 15 months)

Associate of Science in Diagnostic Medical Sonography

2060 Hours / 120 Quarter Credit Hours (Approximately 18 months)

Bachelor of Science in Diagnostic Medical Sonography Health Care Management

2740 Hours / 178 Quarter Credits (Approximately 27 months)

Bachelor of Science in Diagnostic Medical Sonography Health Care Management (Hybrid)

2740 Hours / 178 Quarter Credits (Approximately 27 months)

Associate of Science in Medical Assisting

1260 Hours / 95 Quarter Credit Hours (Approximately 15 months)

Associate of Science in Medical Administrative Specialist

1210 Hours / 90 Quarter Credit Hours (Approximately 15 months)

Associate of Science in Medical Administrative Specialist (Hybrid)

1210 Hours / 90 Quarter Credit Hours (Approximately 15 months)

Personal Fitness Trainer Cert Prep and CPR and First Aid

50 Hours / Approximately 2 months

Diploma in Exercise Science Program Information

605 Hours / 49.5 Quarter Credit Hours / Approximately 8 months

Associate of Science in Health & Fitness Trainer

1,055 Hours / 92 Quarter Credit Hours (Approximately 15 months)

Certificate in Hemodialysis

296 Clock Hours (Approximately 3 months)

Certificate for Certified Nurse Assistant

164 Hours / Approximately 2 Months

Associate of Science in Veterinary Technology Degree

1681 Hours / 115 Quarter Credit Hours (Approximately 19 months)

Associate of Science in Veterinary Technology DE Degree

1675 Hours / 125 Quarter Credit Hours (Approximately 19 months)

Certificate in Veterinary Technician Alternate Route DE

325 Clock Hours (Approximately 6 months)

Diploma in Vocational Nursing (Full-time program)

1613 Hours / 101.5 Quarter Credit Hours (Approximately 15 months)

Diploma in Vocational Nursing (Part-time program)

1613 Hours / 101.5 Quarter Credit Hours (Approximately 30 months)

Associate of Science in Vocational Nursing (Full-time program)

1843 Hours / 124.5 Quarter Credit Hours (Approximately 33 months)

Associate of Science in Occupational Therapy Assistant

1926 Hours / 131.50 Quarter Credits / Approximately 20 months

SCHOOL OF INFORMATION TECHNOLOGY:

Associate of Science in Information Technology

1,200 Hours / 110.50 Quarter Credit Hours (Approximately 15 months)

Diploma in Web Development Programming and Coding

600 Hours (Approximately 7 months)

Bachelor of Science in Cybersecurity

2537 Hours / 194.50 Quarter Credits / Approximately 13 months

Bachelor of Science in Cybersecurity DE

2537 Hours / 194.50 Quarter Credits / Approximately 13 months

General Information

Facilities: In the Los Angeles area, all courses are taught at 1000 South Fremont Ave, Building A9-W, Alhambra, CA 91803. In Ontario, all courses are taught at 3700 Inland Empire Boulevard, Ontario, CA 91764. In Riverside, all courses are taught at 6465 Sycamore Canyon Blvd, Riverside, CA 92507. In Anaheim, all courses are taught at 1400 S Douglass Road, Suite 125, Anaheim, CA 92806.

The Los Angeles Campus occupies approximately 32,000 square feet on four floors in Building A-9 West at The Alhambra, a beautiful campus-like setting consisting of classic brick buildings built around a central courtyard landscaped with lush gardens and serene fountains. The Ontario Campus occupies 41,000 square feet in a one-story professional business park just north of the Ontario International Airport. The campus partially encircles a beautiful indoor atrium accessible to students, and is convenient to shopping, dining, and public transportation. The Riverside Campus occupies 31,000 square feet in modern two-story building in a professional business park. The beautifully constructed, LEED certified building contains a dramatic fountain-centered lobby and glass throughout. The Anaheim Campus occupies 55,000 square feet. The modern facility has classrooms, computer, design, and medical labs, library, student lounge and administrative space.

Each campus includes classrooms, a library/learning resource center, offices, and other learning resources. The maximum number of students in a classroom, studio, or computer laboratory is 35. School equipment is typical of that used in the industry. Computers, servers, scanners, printers, drafting tables, and other peripheral equipment are in place and available for student use.

Student Records: Current official academic student files are maintained in fire-proof file cabinets or stored in rooms equipped with sprinklers. Platt College maintains all files on-site for a period of at least five years from the last date of attendance. Student transcripts and enrollment agreements are maintained permanently. Students should report a change of address or name change to the registrar immediately as they occur. It is important that students keep the college informed of any change of address during the course of their enrollment as well as after graduation.

Events: Platt College hosts various events throughout the year for its students. Students have the opportunity to participate in career fairs, symposiums, lecture series, and museum visits. Students receive information from successful businesspeople who address important issues concerning graphic design, multimedia, information technology networking, and health care careers.

Community Services: Platt College students are committed to helping the community. Many of our programs incorporate community service into the curriculum. Platt College believes that students who participate in community outreach benefit personally from the experience and are more attractive to employers.

Library / Learning Resource Center: The Platt College Library/Learning Resource Center offers a comprehensive collection of resources made available to our students in various publication formats (books, periodicals, etc.) to support our academic programs. Our campus information resources are available to students during class times and normal business hours, along with 24-hour access to our online resources. Borrowing privileges are available to all students interested in checking out circulating materials.

Scholarship Opportunities: Platt College participates in several scholarship opportunities for academically excellent students. For current scholarship information and applications, contact the financial aid department.

Advice and Guidance: Platt College attempts to develop close communication between the students and Administration. Students should feel free to contact the administrative staff for certain personal, vocational, and academic guidance. Platt College does not provide any form of psychological counseling but can confidentially refer students to appropriate agencies and/or providers, upon request.

Housing: Platt College does not assume responsibility for student housing, does not have dormitory facilities under its control, nor offers student housing assistance. According to rentals.com for Alhambra, CA rental properties start at approximately \$1400.00 per month. According to rentals.com for Ontario, CA rental properties start at approximately \$1200.00 per month. According to rentals.com for Riverside, CA rental properties start at approximately \$1000.00 per month. According to rentals.com for Anaheim, CA rental properties start at approximately \$1400.00 per month.

Termination: Students may be terminated for violation of any provision cited within this catalog or the Annual Security Report including failure to meet financial obligations to the school, or violations of the Student Code of Conduct and/or Program guidelines. Platt College reserves the right to terminate for other non-discriminatory reasons, such as noncompliance with satisfactory academic progress policies and excessive absences.

Students are responsible for all of the information contained in the college catalog, in the Student and Employee Consumer Handbook, and Program policies and guidelines as applicable.

Revisions: Except as expressly provided in California Education Code Section 94898, Platt College reserves the right to modify policies, course schedules, curricula or courses within reason due to exigent circumstances, program upgrades and/or content changes, and to cancel programs of study, modes of delivery, upcoming start dates or individual courses as it deems necessary. If a course or program is cancelled, the school may schedule course completion at a later date or refund all monies paid for the cancelled course or program if the student does not wish to continue with the program at the later date. All Platt College programs are not available at all locations, please see an Admissions Representative for more information on specific enrollment information.

Academic Information and Policies

Instructional Schedule: Training is offered Monday through Sunday for morning, afternoon, and evening classes according to the campus location and program.

Definition of a Unit or Credit: Platt College measures student progress in quarter credit hours. The definition of a quarter credit hour is as follows:

One quarter credit hour equals 30 units comprised of the following academic activities:

- One clock hour in a didactic learning environment = 2 units
- One clock hour in a supervised laboratory setting of instruction = 1.5 units
- One hour of externship = 1 unit
- One hour of out-of-class work and/or preparation for the didactic learning environment or supervised laboratory setting of instruction that are designed to measure the student's achieved competency relative to the required subject matter objectives = 0.5 unit

Satisfactory Academic Progress: To maintain satisfactory academic progress toward a degree, diploma, or certificate, a student must maintain a specified grade point average and proceed through the program at a specified minimum pace. For determining satisfactory academic progress (SAP), the programs are divided into ten (10) week terms or evaluation periods. Each term is comprised of two (2) five-week modules.

Students who are at risk for not meeting SAP requirements that are eligible to recover their CGPA and/or completion rates will be required to follow the same process for advising and appealing. This includes students classified as Veteran's Administration (VA) and/or Non-Title IV eligible students eligible to recover their CGPA and/or completion rates.

At the end of each term or evaluation period, the student's cumulative grade point average (CGPA) will be determined. The student must achieve the minimum CGPA during each term or evaluation period. See chart below:

Evaluation Period	CGPA Must Be
First Term	1.5
2 Term (and beyond)	2.0

Passing grades may vary by program, however, and students enrolled in the Veterinary Technology, Diagnostic Medical Sonography, Respiratory Therapy, or Vocational Nursing programs must consult their program Handbooks for further information.

If the students' CGPA falls below the levels specified in the chart above, he or she will be placed on Academic Warning after the completed term in which the student fell below the required CGPA. Platt College shall notify the student that he or she is placed on Academic Warning but is still eligible to receive Federal Financial Aid. If the student does not meet SAP in the following consecutive term, the student will be placed on Academic Probation, and informed that he or she has lost eligibility for Federal Financial Aid and will be terminated from the program. A student has the right to appeal the Academic Probation (SAP decision), but only within 30 days of the final posting of grades following the term in which the student failed to meet the specified grade point average. If the student's Academic Appeal is approved by the Academic Dean, the student may continue to receive Federal Financial Aid for the next consecutive term. If the student doesn't meet the CGPA for the third consecutive term, the student will be terminated from the program.

See the following hypothetical situations:

Hypothetical Situations Concerning Satisfactory Academic Progress

Hypothetical Situation #1:

Term or Evaluation Period	Student's CGPA at End of Term or Evaluation Period	Result
08.05.21 to 10.14.21 (10-week period)	1.3	Student status changed to Academic Warning for duration of next Term or Evaluation Period. May continue to receive Financial Aid for the next Term or Evaluation Period.
10.18.21 to 01.10.22 (10-week period)	2.0 (or higher)	Student removed from Academic Warning status at end of Term or Evaluation Period.

Term or Evaluation Period	Student's CGPA at End of Term or Evaluation Period	Result
08.05.21 to 10.14.21 (10-week period)	1.3	Student status changed to Academic Warning for duration of next Term or Evaluation Period. May continue to receive Financial Aid for the next Term or Evaluation Period.
11.18.21 to 01.10.22 (10-week period)	1.99 (or below)	Student status changed to Academic Probation and will be withdrawn from the program and Financial Aid will end. Student may appeal the Academic Probation.

If a student's CGPA falls below 2.0 at any time during their tenure with the College, he or she will be in violation of the Satisfactory Academic Progress standards above and the student will be placed on Academic Warning. In this case, the evaluation process detailed above is repeated.

In cases where a class is repeated, both classes will appear on the student transcript. Only the make-up grade will be calculated in the student's CGPA. Platt College, on a case-by-case basis, reserves the right to accelerate the above policy on Satisfactory Academic Progress to include immediate termination of a student's enrollment if determined to be warranted by the College.

Required Completion Rate: In addition to maintaining the CGPA specified above, students must progress toward completion of the program within a specified timeframe.

A student's completion rate is measured at the end of a term or evaluation period. All credits attempted, including repeated courses, transfer credits, withdrawn courses, and remedial courses will be counted as credit hours attempted. The additional measurement calculates a student's academic progress by the percentage of credit hours earned to the total credit hours attempted in their program of study. A student must achieve a completion rate of 50% or higher at the completion of their first term of enrollment with the college. A completion rate of 67% is required throughout the remainder of the program to be considered in good standing.

It should be noted that students are expected to complete the requirements for their course of study in the scheduled timeframe not to exceed 1.5 times (150%) the length of the program. Each individual case will be evaluated should the above standard be unattainable. The Director of Student and Academic Affairs reserves the right to make final determinations based on the extenuating circumstances presented.

Students receiving Veterans Administration benefits must complete their program within the originally contracted length of time or number of units. Students receiving Veteran's Benefits who fail to achieve the required CGPA by the end of the probation period will have their Veteran's Benefits interrupted and the DVA will be notified.

Satisfactory Academic Progress Appeal Process:

A student may appeal the determination of Satisfactory Academic Progress and the termination of Financial Aid to the Academic Dean based upon extenuating circumstances within 30 days of the event in question.

Re-Entry Policy:

Students who fail to return after an approved Leave of Absence, or are dismissed for failing to meet academic or financial requirements, may petition the Campus President for re-entry into their program, but must remedy the issue causing their dismissal prior to starting, and may only be allowed to restart on a space-available basis and for a probationary period to be determined by the Campus President and Academic Dean. All dropped students applying for readmission must wait 30 calendar days or 1 module, whichever is greater from their date of determination before they can re-enroll. This policy may be waived at the discretion of the Director of Student and Academic Affairs.

Attendance Policy:

Attendance in all scheduled courses is essential for academic achievement. Perfect attendance – no absences, tardies or early departures are encouraged. Strong attendance and punctuality develop a sense of responsibility that will have a positive impact upon the student's professional career. Attendance is taken each day at Platt College. Attendance is tracked by the quarter hour. These increments accumulate over the length of the module and are added together to determine the total number of hours a student is absent. Students are responsible for notifying their instructor, Registrar and/or the Academic Dean if they are going to be absent from school. Students are encouraged to make non-school personal appointments at times that will not conflict with their scheduled classes. Platt College does not have an excused/unexcused absence policy. Students are responsible to attend all scheduled class sessions.

Additional, program-specific attendance requirements are listed in the course syllabus and may also be found in the Veterinary Technology, Diagnostic Medical Sonography, Vocational Nursing and Respiratory Therapy Student Handbooks. These handbooks are available through their respective Program Directors.

100% attendance for clock hour program students is required. If a student misses anytime within the course, they are required to make it up prior to the course ending. Students need to work with the Academic Dean to make up their lost time.

Students that are absent from school for fourteen (14) consecutive calendar days (excluding scheduled campus wide breaks and holidays that fall on a Monday - Friday) will be discontinued from their program for non-attendance at the end of day 14. Students will receive the appropriate grade of an F or W in accordance with Platt College's F/W policy. Students receiving Veterans Administration benefits who violate any provision of the attendance policy will have their Veteran's Benefits interrupted and the VA will be notified.

The Director of Student and Academic Affairs reserves the right to make final determinations based on the extenuating circumstances presented.

Attendance Probation:

Platt College does not have an excused/unexcused absence policy. Students are responsible to attend all scheduled class sessions.

Cheating and Plagiarism: Cheating and plagiarism are both considered violations of the student code of conduct. Students are expected to conduct themselves in a manner that is ethical and professional.

Cheating means misleading, deceiving, or acting dishonestly on purpose, whether it be on a quiz, test or exam, assignments, essays or general classwork. Cheating can be done in various forms, such as bringing notes into class to be used during a test, using the internet to answer questions on a test, using someone else's work, copying off another student when it is not group work or buying papers from the internet.

Platt College reserves the right to utilize outside proctoring services to assist in ensuring that students are not cheating on quizzes, tests or exams. Students will be required to follow policies put in place by the faculty when taking quizzes, test or exams.

Plagiarism means using another person's work, writing, words, ideas, research, graphics, programs, music, pictures, data, and/or other creative expression without giving the other person full credit. Students must enclose another person's words in quotation marks, cite the appropriate source(s), and give citations when using the ideas of another person, even if those ideas are paraphrased. Platt College reserves the right to utilize outside anti-plagiarism resources to evaluate the originality of student work. Any student found guilty of plagiarism may be subject to disciplinary actions. Those disciplinary actions may include failing and repeating the course, suspension, and/or termination from the program. If a student has to repeat a course, there may be financial implications.

Using words, ideas, computer code, or any work by someone else without giving proper credit is plagiarism. Any time information from a source is used, it must be cited.

Plagiarism and the Internet: The internet has become a very popular resource of information for student assignments. The same rules regarding plagiarism that apply to a printed source, also apply to resources found on the internet when a student refers to work, writing, words, ideas, and the like or quotes from an internet site, he or she must cite that source. Many of the same rules apply when using visual information from an internet site; the source of the visual information or graphic must be cited.

Useful Strategies to Avoid Plagiarizing another Person's Work: If words, sentences, phrases, and the like are copied from a text, put what is copied in quotation marks. This is especially important when taking notes.

When paraphrasing, do not just rearrange or change a few words. A useful technique is:

1. Read the area to be paraphrased carefully;
2. Cover up the text or close the book or computer page so the words cannot be seen;
3. Write out the idea in your own words without referring back to the words
4. Check the attempt at paraphrasing against the original text to be sure the same phrases or words have not been used and that the information is accurate.

At times students accused of plagiarism claim that their plagiarism occurred without their knowledge or intent. Since lack of knowledge of this fundamental rule is not a reasonable defense, it is best to become thoroughly familiar with the various ways in which plagiarism can occur and ways to avoid plagiarizing someone's work. If there are any doubts or questions, take the responsibility to ask the instructor for clarification. You can also go to the library for additional resources on APA format, outlining resources and making citations.

If found guilty of cheating or plagiarizing, a student may be subject to disciplinary actions up to and including failing the assignment, failing the class, suspension or termination from the program.

Grading

Letter Grades, Percentages and Grade Point Averages

Students are assigned letter grades (A through F) in their course work for each class attempted. The instructor uses a percentile breakdown and assigns final letter grades (see accompanying chart). Students may complete a class with a D – (.7). However, to graduate, a student must attain a minimum cumulative grade point average of 2.0 (C).

Additional, program-specific grading requirements may also be found in the Diagnostic Medical Sonography, Respiratory Therapy, Veterinary Technology Student Handbooks and Vocational Nursing. These Handbooks are available through the respective Program Directors at each Campus Location.

A Grade Point Average (GPA) is calculated from the letter grade using the following values:

Letter Grade	Percentile Range	Percentile Earned	Grade Point Assigned
A	96-100	100	4.0
A-	90-95	95	3.7
B+	87-89	89	3.3
B	83-86	86	3.0
B-	80-82	82	2.7
C+	77-79	79	2.3
C *	73-76	76	2.0
C-	70-72	72	1.7
D+	67-69	69	1.3
D	63-66	66	1.0
D- **	60-62	62	0.7
F	<59.9	50	0.0
W	N/A	N/A	0
T/C	N/A	N/A	0

* Minimum cumulative grade point average for entire course for a student to qualify for graduation.

** Minimum grade to pass any course (although this may be higher for certain programs, see program specific Handbooks).

Expanded Grade Symbol Definitions:

A	(Excellent) Meeting course requirements with a superior level of performance.
B	(Good) Meeting course requirements with a high level of performance.
C	(Satisfactory) Meeting course requirements with an acceptable level of performance.
D	(Unsatisfactory)
F	(Failing) Repeat course.
W	Withdrawal
T/C	Transfer Credit

Grade of Incomplete: Platt College does not issue a grade of incomplete on the Student Progress Report or on the Student Transcripts.

Make-up Work: All student work, assignments, quizzes, tests or projects must be completed and submitted on or before the final day of any module. The acceptance of any late or make-up work is at the sole discretion of the Instructor.

Final Grades: Final grades will be available in the learning platform, Canvas, within 5 days of the module end date. Students who would like a printout of their grades, can request a copy from the Registrar at any time.

Grade Appeal Policy: (This process may be different for certain programs, refer to program specific Handbooks for details.) Grade appeals allow students the opportunity to appeal a grade if there is an error or additional time is being requested due to an extenuating circumstance. Supporting documentation is required to be attached to all requests. Students must have attended and completed a minimum of 50% of the course in order to apply for a grade appeal. Students may appeal a grade received in a class through the following steps:

- a) The student must communicate their concerns with the faculty member that issued the grade, within 24 hours of the module end date.
- b) If the faculty member denies the requested grade change, the student may appeal, in writing, to the Academic Dean (or designee) within 24 hours of the denial by the faculty member and attach supporting documentation to the request.
- c) Within 24 hours of the receipt of the written appeal, the Academic Dean (or designee) will meet with the faculty member to discuss the student's appeal, and review the supporting documentation provided by the student.
- d) The Academic Dean will then make a final recommendation, which may be confirmed by the faculty member.
- e) If the Academic Dean does not receive the confirmation of the faculty member, then the final decision will be made by the Director of Student and Academic Affairs or their designee.
- f) Once approval has been granted, students will have 14 calendar days from the date the module ended to complete the requirements as outlined in the grade appeal approval.

Class Withdrawals: A withdrawal ("W") is issued to any student who is withdrawn from a class voluntarily or involuntarily. A "W" is calculated for credits attempted, but is not calculated in a student's grade point average (GPA). The Dean of Academics, or designee, must approve all class withdrawals.

Withdrawing from any class after the first 20% of scheduled hours or after 2 class sessions, whichever is greater may result in a grade of "F". If a student is placed on leave of absence after the first 20% of scheduled hours, that student may also receive a grade of "F".

Course Repetition: A student must repeat a course when the grade received was a failing grade or when the student received a W. In specialty allied health programs, students must refer to their handbooks for further information, and will be required to repeat a course. Students may only repeat a course once, thus students may only attempt any given course two times. If a student fails, withdraws or leaves a course to begin a LOA before completing and passing the course, these would all be considered attempts. The college does not charge for repeating a course according to policy. Please note that repeating a course may extend the original graduation date for the student. A student who must repeat a course will work with the Academic Dean to schedule the course.

If a course is repeated (due to failure) the first attempt will have asterisks "***" next to the course on the transcript and will not count in the calculation of the student's CGPA. The credits attempted in both courses will be considered calculated credit hours attempted for the purpose of determining Satisfactory Academic Progress (SAP).

Cumulative Grade Point Average Required for Graduation: Graduation from Platt College requires a minimum cumulative grade point average of 2.0 (C). Complete graduation requirements are described in the Graduation Requirements section of this catalog.

Continuing Education Course Offerings: The school does not offer courses on a continuing education basis that do not fall within the scope of ACCSC accreditation.

Leave of Absence Policy: Platt College offers accelerated programs of study. As

such, Leaves of Absence are discouraged, and are only granted for unusual mitigating circumstances. Written requests that are signed and dated and accompanied by all supporting documentation for the Leaves of Absence must be presented to the Academic Dean (or designee) prior to the end of the add / drop period of any module / term the student wishes to take a Leave of Absence from. Students requesting a leave of absence must meet with the Registrar, Academic Dean, Financial Aid Officer and Student Accounts Office before their request can be reviewed and considered for approval. A Leave of Absence may be granted for a maximum of 180 days in any 12-month period.

The commonly acceptable reasons for a Leave of Absence are:

- Medical emergency (including pregnancy)
- Family emergency
- Military service

During the leave of absence period, the student is obligated to continue to make their normally scheduled Platt College in-school student payments and maintain contact with campus staff. Students failing to return from a Leave of Absence as scheduled will be withdrawn from Platt College. Students must have successfully completed two modules and be making satisfactory academic progress to be eligible for a Leave of Absence. All requests made for a Leave of Absence after the add / drop period will be treated as a drop request and will be withdrawn from Platt College. The student will be required to re-apply for admission to the program when he / she is ready to return to Platt College.

Transferability of Credits

Transfer Credits: A Transfer Credit (TC) will appear on a student's transcript to indicate those courses for which the student has received college credit from another institution. Transfer Credits may be issued for Experiential Learning.

When reviewing transcripts to identify transferability of credits into Platt College degree programs, the following conditions must be met:

1. The courses were completed at an accredited college or university.
2. The courses were completed within the previous 8 years.
 - o For the Vocational Nursing Program, all courses completed within the previous 5 years, with a grade of "C" or better are eligible for consideration.

3. The courses are equivalent in content and number of credit hours to those offered by Platt College.

4. The courses considered for transfer are at the appropriate college year.

- o Freshman or sophomore year courses may be considered for waiver of Platt College Associate Degree level courses, only.
- o Junior or senior level courses may be considered for waiver of Platt College Associate Degree or bachelor's degree level courses.
- o At no time may one transferred course be used to waive more than one Platt College course.

5. The student achieved a minimum grade of "C" or 2.0 for the courses considered for transfer.

6. To be accepted as waiver of Platt College courses, a student must submit official transcripts for transfer credit consideration.

- o Without receipt of official transcripts, Platt College will not issue Transfer Credit for any of its courses.
 - Students wishing to transfer credits into Platt College for any program must deliver an official transcript to the Dean of Academics, or designee, within the first thirty (30) days from the day they start their program.
 - Students MUST not attend or be scheduled for any class or classes that they are requesting a transfer credit. Once attendance has been posted a TC credit CANNOT be applied.
 - Exceptions to any provision within are considered on an individual basis.

Transfer Credits are not calculated into the student's grade point average.

Experiential Learning: An applicant with the appropriate amount of industry experience may be qualified for waiver of Platt College courses by Experiential Learning. Experiential Learning will be evaluated based on a review of documented work experience and successful completion of relevant standardized tests.

The following criteria must be met for an applicant to qualify for Experiential Learning:

- Submit a resume detailing a minimum of two (2) years of industry experience.
- Submit a minimum of two (2) letters of professional reference.
- Depending upon the course the applicant wishes to waive, a professional portfolio must be submitted and reviewed by the Dean of Academics, or designee.
- Complete and pass with a grade of 3.7 or above (A- or above), the final examination for the course the applicant wishes to waive.

A grade of **TC** will appear on the student's transcript once the waiver of the course through Experiential Learning is approved.

Application for waiver of Platt College courses through Experiential Learning must be submitted to the Dean of Academics or designee, within the first thirty (30) days of the student's start date in their chosen program.

Maximum Number of Transfer Credits Allowed: The number of Platt College credits waived through the transfer of college course credits from previously attended schools or through Experiential Learning cannot amount to more than fifty percent (50%) of the student's program.

Exceptions to any provision above may be considered on an individual basis with the Academic Dean, Campus President and Director of Student and Academic Affairs.

Directed Study: Some classes at Platt College may be assigned as Directed Study courses. This assignment will be at the discretion of the Academic Dean or Campus President with the written consent of the Director of Student and Academic Affairs.

NOTICE CONCERNING TRANSFERABILITY OF CREDITS AND CREDENTIALS EARNED AT OUR INSTITUTION: The transferability of credits you earn at Platt College is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree, diploma or certificate that you earn in your program is also at the complete discretion of the institution to which you may

seek to transfer. If the degree, diploma or certificate that you earn at this institution is not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational and personal goals. This may include contacting an institution to which you may seek to transfer after attending Platt College to determine if your credits, degree, diploma or certificate will transfer prior to enrolling at Platt College.

Career Services

The ultimate goal of Platt College is to assist all graduates in their job search in the field for which they have been trained. The school maintains an active career education program for qualified graduates. Graduates are given the opportunity to pursue job referrals generated by Career Services. A majority of our graduates who seek employment find positions in the field for which they are trained. **However, the school cannot guarantee employment.**

Career Services strives to see that each graduate understands the job search process. Placement begins on orientation day at which time the importance of the student's attendance and productivity in class is stressed. During the course of training, the Career Services staff meets with each student to become familiar with his or her special skills, background, and goals. Additionally, students participate in the following:

1. Writing résumés and letters of application.
2. Researching and contacting potential employers.
3. Interviewing skills workshops.
4. Portfolio preparation.

Students are expected to cooperate with and stay in contact with the Platt College Career Services department during their Academic Program and immediately following their Program completion.

Student Code of Conduct

Complete student roles and responsibilities are outlined within the Platt College Student and Employee Consumer Handbook.

Student Code of Conduct Policy: Students are expected to conduct themselves in a manner conducive to learning and one which also promotes the learning of others. Platt College operates in an office park environment. Under no circumstances will any behavior be tolerated that interferes or disrupts the business activities of the neighboring tenants. The following Code of Conduct is expected to be upheld by all students, and those who violate these provisions are subject to disciplinary measures including suspension and possibly termination from the Program:

- Not to act in such a manner as to bring unfavorable criticism upon the school, staff, or any fellow student.
- Never to enter or attempt to enter or be upon any school property or to engage in any school, function while under the influence of alcohol, drugs or narcotics of any kind.
- To cooperate fully with the school's staff and instructors, so as to successfully conclude the selected program or course within the scheduled training program.
- Not to sell or offer to sell to any student any commodities or services without written permission of the school administration.
- Not to interfere with the learning process of other students, classroom presentation, or individual instruction being conducted in any class or session of the school and to refrain from any form of cheating, plagiarism or unprofessional conduct.
- To comply with the requests of the instructor relating to student conduct and the student dress code as stated in the student and consumer handbook.
- To comply with all safety and health requirements of the school, local, state, and federal laws.
- Not to remove from the school any supplies, textbooks, equipment or property of the school without written permission from one of the school's administrators.
- To refrain from using profane or abusive language while on the school premises or during any school function.
- To refrain from bringing any weapon on school premises. A weapon includes any type of firearm, knife, switchblade, bomb, or incendiary devices.
- To refrain from any disorderly, indecent, or obscene conduct or expression of sexual harassment.

- To refrain from any type of rioting including aiding, abetting, or inciting riot.
- Physical abuse, verbal threats, bullying, or intimidation directed toward other students, staff, or campus visitors.
- Obstruction of pedestrian or vehicular traffic on college premises.
- Any activity involving Platt College campus computing resources which knowingly interferes with someone else's academic freedom or rights to privacy, the institution's goals and policies, local state, or federal laws.
- Falsification, distortion, or misrepresentation of information before a college official or judiciary body.
- Misuse of safety equipment, false bomb or fire alarms, or misinforming safety or security personnel.
- Furnishing false information or academic credentials with the intent to deceive or mislead college officials in making admissions, scholarship, and financial aid determinations on the student's behalf.

Drug Free Schools & Communities Act:

Platt College is committed to the Drug Free Schools and Communities Act Amendments of 1989 (Public Law 101-226, 20 U.S.C. §1145g).

Drug-Free Campus: It is the policy of Platt College to maintain a drug-free living and learning environment and workplace. As a result, the College does not tolerate and strictly prohibits the possession, use, and/or distribution of alcohol, drugs, and/or drug paraphernalia by any member of the Platt College community, including students and guests of its community. Disregard of this policy will subject offenders to disciplinary action up to and including dismissal from the College.

Additionally, some academic programs may require strict drug testing policies. Platt College reserves the right to administer a random drug test prior to students attending their first clinical rotation in these programs, and at random times during the remainder of their time at Platt. If a student refuses to submit to drug testing either at Platt or at their assigned clinical site, the student may be subject to withdrawal from the program. Additional information on program-specific drug testing is available from the Program Director.

The College's interest in disciplining offenders is not punitive, but rather to establish clear limits of conduct for members of the campus community. Therefore, the College subscribes to a disciplinary process that could subject the violator to disciplinary action including termination from the program.

Honor Code: Each student is honor bound to report to school officials any violation of the Student Code of Conduct by any person on the campus.

Violation of the Student Code of Conduct is grounds for dismissal. All reports shall be submitted in writing, signed, and dated by the student. Submission of a false report shall be grounds for dismissal.

Non-Discrimination/Anti-Harassment Policy: The College intends to provide a work and school environment free of unlawful harassment, sexual violence or discrimination. The College prohibits harassment or discrimination based on race, religion, creed, color, national origin, ancestry, sex, military or veteran status, part- or full-time status, physical or mental disability, medical condition, age, sexual orientation, gender, gender identity or expression, genetic information or any other basis protected by the federal, state or local law. In accordance with Title IX of the Education Amendments of 1972, the College prohibits discrimination based on sex, sexual harassment and sexual violence, which includes sexual assault, domestic violence, dating violence and stalking (collectively referred to as "sexual misconduct") and the College has jurisdiction over Title IX complaints.

Students who have any questions regarding this policy, or who wish to complain of harassment, should contact the Campus President. Complaints alleging harassment will be treated as confidentially as possible.

Dress Code: Platt College is located in a business park environment; therefore, appropriate attire is necessary. A student's appearance should never disrupt or distract from the classroom objective. Any student not complying with these requirements may be asked to leave class, which may result in an absence for the class session. Continued non-compliance may lead to dismissal.

Students enrolled in Platt College's Allied Health programs are required to wear medical attire as specified during the enrollment process.

General Complaint/Grievance Procedure

Students have the right to present problems and complaints. This includes, but is not limited to, charges of discrimination. (It should be noted that a filed complaint would have no adverse impact on a student's status.) The final authority in all cases rests with the Campus President.

Informal Complaint/Grievance Procedure

Students are encouraged to follow the listed procedure when addressing CLASS-related complaints:

1. Discuss the issue with your instructor. If you are not satisfied with the resolution within 3 school days, then;
2. Discuss the issue with the Academic Dean. The Academic Dean will advise you immediately of whether they can resolve the issue, or whether you need to escalate the issue to the Campus President. If the issue requires the involvement of the Campus President, please follow the Formal Grievance Procedure explained below.

Students are encouraged to follow the procedures listed below when addressing NON-CLASS-related complaints (school administration issues such as the facility, parking, Financial Aid, Student Accounts, or other Platt College staff or policies):

Formal Grievance Procedure

Step 1: Within fifteen (15) school days of the date of the event generating the complaint, a student will either:

- a) file a written notice with the Campus President, or
- b) file any complaints to Feedback@PlattCollege.edu

The Student Grievance Form may be obtained from the Campus President or Academic Dean. The student's written notice will identify the cause of the complaint, individuals involved (if applicable), the date(s) of occurrence and expected outcomes. The process below will be followed after a written complaint is received.

Step 2: The Campus President (or his designee) shall respond in writing within five (5) school days regarding the process followed, persons involved and steps taken to try and resolve the grievance.

Step 3: If the student is not satisfied with the proposed solution, the student may appeal in writing to the Director of Student and Academic Affairs. The Director of Student and Academic Affairs will have five (5) school days upon receipt of the grievance to review the action(s) taken up to that point. The Director of Student and Academic Affairs will either concur with the action taken by the Campus President or offer an additional solution in writing to the student.

Step 4: In the event the student is not satisfied with the action taken up to this point in the grievance process or upon completion of Step 3, the student may file a complaint with the Bureau for Private Postsecondary Education by calling (888) 370-7589 or by completing a complaint form which can be obtained on the bureau's Internet web site www.bppe.ca.gov

A student may withdraw a complaint at any time during the process by completing the Student Grievance Withdrawal Form that is attached.

Student Complaint / Formal Grievance Procedure

Schools accredited by the Accrediting Commission of Career Schools and Colleges must have a procedure and operational plan for handling student complaints. If a student does not feel that the school has adequately addressed a complaint or concern, the student may consider contacting the Accrediting Commission. All complaints reviewed by the Commission must be in written form and should grant permission for the Commission to forward a copy of the complaint to the school for a response. This can be accomplished by filing the ACCSC Complaint Form. The complainant(s) will be kept informed as to the status of the complaint as well as the final resolution by the Commission. Please direct all inquiries to:

Accrediting Commission of Career Schools & Colleges
2101 Wilson Boulevard, Suite 302
Arlington, VA 22201
(703) 247-4212
www.accsc.org

A copy of the ACCSC Complaint Form is available at the school and may be obtained by contacting Megan Clifton, Director of Accreditation and Regulatory Affairs at mclifton@plattcollege.edu or online at www.accsc.org.

Platt College Policy for Students with Disabilities

This policy is to ensure that Platt College does not discriminate against any applicant or student based on disability. The purpose of this Policy is to set forth Platt College's policy against discrimination (including harassment) on the basis of disability, to set reasonable standards for documentation of a disability, to outline reasonable procedures for requesting academic accommodations, to provide for an interactive process for determining appropriate academic accommodations, to specify procedures for appealing determinations related to disability services, and to identify the campus Section 504 coordinator with responsibility for campus compliance with Section 504.

Students enrolled in Academic Programs at Platt College should complete the steps listed below well in advance of the anticipated need for services and accommodations. Students should allow for a reasonable period of time for the proper evaluation of requests and the implementation of approved requests:

1. Students must meet admissions eligibility requirements for their intended Academic Program before requesting accommodations.
2. Prospective students requiring accommodations should first contact the Campus President. Documentation of disabilities and needs may be required and subject to verification, and the Campus President will direct prospective students to the Academic Dean, who can provide complete information. Existing students requiring accommodations should contact the Academic Dean.
3. Platt College will make a case-by-case determination of the student's need for any requested auxiliary aids, accommodations, or special services determined to be necessary.
4. The Academic Dean will address all accommodations which affect the physical structure, furnishings, or equipment in coordination with the Campus President.

Documentation of Disability: Any student with a disability who wishes to receive academic accommodations must provide current verification of the disability in the form of assessments done by a certified and/or licensed professional trained in the related disability. The documentation must generally be within the last three (3) years (or sooner at the discretion of the ADA Committee) and it must describe the disability.

Documentation used to assess the need and establish appropriate academic accommodations are outlined on the ADA accommodation application available from the Academic Dean, who can also answer any questions you may have about the criteria.

In some circumstances where the disability is obvious, Platt College may provide academic accommodations while the student is in the process of obtaining and gathering the documentation of a disability.

Reasonable Academic Accommodations: Reasonable academic accommodations are made under the guidance and provisions of Section 504 of the Rehabilitation Act of 1973 and Title I of the ADA. The college is not required to provide accommodations if they will “fundamentally alter” the nature of the academic program being offered.

Procedures for Requesting and Determining Academic Accommodations: The Campus Academic Dean is the designated Campus Disability Coordinator for compliance with Section 504.

To request academic accommodations, a student with a disability must contact the Campus Disability Coordinator. All requests for academic accommodations must be made to the Campus Disability Coordinator. Making a request and/or disclosing a disability to a faculty or staff member will not be treated as a request for academic accommodations. If a student informs faculty or staff member that he or she has a disability, the faculty or staff member must refer the student to the Campus Disability Coordinator. The Academic Dean and the student will promptly discuss the appropriate documentation needed to establish the student’s disability and the need for academic accommodations. The student will also complete and submit a “Disability Accommodations Request Form.” The Academic Dean will discuss the Accommodation Request form with the student and ensure all necessary documentation has been provided for the college to make a determination. The Disability Coordinator will notify the student in writing within ten (10) business days with a decision from the ADA Committee regarding the approved academic

accommodations. If the Committee has denied any request for academic accommodation, the denial must be in writing and must include a reason for the denial, and must be discussed with the student. The Academic Dean will provide written notice of the approved academic accommodations to faculty members and other individuals with responsibility for providing the academic accommodations; however, this information is to remain confidential and secure.

Students who disagree with the determinations made by the ADA Committee with respect to disability-related services may file an appeal using the appeals process outlined below (see “Appeals Procedure”).

Implementation of Approved Academic Accommodations: **With the exception of** a significant health or safety concern, instructors are required to provide all approved academic accommodations. If an instructor has questions about the approved academic accommodations, the instructor should immediately contact the Campus Disability Coordinator. Instructors may not unilaterally make a determination as to whether the student has a disability, the extent of the student’s disability, or the appropriateness of an approved academic accommodation.

Appeals Procedure: If a student is dissatisfied with the determination or provision of any disability related services, the student may file an appeal. Dissatisfaction may include, without limitation, a determination that the student is not disabled, a denial of the student’s request for disability related services (such as a request for academic accommodations), delay in the provision of an approved academic accommodation, or the non-provision of an approved academic accommodation by an instructor or staff member.

Appeals should be made in writing and directed to the Campus President at the student’s home campus. The appeal should include a statement of the steps taken to date, the results obtained (if any), and the basis for the student’s dissatisfaction.

The Campus President will then attempt to resolve the issue(s). The student will be provided with a written decision regarding the appeal within fifteen (15) business days after the appeal is received by the Campus President. If a student is dissatisfied with the written decision of the Campus President, the student may file for a second-stage appeal, in writing, to the Director of Accreditation and Regulatory Affairs by e-mailing Regulatory@plattcollege.edu. This written appeal may include a request for a meeting with the Director of Student and Academic Affairs, which may take place either in-person or by other means, at the discretion of Platt College. This second-stage appeal must be filed within ten (10) business days of receiving the written decision of the Campus President. Upon receipt, the Director of Student and Academic Affairs will review the appeal and will issue a written decision to the student and all interested parties within ten (10) business days of the conclusion of the investigation.

Grievance Procedure:

Platt College is committed to a policy of nondiscrimination on the basis of race/ color, national origin/ancestry, sex (including gender identity), religion, age, mental or physical disability, veteran status, medical condition, marital status, sexual orientation, or pregnancy. Any allegations of discrimination will be promptly and fully investigated, and appropriate action will be taken in a timely manner. Any student, employee, or guest of Platt College may file an anonymous complaint at Feedback@PlattCollege.edu

Any student or employee who believes that Platt College has discriminated against him or her may file a grievance using the grievance procedure stated in the Platt College Catalog. This policy may also be found in the Platt College Student and Employee Consumer Handbook, which can be accessed online at www.plattcollege.edu.

In addition, students may be able to file a complaint with the United States Department of Education, Office for Civil Rights. They can contact the Office for Civil Rights for more information at the following:

United States Department of Education
Office for Civil Rights
50 Beale Street, Suite 7200 • San Francisco, CA 94105
(415) 486-5555 • www.ed.gov/ocr

Campus Safety

Safety from accidents is the responsibility of everyone. The school strives to offer a safe environment for students, employees, and visitors to the campus and encourages you to comply with all safety standards including:

1. Smoking is restricted to the designated outside areas.
2. Food, drink, and their containers are restricted to designated break areas and are prohibited from all classrooms and labs at all times.
3. Lab equipment may be used only with an instructor's knowledge, permission, and supervision.
4. Parking is limited to designated areas with the expectation that students will demonstrate safe and courteous driving. Failure to comply may lead to termination from school.

If you are injured, are aware of injury to another student or are aware of a safety hazard on campus, please report this information to your instructor, the Academic Dean or the Campus President immediately.

Campus Safety information is covered during New Student Orientation, and by the course instructor on the first day of class.

FULL CAMPUS EMERGENCY PREPAREDNESS INFORMATION, EMERGENCY NOTIFICATION DETAILS, AND CAMPUS SAFETY GUIDELINES ARE AVAILABLE IN THE STUDENT AND CONSUMER HANDBOOK.

Campus Security Cameras: As part of its ongoing effort to maintain a safe learning environment for students, faculty, and staff, Platt College uses security cameras in classrooms and common areas.

Campus Crime Statistics: In compliance with P.L. 102-226, campus crime statistics are maintained for public and student review and distribution at each Platt College campus on or before October 01 of every year, and are available in the Student and Employee Consumer Handbook. All students, staff, vendors, and guests of the campus are required to report any crime they believe to have occurred on the campus-controlled property immediately. This report can be made anonymously to any campus staff, or electronically by emailing Feedback@PlattCollege.edu. The

X. Tuition and Fees

Current Pricing for each Program's Tuition, Fees, and Books are available in the College Catalog Addendum.

Tuition Payment Policy

- Each Program's tuition and book charges are billed by term throughout the program.
- All charges are due within 7 calendar days of the start of the payment period and/or term.
- Tuition and charges may vary by term.
- Students may request a copy of their student ledger card from Student Accounts to view and review all current and previous charges and payments that have been made to their account.
- Students are responsible for repaying the loan amounts, plus any interest that have been incurred as of the date of withdrawal.

Student Tuition Recovery Fund (STRF)

Student Tuition Recovery Fund Disclosures: The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 1747 North Market Blvd., Suite 225, Sacramento, CA 95834, (916) 431-6959 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. You were enrolled at an institution or a location of the institution within the 120-day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120-day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.

PLATT COLLEGE TUITION & FEES

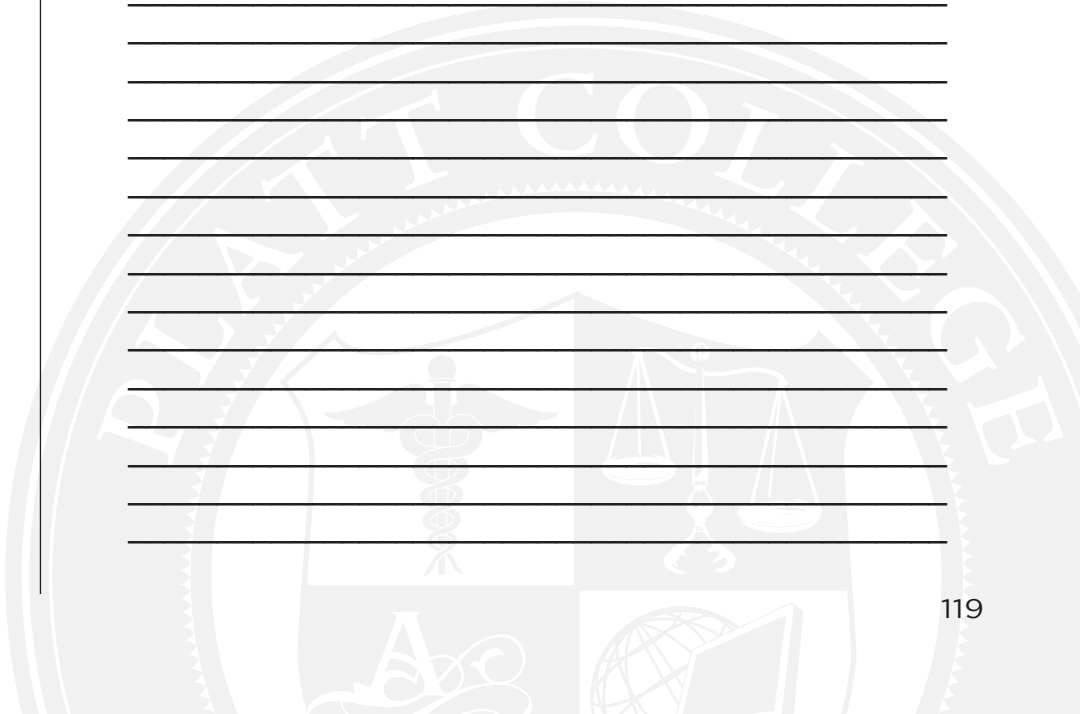

7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of non-collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

Note: Authority cited: Sections 94803, 94877 and 94923, Education Code.
Reference: Section 94923, 94924 and 94925, Education Code.

XI. Course Descriptions

APH101 — Anatomy & Physiology

Comprehensive knowledge of Anatomy and Physiology is a fundamental prerequisite to Medical sciences. Upon completion of this subject, the student will have practical knowledge about the structural levels of organization, anatomical components, and physiology. The student will also learn about Medical Terminology and relationships related to various body organs and anatomical directions, planes, and body cavities. The student will have a clear understanding of the anatomy and physiology of a typical cell, tissues, organs, systems of the human body and homeostasis and its importance in the human body.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

ART111 — Introduction to Design Concepts

At the conclusion of this course, students will be able to identify and apply basic design principles and identify and utilize the design processes necessary to successfully solve design problems using metrics provided. Students learn to apply the basic principles of layout, color theory, deductive and strategic thinking. Students will gain experience using markers, colored pencils and graphite as rendering tools in order to create comprehensives beginning with thumbnails. Teamwork, brainstorming, concept development and presentation skills are emphasized.

Prerequisite: None **100 Hours** **7.0 Quarter Credits**

ART112 — Typography

This course covers typographic terminology and the application of type as a communication tool. Deductive and strategic thinking processes are taught and applied as tools for problem solving. The history of typography, major type families, the study of basic letter forms and typographic contrast are examined for skill building towards the understanding of type as a visual language.

Prerequisite: None **100 Hours** **7.0 Quarter Credits**

ART114 — Fundamentals of Drawing

This course is an introduction to basic drawing and composition. The course will include the study of value, texture, form and perspective. Students will have a working knowledge of terminology, the history of drawing and various drawing techniques.

Prerequisite: None **100 Hours** **7.0 Quarter Credits**

BAF300 – Advanced Finance

This course is designed to provide students with an introduction to corporate finance. Topics cover includes financial management, valuation of assets, capital budgeting, capital structure, and financial statement analysis.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAF305 – Financial Planning

This course is designed to provide students with the skills to understand the importance of financial planning in the business world. Topics covered will include ethical and legal considerations, global markets, and technological innovation on efficient economic outcomes.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAF310 – Financial Risk Management

This course is designed to provide students with an overview of all of the hedging markets and hedging instruments. Topics covered will include hedging use of options, forwards, futures, swaps, and options on futures. It focuses on advanced financial risk management of interest rates, currency rates, equity returns, and fixed income returns.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAF315 – Financial Accounting

This course is designed to provide students with an overview of financial accounting and its importance in the business world. The emphasis is on business combinations, consolidated financial statements, partnerships, and foreign currency transactions and translations.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAF400 – Advanced Accounting

This course is designed to provide students with the concepts of managerial accounting. Topics covered include cost accumulation, decision-making and control. Students will learn to think about accounting issues from a managerial point of view.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAF415 – Government and Not-For-Profit Accounting

This course is designed to provide students with an overview of governmental and not-for-profit accounting. It will cover the unique characteristics and the major types of government and not-for-profit organizations. It will discuss the GASB state and local government financial reporting model, including the dual perspective of government-wide and fund financial statements.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

PLATT COLLEGE
**COURSE
 DESCRIPTIONS**

BAF450 – Accounting Finance Capstone

This course is designed for students to complete a final project that will utilize all of the knowledge that they have obtained throughout the program. It will allow students to demonstrate mastery of the various course competencies in the accounting and finance concentration.

Prerequisite: completion of all Business Management and Accounting and Finance courses **50 Hours** **5.0 Quarter Credits**

BAFDE300 – Advanced Finance

This course is designed to provide students with an introduction to corporate finance. Topics cover includes financial management, valuation of assets, capital budgeting, capital structure, and financial statement analysis.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAFDE305 – Financial Planning

This course is designed to provide students with the skills to understand the importance of financial planning in the business world. Topics covered will include ethical and legal considerations, global markets, and technological innovation on efficient economic outcomes.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAFDE310 – Financial Risk Management

This course is designed to provide students with an overview of all of the hedging markets and hedging instruments. Topics covered will include hedging use of options, forwards, futures, swaps, and options on futures. It focuses on advanced financial risk management of interest rates, currency rates, equity returns, and fixed income returns.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAFDE315 – Financial Accounting

This course is designed to provide students with and overview of financial accounting and its importance in the business world. The emphasis is on business combinations, consolidated financial statements, partnerships, and foreign currency transactions and translations.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAFDE400 – Advanced Accounting

This course is designed to provide students with the concepts of managerial accounting. Topics covered include cost accumulation, decision-making and control. Students will learn to think about accounting issues from a managerial point of view.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAFDE415 – Government and Not-For-Profit Accounting

This course is designed to provide students with an overview of governmental and not-for-profit accounting. It will cover the unique characteristics and the major types of government and not-for-profit organizations. It will discuss the GASB state and local government financial reporting model, including the dual perspective of government-wide and fund financial statements.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BAFDE450 – Accounting Finance Capstone

This course is designed for students to complete a final project that will utilize all of the knowledge that they have obtained throughout the program. It will allow students to demonstrate mastery of the various course competencies in the accounting and finance concentration.

Prerequisite: completion of all Business Management and Accounting and Finance courses **50 Hours** **5.0 Quarter Credits**

BIO101 — Microbiology

This course is designed to provide the student with a foundation in basic microbiology with emphasis on infectious diseases. The student will gain a basic understanding of the various characteristics of microorganisms in general and the specific characteristics of pathogenic bacteria, viruses, fungi, and protozoa.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BIO103 – General Biology & Microbiology

This course is designed to provide the student with a foundation in basic biology. The student will gain a basic understanding of the foundations of life, classifications of species, and animal cell and tissue function.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BIODE103 – General Biology & Microbiology

This course is designed to provide the student with a foundation in basic biology. The student will gain a basic understanding of the foundations of life, classifications of species, and animal cell and tissue function.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BLM301 — Introduction to U.S. Healthcare System

The Course provides a comprehensive introduction to the US healthcare system. Overviews of existing delivery systems, healthcare delivery concepts, access to care, and other critical issues are presented. The course includes the mission of public health; models of health promotion and disease prevention; and determinants of health and health services utilization. The financing, organization, staffing, delivery, and payment of the U.S. healthcare system is described, Issues of competition, regulation, technology, quality, primary care, long-term care, mental health and bioethics are introduced and discussed.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM302 — Current Issues, Trends, and Innovations in U.S. Healthcare

Examination of new technologies, health care delivery models, and the phenomenon of sophisticated consumers. Healthcare reimbursement and potential changes in payment structures are explored. Assessment of the impact of science, technology, ethics, and government on the provision of health care.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM303 — Quality Improvement in Healthcare

Assessment of specific interventions and initiatives to improve the quality and cost-efficiency of health care from the perspectives of providers and patients. Analysis of the structures in place to enhance the quality of health care delivery and political and economic influences that affect quality improvement programs in both the public and private sectors.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM304 — Organization and Management of Healthcare Systems

This course explores in further detail the organization of current healthcare delivery systems in the United States, and introduces basic management principles as they apply to the delivery of services provided by health science disciplines. Issues addressed include information systems, leadership, team building, fiscal management, human resource management, quality improvement, and management of conflict and change.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM400 — Theories, Practices, and Ethics of Leadership

This course is designed to provide students with a comprehensive understanding of leadership as phenomenon and its impact on the organizational behavior of individuals. Major theories of leadership will be examined and leadership will be integrated into the various internal and external organizational and situational factors. An emphasis will be placed upon developing a personal, ethical leadership style that is applicable in the daily operations of today's organizations.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM405 — Organizational Dynamics and Change Management

This course is designed to provide students with a working understanding of how to manage the change and improvement process in today's organizations.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM410 — Leading Diverse Groups and Teams

This course will examine the principles of building and sustaining highly effective teams through the application of leadership theory to groups that are diverse in gender, ethnicity, education, and functional expertise. Special emphasis will be placed upon the role of the leader in establishing effective collaboration among the members, comprehensive understanding of the nature of teams, their functioning and impact on individual and group behavior.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM420 — Organizational Training and Development

This course provides essential managerial-level comprehension of training theory and its practical applications in the business and management environment. Students learn how to design instructional training programs beginning with the needs assessment and continuing through the evaluation phase. Special emphasis will be placed on the current trends and issues in training and development to include the rapid changes in technology and job design, along with the increasing importance of learning — and knowledge — based organizations.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM430 — Operations Management

This course provides essential managerial-level comprehension of operations management and its practical applications in the business environment. Students learn how processes, products and services interact in operations management. The course also touches on the subject of project management. Students will also develop comprehension of resource management, quality management and quality improvement.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

BLM440 — Project Management

This course provides an overview of the concepts, procedures and fundamental processes of project management for working professionals. Students are introduced to the principles, tools, and techniques of project management within an integrative framework. The course emphasizes that, for most organizations, projects are the primary means for implementing strategic initiatives. This course uses real-world examples and identifies common mistakes and pitfalls in project management. The nine areas of the Project Management Institute's Project Management Body of Knowledge (PMBOK) are incorporated.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM450 — Transforming Organizations

This course provides an overview of the human and intellectual capital that is critical to success, and the management of these resources in four information-intensive settings ;(1) managing innovation, (2) managing collaboration, (3) managing team decision-making, and (4) managing change and adaption. The course puts a particular emphasis on the important tasks of developing well-aligned, high performance organizations and on the challenges of leading change in organizations.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM460 — Leading Strategic Organizational Sustainability

This course examines how companies develop strategies based on financial, social and environmental criteria. The course looks at how organizations integrate the principles of sustainability into key functional activities, including strategy, marketing, human resources, accounting, and information systems and obtain competitive advantage through sustainability-based approaches. Students learn the importance of a multiple stakeholder perspective of organization management and change based on engagement with employees, consumers, competitors, nongovernmental organizations and public agencies.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM470 — Research and Evaluation Methods in Leadership

This course introduces the concepts, principles, and methods of organizational research. Special emphasis is given to the study of the scientific method of problem solving and the systematic review of leadership research literature. The primary goal of the course is to strengthen student's critical thinking and reasoning skills to become better consumers of educational research. Another goal of the course is to strengthen student's skills as a competent researcher results, and to strengthen their skills at planning organizational research.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLM490 — Leadership Capstone Seminar

The capstone course is designed to be the culminating work for the Bachelor's degree in Leadership and Management. Under the guidance of the instructor, students will design a project to demonstrate their mastery of leadership theories, application, and frameworks. Students will include scholarly research, attention to ethical awareness, and demonstrate critical analysis in their project.

Prerequisites: All Leadership and Management Core Courses
50 Hours **4.0 Quarter Credits**

BLMDE301 — Introduction to U.S. Healthcare System

The Course provides a comprehensive introduction to the US healthcare system. Overviews of existing delivery systems, healthcare delivery concepts, access to care, and other critical issues are presented. The course includes the mission of public health; models of health promotion and disease prevention; and determinants of health and health services utilization. The financing, organization, staffing, delivery, and payment of the U.S. healthcare system is described, Issues of competition, regulation, technology, quality, primary care, long-term care, mental health and bioethics are introduced and discussed.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLMDE302 — Current Issues, Trends, and Innovations in U.S. Healthcare

Examination of new technologies, health care delivery models, and the phenomenon of sophisticated consumers. Healthcare reimbursement and potential changes in payment structures are explored. Assessment of the impact of science, technology, ethics, and government on the provision of health care.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLMDE303 — Quality Improvement in Healthcare

Assessment of specific interventions and initiatives to improve the quality and cost-efficiency of health care from the perspectives of providers and patients. Analysis of the structures in place to enhance the quality of health care delivery and political and economic influences that affect quality improvement programs in both the public and private sectors.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

BLMDE304 — Organization and Management of Healthcare Systems

This course explores in further detail the organization of current healthcare delivery systems in the United States, and introduces basic management principles as they apply to the delivery of services provided by health science disciplines. Issues addressed include information systems, leadership, team building, fiscal management, human resource management, quality improvement, and management of conflict and change.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLMDE400 — Theories, Practices, and Ethics of Leadership

This course is designed to provide students with a comprehensive understanding of leadership as phenomenon and its impact on the organizational behavior of individuals. Major theories of leadership will be examined and leadership will be integrated into the various internal and external organizational and situational factors. An emphasis will be placed upon developing a personal, ethical leadership style that is applicable in the daily operations of today's organizations.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLMDE410 — Leading Diverse Groups and Teams

This course will examine the principles of building and sustaining highly effective teams through the application of leadership theory to groups that are diverse in gender, ethnicity, education, and functional expertise. Special emphasis will be placed upon the role of the leader in establishing effective collaboration among the members, comprehensive understanding of the nature of teams, their functioning and impact on individual and group behavior.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLMDE430 — Operations Management

This course provides essential managerial-level comprehension of operations management and its practical applications in the business environment. Students learn how processes, products and services interact in operations management. The course also touches on the subject of project management. Students will also develop comprehension of resource management, quality management and quality improvement.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BLMDE440 — Project Management

This course provides an overview of the concepts, procedures and fundamental processes of project management for working professionals. Students are introduced to the principles, tools, and techniques of project management within an integrative framework. The course emphasizes that, for most organizations, projects are the primary means for implementing strategic initiatives. This course uses real-world examples and identifies common mistakes and pitfalls in project management. The nine areas of the Project Management Institute's Project Management Body of Knowledge (PMBOK) are incorporated.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

BM100 – Introduction to Business Management

This course introduces the student to the basic business management concepts and techniques used in organizing and maintaining an effectively run business or department. An overview of personnel management, budgeting, staffing, and evaluation of work flow will be discussed.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM105 – Business Applications 1 (documents and presentations)

This course introduces the student to the basics of word processing and presentation development. It will demonstrate how to create presentation of material for the purposes of disseminating information and communicating to individuals or groups. The student will create a variety of documents and presentation formats. The information taught in this course will allow for the student to sit for certification in presentations.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM110 – Business Applications 2 (spreadsheets and databases)

This course introduces the student to skills associated with spreadsheet creation and use. It will introduce the student to the basic principles and techniques required for database design. The skills learned will be applied to the development of tables, forms, reports, templates, and custom form letters. The information taught in this course will allow for the student to sit for certification in spreadsheets.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM115 – Business Math

This course is designed to provide students with the ability to apply mathematical applications in business practices. It includes a review of basic business math skills with particular emphasis on fractions, percentages, bank reconciliations, equations, discounts, interest, taxes, and financial statements.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM120 – Business Communications

This course is designed to introduce practical communication skills, including the mechanics and principles of effective business writing and research methods and compiling reports. Focus is on an understanding of writing styles appropriate to the business world and on speaking and presentation styles appropriate to the key activities in the business world.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM125 – Introduction to Accounting

This course is designed to introduce an understanding of accounting principles along with a working knowledge of GAAP and the accounting process. Students learn to work with financial statements, reconciliation and balance sheets.

Prerequisite: BM115 - Business Math
50 Hours **5.0 Quarter Credits**

BM130 – Electronic Accounting

This course is designed to provide students with a working knowledge of accounting software through numerous practical exercises. Students will become familiar with the basic bookkeeping fundamentals for managing both a personal / service-type business and a merchandising business.

Prerequisite: BM125 – Introduction to Accounting
50 Hours **5.0 Quarter Credits**

BM135 – Ethics and Professionalism

This course is designed to provide students with an understanding of ethics and professionalism in the workplace. Students will cover the relationship between management, employees and customers within the workplace. Techniques on how to encourage and maintain ethics and professionalism in the workplace will be covered.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM200 – Business Law

This course is designed to provide the student with information on the essentials of the nature of law and the functions of the judicial system in the business environment. An overview of legal characteristics of a sole proprietorship, partnerships, limited liability companies and corporations are discussed.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM205 – Human Resource Management

This course is designed to introduce students to the various topics covered by human resources management. The primary topics are the functions of human resources such as job analysis and planning, recruiting, staffing, orientation and training, performance appraisal, career planning, compensating, and motivating. A wide variety of secondary topics will also be covered in this course to include learning principles, human resource development interventions, employee orientation and socialization, performance management, coaching, diversity, and employee counseling.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM210 – Business Operations

This course is designed to provide students with concepts, techniques and tools to design, analyze, and improve business operations. The course will cover topics such as forecasting, product design, quality control, inventory and management.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM215 – Business Finance

This course is designed to provide students with the foundations of finance and financial reporting with emphasis on business corporations. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities.

Prerequisite: BM115 – Business Math
50 Hours **5.0 Quarter Credits**

BM220 – Business Marketing and eMarketing

This course is designed to provide students with an introduction to contemporary marketing theories and eMarketing theories and implementation. Topics covered will include identifying market opportunity, product development, promotion planning, pricing decisions and channels of distribution.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM225 – International Management

This course is designed to provide students with an introduction to international management. The topics will cover the major theories of multinational and international management. Other topics include influences on ethics, social responsibility, strategic planning and managerial styles.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM230 – Business Management Capstone

This course is designed to provide students with the opportunity to develop a business plan that will apply theories and techniques taught throughout the program.

Prerequisite: BM100 through BM225 courses
50 Hours 5.0 Quarter Credits

BM300 – Economics

This course is designed to provide students with an introduction to economics. Topics to be covered include economic theories, methods, and principles of economics.

Prerequisite: None 50 Hours 5.0 Quarter Credits

BM305 – Organizational Behavior

This course is designed to provide students with an overview of organizational theory. Topics to be covered will be individual and team behavior with an emphasis on developing team-building skills, structure, size, technology, power relationships and how organizations survive, decline, grow and change.

Prerequisite: None 50 Hours 5.0 Quarter Credits

BM315 – Strategic Operations Management

This course is designed to provide students with techniques of strategic management. The focus will be on the strategies that management can use to make informed decisions regarding operations, marketing, human resources, accounting, and information systems.

Prerequisite: None 50 Hours 5.0 Quarter Credits

BM325 – Critical Thinking and Decision Making

This course is designed to focus on analysis, synthesis, prescription, and application of critical thinking and decision making within the organization. Students learn how managers deal clearly, rationally, and creatively within a diverse and dynamic workplace. This course equips students with skills in critical thinking and decision making that allows them to identify and solve organizational problems, as well as provide strategic direction.

Prerequisite: None 50 Hours 5.0 Quarter Credits

BM330 – Marketing Management

This course is designed to provide students with the knowledge to apply principles and strategies for marketing products and services to industrial, commercial and governmental entities. Students will understand the strategic role of marketing

and develop the ability to define and analyze the marketing problems dealt with by managers. In addition, course discusses ways in which market information and product life cycle affect product and production design; forecasting techniques; interdependencies between marketing and operations functions.

Prerequisite: None 50 Hours 5.0 Quarter Credits

BM400 – Consulting Management

This course is designed to provide students with the fundamentals of management consulting. Topics cover the consulting process, skills for project, team, and client management, the ethics of consulting, careers in consulting, key models and theories used to understand management consultancy work practice areas in the consulting industry, and issues surrounding effective use of consultants.

Prerequisite: None 50 Hours 5.0 Quarter Credits

BM410 – Organizational Communication

This course is designed to provide students with a more in-depth view of communication within the business world. Topics cover writing clarity, conciseness and comprehensive for the business world. Presentation and report writing will also be covered.

Prerequisite: None 50 Hours 5.0 Quarter Credits

BM415 – Negotiation and Contract Management

This course is designed to provide the students with the knowledge for negotiation management. Topics covered will help student know how to apply strategies, tactics and counter-tactics to achieve success in contract negotiations. Contract terminology and contract expectations will also be discussed. Students will understand the difference between federal governmental and commercial contracts and negotiations. It introduces students to the consulting process, skills for project, team, and client management, the ethics of consulting, careers in consulting, key models and theories used to understand management consultancy work practice areas in the consulting industry, and issues surrounding effective use of consultants.

Prerequisite: None 50 Hours 5.0 Quarter Credits

BM425 – Business Governance and Social Responsibility

This course is designed to provide students with the necessary knowledge to understand business governance and social responsibility. Topics to be covered are business ethics and its influence on economic, financial, managerial and environmental aspects of business.

Prerequisite: None 50 Hours 5.0 Quarter Credits

PLATT COLLEGE
**COURSE
 DESCRIPTIONS**

BM430 – Conflict and Change Management

This course is designed to provide students with the knowledge to examine workplace conflict and its relationship to organizational change. It explores the causes of conflict and identifies strategies for management and improvement. Topics to be covered are skills for managing change; the theory underlying the creation of integrated conflict management systems in organizations; the nature of such systems and how they are developed, designed and evaluated.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM440 – Case Studies in Leadership and Management

This course is designed to provide the students the exposure to various topics that they will face in the role of leaders and managers. Students will review case studies and complete a case brief and analysis. Students will discuss topics such as leadership, organizational change, planning and managing change in an organization.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM445 – Business Analytics

This course is designed to provide students with an introduction to business analytics. Business analytics uses data, methods and fact-based management to support and improve decision making. Students will review the various types of data and models used in business analytics. The course will also cover the benefits of employing analytics and a structured approach to problem –solving in management.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BM450 – Business Management Capstone

This course is designed for students to complete a final project that will utilize all of the knowledge that they have obtained throughout the program. It will allow students to demonstrate mastery of the various course competencies in the business management concentration.

Prerequisite: completion of all Business Management courses
50 Hours **5.0 Quarter Credits**

BMDE100 – Introduction to Business Management

This course introduces the student to the basic business management concepts and techniques used in organizing and maintaining an effectively run business or department. An overview of personnel management, budgeting, staffing, and evaluation of work flow will be discussed.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BMDE105 – Business Applications 1 (documents and presentations)

This course introduces the student to the basics of word processing and presentation development. It will demonstrate how to create presentation of material for the purposes of disseminating information and communicating to individuals or groups. The student will create a variety of documents and presentation formats. The information taught in this course will allow for the student to sit for certification in presentations.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BMDE110 – Business Applications 2 (spreadsheets and databases)

This course introduces the student to skills associated with spreadsheet creation and use. It will introduce the student to the basic principles and techniques required for database design. The skills learned will be applied to the development of tables, forms, reports, templates, and custom form letters. The information taught in this course will allow for the student to sit for certification in spreadsheets.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BMDE115 – Business Math

This course is designed to provide students with the ability to apply mathematical applications in business practices. It includes a review of basic business math skills with particular emphasis on fractions, percentages, bank reconciliations, equations, discounts, interest, taxes, and financial statements.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BMDE120 – Business Communications

This course is designed to introduce practical communication skills, including the mechanics and principles of effective business writing and research methods and compiling reports. Focus is on an understanding of writing styles appropriate to the business world and on speaking and presentation styles appropriate to the key activities in the business world.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BMDE125 – Introduction to Accounting

This course is designed to introduce an understanding of accounting principles along with a working knowledge of GAAP and the accounting process. Students learn to work with financial statements, reconciliation and balance sheets.

Prerequisite: BMDE115 – Business Math
Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BMDE130 – Electronic Accounting

This course is designed to provide students with a working knowledge of accounting software through numerous practical exercises. Students will become familiar with the basic bookkeeping fundamentals for managing both a personal / service-type business and a merchandising business.

Prerequisite: BMDE125 – Introduction to Accounting

Prerequisite: None 50 Hours 5.0 Quarter Credits

BMDE135 – Ethics and Professionalism

This course is designed to provide students with an understanding of ethics and professionalism in the workplace. Students will cover the relationship between management, employees and customers within the workplace. Techniques on how to encourage and maintain ethics and professionalism in the workplace will be covered.

Prerequisite: None 50 Hours 5.0 Quarter Credits

BMDE200 – Business Law

This course is designed to provide the student with information on the essentials of the nature of law and the functions of the judicial system in the business environment. An overview of legal characteristics of a sole proprietorship, partnerships, limited liability companies and corporations are discussed.

Prerequisite: None 50 Hours 5.0 Quarter Credits

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BMDE450 – Business Management Capstone

This course is designed for students to complete a final project that will utilize all of the knowledge that they have obtained throughout the program. It will allow students to demonstrate mastery of the various course competencies in the business management concentration.

Prerequisite: completion of all Business Management courses
50 Hours **5.0 Quarter Credits**

BPM300 – Intermediate Project Management

This course is designated to provide students with a more in-depth overview of project management in the context of people, processes, tools and procedures. It addresses the following areas: definition of a project management, the project life cycle models, project management processes (process mapping, process flow diagrams, project management documents), project stakeholders and groups.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BPM305 – Advanced Project Management

This course is designed to provide students with the scope for a project and developing a complete project overview statement. Developing a work breakdown structure (WBS) and the fundamentals of scheduling, including a review of the three constraints (Scope, Time, Cost) related to quality are included. It addresses the following areas: Project Integration Management, Project Scope Management, Project Time Management, Project Cost Management, and Project Quality Management.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BPM310 – Project Management Execution and Control

This course is designed to provide students with a review of control and tracking steps to ensure a project's successful closure on time and within budget. Discussion on managing scope, change and identify variances that require action. It addresses the following areas: project human resource management, project communication management, project risk management, and project procurement management.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BPM450 – Project Management Capstone

This course is designed for students to complete a final project that will utilize all of the knowledge that they have obtained throughout the program. It will allow students to demonstrate mastery of the various course competencies in the project management concentration.

Prerequisite: completion of all Business Management and Project Management courses
Prerequisite: None **50 Hours** **5.0 Quarter Credits**

Discussion on managing scope, change and identify variances that require action. It addresses the following areas: project human resource management, project communication management, project risk management, and project procurement management.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

BPMDE450 – Project Management Capstone

This course is designed for students to complete a final project that will utilize all of the knowledge that they have obtained throughout the program. It will allow students to demonstrate mastery of the various course competencies in the project management concentration.

Prerequisite: completion of all Business Management and Project Management courses
50 Hours **5.0 Quarter Credits**

CHM102 – Chemistry

This course will provide an introduction to the principles of chemistry, including inorganic chemistry, organic chemistry, and biochemistry. Topics covered include atomic structure, bonding and nomenclature, gas laws, solutions, acids and bases, pH and equilibrium, organic and biochemical structure and reactions, and nuclear chemistry.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

CHM103 – General Chemistry

This course provides an introduction to the principles of chemistry, including inorganic chemistry, organic chemistry, and biochemistry. Topics covered include atomic structure, bonding and nomenclature, gas laws, solutions, acids and bases, pH and equilibrium, organic and biochemical structure and reactions, and nuclear chemistry.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

CHMDE103 – General Chemistry

This course provides an introduction to the principles of chemistry, including inorganic chemistry, organic chemistry, and biochemistry. Topics covered include atomic structure, bonding and nomenclature, gas laws, solutions, acids and bases, pH and equilibrium, organic and biochemical structure and reactions, and nuclear chemistry.

Prerequisite: None **30 Hours** **3.0 Quarter Credits**

CHT101 – Hemodialysis

This course includes principles of renal failure and dialysis. The role of the hemodialysis technician in a dialysis unit and the operation of the dialysis devices. Universal precautions including asepsis and aseptic technique. This course will also cover the anatomy and physiology of the Renal System, pre-dialysis patient preparation and preparing the dialysis equipment.

Prerequisite: None **96 Hours**

CHT102 – Hemodialysis Clinical Rotation

Formal, structured off-campus clinical experience in licensed hemodialysis facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of certified hemodialysis technician. The student is under the direct supervision of one or more licensed hemodialysis technicians or registered nurses. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a certified hemodialysis technician. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the hemodialysis technician in the health care team.

Prerequisite: CHT101 **200 Hours**

CIT300 – IT Fundamentals

This course prepares students to work as computer support and bench technicians by teaching the fundamentals of PC and peripheral hardware and software selection, installation, maintenance, and troubleshooting.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CIT310 – Networking Fundamentals I

This course prepares students to design, configure, install, manage, and troubleshoot network hardware and software.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CIT320 – Cybersecurity Fundamentals I

This course prepares students to manage security issues as an IT professional by teaching the fundamentals of cybersecurity.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CIT330 – Linux Administration

This course prepares students to use the Linux operating system in a variety of settings and scenarios.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CIT340 – Ethical Hacking I

This course prepares students to work as computer security professional by teaching the fundamentals of ethical hacking.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CIT350 – Incident Response I

This course covers the lifecycle of incident response, including preparation, data collection, data analysis and remediation. Provides a thorough hands-on understanding of security operations, cyber defense, analysis, cyber defense infrastructure support, how to respond to and manage incidents of breach and effectively assess and manage current and future vulnerabilities.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CIT360 – Digital Forensics

This course familiarizes students with skills and best practices for computer forensics investigation and analysis. Students will learn how to gather and analyze digital evidence and use critical thinking skills to solve computer-based crimes.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CIT370 – Incident Response II

This course prepares students to work as computer security professional by teaching the fundamentals of cybersecurity.

Prerequisites: Incident Response I 50 hours 4.0 Quarter Credits

CIT380 – Penetration Testing

This course provides a guide to operating as a penetration testing professional. It includes standards and best practices, specific hacking techniques, test design, and report-writing.

Prerequisites: None 50 hours 4.0 Quarter Credits

CIT400 – Network Defense and Countermeasures

This course prepares students to defend networks against attacks by implementing proactive protection measures and by responding to active and potential threats. It covers multiple techniques for network defense, including firewalls, intrusion-detection systems, VPNs, encryption, and system hardening.

Prerequisites: None 50 hours 4.0 Quarter Credits

CIT410 – Risk Assessment and Analysis

The course prepares students to understand the importance of risk assessment and analysis in the world of cybersecurity. Students will learn the fundamentals of risk management and assessment, threats, vulnerabilities and exploits, as well as what is involved in the analysis and development of plans for businesses.

Prerequisites: None 50 hours 4.0 Quarter Credits

CIT420 – Cybersecurity Fundamentals II

This course prepares students to manage security issues as an IT professional by teaching the fundamentals of cybersecurity.

Prerequisites: CIDE320 – Cybersecurity Fundamentals I 50 hours 4.0 Quarter Credits

CIT430 – Linux Security

This course familiarizes students with Linux operating system fundamentals, with a focus on security. It covers a full range of command-line and shell activities, including managing accounts, developing account security policies, setting file permissions, and managing storage. It also looks at scripting and automation, networking configuration, and a variety of security issues such as software management security policies, footprinting, firewalls, and intrusion detection.

Prerequisites: None 50 hours 4.0 Quarter Credits

CIT440 – Ethical Hacking II

This course prepares students to work as computer security professional by teaching the fundamentals of ethical hacking.

Prerequisites: CTDE340 – Ethical Hacking 50 hours 4.0 Quarter Credits

CIT450 – Cybersecurity Programs and Policies

This course familiarizes students with skills and best practices for developing and implementing effective cybersecurity policies within an organization-wide cybersecurity framework.

Prerequisites: None 50 hours 4.0 Quarter Credits

CIT460 – Cybersecurity Capstone

This course reviews all the content from the programs and prepares the students for a future in cybersecurity. It brings together all of the skills and knowledge required to be successful in various cybersecurity positions.

Prerequisites: all program courses 50 hours 4.0 Quarter Credits

CITDE300 – IT Fundamentals

This course prepares students to work as computer support and bench technicians by teaching the fundamentals of PC and peripheral hardware and software selection, installation, maintenance, and troubleshooting.

Prerequisites: None 50 hours 4.0 Quarter Credits

CITDE310 – Networking Fundamentals I

This course prepares students to design, configure, install, manage, and troubleshoot network hardware and software.

Prerequisites: None 50 hours 4.0 Quarter Credits

CITDE320 – Cybersecurity Fundamentals I

This course prepares students to manage security issues as an IT professional by teaching the fundamentals of cybersecurity.

Prerequisites: None 50 hours 4.0 Quarter Credits

CITDE330 – Linux Administration

This course prepares students to use the Linux operating system in a variety of settings and scenarios.

Prerequisites: None 50 hours 4.0 Quarter Credits

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

CITDE340 – Ethical Hacking I

This course prepares students to work as computer security professional by teaching the fundamentals of ethical hacking.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CITDE350 – Incident Response I

This course covers the lifecycle of incident response, including preparation, data collection, data analysis and remediation. Provides a thorough hands-on understanding of security operations, cyber defense, analysis, cyber defense infrastructure support, how to respond to and manage incidents of breach and effectively assess and manage current and future vulnerabilities.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CITDE360 – Digital Forensics

This course familiarizes students with skills and best practices for computer forensics investigation and analysis. Students will learn how to gather and analyze digital evidence and use critical thinking skills to solve computer-based crimes.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CITDE370 – Incident Response II

This course prepares students to work as computer security professional by teaching the fundamentals of cybersecurity.

Prerequisites: Incident Response I
50 hours 4.0 Quarter Credits

CITDE380 – Penetration Testing

This course provides a guide to operating as a penetration testing professional. It includes standards and best practices, specific hacking techniques, test design, and report-writing.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CITDE400 – Network Defense and Countermeasures

This course prepares students to defend networks against attacks by implementing proactive protection measures and by responding to active and potential threats. It covers multiple techniques for network defense, including firewalls, intrusion-detection systems, VPNs, encryption, and system hardening.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CITDE410 – Risk Assessment and Analysis

The course prepares students to understand the importance of risk assessment and analysis in the world of cybersecurity. Students will learn the fundamentals of risk management and assessment, threats, vulnerabilities and exploits, as well as what is involved in the analysis and development of plans for businesses.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CITDE420 – Cybersecurity Fundamentals II

This course prepares students to manage security issues as an IT professional by teaching the fundamentals of cybersecurity.

Prerequisites: CIDE320 – Cybersecurity Fundamentals I
50 hours 4.0 Quarter Credits

CITDE430 – Linux Security

This course familiarizes students with Linux operating system fundamentals, with a focus on security. It covers a full range of command-line and shell activities, including managing accounts, developing account security policies, setting file permissions, and managing storage. It also looks at scripting and automation, networking configuration, and a variety of security issues such as software management security policies, footprinting, firewalls, and intrusion detection.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CITDE440 – Ethical Hacking II

This course prepares students to work as computer security professional by teaching the fundamentals of ethical hacking.

Prerequisites: CITDE340 – Ethical Hacking
50 hours 4.0 Quarter Credits

CITDE450 – Cybersecurity Programs and Policies

This course familiarizes students with skills and best practices for developing and implementing effective cybersecurity policies within an organization-wide cybersecurity framework.

Prerequisites: None **50 hours** **4.0 Quarter Credits**

CITDE460 – Cybersecurity Capstone

This course reviews all the content from the programs and prepares the students for a future in cybersecurity. It brings together all of the skills and knowledge required to be successful in various cybersecurity positions.

Prerequisites: all program courses
50 hours 4.0 Quarter Credits

CJ140—Introduction to Report Writing

This course examines the role of report writing as it relates to police work. Students will gain an objective look at all aspects of investigations and how they are documented in various report forms. Students will actively participate in discussions and role play situations with the goal of investigating a situation and documenting it on the proper police forms. Interview and interrogation techniques will be explained and students will demonstrate their ability to differentiate between these two types of police practices.

Co-requisite: None **50 Hours** **4.5 Quarter Credits**

CJ145—Corrections 1

This course will examine the historical development and present philosophies in the handling of those adjudged to be law violators. Federal, state, and local correctional systems will be studied, including prison/jail architecture and its impact on safety and prison organization. Various sentencing/presentencing/release aspects such as--the bail process and bail schedules, probation and intermediate sanctions, parole and prisoner reentry--are examined. A study is then made of the various clients within, and the differences between, the adult and juvenile correctional systems.

Co-requisite: LAW101 – Introduction to Law
50 Hours **4.5 Quarter Credits**

CJ155—Private Security 1

This course coincides with the California State Bureau of Security and Investigative Services mandated security officer training curriculum including: Powers to Arrest, Terrorism/Weapons of Mass Destruction, Public Relations, Observation and Documentation, Officer Safety, Crime Scene preservation, Communication, Legal Aspects, Courtroom Demeanor, and Introduction to Security Supervision. Successful completion of this course should result in the subject mastery required to sit for the State of California Guard Card test.

Co-requisite: LAW101 – Introduction to Law
50 Hours **4.5 Quarter Credits**

CJ165—Introduction to Criminal Law

This course will be an overview of the criminal justice system in America, with an emphasis on criminal procedures and California statutes including: a basic study of laws of arrest, relevant Constitutional amendments, the federal and state court systems, basic pre-trial procedures and motions, the elements of a crime/corpus delicti, initial and felony arraignments, search and seizure applications and exceptions, Miranda admonition and waivers, grand jury indictment/true Bill,

confessions and Beheler admonitions, felony preliminary hearings, as well as a study of Murder which covers 1st and 2nd degree homicide, voluntary and involuntary manslaughter, and Watson Murder as it applies to DUI cases.

Co-requisite: LAW101 – Introduction to Law
50 Hours **4.5 Quarter Credits**

CJ175—Criminology 1

This course will define criminology; describe the roles, duties, and impact of criminologists on the criminal justice system; define the basics of an anti-social personality; compare the classical, biological, psychological, psychiatric, social structure, social process, and social development theories of criminology; consider methods of applying scientific study to criminal activity; and relate criminology theory and practice to careers in law enforcement. Where criminology theories come from will also be studied, as will how various theories interact and/or cancel each other out—as well as evaluating the central theme and question of free will versus determinism as the primary causal factor of criminal behavior.

Co-requisite: LAW101 – Introduction to Law
50 Hour **4.5 Quarter Credits**

CJ185—Criminal Investigation

This course will provide an introduction to criminal investigation, including crime scene protection and processing procedures, inductive and deductive reasoning, identification and collection of evidence, case preparation, interview/interrogation strategies and tactics, criminal intelligence and surveillance operations, undercover operations and confidential informant management, death investigations, and basic preliminary investigation of crimes against property and crimes against persons with consideration of identifying suspects, establishing elements of specific crimes, and then connecting suspects to those crimes. Legal issues affecting criminal investigation will also be studied with an emphasis on search warrant preparation.

Co-requisite: LAW101 – Introduction to Law
50 Hours **4.5 Quarter Credits**

CJ200—Corrections 2

This course examines the handling of special offenders, including drug addicted, mentally ill, aging, sex offender, HIV/AIDS infected, and violent offenders within the various Federal, state, and local correctional systems. The daily routine, responsibilities, and duties of correctional officers will be studied--as well as the unique concerns of correctional managers as they relate to inmates and prison staff. The everyday prison life of inmates is addressed, including rehabilitation/educational opportunities, discipline, prison gangs, and interaction with vocational prison staff. In addition, Constitutional cases affecting issues of capital punishment, cruel and unusual punishment, and prisoner rights are presented.

Prerequisite: CJ145 – Corrections 1
50 Hours **4.5 Quarter Credits**

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

CJ205—Private Security 2

This course will examine the various business models and environments of the private security industry such as uniformed private security officer, fixed post versus mobile foot or vehicular patrol techniques, corporate uniformed security and corporate investigative security functions, corporate and retail shrinkage due to internal and external theft, sub rosa / undercover security operations for varied clients, cyber security for corporate and retail, and consulting opportunities as they relate to physical security. Students will also learn and hone basic job interviewing and soft skills required in the security industry.

Prerequisite: CJ155 – Private Security 1

50 Hours

4.0 Quarter Credits

CJ210—Intermediate Criminal Law

This course is an overview of the criminal justice system in America, with an emphasis on California criminal procedures and statutes including: crimes against persons such as assault with a deadly weapon and sex crimes, property crimes such as burglary and grand theft auto, social crimes such as narcotics offenses and prostitution, crimes of treason such as sedition and espionage, and crimes against the state such as perjury and obstruction of justice. Available criminal defenses insanity, duress, and mistake of law/fact are also considered.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ215—Introduction to Juvenile Justice

This course examines prevalent patterns of juvenile delinquency, relates these patterns to theories of child and adolescent development, and considers various theories regarding the cause of juvenile criminal behavior. In addition, this course surveys the roles of the police, courts, and juvenile probation in regards to California's balanced and restorative justice system. California Welfare and Institution 330 dependent child, 601 status offender, and 602 delinquent offender Codes are also studied—as well as Dennis H juvenile detention hearings, Gladys R delinquency hearings for offenders under 14 years of age, and Edsel P fitness hearings to determine waiver of serious juvenile offenders to adult court. Court cases pertinent to the areas of the juvenile justice system that are covered are also discussed.

Co-requisite: LAW101 – Introduction to Law

50 Hours

4.5 Quarter Credits

CJ220—Criminology 2

This course will initially examine social conflict theories of criminology such as critical, left-realist, feminist criminology, postmodern, peacemaking, and convict criminology, comparing them to previously learned criminology theories. The course emphasis then shifts to applying the many criminology theories to a variety of crimes and the individuals who commit them. The irony of crimes committed by persons ranging from the affluent to the deprived is related by typologies of: murder, gangs-related crime, robbery, burglary, auto theft, arson, sexual offenses, narcotics offenses, crimes against children, fraud, computer crimes, embezzlement, receiving stolen property, terrorism, corporate/white collar crime, insider trading, gambling, prostitution, money laundering, and public corruption.

Prerequisite: CJ175 – Criminology 1

50 Hours

4.5 Quarter Credits

CJ226—Contemporary Terrorism 1

This course will examine the influence and impact of international and domestic terrorism on the criminal justice system—and to a lesser degree the impact of contemporary legal, civic, and political issues. A comparison of several terrorism definitions will be explored as they relate to: violence as the terrorists' operational mechanism, the desire for publicity, asymmetrical tactics, and ideological/religious/cultural relevance. A post world war II history of international terrorism culminates in the 9/11 attack and the failure of U.S. intelligence to "connect the dots." A partial worldwide geopolitical study of terrorist groups, their methods, and histories will be examined—ending in Europe.

Co-requisite: LAW101 – Introduction to Law

50 Hours

4.5 Quarter Credits

CJ230—Advanced Report Writing

This course will teach proper law enforcement report writing and field note taking and the role each plays in effective, successful criminal prosecutions. The preparation of clear, concise, and accurate reports will be stressed with an emphasis on: elements of composition, syntax, grammar, punctuation, spelling and knowledge of law enforcement abbreviations. Crimes against property and crimes against persons will be covered including: robbery, burglary, auto theft, and assault with a deadly weapon—as well as narcotics offenses, sexual offenses, white collar crimes, and criminal gang injunctions. Practice in arrest and crime report writing is emphasized and proficiency must be demonstrated, as well as an understanding of the importance exemplary report preparation.

Prerequisite: CJ140 – Introduction to Report Writing

50 Hours

4.0 Quarter Credits

CJ235—Advanced Juvenile Justice

This course initially explores the various duties and responsibilities of juvenile probation including: initial juvenile intake, social study reports and rehabilitation reports/recommendations to the juvenile court, and detention responsibilities both short and long term. The numerous non-incarcerative community-based programs and options available for juveniles are studied, as are the many treatment technologies available. Juvenile institutionalization is also examined, including: legacy versus best practice juvenile facility design, staff/client span of control, in custody educational practices, and institutional rehabilitation opportunities. Juvenile gang history, organization, demographics, recruitment, impact on all facets of the juvenile justice system, and involvement in narcotics trafficking are discussed. Court cases pertinent to the subject matters covered are also examined.

Prerequisite: CJ215 – Introduction to Juvenile Justice
 50 Hours 4.0 Quarter Credits

CJ240—Contemporary Terrorism 2

This course continues the worldwide geopolitical study of terrorist groups, their methods, and histories in North Africa and the Middle East; the Persian Gulf; Northeast, Central and Southern Africa; Southern and Southeast Asia; the Pacific Rim; and Latin America and South America. An additional examination of counterterrorism agencies, methods, hostage rescue techniques, risk analysis, impact of The Patriot Act, aviation security, cyber security, impact of the Patriot Act—as well as state-of-the-art weaponry and technology and personal protection techniques—will also occur. Students will also learn how the Intelligence Community--partnered with cutting edge intelligence gathering techniques such as metadata, open source intelligence, and mathematics-based crime forecasting—hopes to identify and project terrorist threats deep into the future.

Prerequisite: CJ226 – Contemporary Terrorism 1
 50 Hours 4.0 Quarter Credits

CJ245—Introduction to Forensics

This course applies scientific methodology to crime scene investigation and crime solving, including an analysis of crime scene investigation, securing and protection of a crime scene, keeping a homicide log, the initial walk through of a homicide scene, crime scene photography, crime scene reconstruction, physical evidence collection and packaging, autopsy methodology, rigor mortis and livor mortis, maintaining the chain of custody, fingerprint collection and identification techniques, tool mark identification, ballistic/firearms evidence identification and collection, gunpowder residue, and castings of tires and shoeprints. Several of these forensic techniques will be practiced until proficiency is demonstrated.

Co-requisite: LAW101 – Introduction to Law
 50 Hours 4.5 Quarter Credits

CJ250—Advanced Forensics

This course will continue the application of scientific methodology to crime scene investigation and crime solving, including: blood spatter analysis techniques and documentation, a study of illicit drug types and tests, metabolism and absorption of drugs and alcohol, trace evidence identification and collection, arson and explosives investigation, toxicology and blood analysis, poison absorption rates, document examination and questioned document investigation. DNA analysis techniques are also studied, including mitochondrial DNA, familial DNA, and biological stain analysis—as well as DNA application to sexual crime investigations. Several of these techniques will be practiced until proficiency is demonstrated. Additionally, using the forensics techniques mastered in Introduction to Forensics and Advanced Forensics, the students will respond to and process a homicide scene as if they were actual law enforcement personnel.

Prerequisite: CJ245 – Introduction to Forensics
 50 Hours 4.0 Quarter Credits

CJ305—Introduction to Criminal Behavior

This course will focus on an overview of criminal behavior. Students will learn what criminal behavior is, why we study it, and how it relates to their careers as criminal justice professionals. Specifically the course will cover the definition of criminal behavior; the theories of criminal behavior; and the origins of criminal behavior including developmental risk factors, biological factors, and learning/situational factors. Human aggression, violence, and their causal models will also be studied--especially how they relate and are addressed by the criminal justice system. Juvenile delinquency, as well as its causes and effects, are also considered. Students will finish with an emphasis upon criminal psychopathy and mental disorders, as they relate to law enforcement and the criminal justice system.

Prerequisite: LAW101 – Introduction to Law
 50 Hours 4.5 Quarter Credits

CJ310—Community Corrections 1

This course will deal with the various aspects of community based corrections and the effects of evidence-based practices upon the prisoner and the community at large. The history and development of probation and parole will be considered as well as a variety of non-incarcerative options. Students will study the methodology probation officers follow to process and access offenders including pretrial supervision, conducting the presentence investigation and report, classification and supervision of probationers, community supervision for offenders with special needs, and the modification and/or revocation of probation. AB109 release procedures from state prisons to county probation departments will also be examined.

Prerequisite: LAW101 – Introduction to Law
 50 Hours 4.0 Quarter Credits

CJ330--Constitutional Law 1

This course is an introduction to United States constitutional law with an emphasis on key US Supreme Court Decisions. The history of the constitution's creation will be examined as well as key concepts including rule of law, judicial review, separation of powers/checks and balances, and federalism in relation to states' rights. The organization and constitutional powers/limitations of the congress will be studied, as will the organization and constitutional powers/limitations of the president and the executive branch. The organization and roles and limitations of the judiciary are considered, as well as historical Supreme Court eras and various Constitutional interpretations. The creation, delegation of powers, and limitations of federal administrative agencies also discussed.

Prerequisite: LAW101 – Introduction to Law
50 Hours **5.0 Quarter Credits**

CJ335—Introduction to Trial Procedures

This course is an introduction examining the goals and structures of the criminal justice system as well as considering issues such as the rule of law, court structures, venue, and jurisdiction. Additionally, areas that impact the pretrial process such as search and seizure, expectation of privacy zone, Fourth Amendment exceptions, inspections and regulatory searches, probable cause, search warrants, the exclusionary rule, arrests with or without warrants, reasonable force to effect an arrest, the Miranda Admonition, booking, stop and frisk, cursory weapons search, privilege against compulsory self-incrimination, arraignment, preliminary hearing, criminal complaint versus grand jury indictment, and right to counsel during the criminal legal process are studied.

Prerequisites: LAW101 – Introduction to Law
50 Hours **5.0 Quarter Credits**

CJ355—Laws of Evidence 1

This course is designed as an introductory level evidence course. Topics covered will be the history and development of evidence law including trial by ordeal, trial by combat, and the advent of the modern adversary system, as well as a comparison of various legal systems around the globe. Federal and other state evidence law will also be compared with the California Evidence Code. Different burden of proof levels are examined, as are presumptions and inference in criminal and civil court, types and forms of evidence, chain of custody, identification and authentication of evidence, best evidence, the balancing test, 1538.5 P.C. motions to suppress evidence and other pretrial motions, objections during trials, relevancy, methods

of proving character and the admissibility or inadmissibility of prior bad acts and/or crimes. The elements of witness competency are also studied, including personal knowledge, duty to tell the truth, capacity to communicate, and the competency of children as witnesses.

Prerequisites: LAW101 – Introduction to Law
50 Hours **5.0 Quarter Credits**

CJ360—Immigration

This course will explore the legal, historical, and policy perspectives that shape U.S. law governing immigration and citizenship. Topics covered include the roles of the congress in making immigration law, the president in enforcing immigration law, and the federal judiciary in interpreting immigration law, as well as the immigration appeal process and process to become a naturalized U.S. citizen. Types of immigration visas, the process to obtain them, and their effects upon immigrant employment, academic study, and the gaining of legal permanent resident status are examined. The operations and cooperation of Immigration and Customs Enforcement (ICE), Customs and Border Enforcement (CBP), and local law enforcement pertaining to the enforcement of border security, immigration law, marriage fraud, document fraud, visa overstay, and drug interdiction and illegal drug cartel activity are also considered. Anti-terrorism efforts by federal, state, and local law enforcement is also studied--as it applies to immigration threat assessment, interagency cooperation, and evolving national priorities.

Prerequisites: LAW101 – Introduction to Law
50 Hours **5.0 Quarter Credits**

CJ370—Issues in Public and Private Security

This course overviews the public and private security fields including basic security functions in varied communities, laws concerning security; the role of public and private security in protecting vital infrastructure, industry, transportation, corporations, and the security doctrines of major commercial endeavors. Risk/threat assessment, hard targeting defenses and solutions, biometric technologies, sub rosa investigations, current cyber security trends, preparing an emergency plan and/or disaster response, security related legal liability and mitigation strategies, current counterterrorism doctrine and methods, and government security contracting will be examined--as well as contemporary career opportunities in the far-reaching public and private security fields. Additionally, case security studies will be considered, as well as the required steps to create a security business.

Prerequisite: LAW101 – Introduction to Law
50 Hours **4.0 Quarter Credits**

CJ375—Management in Security Industry

This course demonstrates the role security supervision, middle management, and upper management play in the smooth, successful operation of a modern private security force. Basic security management skills will be taught including leadership, administration, planning and budgeting, employee recruitment, hiring, retention, and motivation. Methods of training are also considered, as are security officer performance evaluation, the promotional process, laws affecting human resources administration, strategies for productive/effective relationships with law enforcement, the disciplinary process, and various methods for enhancing work place productivity.

Prerequisites: LAW101 – Introduction to Law

50 Hours

4.5 Quarter Credits

CJ380—Modern Policing 1

This course deals with the advancements in technology and how law enforcement is using them. Students will learn technological areas including computer basics and information networks, wireless communications, the internet and open source intelligence, and geographic information--such as cartography basics, automatic vehicle location, and Navstar / global positioning technology. A history of technology and its law enforcement applications will also be examined--as will the configuration of and technologies used within various law enforcement computer-aided communications dispatch centers. Computer and information systems available within individual law enforcement agencies, the external data systems available to most law enforcement agencies, and the ability for interoperability and information/resource sharing between law enforcement agencies is also studied.

Prerequisites: LAW101 – Introduction to Law

50 Hours

4.5 Quarter Credits

CJ385—Police Administration and Management 1

This course introduces issues in police administration including organizational and management theory, historical perspective on the evolution of the police role and operations, the uniqueness of the law enforcement environment, police-community relations--as well as police relations with the media. The role of local law enforcement in combating terrorism is considered as it relates to homeland security, threat assessment, safeguarding critical infrastructure, response to terrorist incidents, and intelligence gathering/dissemination. Police leadership theories and styles, team building, macro and micro political environments, and career paths to the top of a police organization are examined. Factors effecting motivation are also discussed including police culture, dynamics of group behavior, and various motivational theories.

Prerequisite: LAW101 – Introduction to Law

50 Hours

4.0 Quarter Credits

CJ390—Narcotics 1

This course deals with the various aspects of drugs in our society including the enforcement of laws barring illegal drugs, understanding the global and U.S. drug problems, the history of U.S. drug use and drug-control policy, drug delivery methods, and the fundamentals and theoretical perspectives of drug-taking behavior. Students will study the relationship between drugs, crime, and law enforcement such as systemic crime, drug-related crime, psychopharmacological crime, economically compulsive crime, the Goldstein tripartite model of drugs and violence, drugs and delinquency, the freelance model versus the business model of drug sales, crop eradication, U.S. certification, drug interdiction, CBP and U.S. Coast Guard enforcement efforts, street level drug enforcement, major violator drug enforcement, HIDTA, RICO enforcement, reverse sting, buy-bust, buy-walk, undercover operations, controlled buys, search warrant preparation and service, and asset forfeiture operations.

Prerequisites: LAW101 – Introduction to Law

50 Hours

4.0 Quarter Credits

CJ395—Ethics in Law Enforcement

This course focuses on an overview of ethical dilemmas which face our law enforcement personnel and criminal justice system. Students will understand what constitutes moral behavior and what standards must apply to our criminal justice professionals. Topics including necessary versus excessive use-of-force, use of deadly force/Tennessee versus Garner, gratuities, corruption, racial profiling, conduct unbecoming an officer, neglect of duty, discourtesy, violations of law committed by law enforcement personnel, sexual misconduct, confidential informant operations, perjury and false police reports, Brady versus Maryland, the bunker mentality/law enforcement code of silence, acquiescing, and the law enforcement misconduct investigatory system will be studied and applied to federal, state, and local law enforcement and corrections.

Prerequisites: LAW101 – Introduction to Law

50 Hours

4.0 Quarter Credits

CJ405—Advanced Criminal Behavior

This course takes the fundamentals presented in Introduction to Criminal Behavior and applies them to numerous criminal activities. Students learn the definitions, demographic factors and psychological aspects of criminal homicide, assault, and family violence—as well as the violence provoking dynamic cascade/snowballing effect. The investigative psychology regarding serial killers, mass and spree killers--as well as perpetrators of school and workplace violence are considered.

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

Terrorists' motivations, the radicalization/cognitive restructuring processes, and the rationalization of terrorism and violence are studied. The many facets of sexual crimes, including vulnerability factors, classification of rape patterns, offender models and typologies, and sexual assaults upon children and youth are examined. The typologies and psychology of property crime offenders, violent economic crime offenders, crimes of intimidation as well as substance abusers is considered in depth.

Prerequisites: CJ305 – Introduction to Criminal Behavior
50 Hours **4.5 Quarter Credits**

CJ410—Community Corrections 2

This course examines the various non-incarcerative options available within community-based corrections such as residential community supervision programs. Nonresidential graduated sanctions including house arrest and day reporting centers, electronic monitoring and radio frequency and global positioning systems, current monitoring trends, and the impact of GPS systems on criminal investigations and public safety are studied as well. Students will also consider the usage of economic and restorative justice reparations such as community service/labor, fines, and direct restitution to crime victims, victim-offender mediation, conferencing, sentencing circles, victim impact panels, and reparation boards. The parole process will also be discussed, as will prisoner reentry, collateral consequences, and mandatory release. Career opportunities and pathways in community corrections are considered, as is the impact of non-incarcerative options upon juvenile offenders and the juvenile justice system.

Prerequisites: CJ310 – Community Corrections 1
50 Hours **4.0 Quarter Credits**

CJ430—Constitutional Law 2

This course continues the study of Constitutional Law by considering the state and federal relationship, dual sovereignty, preemption, interpretations of the commerce clause, compacts, and interstate comity. The Bill of Rights is examined as it applies to individual rights, incorporation of the amendments, penumbras, and to whom the Bill of Rights applies. Narrow versus wide interpretation of rights pertaining to freedoms of expression, association, the press, and free exercise of religion are discussed. Due process, reproductive liberties, privacy, and economic liberties are also studied. Equal protection under the Constitution is examined through study of the 14th Amendment, the equal protection clause, a history of discrimination and major pertinent Supreme Court decisions, and current day discrimination tests

and remedies. Civil liberties are also discussed as they apply to the criminal justice system including arrest and detention, search and seizure both warrantless and with warrant, border searches, school searches, and exceptions to search and seizure limitations.

Prerequisites: CJ330 – Constitutional Law 1
50 Hours **5.0 Quarter Credits**

CJ435—Advanced Trial Procedures

This course initially continues the study of trial procedures by considering pretrial right to discovery and motions to suppress evidence and/or dismiss charges, as well as motions for continuance, to sever offenses or sever defendants' cases, and to determine competency. Students also learn courtroom evidence rules for relevancy, hearsay, and hearsay exceptions. The jury selection process is covered as it pertains to voir dire, peremptory challenges and challenges for cause, alternate juror selection, jury sequestration, and jury instructions. Trial procedures including opening and closing statements, reasonable doubt, subpoenas, witness examination through direct and cross examination, case strategy and tactics, presenting the prosecution case, presenting the defense case, prosecution rebuttal, the defense's hypothesis of innocence, verdicts, hung juries, refile of cases by the prosecution, types of sentencing and sentences, the death penalty, the appeal process, habeas corpus hearings, and collateral proceedings and writs are also examined.

Prerequisites: CJ335 – Introduction to Trial Procedures
50 Hours **5.0 Quarter Credits**

CJ455—Laws of Evidence 2

This course continues the study of evidence law through mode and order of witness examination, how witness credibility is tested and ensured as per direct and cross examination, witness preparation techniques, types of oaths, exclusion of other witnesses, impeachment for credibility or bias, the criminal defendant as witness, and the no comment rule. The many facets of opinion and expert testimony are considered including what lay witnesses can testify to, opinions as they apply to expert witnesses, the admissibility of scientific evidence, the general acceptance test, the relevancy test, the Daubert Standard, experts who are not scientists, and the judge's role as gatekeeper of scientific evidence and all other evidence types. Hearsay is also explored, and the many hearsay exceptions, as well the current use of privileges such as attorney-client, priest-penitent, marital privilege, and the future trends of evidence law.

Prerequisites: CJ355 – Laws of Evidence 1
50 Hours **5.0 Quarter Credits**

CJ480—Modern Policing 2

This course builds upon the basics of modern police technology by examining improvements in tactical communications, the basic process of crime analysis, the impact of modern crime analysis methods upon patrol tactics and deployment of resources, and use of computerized crime mapping. Additional applications of current technology to investigations are studied including DNA evidence and data banks, digital photography, advances in fingerprint technology and fingerprint data banks, geographic information systems, automatic license plate readers, mobile digital computers in police vehicles, the role of software applications in wiretap court orders, body wires, night vision devices, video evidence, vehicle tracking technologies, tracking of electronic/cell phone communications and cell phone pinging, training of personnel on new technologies, less lethal technologies/use-of-force, body armor advances, drones, predictive policing, and emerging and future technologies.

Prerequisites: CJ380 – Modern Policing 1
50 Hours **4.5 Quarter Credits**

CJ485—Police Administration and Management 2

This course continues the study of police administration by considering aspects of communications, negotiation, and conflict resolution such as the types of communication, barriers to communication, concepts for effective communication, and sources of conflict. Conflict resolution strategies are also considered as are various negotiation tools and ways to implement the negotiation process. Stress and fatigue management strategies are examined including identifying and controlling sources of police stress, police career stages, critical incident management, and wellness programs, Police human resources management is also studied, as is labor relations, the collective bargaining process, the grievance process, control and the law enforcement disciplinary process and investigation of personnel complaints, productivity measurement and control, accountability, the budgeting process, short to long-range planning, personnel deployment and scheduling, and the changing law enforcement environment.

Prerequisites: CJ385 – Police Administration and Management 1
50 Hours **5.0 Quarter Credits**

CJ490—Narcotics 2

This course examines the relationship between drugs, the court system, and corrections by considering the structure and elements of federal and California drug statutes, prosecutions of drug offenses such as possession, possession for sales and sales and transportation, court adjudication, sentencing, parole and non-incarcerative options, drug court alternatives, drug supply versus demand, deterrence versus punishment,

the impact of drug addicted inmates on the correctional system--as well as drug rehabilitation efforts within the correctional system. Students will also study the origin, history, acute/chronic effects on mind and body drugs, patterns of abuse, lethality and potential for addiction and treatment options for various illegal psychoactive substances such as opioids, heroin and prescription analgesics, cocaine and methamphetamine, LSD and other hallucinogens, marijuana and hashish, performance-enhancing drugs such as anabolic steroids, and depressants such as barbiturates and inhalants. Additionally, the topics of drug legalization/criminalization, abuse of legal substances such as alcohol, prescription drugs, and nicotine, and future of substance abuse prevention and treatment are considered.

Prerequisites: CJ390 – Narcotics 1
50 Hours **4.5 Quarter Credits**

CJDE140—Introduction to Report Writing

This course examines the role of report writing as it relates to police work. Students will gain an objective look at all aspects of investigations and how they are documented in various report forms. Students will actively participate in discussions and role play situations with the goal of investigating a situation and documenting it on the proper police forms. Interview and interrogation techniques will be explained and students will demonstrate their ability to differentiate between these two types of police practices.

Co-requisite: LAWDE101 – Introduction to Law
50 Hours **4.5 Quarter Credits**

CJDE145—Corrections 1

This course will examine the historical development and present philosophies in the handling of those adjudged to be law violators. Federal, state, and local correctional systems will be studied, including prison/jail architecture and its impact on safety and prison organization. Various sentencing/presentencing/release aspects such as--the bail process and bail schedules, probation and intermediate sanctions, parole and prisoner reentry--are examined. A study is then made of the various clients within, and the differences between, the adult and juvenile correctional systems.

Co-requisite: LAWDE101 – Introduction to Law
50 Hours **4.5 Quarter Credits**

CJDE155—Private Security 1

This course coincides with the California State Bureau of Security and Investigative Services mandated security officer training curriculum including: Powers to Arrest, Terrorism/Weapons of Mass Destruction, Public Relations, Observation and Documentation, Officer Safety, Crime Scene preservation, Communication, Legal Aspects, Courtroom Demeanor, and Introduction to Security Supervision. Successful completion of this course should result in the subject mastery required to sit for the State of California Guard Card test.

Co-requisite: LAWDE101 – Introduction to Law

50 Hours

4.5 Quarter Credits

CJDE165—Introduction to Criminal Law

This course will be an overview of the criminal justice system in America, with an emphasis on criminal procedures and California statutes including: a basic study of laws of arrest, relevant Constitutional amendments, the federal and state court systems, basic pre-trial procedures and motions, the elements of a crime/corpus delicti, initial and felony arraignments, search and seizure applications and exceptions, Miranda admonition and waivers, grand jury indictment/true Bill, confessions and Beheler admonitions, felony preliminary hearings, as well as a study of Murder which covers 1st and 2nd degree homicide, voluntary and involuntary manslaughter, and Watson Murder as it applies to DUI cases.

Co-requisite: LAWDE101 – Introduction to Law

50 Hours

4.5 Quarter Credits

CJDE175—Criminology 1

This course will define criminology; describe the roles, duties, and impact of criminologists on the criminal justice system; define the basics of an anti-social personality; compare the classical, biological, psychological, psychiatric, social structure, social process, and social development theories of criminology; consider methods of applying scientific study to criminal activity; and relate criminology theory and practice to careers in law enforcement. Where criminology theories come from will also be studied, as will how various theories interact and/or cancel each other out—as well as evaluating the central theme and question of free will versus determinism as the primary causal factor of criminal behavior.

Co-requisite: LAWDE101 – Introduction to Law

50 Hours

4.5 Quarter Credits

CJDE185—Criminal Investigation

This course will provide an introduction to criminal investigation, including crime scene protection and processing procedures, inductive and deductive reasoning, identification and collection of evidence, case preparation, interview/interrogation strategies and tactics, criminal intelligence and surveillance operations, undercover operations and confidential informant management, death investigations, and basic preliminary investigation of crimes against property and crimes against persons with consideration of identifying suspects, establishing elements of specific crimes, and then connecting suspects to those crimes. Legal issues affecting criminal investigation will also be studied with an emphasis on search warrant preparation.

Co-requisite: LAWDE101 – Introduction to Law

50 Hours

4.5 Quarter Credits

CJDE200—Corrections 2

This course examines the handling of special offenders, including drug addicted, mentally ill, aging, sex offender, HIV/AIDS infected, and violent offenders within the various Federal, state, and local correctional systems. The daily routine, responsibilities, and duties of correctional officers will be studied--as well as the unique concerns of correctional managers as they relate to inmates and prison staff. The everyday prison life of inmates is addressed, including rehabilitation/educational opportunities, discipline, prison gangs, and interaction with vocational prison staff. In addition, Constitutional cases affecting issues of capital punishment, cruel and unusual punishment, and prisoner rights are presented.

Prerequisite: CJDE145 – Corrections 1

50 Hours

4.5 Quarter Credits

CJDE205—Private Security 2

This course will examine the various business models and environments of the private security industry such as uniformed private security officer, fixed post versus mobile foot or vehicular patrol techniques, corporate uniformed security and corporate investigative security functions, corporate and retail shrinkage due to internal and external theft, sub rosa/undercover security operations for varied clients, cyber security for corporate and retail, and consulting opportunities as they relate to physical security. Students will also learn and hone basic job interviewing and soft skills required in the security industry.

Prerequisite: CJDE155 – Private Security 2

50 Hours

4.0 Quarter Credits

CJ210—Intermediate Criminal Law

This course is an overview of the criminal justice system in America, with an emphasis on California criminal procedures and statutes including: crimes against persons such as assault with a deadly weapon and sex crimes, property crimes such as burglary and grand theft auto, social crimes such as narcotics offenses and prostitution, crimes of treason such as sedition and espionage, and crimes against the state such as perjury and obstruction of justice. Available criminal defenses insanity, duress, and mistake of law/fact are also considered.

Prerequisite: CJDE165 – Introduction to Criminal Law
 50 Hours 4.5 Quarter Credits

CJDE215—Introduction to Juvenile Justice

This course examines prevalent patterns of juvenile delinquency, relates these patterns to theories of child and adolescent development, and considers various theories regarding the cause of juvenile criminal behavior. In addition, this course surveys the roles of the police, courts, and juvenile probation in regards to California’s balanced and restorative justice system. California Welfare and Institution 330 dependent child, 601 status offender, and 602 delinquent offender Codes are also studied—as well as Dennis H juvenile detention hearings, Gladys R delinquency hearings for offenders under 14 years of age, and Edsel P fitness hearings to determine waiver of serious juvenile offenders to adult court. Court cases pertinent to the areas of the juvenile justice system that are covered are also discussed.

Co-requisite: LAWDE101 – Introduction to Law
 50 Hours 4.5 Quarter Credits

CJDE220—Criminology 2

This course will initially examine social conflict theories of criminology such as critical, left-realist, feminist criminology, postmodern, peacemaking, and convict criminology, comparing them to previously learned criminology theories. The course emphasis then shifts to applying the many criminology theories to a variety of crimes and the individuals who commit them. The irony of crimes committed by persons ranging from the affluent to the deprived is related by typologies of: murder, gangs-related crime, robbery, burglary, auto theft, arson, sexual offenses, narcotics offenses, crimes against children, fraud, computer crimes, embezzlement, receiving stolen property, terrorism, corporate/white collar crime, insider trading, gambling, prostitution, money laundering, and public corruption.

Prerequisite: CJDE175 – Criminology 1
 50 Hours 4.5 Quarter Credits

CJDE226—Contemporary Terrorism 1

This course will examine the influence and impact of international and domestic terrorism on the criminal justice system—and to a lesser degree the impact of contemporary legal, civic, and political issues. A comparison of several terrorism definitions will be explored as they relate to: violence as the terrorists’ operational mechanism, the desire for publicity, asymmetrical tactics, and ideological/religious/cultural relevance. A post world war II history of international terrorism culminates in the 9/11 attack and the failure of U.S. intelligence to “connect the dots.” A partial worldwide geopolitical study of terrorist groups, their methods, and histories will be examined—ending in Europe.

Co-requisite: LAWDE101 – Introduction to Law
 50 Hours 4.5 Quarter Credits

CJDE230—Advanced Report Writing

This course will teach proper law enforcement report writing and field note taking and the role each plays in effective, successful criminal prosecutions. The preparation of clear, concise, and accurate reports will be stressed with an emphasis on: elements of composition, syntax, grammar, punctuation, spelling and knowledge of law enforcement abbreviations. Crimes against property and crimes against persons will be covered including: robbery, burglary, auto theft, and assault with a deadly weapon—as well as narcotics offenses, sexual offenses, white collar crimes, and criminal gang injunctions. Practice in arrest and crime report writing is emphasized and proficiency must be demonstrated, as well as an understanding of the importance exemplary report preparation.

Prerequisite: CJDE140 – Introduction to Report Writing
 50 Hours 4.0 Quarter Credits

CJDE235—Advanced Juvenile Justice

This course initially explores the various duties and responsibilities of juvenile probation including: initial juvenile intake, social study reports and rehabilitation reports/recommendations to the juvenile court, and detention responsibilities both short and long term. The numerous non-incarcerative community-based programs and options available for juveniles are studied, as are the many treatment technologies available. Juvenile institutionalization is also examined, including: legacy versus best practice juvenile facility design, staff/client span of control, in custody educational practices, and institutional rehabilitation opportunities. Juvenile gang history, organization, demographics, recruitment, impact on all facets of the juvenile justice system, and involvement in narcotics trafficking are discussed. Court cases pertinent to the subject matters covered are also examined.

Prerequisite: CJDE215 – Introduction to Juvenile Justice
 50 Hours 4.0 Quarter Credits

CJDE240—Contemporary Terrorism 2

This course continues the worldwide geopolitical study of terrorist groups, their methods, and histories in North Africa and the Middle East; the Persian Gulf; Northeast, Central and Southern Africa; Southern and Southeast Asia; the Pacific Rim; and Latin America and South America. An additional examination of counterterrorism agencies, methods, hostage rescue techniques, risk analysis, impact of The Patriot Act, aviation security, cyber security, impact of the Patriot Act—as well as state-of-the-art weaponry and technology and personal protection techniques—will also occur. Students will also learn how the Intelligence Community--partnered with cutting edge intelligence gathering techniques such as metadata, open source intelligence, and mathematics-based crime forecasting—hopes to identify and project terrorist threats deep into the future.

Prerequisite: CJDE226 – Contemporary Terrorism 1
50 Hours

4.0 Quarter Credits

CJDE245—Introduction to Forensics

This course applies scientific methodology to crime scene investigation and crime solving, including an analysis of crime scene investigation, securing and protection of a crime scene, keeping a homicide log, the initial walk through of a homicide scene, crime scene photography, crime scene reconstruction, physical evidence collection and packaging, autopsy methodology, rigor mortis and livor mortis, maintaining the chain of custody, fingerprint collection and identification techniques, tool mark identification, ballistic/firearms evidence identification and collection, gunpowder residue, and castings of tires and shoeprints. Several of these forensic techniques will be practiced until proficiency is demonstrated.

Co-requisite: LAWDE101 – Introduction to Law
50 Hours

4.5 Quarter Credits

CJDE250—Advanced Forensics

This course will continue the application of scientific methodology to crime scene investigation and crime solving, including: blood spatter analysis techniques and documentation, a study of illicit drug types and tests, metabolism and absorption of drugs and alcohol, trace evidence identification and collection, arson and explosives investigation, toxicology and blood analysis, poison absorption rates, document examination and questioned document investigation. DNA analysis techniques are also studied, including mitochondrial DNA, familial DNA, and biological stain analysis—as well as DNA application to sexual crime investigations. Several of these techniques will be practiced until proficiency is demonstrated. Additionally, using the forensics techniques mastered in Introduction to Forensics and Advanced Forensics, the students will have responded to and process a homicide scene as if they were actual law enforcement personnel.

Prerequisite: CJDE245 – Introduction to Forensics
50 Hours

4.0 Quarter Credits

CJDE305—Introduction to Criminal Behavior

This course will focus on an overview of criminal behavior. Students will learn what criminal behavior is, why we study it, and how it relates to their careers as criminal justice professionals. Specifically, the course will cover the definition of criminal behavior; the theories of criminal behavior; and the origins of criminal behavior including developmental risk factors, biological factors, and learning/situational factors. Human aggression, violence, and their causal models will also be studied--especially how they relate and are addressed by the criminal justice system. Juvenile delinquency, as well as its causes and effects, are also considered. Students will finish with an emphasis upon criminal psychopathy and mental disorders, as they relate to law enforcement and the criminal justice system.

Prerequisite: LAWDE101 – Introduction to Law
50 Hours

4.5 Quarter Credits

CJDE310—Community Corrections 1

This course will deal with the various aspects of community based corrections and the effects of evidence-based practices upon the prisoner and the community at large. The history and development of probation and parole will be considered as well as a variety of non-incarcerative options. Students will study the methodology probation officers follow to process and access offenders including pretrial supervision, conducting the presentence investigation and report, classification and supervision of probationers, community supervision for offenders with special needs, and the modification and/or revocation of probation. AB109 release procedures from state prisons to county probation departments will also be examined.

Prerequisite: LAWDE101 – Introduction to Law
50 Hours

4.0 Quarter Credits

CJ330--Constitutional Law 1

This course is an introduction to United States constitutional law with an emphasis on key US Supreme Court Decisions. The history of the constitution's creation will be examined as well as key concepts including rule of law, judicial review, separation of powers/checks and balances, and federalism in relation to states' rights. The organization and constitutional powers/limitations of the congress will be studied, as will the organization and constitutional powers/limitations of the president and the executive branch. The organization and roles and limitations of the judiciary are considered, as well as historical Supreme Court eras and various Constitutional interpretations. The creation, delegation of powers, and limitations of federal administrative agencies also discussed.

Prerequisite: LAWDE101 – Introduction to Law
50 Hours

5.0 Quarter Credits

CJDE335—Introduction to Trial Procedures

This course is an introduction examining the goals and structures of the criminal justice system as well as considering issues such as the rule of law, court structures, venue, and jurisdiction. Additionally, areas that impact the pretrial process such as search and seizure, expectation of privacy zone, Fourth Amendment exceptions, inspections and regulatory searches, probable cause, search warrants, the exclusionary rule, arrests with or without warrants, reasonable force to effect an arrest, the Miranda Admonition, booking, stop and frisk, cursory weapons search, privilege against compulsory self-incrimination, arraignment, preliminary hearing, criminal complaint versus grand jury indictment, and right to counsel during the criminal legal process are studied.

Prerequisites: LAWDE101 – Introduction to Law
 50 Hours 5.0 Quarter Credits

CJDE355—Laws of Evidence 1

This course is designed as an introductory level evidence course. Topics covered will be the history and development of evidence law including trial by ordeal, trial by combat, and the advent of the modern adversary system, as well as a comparison of various legal systems around the globe. Federal and other state evidence law will also be compared with the California Evidence Code. Different burden of proof levels are examined, as are presumptions and inference in criminal and civil court, types and forms of evidence, chain of custody, identification and authentication of evidence, best evidence, the balancing test, 1538.5 P.C. motions to suppress evidence and other pretrial motions, objections during trials, relevancy, methods of proving character and the admissibility or inadmissibility of prior bad acts and/or crimes. The elements of witness competency are also studied, including personal knowledge, duty to tell the truth, capacity to communicate, and the competency of children as witnesses.

Prerequisites: LAWDE101 – Introduction to Law
 50 Hours 5.0 Quarter Credits

CJDE360—Immigration

This course will explore the legal, historical, and policy perspectives that shape U.S. law governing immigration and citizenship. Topics covered include the roles of the congress in making immigration law, the president in enforcing immigration law, and the federal judiciary in interpreting immigration law, as well as the immigration appeal process and process to become a naturalized U.S. citizen. Types of immigration visas, the process to obtain them, and their effects upon immigrant employment, academic study, and the gaining of legal permanent resident status are examined.

The operations and cooperation of Immigration and Customs Enforcement (ICE), Customs and Border Enforcement (CBP), and local law enforcement pertaining to the enforcement of border security, immigration law, marriage fraud, document fraud, visa overstay, and drug interdiction and illegal drug cartel activity are also considered. Anti-terrorism efforts by federal, state, and local law enforcement is also studied—as it applies to immigration threat assessment, interagency cooperation, and evolving national priorities.

Prerequisites: LAWDE101 – Introduction to Law & CJ
 50 Hours 5.0 Quarter Credits

CJDE370—Issues in Public and Private Security

This course overviews the public and private security fields including basic security functions in varied communities, laws concerning security; the role of public and private security in protecting vital infrastructure, industry, transportation, corporations, and the security doctrines of major commercial endeavors. Risk/threat assessment, hard targeting defenses and solutions, biometric technologies, sub rosa investigations, current cyber security trends, preparing an emergency plan and/or disaster response, security related legal liability and mitigation strategies, current counterterrorism doctrine and methods, and government security contracting will be examined—as well as contemporary career opportunities in the far-reaching public and private security fields. Additionally, case security studies will be considered, as well as the required steps to create a security business.

Prerequisite: LAWDE101 – Introduction to Law
 50 Hours 4.0 Quarter Credits

CJDE375—Management in Security Industry

This course demonstrates the role security supervision, middle management, and upper management play in the smooth, successful operation of a modern private security force. Basic security management skills will be taught including leadership, administration, planning and budgeting, employee recruitment, hiring, retention, and motivation. Methods of training are also considered, as are security officer performance evaluation, the promotional process, laws affecting human resources administration, strategies for productive/effective relationships with law enforcement, the disciplinary process, and various methods for enhancing work place productivity.

Prerequisites: LAWDE101 – Introduction to Law
 50 Hours 4.5 Quarter Credits

CJDE380—Modern Policing 1

This course deals with the advancements in technology and how law enforcement is using them. Students will learn technological areas including computer basics and information networks, wireless communications, the internet and open source intelligence, and geographic information--such as cartography basics, automatic vehicle location, and Navstar/global positioning technology. A history of technology and its law enforcement applications will also be examined--as will the configuration of and technologies used within various law enforcement computer-aided communications dispatch centers. Computer and information systems available within individual law enforcement agencies, the external data systems available to most law enforcement agencies, and the ability for interoperability and information/resource sharing between law enforcement agencies is also studied.

Prerequisites: LAWDE101 – Introduction to Law

50 Hours

4.5 Quarter Credits

CJDE385—Police Administration and Management 1

This course introduces issues in police administration including organizational and management theory, historical perspective on the evolution of the police role and operations, the uniqueness of the law enforcement environment, police-community relations--as well as police relations with the media. The role of local law enforcement in combating terrorism is considered as it relates to homeland security, threat assessment, safeguarding critical infrastructure, response to terrorist incidents, and intelligence gathering/dissemination. Police leadership theories and styles, team building, macro and micro political environments, and career paths to the top of a police organization are examined. Factors effecting motivation are also discussed including police culture, dynamics of group behavior, and various motivational theories.

Prerequisite: LAWDE101 – Introduction to Law

50 Hours

4.0 Quarter Credits

CJDE390—Narcotics 1

This course deals with the various aspects of drugs in our society including the enforcement of laws barring illegal drugs, understanding the global and U.S. drug problems, the history of U.S. drug use and drug-control policy, drug delivery methods, and the fundamentals and theoretical perspectives of drug-taking behavior. Students will study the relationship between drugs, crime, and law enforcement such as systemic crime, drug-related crime, psychopharmacological crime, economically compulsive crime, the Goldstein tripartite model of drugs and violence, drugs and delinquency, the freelance model versus the business model of drug

sales, crop eradication, U.S. certification, drug interdiction, CBP and U.S. Coast Guard enforcement efforts, street level drug enforcement, major violator drug enforcement, HIDTA, RICO enforcement, reverse sting, buy-bust, buy-walk, undercover operations, controlled buys, search warrant preparation and service, and asset forfeiture operations.

Prerequisites: LAWDE101 – Introduction to Law

50 Hours

4.0 Quarter Credits

CJDE395—Ethics in Law Enforcement

This course focuses on an overview of ethical dilemmas which face our law enforcement personnel and criminal justice system. Students will understand what constitutes moral behavior and what standards must apply to our criminal justice professionals. Topics including necessary versus excessive use-of-force, use of deadly force/Tennessee versus Garner, gratuities, corruption, racial profiling, conduct unbecoming an officer, neglect of duty, discourtesy, violations of law committed by law enforcement personnel, sexual misconduct, confidential informant operations, perjury and false police reports, Brady versus Maryland, the bunker mentality/law enforcement code of silence, acquiescing, and the law enforcement misconduct investigatory system will be studied and applied to federal, state, and local law enforcement and corrections.

Prerequisites: LAW101 – Introduction to Law

50 Hours

4.0 Quarter Credits

CJDE405—Advanced Criminal Behavior

This course takes the fundamentals presented in Introduction to Criminal Behavior and applies them to numerous criminal activities. Students learn the definitions, demographic factors and psychological aspects of criminal homicide, assault, and family violence—as well as the violence provoking dynamic cascade/snowballing effect. The investigative psychology regarding serial killers, mass and spree killers-- as well as perpetrators of school and workplace violence are considered. Terrorists' motivations, the radicalization/cognitive restructuring processes, and the rationalization of terrorism and violence are studied. The many facets of sexual crimes, including vulnerability factors, classification of rape patterns, offender models and typologies, and sexual assaults upon children and youth are examined. The typologies and psychology of property crime offenders, violent economic crime offenders, crimes of intimidation as well as substance abusers is considered in depth.

Prerequisites CJDE305 – Introduction to Criminal Behavior

50 Hours

4.5 Quarter Credits

CJDE410—Community Corrections 2

This course examines the various non-incarcerative options available within community-based corrections such as residential community supervision programs. Nonresidential graduated sanctions including house arrest and day reporting centers, electronic monitoring and radio frequency and global positioning systems, current monitoring trends, and the impact of GPS systems on criminal investigations and public safety are studied as well. Students will also consider the usage of economic and restorative justice reparations such as community service/labor, fines, and direct restitution to crime victims, victim-offender mediation, conferencing, sentencing circles, victim impact panels, and reparation boards. The parole process will also be discussed, as will prisoner reentry, collateral consequences, and mandatory release. Career opportunities and pathways in community corrections are considered, as is the impact of non-incarcerative options upon juvenile offenders and the juvenile justice system.

Prerequisites: CJDE310 – Community Corrections 1
50 Hours 4.0 Quarter Credits

CJDE430—Constitutional Law 2

This course continues the study of Constitutional Law by considering the state and federal relationship, dual sovereignty, preemption, interpretations of the commerce clause, compacts, and interstate comity. The Bill of Rights is examined as it applies to individual rights, incorporation of the amendments, penumbras, and to whom the Bill of Rights applies. Narrow versus wide interpretation of rights pertaining to freedoms of expression, association, the press, and free exercise of religion are discussed. Due process, reproductive liberties, privacy, and economic liberties are also studied. Equal protection under the Constitution is examined through study of the 14th Amendment, the equal protection clause, a history of discrimination and major pertinent Supreme Court decisions, and current day discrimination tests and remedies. Civil liberties are also discussed as they apply to the criminal justice system including arrest and detention, search and seizure both warrantless and with warrant, border searches, school searches, and exceptions to search and seizure limitations.

Prerequisites: CJDE330 – Constitutional Law 1
50 Hours 5.0 Quarter Credits

CJDE435—Advanced Trial Procedures

This course initially continues the study of trial procedures by considering pretrial right to discovery and motions to suppress evidence and/or dismiss charges, as well as motions for continuance, to sever offenses or sever defendants' cases, and to determine competency. Students also learn courtroom evidence rules for

relevancy, hearsay, and hearsay exceptions. The jury selection process is covered as it pertains to voir dire, peremptory challenges and challenges for cause, alternate juror selection, jury sequestration, and jury instructions. Trial procedures including opening and closing statements, reasonable doubt, subpoenas, witness examination through direct and cross examination, case strategy and tactics, presenting the prosecution case, presenting the defense case, prosecution rebuttal, the defense's hypothesis of innocence, verdicts, hung juries, refile of cases by the prosecution, types of sentencing and sentences, the death penalty, the appeal process, habeas corpus hearings, and collateral proceedings and writs are also examined.

Prerequisites: CJDE335 – Introduction to Trial Procedures
50 Hours 5.0 Quarter Credits

CJDE455—Laws of Evidence 2

This course continues the study of evidence law through mode and order of witness examination, how witness credibility is tested and ensured as per direct and cross examination, witness preparation techniques, types of oaths, exclusion of other witnesses, impeachment for credibility or bias, the criminal defendant as witness, and the no comment rule. The many facets of opinion and expert testimony are considered including what lay witnesses can testify to, opinions as they apply to expert witnesses, the admissibility of scientific evidence, the general acceptance test, the relevancy test, the Daubert Standard, experts who are not scientists, and the judge's role as gatekeeper of scientific evidence and all other evidence types. Hearsay is also explored, and the many hearsay exceptions, as well the current use of privileges such as attorney-client, priest-penitent, marital privilege, and the future trends of evidence law.

Prerequisites: CJDE355 – Laws of Evidence 1
50 Hours 5.0 Quarter Credits

CJDE480—Modern Policing 2

This course builds upon the basics of modern police technology by examining improvements in tactical communications, the basic process of crime analysis, the impact of modern crime analysis methods upon patrol tactics and deployment of resources, and use of computerized crime mapping. Additional applications of current technology to investigations are studied including DNA evidence and data banks, digital photography, advances in fingerprint technology and fingerprint data banks, geographic information systems, automatic license plate readers, mobile digital computers in police vehicles, the role of software applications in wiretap court orders, body wires, night vision devices, video evidence, vehicle tracking technologies, tracking of electronic/cell phone communications and cell phone pinging, training of personnel on new technologies, less lethal technologies/use-of-force, body armor advances, drones, predictive policing, and emerging and future technologies.

Prerequisites: CJDE380 – Modern Policing 1
50 Hours 4.5 Quarter Credits

CJDE485—Police Administration and Management 2

This course continues the study of police administration by considering aspects of communications, negotiation, and conflict resolution such as the types of communication, barriers to communication, concepts for effective communication, and sources of conflict. Conflict resolution strategies are also considered as are various negotiation tools and ways to implement the negotiation process. Stress and fatigue management strategies are examined including identifying and controlling sources of police stress, police career stages, critical incident management, and wellness programs, Police human resources management is also studied, as is labor relations, the collective bargaining process, the grievance process, control and the law enforcement disciplinary process and investigation of personnel complaints, productivity measurement and control, accountability, the budgeting process, short to long-range planning, personnel deployment and scheduling, and the changing law enforcement environment.

Prerequisites: CJDE385 – Police Administration and Management 1
50 Hours 5.0 Quarter Credits

CJDE490—Narcotics 2

This course examines the relationship between drugs, the court system, and corrections by considering the structure and elements of federal and California drug statutes, prosecutions of drug offenses such as possession, possession for sales and sales and transportation, court adjudication, sentencing, parole and non-incarcerative options, drug court alternatives, drug supply versus demand, deterrence versus punishment, the impact of drug addicted inmates on the correctional system—as well as drug rehabilitation efforts within the correctional system. Students will also study the origin, history, acute/chronic effects on mind and body drugs, patterns of abuse, lethality and potential for addiction and treatment options for various illegal psychoactive substances such as opioids, heroin and prescription analgesics, cocaine and methamphetamine, LSD and other hallucinogens, marijuana and hashish, performance-enhancing drugs such as anabolic steroids, and depressants such as barbiturates and inhalants. Additionally, the topics of drug legalization/criminalization, abuse of legal substances such as alcohol, prescription drugs, and nicotine, and future of substance abuse prevention and treatment are considered.

Prerequisites: CJDE390 – Narcotics 1 50 Hours 4.5 Quarter Credits

CNA100 – Certified Nurse Assistant

This course is designed to teach the skills and clinical rotation necessary to assume the role and responsibilities as a Certified Nurse Assistant. The course will focus on effective communication, infection control, safety, resident’s rights as well as basic nursing skills. The clinical rotation experience provides the student with the opportunity to practice the skills that have been taught. It is a real world scenario in which the student will work with patients, doctors and other members of the healthcare team. This hands-on experience gives the student on-the-job training.

Prerequisite: None 164 hours

DMS101 — Introduction to Sonography

The course provides the basic need-to-know information required for the beginning student in the Diagnostic Medical Sonography Program. This course will provide the DMS student with the anatomical, body planes, orientation, patient positions, scanning planes and normal cross-sectional anatomy and physiology of the abdominal aorta and inferior vena cava. The student will learn and practice proper ultrasound scanning techniques for imaging, identifying normal sonographic protocols and preparation of the necessary information for an initial written or oral presentation to the radiologist. The student will learn to apply sonographic terminologies. The student will learn how to use and operate the ultrasound machine.

Prerequisite: APH101 60 Hours 3.0 Quarter Credits

DMS102 — Introduction to Sonography 2

The course provides the basic need-to-know information required for the beginning student in the Diagnostic Medical Sonography Program. This course will provide the DMS student with the anatomical, orientation, patient positions, scanning planes and basic anatomy of the liver and Gallbladder. The student will learn and practice proper ultrasound scanning techniques for imaging, identifying normal sonographic protocols and preparation of the necessary information for an initial written or oral presentation to the radiologist. The student will learn to apply sonographic terminologies. The laboratory component will also focus upon development of skills pertinent to patient-sonographer interaction.

Prerequisites: DMS101 60 Hours 3.0 Quarter Credits

DMS103 — Introduction to Sonography 3

The course provides the basic need-to-know information required for the beginning student in the Diagnostic Medical Sonography Program. This course will provide the DMS student with the anatomical, orientation, patient positions, scanning planes and basic anatomy of the Pancreas, Spleen and Renal. The student will learn and practice proper ultrasound scanning techniques for imaging, identifying normal sonographic protocols and preparation of the necessary information for an initial written or oral presentation to the radiologist. The student will learn to apply sonographic terminologies. The student will learn to apply sonographic terminologies.

Prerequisites: DMS102 60 Hours 3.0 Quarter Credits

DMS104 — Introduction to Sonography 4

The course provides the basic need-to-know information required for the beginning student in the Diagnostic Medical Sonography Program. This course will provide the DMS student with the anatomical, body planes, orientation, patient positions, scanning planes and basic anatomy of the organs of the thyroid, breast, male pelvic, neurosonography and GI. The student will learn and practice proper ultrasound scanning techniques for imaging, identifying normal sonographic protocols and preparation of the necessary information for an initial written or oral presentation to the radiologist. The student will learn to apply sonographic terminologies. The laboratory component will also focus upon development of skills pertinent to patient-sonographer interaction.

Prerequisites: DMS103 60 Hours 3.0 Quarter Credits

DMS105 — Introduction to Sonography 5

The course provides the basic need-to-know information required for the beginning student in the Diagnostic Medical Sonography Program. This course will provide the DMS student with the anatomical, orientation, patient positions, scanning planes and basic anatomy of the female pelvic. The student will learn and practice proper ultrasound scanning techniques for imaging, identifying normal sonographic protocols and preparation of the necessary information for an initial written or oral presentation to the radiologist. The student will learn to apply sonographic terminologies. The laboratory component will also focus upon development of skills pertinent to patient-sonographer interaction.

Prerequisites: DMS104 60 Hours 3.0 Quarter Credits

DMS106 — Introduction to Sonography 6

The course provides the basic need-to-know information required for the beginning student in the Diagnostic Medical Sonography Program. This course will provide the DMS student with the anatomical, orientation, patient positions, scanning planes and basic anatomy of the first and second trimester obstetrics scanning. The student will learn and practice proper ultrasound scanning techniques for imaging, identifying normal sonographic protocols and preparation of the necessary information for an initial written or oral presentation to the radiologist. The student will learn to apply sonographic terminologies. The laboratory component will also focus upon development of skills pertinent to patient-sonographer interaction.

Prerequisites: None 60 Hours 3.0 Quarter Credits

DMS107 — Introduction to Sonography 7

The course provides the basic need-to-know information required for the beginning student in the Diagnostic Medical Sonography Program. This course will provide the DMS student with the anatomical, orientation, patient positions, scanning planes and basic anatomy related to vascular examinations. The student will learn and practice proper ultrasound scanning techniques for imaging, identifying normal sonographic protocols and preparation of the necessary information for an initial written or oral presentation to the radiologist. The student will learn to apply sonographic terminologies. The laboratory component will also focus upon development of skills pertinent to patient-sonographer interaction.

Prerequisites: None 60 Hours 3.0 Quarter Credits

DMS111 — Ultrasound Physics 1

Introduction to basic acoustic physical principles and the manner in which ultrasound waves react in human tissue. Emphasis on sound acoustic variable and interference, describe and understand the features of a sound wave and the relationship of the parameters in the interaction of the sound source and medium. Differentiate and relate the parameters of continuous sound and pulse sound. Understand the relation between the distance to a reflector (range) and the time it takes for the sound to return to it point of origin.

Prerequisite: None 30 Hours 3.0 Quarter Credits

DMS112 — Ultrasound Physics 2

Introduces concepts for the factors involved with diagnostic ultrasound principles and instruments. Emphasis will be placed on ultrasound physics, transducer construction, operation and characteristics, adjustable physics parameters. Topics include ultrasound transducers, imaging instruments, ultrasound machine adjustable parameters, real-time imaging, image storage and display, resolution of the sound beam.

Prerequisite: DMS111 30 Hours 3.0 Quarter Credits

DMS113 — Ultrasound Physics 3

This course is a continuance introduction to concepts of factors involved with diagnostic ultrasound dynamic range, images processing and emphasis placed on hemodynamics, Doppler ultrasound, image artifacts, bio-effects, safety, and quality assurance. Advanced instrumentation will also be presented. This course is a continuation of Ultrasound Physics 2 (DMS112).

Prerequisite: DMS111 — 112 30 Hours 3.0 Quarter Credits

DMS114 — Ultrasound Physics Review and Exam Preparation

Review of Ultrasound Physics sequence (DMS111 — DMS113), with an emphasis on preparing the student for the SPI portion of the ARDMS examination.

Prerequisite: DMS113

30 Hours

3.0 Quarter Credits

DMS121 — Patient Care

Sonography students will learn to assess clinical history, current medical conditions, provide high quality patient care, respond to emergency situations, demonstrate awareness of infection control techniques and provide a safe environment for both the patient and health care team. Students will also learn that oral, written and non-verbal communication must adhere to the prescribed professional standards. Patient transfer and immobilization techniques with consideration of patient and practitioner safety, use and care for intravenous lines, catheters, percutaneous drains, and oxygen administration devices, transducer preparation, insertion, and disinfectant techniques, importance of infection control will also be covered.

Prerequisite: None

30 Hours

3.0 Quarter Credits

DMS122 — Medical Terminology 1

Sonography students will learn to apply appropriate terminology to point of references on the human body and apply medical terminology as the language of medicine. The student will learn to understand medical terms by breaking them into their component parts and will understand the meaning of parts. This word building strategy enables the student to build a repertoire of medical terms. Emphasis will be placed on the integumentary, skeletal, muscular, digestive and cardiovascular systems.

Prerequisite: None

30 Hours

3.0 Quarter Credits

DMS211 — Abdomen and Superficial Structures 1

Upon completion of this course the student will have the basic knowledge of the normal Cross sectional anatomy, physiology and pathological conditions affecting the abdominal organs and small parts. It also includes role of differential diagnosis in ultrasound examinations. Emphasis will be placed on the liver, gallbladder and biliary tree.

Prerequisite: DMS101 — DMS122

30 Hours

3.0 Quarter Credits

DMS212 — Abdomen and Superficial Structures 2

Upon completion of this course the student will have the basic knowledge of the normal Cross sectional anatomy, physiology and pathological conditions affecting the abdominal organs and small parts. It also includes role of differential diagnosis in ultrasound examinations. Emphasis will be placed on recognition of normal anatomy of the pancreas, spleen, kidneys and urinary system, Adrenal glands and Retroperitoneum.

Prerequisite: DMS211

30 Hours

3.0 Quarter Credits

DMS213 — Abdomen and Superficial Structures 3

Upon completion of this course the student will have the basic knowledge of the normal Cross sectional anatomy, physiology and pathological conditions affecting the breast, thyroid, parathyroid, testes, and prostate. It also includes role of differential diagnosis in ultrasound examinations. Emphasis will be placed on breast, thyroid, parathyroid, testes, and prostate.

Prerequisite: DMS 212

30 Hours

3.0 Quarter Credits

DMS221 — Obstetrics & Gynecology Sonography 1

On completion of this course, students will have understanding of accurate assessment and performance of gynecologic/female pelvic sonograms by assembling a comprehensive knowledge of the anatomy, physiology, pathophysiology, and sonographic appearances of the female reproductive system, an understanding of the embryologic development, premenarchal, menarchal, and postmenopausal female reproductive systems. Emphasis will be on the female pelvic organs.

Prerequisite: DMS107

30 Hours

3.0 Quarter Credits

DMS222 — Obstetrics & Gynecology Sonography 2

This course will prepare the student to perform sonograms of the pregnant female pelvis. The student will learn normal and abnormal processes of the first second and third trimester. The students learn medical terminology related to obstetrics. The students learn to correlate clinical presentation with sonographic findings, differentiate the normal and abnormal appearances of a first trimester pregnancy, complications of first trimester, sonographic findings associated with ectopic pregnancy, types and sonographic appearances of abortion, clinical and sonographic findings associated with gestational trophoblastic disease.

Prerequisite: None

30 Hours

3.0 Quarter Credits

DMS223 — Obstetrics & Gynecology Sonography 3

This course will provide the student with an understanding of the abnormalities that may occur throughout the pregnancy. Emphasis is given to etiology and significance of the abnormality as well as its sonographic appearance. Maternal diseases associated with pregnancy also be included. Emphasis will be placed on the abnormalities of the fetal abdomen, urogenital system, fetal skeleton placenta and, IUGR.

Prerequisite: None 30 Hours 3.0 Quarter Credits

DMS231 — Introduction to Vascular Sonography 1

Overview of normal and pathological sonographic data of the abdominal vasculature. Covers the basics of hemodynamics, the physical principles and instrumentation techniques of pulsed wave spectral analysis and Color Doppler. Normal vascular anatomy will be contrasted and compared with pathophysiology of the vascular system.

Prerequisite: None 30 Hours 3.0 Quarter Credits

DMS232 — Introduction to Vascular Sonography 2

Overview of normal and pathological sonographic data of the cerebrovascular and peripheral vascular systems covers the basics of hemodynamics for the cerebrovascular and peripheral vascular systems. The physical principles and instrumentation techniques of pulsed wave spectral analysis and Color Doppler. Normal vascular anatomy will be contrasted and compared with pathophysiology of the vascular system.

Prerequisite: None 30 Hours 3.0 Quarter Credits

DMS255 — Pre-Clinical Seminar

This course is designed for students to perfect their scanning techniques before their clinical assignment. This course help to obtain the technical expertise with emphasis on mastery of skills, and abilities required performing sonographic studies and procedures. The emphasis is on abdominal, small parts, gynecological and obstetrical examinations to demonstrate proficiency in clinical scanning.

Prerequisite: DMS231 30 Hours 3.0 Quarter Credits

DMS301 — Specialty Topics in Sonography 1

This course covers advanced specialty topics in sonography, including Adult Cardiac Ultrasound and Vascular Sonography. Cardiovascular measurement in standard sonographic modes are introduced and practiced. Topics on cardiac sonography are covered including: Cardiac Anatomy, Physiology and Hemodynamics, Echocardiographic measurements using M-Mode, 2D, 3D and Doppler modalities.

Prerequisite: None 60 Hours 5.0 Quarter Credits

DMS302 — Specialty Topics in Sonography 2

This course covers advanced specialty topics in sonography, including Introduction to Fetal Cardiac Ultrasound as well as Clinical aspects of Adult Echocardiography. Cardiovascular measurements in standard sonographic modes are introduced and practiced. Topics on cardiac sonography are covered including: Introduction to Clinical Echocardiography, Fetal Echocardiography and Congenital Heart Diseases.

Prerequisite: DMS301 – Specialty Topics in Sonography 1 60 Hours 5.0 Quarter Credits

DMS310 — Abdominal Sonography Registry Review

This is a comprehensive review course which covers the necessary topics and key points preparing students for the Abdomen and Superficial structures ARDMS certifying examination. Topics covered include: Ultrasound of the Liver, Gallbladder, Spleen, Pancreas, Urinary System, Prostate, Testicular, Thyroid and Superficial Structures, abdominal wall and retro-peritoneal anatomy and related pathologies. The course also includes ultrasound studies of neonatal head, hip and adrenal gland.

Prerequisite: None 30 Hours 2.5 Quarter Credits

DMS315 — OBGYN Sonography Registry Review

This is a comprehensive review course which covers the necessary topics and the key points preparing students for Obstetrics and Gynecology ARDMS certifying examination. Topics covered in this module includes: Complete review of Embryology, General Anatomy and physiology of the female reproductive system, Abnormalities of the Uterus and Ovaries, Infertility treatment and contraception, normal First 2nd / 3rd Trimester Assessment, complications of pregnancy as well as Fetal Anomalies and prenatal screening.

Prerequisite: None 30 Hours 2.5 Quarter Credits

DMSDE310 — Abdominal Sonography Registry Review

This is a comprehensive review course which covers the necessary topics and key points preparing students for the Abdomen and Superficial structures ARDMS certifying examination. Topics covered include: Ultrasound of the Liver, Gallbladder, Spleen, Pancreas, Urinary System, Prostate, Testicular, Thyroid and Superficial Structures, abdominal wall and retro-peritoneal anatomy and related pathologies. The course also includes ultrasound studies of neonatal head, hip and adrenal gland.

Prerequisite: None 30 Hours 2.5 Quarter Credits

DMSDE315 — OBGYN Sonography Registry Review

This is a comprehensive review course which covers the necessary topics and the key points preparing students for Obstetrics and Gynecology ARDMS certifying examination. Topics covered in this module includes: Complete review of Embryology, General Anatomy and physiology of the female reproductive system, Abnormalities of the Uterus and Ovaries, Infertility treatment and contraception, normal First 2nd / 3rd Trimester Assessment, complications of pregnancy as well as Fetal Anomalies and prenatal screening.

Prerequisite: None 30 Hours 2.5 Quarter Credits

DMSX271 — Clinical Practicum 1

The Externship experience provides the student with the opportunity to practice the skills they have been taught in school. It is a real world scenario in which the student will work with patients, doctors, and other members of the healthcare delivery team. This hands-on experience gives the student on-the-job training that would be impossible to provide in a classroom setting. The Externship Site Supervisor will complete weekly evaluations tracking the student's progress, as well as a final evaluation at the completion of the student's hours. The Externship Coordinator will monitor the student's progress, along with the Externship Site Supervisor, with onsite visits being performed.

Prerequisite: DMS255 160 Hours 5.0 Quarter Credits

DMSX272 — Clinical Practicum 2

The Externship experience provides the student with the opportunity to practice the skills they have been taught in school. It is a real world scenario in which the student will work with patients, doctors, and other members of the healthcare delivery team. This hands-on experience gives the student on-the-job training that would be impossible to provide in a classroom setting. The Externship Site Supervisor will complete weekly evaluations tracking the student's progress, as well as a final evaluation at the completion of the student's hours. The Externship Coordinator will monitor the student's progress, along with the Externship Site Supervisor, with onsite visits being performed.

Prerequisite: DMS255 200 Hours 6.5 Quarter Credits

DMSX273 — Clinical Practicum 3

The Externship experience provides the student with the opportunity to practice the skills they have been taught in school. It is a real world scenario in which the student will work with patients, doctors, and other members of the healthcare delivery team. This hands-on experience gives the student on-the-job training that would

be impossible to provide in a classroom setting. The Externship Site Supervisor will complete weekly evaluations tracking the student's progress, as well as a final evaluation at the completion of the student's hours. The Externship Coordinator will monitor the student's progress, along with the Externship Site Supervisor, with onsite visits being performed.

Prerequisite: DMS255 200 Hours 6.5 Quarter Credits

DMSX274 — Clinical Practicum 4

The Externship experience provides the student with the opportunity to practice the skills they have been taught in school. It is a real world scenario in which the student will work with patients, doctors, and other members of the healthcare delivery team. This hands-on experience gives the student on-the-job training that would be impossible to provide in a classroom setting. The Externship Site Supervisor will complete weekly evaluations tracking the student's progress, as well as a final evaluation at the completion of the student's hours. The Externship Coordinator will monitor the student's progress, along with the Externship Site Supervisor, with onsite visits being performed.

Prerequisite: DMS255 200 Hours 6.5 Quarter Credits

DMSX275 — Clinical Practicum 5

The Externship experience provides the student with the opportunity to practice the skills they have been taught in school. It is a real world scenario in which the student will work with patients, doctors, and other members of the healthcare delivery team. This hands-on experience gives the student on-the-job training that would be impossible to provide in a classroom setting. The Externship Site Supervisor will complete weekly evaluations tracking the student's progress, as well as a final evaluation at the completion of the student's hours. The Externship Coordinator will monitor the student's progress, along with the Externship Site Supervisor, with onsite visits being performed.

Prerequisite: DMS255 200 Hours 6.5 Quarter Credits

EM151 — Publishing Design and Layout

Introduction focused on the basic tools and commands necessary to design and layout files in the industry standard publishing software. Preparation of files for use in the industry printing process. Continued development of sketching and drawing skills.

Prerequisite: ART112 100 Hours 7.0 Quarter Credits

EM152 — Photo Manipulation

Introduction to raster based image manipulation: Beginning Photoshop. Apply and develop beginning design and production skills in a raster-based photo manipulation, culminating in the completion of at least two portfolio design pieces. Preparation of files for use in the industry printing process. Continued development of sketching and illustration skills.

Prerequisite: ART111 100 Hours 7.0 Quarter Credits

EM153 — Digital Illustration

Introduction to vector-based illustration: Intermediate Illustrator and beginning Flash. Apply and develop intermediate design and production skills in vector-based illustration, culminating in the completion of portfolio pieces, and an introduction to vector-based animation. Preparation of files for use in the industry printing process. Continued development of sketching and drawing skills.

Prerequisite: ART114 100 Hours 7.0 Quarter Credits

EM251 — Introductory Web Design

This course provides an introduction to many basic concepts, issues and techniques related to designing, developing and deploying web sites. Emphasis is placed on the importance of organizing and preparing graphics and content for the web. Students will learn the fundamentals of HTML, and Cascading Style Sheets (CSS). Design principles, typography and grid systems will be presented as foundations for effective site development. Students will also build their understanding of print design by creating an editorial layout for both print and web

Prerequisite: EM151 100 Hours 7.0 Quarter Credits

EM252 — Advanced Photo Manipulation

At the conclusion of this course, students will be able to identify and apply advanced techniques in photo editing, scanning, image compositing, file formats, selections and masks. They will incorporate the use of color theory and design principles and demonstrate their abilities by creating three portfolio pieces. Optimizing files for the web and preparing files for output to a printer and business skills are emphasized. Continued development of sketching and illustration skills.

Prerequisite: EM152 100 Hours 7.0 Quarter Credits

EM253 — Advanced Digital Illustration

Advanced vector-based illustration: Advanced Illustrator and intermediate Flash. Apply and develop advanced design and production skills in vector-based illustration, culminating in the completion of two portfolio design pieces. More vector-based animation will be explored with continued emphasis on key frames and the timeline in Flash. Preparation of files for use in the industry printing process will continue to be emphasized on all projects. Continued development of sketching and illustration skills.

Prerequisite: EM153 100 Hours 7.0 Quarter Credits

EM255 — Figure Drawing

Continuing to develop the various drawing skills from the first drawing course, students will focus on depicting gesture and motion, capturing the essence of movement and form in space, and creating compositions based on the three basic lighting situations.

Prerequisite: None 50 Hours 3.5 Quarter Credits

ENG101 — English

Students will learn effective college-level essay writing skills with a focus on structure and development, including organization and coherence with special attention to persuasive writing. In addition, a targeted review of sentence mechanics, grammar and punctuation will be covered through a combination of lecture and directed exercises.

Prerequisite: None 50 Hours 5.0 Quarter Credits

ENG102 — English Composition

Students will focus on college-level writing skills with particular emphasis on structure, organization and coherence with special attention to persuasive writing and novel analysis. The course will cover a targeted review of sentence mechanics, grammar and punctuation through a combination of lecture and directed exercises. The ENG 102 course is specific to DMS, Respiratory Therapy and Veterinary Technology Programs.

Prerequisite: None 60 Hours 6.0 Quarter Credits

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

ENG303 — College Writing

This section presents an advanced study of expository and argumentative techniques, including attendant critical thinking skills. The course is designed to make writers aware of the process and techniques of effective writing. By focusing on how the writer observes, explains, evaluates, and persuades, the assignments will draw upon and sharpen fundamental writing skills. In the course, students will be expected to write often and respond critically to writings by other classmates, to study published works, and to discuss how weak writing fails and how strong writing succeeds. The types of writings that will be considered include memoirs, biographies, news reporting, and essays. Major topics include invention, style, persona, audience analysis, arrangement, and revision.

Prerequisite: ENG 101 **50 Hours** **5.0 Quarter Credits**

ENG305 – Advanced Composition

Students will strengthen their own writing skills by developing a clear understanding of the writing process. Students will also learn how to become reliable critics and editors of their own work. Through the course students will understand the importance of writing in the workplace as well as in their own lives.

Prerequisite: ENG 102 **60 Hours** **6.0 Quarter Credits**

ENGDE101 — English

Students will learn effective college-level essay writing skills with a focus on structure and development, including organization and coherence with special attention to persuasive writing. In addition, a targeted review of sentence mechanics, grammar and punctuation will be covered through a combination of lecture and directed exercises.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

ENGDE102 — English Composition

Students will focus on college-level writing skills with particular emphasis on structure, organization and coherence with special attention to persuasive writing and novel analysis. The course will cover a targeted review of sentence mechanics, grammar and punctuation through a combination of lecture and directed exercises. The ENG 102 course is specific to DMS, Respiratory Therapy and Veterinary Technology Programs.

Prerequisite: None **60 Hours** **6.0 Quarter Credits**

ENGDE303 — College Writing

This section presents an advanced study of expository and argumentative techniques, including attendant critical thinking skills. ENGDE305 – Advanced Composition

Students will strengthen their own writing skills by developing a clear understanding of the writing process. Students will also learn how to become reliable critics and editors of their own work. Through the course students will understand the importance of writing in the workplace as well as in their own lives.

Prerequisite: ENG 102 **60 Hours** **6.0 Quarter Credits**

HCM345 — Economics in Healthcare Organizations

This course examines the major topics in health care economics, such as the production of health, demand for medical care and health insurance, the physician firm, the hospital market, and government provided health care. The course also focuses on the demand for and supply of healthcare services and emphasizes the efficiency and equity characteristics of the system.

Prerequisites: None **50 Hours** **4.0 Quarter Credits**

HCMDE345 — Economics in Healthcare Organizations

This course examines the major topics in health care economics, such as the production of health, demand for medical care and health insurance, the physician firm, the hospital market, and government provided health care. The course also focuses on the demand for and supply of healthcare services and emphasizes the efficiency and equity characteristics of the system.

Prerequisites: None **50 Hours** **4.0 Quarter Credits**

HFT100 – Anatomy for Fitness Trainer

Students in this course will learn about human anatomy, including the nervous, endocrine, reproductive, cardiovascular, lymphatic, respiratory, digestive, and urinary systems. In addition, students will learn about the skeletal system, including the bone tissues and joints, the muscular system to include origin and insertion and function of the major muscles of the body, and the integumentary system to include skin and its function and pathologies.

Prerequisite: None 50 Hours 5.0 Quarter Credits

HFT110 – Physiology for Fitness Trainer

Students in this course learn about the physiological adjustments, scientific aspects, and biomechanics that occur within the body during exercise. In addition, students learn about the physiological systems as they are affected by physical exercise, including observations of respiratory, circulatory, nervous, and metabolic adjustments to physical exercise.

Prerequisite: None 50 Hours 4.5 Quarter Credits

HFT120 –Nutrition

Students in this course will learn about the practical applications in sports nutrition. Students will understand the role of macronutrients and micronutrients in weight management. Students will also learn the nutritional requirements of different types of athletes and the potential job opportunities in sports nutrition.

Prerequisite: None 50 Hours 5.0 Quarter Credits

HFT130 – Exercise Psychology

Students will learn the basics of personal and professional leadership as well as motivational and situational techniques to use during interaction with clients to enhance positive behavioral change. Students will also learn how to apply a holistic, integrated, principled-centered approach to organizing personal lives and motivating people to be physically active.

Prerequisite: None 50 Hours 4.0 Quarter Credits

HFT140 – Business Management & Marketing

Students in this course will learn about different leadership theories, the difference between leadership and management, and the necessary skills set for sport leadership. In addition, students will learn about how to apply a principled and ethical approach to sport leadership. Students will also learn about fostering innovation in sport organizations, handling crisis and conflict, shepherding sport for development organizations, dealing with gender and race issues in sports, and leading athletes with disabilities. Students will also learn how to market their business.

Prerequisite: None 50 Hours 5.0 Quarter Credits

HFT150 – Weight Loss

Students in this course learn to develop specialized fitness programs to help meet clients’ objectives for weight loss through improved fitness. Topics covered include: the health effects of obesity, the psychology and physiology of weight loss control, and key training and nutrition programs to promote weight loss.

Prerequisite: None 50 Hours 4.5 Quarter Credits

HFT160 – Lifestyle Training

Students will learn about client screening, goal setting, managing stress, physical performance, professional ethics of wellness professionals and health-related quality of life. This course will lay the foundation for students to effectively promote personal training as part of a healthy lifestyle.

Prerequisite: None 50 Hours 4.5 Quarter Credits

HFT170 – Group Fitness

Students will learn new and classic exercise techniques that are used in a variety of group fitness courses. Students will become familiar with group strength, equipment-based and hybrid combination classes. Students will also learn how to manage large groups, and provide a diverse, safe and effective group fitness experience.

Prerequisite: None 50 Hours 4.0 Quarter Credits

HFT200 – Special Needs Adaptive Exercise

Students in this course will learn and practice the skills and knowledge required to develop fitness programs for clientele requiring special considerations. Populations to be studied include youths, seniors, pregnant women, obese people, those suffering from pulmonary diseases, metabolic diseases, immunological and hematological disorders, orthopedic diseases and disabilities, neuromuscular disorders, cognitive, psychological, and sensory disorders, and increased cardiovascular disease risk factors.

Prerequisite: None 50 Hours 4.5 Quarter Credits

HFT210 – Fitness Program Design

This course prepares students to design goal-specific OPT™ programs, stabilization OPT™ programs, strength OPT™ programs, flexibility training, core training, balance training, plyometric training, speed, agility, and quickness training, resistance training, and cardiorespiratory training programs for each client. Students are expected to be able to implement appropriate exercise techniques and modify, progress, and regress appropriate exercises.

Prerequisite: None 50 Hours 4.5 Quarter Credits

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

HFT220 – Kinesiology

Students will learn about the study of biomechanics, kinetics, and muscles, including the principles of human movement and the description of structure, function, and kinesiology of the extremities. Topics include kinematics at the whole body level, tissues, joints, limbs, and biomechanics of the upper and lower extremities. Furthermore, students will learn the action and kinematics of the skeletal muscles. Students will consider various techniques to understand and improve the kinetics of human motion.

Prerequisite: None **50 Hours** **4.5 Quarter Credits**

HFT230 – Exercise and Fitness Assessment

Personal fitness trainers are required to perform subjective assessments, objective assessments, and movement assessments with their clients to provide quality personal training services. This course provides students with a practical opportunity to develop and hone those skills. Students are introduced to training techniques for use in program design courses.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

HFT240 – Training the Athlete

Students will learn how to create training plans for clientele who specialize in certain athletic areas. Students will be able to design cardiorespiratory training programs, power OPT™ programs, and programs for clients who participate in individual competition or team sports. Students will apply principles of reactive neuromuscular training (plyometric) and integrated speed training to help clients achieve their established goals.

Prerequisite: None **50 Hours** **4.5 Quarter Credits**

HFT250 – Certification Prep and First Aid & CPR

Students will learn about the essentials to personal fitness training. Students will be introduced to the human movement system, the Optimum Performance Training (OPT) model and other domains of basic exercise science; assessment; exercise technique and training instruction; program design; considerations in nutrition; client relations and behavioral coaching; and professional development, practice, and responsibility. Students will also complete a certification course in first aid & CPR.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

HFT260 – Health & Fitness Externship

The internship is an opportunity to integrate career related experience to the program of study. The course provides students the opportunity to relate theory to practice. It also provides the students with in-service orientation to a career which will enhance the student's understanding of organizational and group processes.

Prerequisite: Completion of all courses in the program
105 Hours **4.0 Quarter Credits**

HIS323 — History of Business Innovation

This course presents a survey of the history of innovative business techniques in the 20th and 21st centuries. Students will examine production development and techniques, as well as the business practices that were used to foster creativity and innovation in an organizational setting. The students will also consider the different categories of business innovation (e.g. product, process and management innovation).

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

HISDE323 — History of Business Innovation

This course presents a survey of the history of innovative business techniques in the 20th and 21st centuries. Students will examine production development and techniques, as well as the business practices that were used to foster creativity and innovation in an organizational setting. The students will also consider the different categories of business innovation (e.g. product, process and management innovation).

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

IAHC 101 — Introduction to Allied Health Careers

This introductory course provides an essential foundation for students beginning their course of study in the Allied Health Field. Students will gain familiarity with key medical terminology concepts and learn the use of prefixes, suffixes, and word roots to build their medical vocabulary. Students will also learn the basics of human anatomy and physiology, including the fundamental organization of the human body and its ten body systems. Key principles of professionalism, responsibilities, ethics, scope of practice, and legal implications of working in the healthcare field will be discussed. Finally, students will be introduced to the current principles of HIPPA policies and regulations.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

IT101 – Computer Applications

This course is designed to increase proficiency in the use of basic computer use, common word processing, spreadsheet, and presentation application software. Topics include the production of business documents, reports, and presentations. Upon successful completion of this course, students will be able to identify basic components of a computer, and prepare documents using word processing, spreadsheets, and presentation software.

Prerequisite: None **50 hours** **4.5 Quarter Credits**

IT102 – Desktop Hardware and Software I

This course provides an overview of computer hardware and terminology. Topics include hardware architecture, component installation, and troubleshooting methodologies. Upon successful completion of this course, students should be able to identify and install various computer components, and perform basic troubleshooting skills.

Prerequisite: None **50 hours** **4.5 Quarter Credits**

IT103 – Desktop Hardware and Software II

This course provides a more in depth view of computer hardware and terminology. Topics include hardware architecture, component installation, and troubleshooting methodologies. Upon successful completion of this course, students should be able to identify and install various computer components, disassemble and build a working computer, identify PC power components and constraints and perform basic troubleshooting skills.

Prerequisite: IT102 – Desktop Hardware and Software I
50 hours **4.5 Quarter Credits**

IT104 – Desktop Operating Systems

This course provides an overview of common desktop operating systems. Topics include operating system installation, architecture, functions, and features of various operating systems. Upon successful completion of this course, students will be able to install, configure, and support desktop operating systems, and perform basic troubleshooting skills.

Prerequisite: IT102 - Desktop Hardware and Software I
50 hours **4.5 Quarter Credits**

IT106 – Linux Operating Systems

This course introduces basic concepts of the Linux operating systems. Topics include Installation, configuration and user administration. Focus will be on functions that resemble the UNIX environment. Directory and file management, user account management and certain device management (such as drives, printers, interface cards, etc.) will be discussed. Upon successful completion of this course, students will be able to install a Linux operating system, log onto a UNIX style system, navigate the file structure, control processes, create and delete files and directories, edit files, and move files and directories.

Prerequisite: IT102 - Desktop Hardware and Software I
50 hours **4.5 Quarter Credits**

IT115 - Introduction to Programming

This course serves as a foundation for understanding the logical function and process of computer programming in a given language environment. Basic computer programming knowledge and skills in logic and syntax will be covered. Coding conventions and relevant procedures will be discussed within the given programming language environment.

Prerequisite: IT101 – Computer Applications
50 hours **4.5 Quarter Credits**

IT120 - Cloud Fundamentals

This course provides an overview of cloud computing and virtualization concepts. Topics include characteristics of cloud services, the business value of cloud computing, technical perspectives and cloud types. Successful completion of this course provides the student with the ability to accomplish technical tasks such as understanding the cloud; enabling Microsoft cloud services; administering Office 365; and supporting cloud users.

Prerequisite: IT205 - Microsoft Client Server
50 hours **4.5 Quarter Credits**

IT130 - Technical Customer Support and Group Dynamics

In this course, students examine elements of successful teams and small decision-making groups. Emphasis is on communication, critical thinking and group process techniques. The course also explores working with customer technology and support requirements, development of interpersonal skills to resolve field support problems, analytical and problem-solving skills, good communication skills, time management and organizational skills

Prerequisite: None **50 hours** **4.5 Quarter Credits**

IT140- Structured Cabling

This course provides the student with knowledge of the industry standards and practices involved in wiring and transmitting data through a computer network, including media and protocol specifications, connection topologies, installation, testing and troubleshooting.

Prerequisite: None **50 hours** **4.5 Quarter Credits**

IT200 – Networking Essentials

This course serves as a foundation for the study of computer networking technologies. Concepts in data communications, such as signaling, coding and decoding, multiplexing, circuit switching and packet switching, OSI and TCP/IP models, LAN/WAN protocols, network devices and their functions, topologies and capabilities are discussed. Industry standards and the development of networking technologies are surveyed in conjunction with a basic awareness of software and hardware components used in typical networking and internetworking environments.

Prerequisite: IT102 - Desktop Hardware and Software I
50 hours 4.5 Quarter Credits

IT205 Microsoft Client Server

This course introduces operating principles for the client-server based networking systems. Students will examine processes and procedures involving the installation, configuration, maintenance, troubleshooting and routine administrative tasks of popular desktop operating system(s) for standalone and network client computers, and related aspects of typical network server functions.

Prerequisite: None **50 hours 4.5 Quarter Credits**

IT213 – Routing Protocols and Concepts

This course describes the architecture, components, and operation of routers, and explains the principles of routing and routing protocols. Topics include the analysis, verification, and troubleshooting of both classful and classless routing protocols. Upon successful completion of this course, students will be able to configure a router, conduct basic configuration of routing protocols, and design and implement basic security measures.

Prerequisite: IT200 – Networking Essentials
50 hours 4.5 Quarter Credits

IT215 - Introduction to Mobile Devices

This course introduces mobile technology and wireless communications and their practical applications. Topics include wireless communications systems, mobile devices and mobile networking.

Prerequisite: IT205 - Microsoft Client Server
50 hours 4.5 Quarter Credits

IT220 – LAN Technologies

This course focuses on how network switches operate and are implemented in a LAN environment for small through large networks. Topics include LAN switch operation, VLAN (Virtual Local Area Network) implementation, Rapid Spanning Tree Protocol (RSTP), VLAN Trunking Protocol (VTP), Inter-VLAN routing, and network operations. Upon successful completion of this course, students will be able to analyze, configure, verify, and troubleshoot VLANs, RSTP, VTP, and networks in general.

Prerequisite: IT213 – Routing Protocols and Concepts
50 hours 4.5 Quarter Credits

IT221 – WAN Technologies

This course introduces network user access technologies and devices. Topics include the implementation and configuration of Point-to-Point Protocol (PPP), Point-to-Point Protocol over Ethernet (PPPoE), DSL, and Frame Relay with traffic control and access lists. WAN (Wide Area Networks) security concepts, tunneling, and VPN basics are introduced, along with a discussion of the special network services required by converged applications and an introduction to quality of service (QoS). Upon successful completion of this course, students will be able to install and configure WAN technologies.

Prerequisite: IT213 – Routing Protocols and Concepts
50 hours 4.5 Quarter Credits

IT225 - Introduction to Microsoft Exchange and Web Services

This course explores common network-based services such as Web services, email and FTP in a given server operating systems environment. Related security issues will also be studied.

Prerequisites: IT205 - Microsoft Client Server
50 hours 4.5 Quarter Credits

IT235 – Network Security

This course provides an introduction into network security threats and the tools necessary to mitigate these threats. Topics include modern network security threats, securing network devices, authentication, authorization and accounting, implementing firewall technologies and intrusion prevention, and securing the local area network. Upon successful completion of this course, students will be able to design and support a basic network security.

Prerequisite: IT200 – Networking Essentials
50 hours 4.5 Quarter Credits

IT245 - Introduction to Databases

This course introduces relational database concepts and the role of databases in both Windows and Web applications. The course introduces basic data modeling and normalization concepts. Extensible Markup Language (XML) is also introduced.

Prerequisite: IT101 – Computer Applications
50 hours **4.5 Quarter Credits**

IT250 – Project Management and Technical Documentation

This course emphasizes the importance of documentation and the skills necessary to develop relevant, useful technical documentation and project plans. Topics include the documentation process, style and design, digital formats, technical baselines, project management documentation, disaster recovery overview, document archiving, and documentation configuration management. Upon successful completion of this course, students will be able to create technical documents, project plans and value effective documentation for an enterprise environment.

Prerequisite: None **50 hours** **4.5 Quarter Credits**

LAW101—Introduction to Law

This is an introductory course in criminal justice studies. This course introduces students to basic legal concepts/terms, principles and procedures in the study of law. It will provide an in-depth understanding of the structure of the U.S. legal system, both federal and state courts. The course will further explore the role and functions of the three branches of government namely: legislative, executive, and judicial branches, and the concepts of federalism and separation of powers. Students will be able to use and understand simple legal vocabulary and knowledge of various legal theories or schools. Students will be introduced to legal reasoning, case analysis and the IRAC method. Students will acquire knowledge areas of law such as: criminal law, constitutional law and freedom, torts and contract law. Ethical considerations for legal professionals and duties are discussed throughout the course.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

LAWDE101—Introduction to Law

This is an introductory course in criminal justice studies. This course introduces students to basic legal concepts/terms, principles and procedures in the study of law. It will provide an in-depth understanding of the structure of the U.S. legal system, both federal and state courts. The course will further explore the role and functions of the three branches of government namely: legislative, executive, and judicial branches, and the concepts of federalism and separation of powers. Students will

be able to use and understand simple legal vocabulary and knowledge of various legal theories or schools. Students will be introduced to legal reasoning, case analysis and the IRAC method. Students will acquire knowledge areas of law such as: criminal law, constitutional law and freedom, torts and contract law. Ethical considerations for legal professionals and duties are discussed throughout the course.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

LVN100 – Foundations of Nursing I

This course provides the student with an in-depth introduction to the practice of Vocational Nursing. The nursing process will be presented as a problem solving approach for gathering data, identifying capacities and needs of the human adaptive system, selecting and implementing approaches for nursing care, and evaluating the outcome of care provided and using the nursing process as a framework for clinical decision making for safe, effective delivery of care. The nursing process is integrated with an emphasis on all components utilizing standardized nursing language.

Prerequisite: None **56 Hours** **5.5 Quarter Credit**

LVN105 – Foundations of Nursing I Lab

In the skills lab the student will have an opportunity to learn and practice basic nursing principles and procedures related to meeting the daily needs of clients. The nursing skills include gathering data related to vital signs, physical assessment, asepsis, surgical wound care, basic care procedures, and activities of daily living support skills.

Prerequisite: None **104 Hours** **6.5 Quarter Credits**

LVN110 – Anatomy & Physiology

This course provides the student with a working understanding of the structure and function of the human body and mechanisms for maintaining homeostasis within it. The course includes the study of cells, tissues, and organs of the Integumentary, Skeletal, Muscular, Nervous, Sensory, Endocrine, Cardiac, Respiratory, Digestive, Urinary, and Reproductive systems.

Prerequisite: None **55 Hours** **5.5 Quarter Credits**

LVN120 – Human Growth & Development

This course introduces the student to basic concepts of Life Span Development; while incorporating cultural considerations as they relate to health promotion and disease prevention.

Prerequisite: None **45 Hours** **4.5 Quarter Credits**

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

LVN130 – Foundations of Nursing II

This course continues on the foundations provided in LVN100 and utilizes the nursing process as a problem solving approach for gathering data, identifying capacities and needs of the human adaptive system, and selecting and implementing approaches for nursing care. Content areas of focus for this course include care of patients requiring emergency care, care of older adult, death and dying, rehab, disaster planning, patient teaching, and the integumentary system.

Prerequisite: None **50 Hours** **6.0 Quarter Credits**

LVN130a – Foundations of Nursing 2a

This course continues on the foundations provided in LVN100 and utilizes the nursing process as a problem-solving approach for gathering data, identifying capacities and needs of the human adaptive system, and selecting and implementing approaches for nursing care. Content areas of focus for this course include care of patients requiring emergency care, care of older adult, death and dying, rehab, disaster planning, patient teaching, and the integumentary system.

Prerequisite: None **25 Hours** **3.0 Quarter Credits**

LVN130b – Foundations of Nursing 2b

This course is the continuation of LVN130a. Content areas of focus for this course include care of patients requiring emergency care, care of older adult, death and dying, rehab, disaster planning, patient teaching, and the integumentary system.

Prerequisite: LVN130a – Foundations of Nursing 2a
25 Hours **3.0 Quarter Credits**

LVN140 – Nutrition

This course introduces the student to basic concepts of nutrition, including fats, carbohydrates, and proteins and how they are utilized by the body. Therapeutic diets will be discussed as well as how to assist the client to adapt to changes in diet as required due to disease processes.

Prerequisite: None **24 Hours** **2.0 Quarter Credits**

LVN150 – Pharmacology

This course focuses on dosages, applications, side effects, toxicity and laboratory tests performed to monitor actions and effects of specific drugs. The metric system, the apothecary system and conversion between systems will be presented. Dosage calculations will be introduced.

Prerequisite: None **54 Hours** **5.0 Quarter Credits**

LVN160 – Clinical Practice 1

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge

and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: None **104 Hours** **4.0 Quarter Credits**

LVN160a – Clinical Practice 1a

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: None **52Hours** **2.0 Quarter Credits**

LVN160b – Clinical Practice 1b

This course is a continuation of LVN160b. This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: LVN160b – Clinical Practice 1B
52Hours **2.0 Quarter Credits**

LVN170 – Medical Surgical Nursing 1

This course provides the student with an in-depth introduction to the practice of Medical-Surgical Vocational Nursing. This course covers physiology and basic pathophysiology, causes of illness, communicable disease and disease transmission and prevention. The student will begin to compare and contrast normal body functions with that of pathological variations, identify disease processes(by definition, assessment and diagnostics), assist in formulation of a plan of care utilizing the nursing process for medical-surgical conditions, provide patient/family education, explain the components of the health-illness continuum, assess prevalent medical-surgical conditions affecting the adult client, and utilize the nursing process to assist in developing a plan of care for selected medical-surgical conditions. Content areas of focus for this course include perioperative nursing; pain management; the role of the LVN in admission, discharge, and transfer; the gastrointestinal system and the musculoskeletal system.

Prerequisite: None **90 Hours** **9.0 Quarter Credits**

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

LVN170a – Medical Surgical Nursing 1a

This course provides the student with an in-depth introduction to the practice of Medical-Surgical Vocational Nursing. This course covers physiology and basic pathophysiology, causes of illness, communicable disease and disease transmission and prevention. The student will begin to compare and contrast normal body functions with that of pathological variations, identify disease processes (by definition, assessment and diagnostics), assist in formulation of a plan of care utilizing the nursing process for medical-surgical conditions, provide patient/family education, explain the components of the health-illness continuum, assess prevalent medical-surgical conditions affecting the adult client, and utilize the nursing process to assist in developing a plan of care for selected medical-surgical conditions. Content areas of focus for this course include perioperative nursing; pain management; the role of the LVN in admission, discharge, and transfer; the gastrointestinal system and the musculoskeletal system.

Prerequisite: None **45 Hours** **4.5 Quarter Credits**

LVN170b – Medical Surgical Nursing 1b

This course is a continuation of LVN170a. This course provides the student with an in-depth introduction to the practice of Medical-Surgical Vocational Nursing. This course covers physiology and basic pathophysiology, causes of illness, communicable disease and disease transmission and prevention. The student will begin to compare and contrast normal body functions with that of pathological variations, identify disease processes (by definition, assessment and diagnostics), assist in formulation of a plan of care utilizing the nursing process for medical-surgical conditions, provide patient/family education, explain the components of the health-illness continuum, assess prevalent medical-surgical conditions affecting the adult client, and utilize the nursing process to assist in developing a plan of care for selected medical-surgical conditions. Content areas of focus for this course include perioperative nursing; pain management; the role of the LVN in admission, discharge, and transfer; the gastrointestinal system and the musculoskeletal system.

Prerequisite: LVN170b – Medical Surgical Nursing 1b
45 Hours **4.5 Quarter Credits**

LVN180 – Clinical Practice 2

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: None **183 Hours** **3.0 Quarter Credits**

LVN180a – Clinical Practice 2a

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: None **91.5 Hours** **3.5 Quarter Credits**

LVN180b – Clinical Practice 2b

This course is a continuation of LVN180a. This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: LVN180a – Clinical Practice 2a
91.5 Hours **3.5 Quarter Credits**

LVN200– Community / Mental Health Nursing

This course covers concepts related to home/long-term/rehab/hospice nursing as well as the care of clients with mental health disorders. Disease processes will be discussed with a focus on nursing care utilizing the nursing process as a framework for assisting the client to adapt.

Prerequisite: None **33 Hours** **3.0 Quarter Credits**

LVN210 – Medical / Surgical Nursing II

This course is a continuation of Medical-Surgical concepts and the role of the Medical-Surgical Vocational Nurse. This course covers physiology and basic pathophysiology, causes of illness, communicable disease and disease transmission and prevention for selected conditions. The student will continue to compare and contrast normal body functions with that of pathological variations, identify disease processes (by definition, assessment and diagnostics), assist in formulation of a plan of care utilizing the nursing process for medical-surgical conditions, provide patient/family education, explain the components of the health-illness continuum, assess prevalent medical-surgical conditions affecting the adult client, and utilize the nursing process to assist in developing a plan of care for selected medical-surgical conditions. Content areas of focus for this course include care of patients with disorders of the respiratory, cardiovascular, hematologic, and lymphatic systems.

Prerequisite: None **58 Hours** **5.5 Quarter Credits**

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

LVN220 – Clinical Practice 3

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective health-care in varying environments.

Prerequisite: None **203 Hours** **7.5 Quarter Credits**

LVN220a – Clinical Practice 3a

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: None **101.3 Hours** **4 Quarter Credits**

LVN220b – Clinical Practice 3b

This course is a continuation of LVN220a. This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: LVN220a – Clinical Practice 3a
101.3 Hours **3.5 Quarter Credits**

LVN230 – Maternal /Newborn Nursing

This course focuses on the nursing care of women throughout pregnancy including the female reproductive system as well as care of the newborn during the post-partum period through first month of life.

Prerequisite – None **24 hours** **2.5 Quarter Credits**

LVN240 – Medical / Surgical Nursing III

This course is a continuation of Medical-Surgical concepts and the role of the Medical-Surgical Vocational Nurse. This course covers physiology and basic pathophysiology, causes of illness, communicable disease and disease transmission and prevention for selected conditions. The student will continue to compare and contrast normal body functions with that of pathological variations, Identify disease processes(by definition, assessment and diagnostics), assist in formulation of a plan of care utilizing the nursing process for medical-surgical conditions, provide patient/family education, explain the components of the health-illness continuum, assess prevalent medical-surgical conditions affecting the adult client, and utilize the nursing process to assist in developing a plan of care for selected medical-surgical conditions. Content areas of focus for this course include care of patients with disorders of the genitourinary, endocrine, and immune systems as well as the male reproductive system.

Prerequisite: None **72 Hours** **7.0 Quarter Credits**

LVN250 – Clinical Practice 4

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: None **192 Hours** **7.0 Quarter Credits**

LVN250a – Clinical Practice 4a

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: None **96 Hours** **3.5 Quarter Credits**

PLATT COLLEGE
**COURSE
 DESCRIPTIONS**

LVN250b – Clinical Practice 4b

This course is a continuation of LVN250a. This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: LVN250a – Clinical Practice 4a
96 Hours 3.5 Quarter Credits

LVN260 – Pediatrics Nursing

This course focuses on care of the pediatric client from infancy through adolescence including health promotion, disease prevention, and abuse reporting.

Prerequisite: None 18 Hours 1.5 Quarter Credits

LVN270– Leadership in Nursing

This course covers concepts related to leadership. Leadership roles within the scope of practice and the health care system will be discussed.

Prerequisite: VN100 – VN131 20 Hours 2.0 Quarter Credits

LVN270a – Leadership in Nursing a

This course covers concepts related to leadership. Leadership roles within the scope of practice and the health care system will be discussed.

Prerequisite: VN100 – VN131 10 Hours 1.0 Quarter Credits

LVN270b – Leadership in Nursing b

This course is a continuation of LVN270a. This course covers concepts related to leadership. Leadership roles within the scope of practice and the health care system will be discussed.

Prerequisite: LVN270b – Leadership in Nursing a
10 Hours 1.0 Quarter Credits

LVN280 – Medical / Surgical Nursing III

This course is a continuation of Medical-Surgical concepts and the role of the Medical-Surgical Vocational Nurse. This course covers physiology and basic pathophysiology, causes of illness, communicable disease and disease transmission and prevention for selected conditions. The student will continue to compare and contrast normal body functions with that of pathological variations, Identify disease

processes (by definition, assessment and diagnostics), assist in formulation of a plan of care utilizing the nursing process for medical-surgical conditions, provide patient/family education, explain the components of the health-illness continuum, assess prevalent medical-surgical conditions affecting the adult client, and utilize the nursing process to assist in developing a plan of care for selected medical-surgical conditions. Content areas of focus for this course includes care of patients with neurologic and sensory disorders.

Prerequisite: None 24 Hours 2.0 Quarter Credits

LVN280a – Medical / Surgical Nursing 3a

This course is a continuation of Medical-Surgical concepts and the role of the Medical-Surgical Vocational Nurse. This course covers physiology and basic pathophysiology, causes of illness, communicable disease and disease transmission and prevention for selected conditions. The student will continue to compare and contrast normal body functions with that of pathological variations, Identify disease processes(by definition, assessment and diagnostics), assist in formulation of a plan of care utilizing the nursing process for medical-surgical conditions, provide patient/family education, explain the components of the health-illness continuum, assess prevalent medical-surgical conditions affecting the adult client, and utilize the nursing process to assist in developing a plan of care for selected medical-surgical conditions. Content areas of focus for this course includes care of patients with neurologic and sensory disorders.

Prerequisite: None 12 Hours 1.0 Quarter Credits

LVN280b – Medical / Surgical Nursing 3b

This course is a continuation of Medical-Surgical concepts and the role of the Medical-Surgical Vocational Nurse. This course covers physiology and basic pathophysiology, causes of illness, communicable disease and disease transmission and prevention for selected conditions. The student will continue to compare and contrast normal body functions with that of pathological variations, Identify disease processes(by definition, assessment and diagnostics), assist in formulation of a plan of care utilizing the nursing process for medical-surgical conditions, provide patient/family education, explain the components of the health-illness continuum, assess prevalent medical-surgical conditions affecting the adult client, and utilize the nursing process to assist in developing a plan of care for selected medical-surgical conditions. Content areas of focus for this course includes care of patients with neurologic and sensory disorders.

Prerequisite: LVN280a – Medical / Surgical Nursing 3a
12 Hours 1.0 Quarter Credits

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

LVN290 – NCLEX Review

This course prepares students completing their last term to take the NCLEX-PN examination. Student are required to pass the HESI exit exam in order successfully pass this course.

Prerequisite: VN141 **36 Hours** **3.5 Quarter Credits**

LVN295 – Clinical Practice 5

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: None **168 Hours** **6.0 Quarter Credits**

LVN295a – Clinical Practice 5a

This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective health-care in varying environments.

Prerequisite: None **84 Hours** **3.0 Quarter Credits**

LVN295b – Clinical Practice 5b

This course is a continuation of LVN295a. This course provides the student with a concentrated supervised clinical experience to develop and refine nursing skills learned in the classroom and skills labs. The real-world patient care setting is designed to expand and synthesize nursing knowledge and evidence-based practice. Students will enhance their clinical and critical thinking skills, while also effectively using resources and integrating evidence-based practice to practice providing quality and cost-effective healthcare in varying environments.

Prerequisite: LVN295b – Clinical Practice 5a
84 Hours **3.0 Quarter Credits**

MA102 — Patient Care and Ethics

Students focus on learning how to create environments of care in their workplace. This course provides scenarios that give the students an understanding of health care ethics, factors of how patients respond to change including chronic or terminal illness, and issues pertaining to sexuality and confidentiality. Student are introduced to multicultural perspectives and practice the recognition of patient attitudes, beliefs and values while understanding family needs, roles and responsibilities. The basic principles of psychology along with developmental stages of the life cycle, cultural, hereditary and environmental influences on behavior are covered in this module. Students will also discuss and define professionalism, ethics, and scope of practice and legal implications of working in the healthcare field.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MA105 — Introduction to Microbiology, Surgical & Medical Asepsis

The world of micro-organisms is introduced. Pathogenic and non-pathogenic bacteria including viruses, fungi, protozoa, helminthes, and rickettsiae are related to common diseases and infections. The chain of infection is identified and defined. Defense mechanisms and the inflammatory response that occurs are discussed. Surgical asepsis is defined and discussed. Clinical Lab skills include sanitization, disinfection, and sterilization procedures. Common instruments are identified. Surgical aseptic technique is developed including gloving, tray preparation, working with a sterile field, and changing dressing s and wound care is discussed. Medical asepsis is defined and discussed including Universal Blood and Body Fluid Precautions, OSHA requirements, and appropriate use and disposal of barriers.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MA106 — Clinical Pharmacology

This course introduces basic pharmacology concepts. General mathematical concepts are reviewed. Mathematical theories and formulas for conversion and administration of medication are demonstrated. Common medications, complications of medication administration, and principles of IV therapy are discussed. Students will learn about pediatric patient care, administration and importance of immunizations and formulas for the conversions of pediatric weights and heights as well as drug calculations. Students will also be introduced to the writing of a prescription and the legal considerations of Pharmacology.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MA107 — First Aid / CPR & Nutrition

The role of the medical assistant in emergency situations is discussed including bandaging techniques. Students will practice clinical skills including: vital signs, venipunctures and injections. CPR (AED BLS-C card) and basic first aid procedures are presented. Maintenance of emergency office supplies and equipment is discussed. Students will learn the Occupational Safety and Health Administration (OSHA) standards. Discussion of basic nutrition, metabolism, and diet therapy and its relation to these body systems are also included. Emphasis is placed on patient education and assisting the patient in the development of skills necessary to make informed and responsible health decisions.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MA108 — Cardiovascular Anatomy, Electrocardiography and Cardiopulmonary

The circulatory and respiratory system will be reviewed as well as various abnormalities that may occur during electrocardiography. Students will learn about electrical pathways of the heart muscle in preparation to learn electrocardiography (ECG or EKG) including lead placement, identification of artifacts and arrhythmias and recording a multi-lead electrocardiogram. Students are introduced to basic normal and abnormal anatomy and physiology as well as the diagnostic/treatment modalities of the cardiovascular system. Students will practice clinical skills including; vital signs and performing ECG or EKGs.

Prerequisite: None 100 Hours 8 Quarter Credits

MA153 — Excretory and Reproductive Systems

Students are introduced to the basic normal and abnormal anatomy and physiology of the respiratory, urinary and reproductive systems. Discussion of fluids, electrolytes, acid-base balance, and basic life sciences are included. This module also identifies common pathology/diseases and diagnostic/treatment modalities of the Excretory and Reproductive systems. Students learn to perform urine analysis to dedicate metabolic changes, physical differences and microscopic abnormalities.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MA155 — Musculoskeletal Systems and Physical Therapy

Students will learn the basic normal and abnormal anatomy and physiology of the musculoskeletal system. Students will practice memorization of the muscle groups and functions through software exercises. The basic physiological reactions and treatment of common injuries using hot and cold packs, ultrasound, hydrotherapy, and ultraviolet lamps will be discussed. Range of motion exercises, ambulating aids, and patient wheelchair transfers are demonstrated.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MA156 — Advanced Medical Terminology

Student will apply understanding of basic medical terminology and will add to their breadth of knowledge through software based exercises and the expectation in the classroom to refer to all terms by their proper medical signifier. This course provides the students with opportunity to apply and practice terminology in a mocked medical environment. Students will master the spelling, usage and application of medical terminology by applying their medical vocabulary to charting, rooming and following supervisory instruction.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MA201 — Laboratory Procedures

Specimen collection and handling, venipunctures, capillary puncture, diagnostic testing, and laboratory testing procedures of common office laboratory examinations are demonstrated and practiced in this course. Quality assurance and safety guidelines are stressed. Clinical lab skills include vital signs, venipunctures and injections will be checked for proficiency.

Prerequisite: None 100 Hours 7.0 Quarter Credits

MA202 — Medical Billing and Coding

This course is designed to introduce students to coding and classification systems and nomenclatures, indexes, registers and registries as well as the basic principles and uses of each. In-depth coding technique using the International Classification of Diseases, Clinical Modification (ICD-10-CM), the CPT coding manual, the standard data set, the HCFA insurance form, and current procedural terminology are taught. The course will cover the development of an insurance claim beginning with the completion of an encounter form, transferring the information to a ledger card, to the creation of a written and electronic claim form and claim follow-up to include Explanation of Benefits. The student will also have a basic understanding of the following insurance programs: Blue Cross/Blue Shield Plans, Medicare/ Medicaid, Champus (Tricare), Champva, Workers' Compensation and disability compensation programs. Students will utilize the media resource center regularly in order to complete research projects, write essays and improve learning through computer exercises.

Prerequisite: None 100 Hours 7.0 Quarter Credits

MA203 — Patient Examination, Vital Signs & Sensory Systems

Students learn how to perform and/or assist with examinations including auditory and visual examinations that are performed in a variety of medical offices. Study includes: positioning, draping, equipment preparation, examinations and procedures related to the eyes and ears, and anticipating patient and physician needs. Students learn the procedures for obtaining blood pressure, pulse, respirations, temperature, height and weight. Normal and abnormal findings are discussed. Students will learn to prepare examinations trays for various clinical settings.

Prerequisite: None 100 Hours 7.0 Quarter Credits

MA250 — Certification Preparation Seminar

Students will prepare for the national certification exam in the following areas of competence: administrative procedures, clinical procedures including fundamental principles of aseptic technique and infection control, diagnostic orders, patient care, professionalism, communication, and legal concepts. Exam topics will be reviewed in depth including: general medical assisting knowledge comprised of anatomy physiology, terminology and abbreviations, medical law and ethics, pharmacology, and office business procedures and management.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MAS104 — Introduction to Medical Transcription

This course introduces the student to medical transcription and training in the various types and styles of equipment, report formats, dictation, and the standards of operation within the transcription field. Medical terminology and the need for accuracy will be stressed. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MAS105 —Medical Terminology

This course introduces the student to pharmaceutical and medical billing terms, pharmaceutical abbreviations, and procedures. Students will receive the knowledge necessary to communicate information between pharmacists and physicians regarding prescription medications. The major emphasis is on the classifications, spelling, and pronunciation of the most commonly ordered prescription medications. The study of symbols and systems of measurement used in prescriptions will also be covered. Course includes more detailed and advanced study of the derivatives of medical terms, symbols, and signs. Presents an in-depth study of the correlation between medical vocabulary and the application of those terms to the anatomy and physiology

of the body, related diseases, conditions and treatment. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MAS106 — Human Resources, Risk Management and Employability

This course introduces the student to human resources and risk management in the medical environment. Students will be introduced to basic human resource functions including classifying and reclassifying existing positions, interviewing and hiring employees, counseling employees, benefits, work hours and overtime. Students will learn to identify the sources of liability in an office based medical practice, specify strategies to reduce exposure to office liability, discuss various methods to address compliance issues related to an office based medical practice and describe liability issues related to employment in the office based medical practice. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MAS107 – Advanced EHR

This course will cover the advanced topics in the field of electronic records. Such topics may include, but are not limited to: health data structure, standards across the board and various types of data collection methods. Students will also learn the importance of electronic health record maintenance, privacy, security and confidentiality. They will discuss the financial management side of insurances and billing.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MAS110 – Anatomy and Physiology

Upon completion of this subject, the student will have practical knowledge about the structural levels of organization, anatomical components, and physiology. The student will also learn about Medical Terminology and relationships related to various body organs and anatomical directions, planes, and body cavities. The student will have a clear understanding of the anatomy and physiology of a typical cell, tissues, organs, systems of the human body and homeostasis and its importance in the human body.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MAS140 – Medical Billing and Coding – ICD-10

This course will cover topics to provide students with an understanding of managed care plans and private plans, such as, but not limited to Medicare, Medicaid, HMOs, and PPOs. Students will become familiar with the processes needed for prior authorization. This course will focus on ICD-10.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MAS142 – Medical Billing and Coding – CPT

This course will cover topics to provide students with an understanding of managed care plans and private plans, such as, but not limited to Medicare, Medicaid, HMOs, and PPOs. Students will become familiar with the processes needed for prior authorization. This course will focus on CPT.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MAS144 – Medical Billing and Coding – HCPCS

This course will cover topics to provide students with an understanding of managed care plans and private plans, such as, but not limited to Medicare, Medicaid, HMOs, and PPOs. Students will become familiar with the processes needed for prior authorization. This course will focus on HCPCS.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MAS152 — Medical Office Procedures

General administrative procedures are introduced. Areas of study include receptionist duties, appointment scheduling, records management, financial arrangements, communications, telephone procedures, and correspondence management. This course addresses basic principles, terms and concepts of business structure including those in the medical field. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MAS155 — Medical Computerized Office

Students develop skills in entering, editing, analyzing, and retrieving patient data using specialized medical software. This course also includes hands-on use of the software for insurance billing, coding of diseases, medical records, and related

medical information. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MAS159 — Medical Accounting Procedures

The introduction of the accounting cycle with emphasis on accounting procedures typical in the merchandising and service business. Students will prepare financial statements, work with journals and ledgers, prepare payroll and banking statements, account receivables and payables, and develop skill in the use of standard spreadsheet software. Bookkeeping principles are identified and applied. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MAS160 — Tracing Delinquent Claims and Collections

Students will learn how to trace and handle delinquent claims. Students will learn the collection process including collections letters, telephone calls and collection servicing agencies. Legal Implications of the collection process will be identified. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MAS162 — Certification Preparation Seminar

Students will prepare for the national certification exam in the following areas of competence: medical insurance and billing procedures, terminology, the claims process, CPT coding, ICD-9-CM and HCPCS Level II Coding. Exam topics will be reviewed in depth including: CMS-1500 claims forms, confidentiality and ethics, Blue plans, disability, HIPSS, Medicaid and Medicare, OSHA, and TRICARE.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MAS170 – First Aid and CPR / Billing Claims

This course will provide students with the experience in the billing claims areas. Student will understand the process for submitting claims, managing accounts and balances. Students will also be trained in first aid and CPR.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MASDE104 — Introduction to Medical Transcription

This course introduces the student to medical transcription and training in the various types and styles of equipment, report formats, dictation, and the standards of operation within the transcription field. Medical terminology and the need for accuracy will be stressed. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MASDE105 —Medical Terminology

This course introduces the student to pharmaceutical and medical billing terms, pharmaceutical abbreviations, and procedures. Students will receive the knowledge necessary to communicate information between pharmacists and physicians regarding prescription medications. The major emphasis is on the classifications, spelling, and pronunciation of the most commonly ordered prescription medications. The study of symbols and systems of measurement used in prescriptions will also be covered. Course includes more detailed and advanced study of the derivatives of medical terms, symbols, and signs. Presents an in-depth study of the correlation between medical vocabulary and the application of those terms to the anatomy and physiology of the body, related diseases, conditions and treatment. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MASDE106 — Human Resources, Risk Management and Employability

This course introduces the student to human resources and risk management in the medical environment. Students will be introduced to basic human resource functions including classifying and reclassifying existing positions, interviewing and hiring employees, counseling employees, benefits, work hours and overtime. Students will learn to identify the sources of liability in an office based medical practice, specify strategies to reduce exposure to office liability, discuss various methods to address compliance issues related to an office based medical practice and describe liability issues related to employment in the office based medical practice. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MASDE107 – Advanced EHR

This course will cover the advanced topics in the field of electronic records. Such topics may include, but are not limited to: health data structure, standards across the board and various types of data collection methods. Students will also learn the importance of electronic health record maintenance, privacy, security and confidentiality. They will discuss the financial management side of insurances and billing.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MASDE110 – Anatomy and Physiology

Upon completion of this subject, the student will have practical knowledge about the structural levels of organization, anatomical components, and physiology. The student will also learn about Medical Terminology and relationships related to various body organs and anatomical directions, planes, and body cavities. The student will have a clear understanding of the anatomy and physiology of a typical cell, tissues, organs, systems of the human body and homeostasis and its importance in the human body.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MASDE152 — Medical Office Procedures

General administrative procedures are introduced. Areas of study include receptionist duties, appointment scheduling, records management, financial arrangements, communications, telephone procedures, and correspondence management. This course addresses basic principles, terms and concepts of business structure including those in the medical field. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MASDE155 — Medical Computerized Office

Students develop skills in entering, editing, analyzing, and retrieving patient data using specialized medical software. This course also includes hands-on use of the software for insurance billing, coding of diseases, medical records, and related medical information. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None 50 Hours 3.5 Quarter Credits

MASDE162 — Certification Preparation Seminar

Students will prepare for the national certification exam in the following areas of competence: medical insurance and billing procedures, terminology, the claims process, CPT coding, ICD-9-CM and HCPCS Level II Coding. Exam topics will be reviewed in depth including: CMS-1500 claims forms, confidentiality and ethics, Blue plans, disability, HIPSS, Medicaid and Medicare, OSHA, and TRICARE.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MGT300 — Communication for the Healthcare Professional

This course is designed to develop and strengthen oral and written communication skills for leaders. Students will apply the critical fundamentals of business communication protocols for business letters, memoranda, electronic mail, business messages, instructions, as well as formal reports and proposals. In addition, there will be instruction in oral presentation and in-depth practice on both an individual and a collaborative basis understand the importance of becoming an effective business communicator in today's changing organizations.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MGT310 — Introduction to Management in Healthcare Organizations

This course presents a thorough and systematic coverage of management and organizational theory and practice. It will focus on the basic roles, skills and functions of management with special attention to managerial responsibility for effective and efficient achievement of goals. Additionally, students will be introduced to social responsibility, managerial ethics, and the ever-increasing importance of the current demand in organizations that their managers understand the concepts of strategic and tactical organizational planning and design.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MGT315 — Ethics for the Healthcare Professional

The course provides a comprehensive inquiry into the major components of social responsibility and a study of moral and ethical issues that relate to problems in business. Focus will be on the economic, legal, political, ethical, and societal issues involving the interaction of business, government, and society.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MGT325 — Marketing for the Healthcare Professional

This course provides an introduction to contemporary marketing theory and its application in the marketing implementation process. It places special focus on identifying market opportunity, product development, promotion planning, pricing decisions, and channels of distribution.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MGTDE310 — Introduction to Management in Healthcare Organizations

This course presents a thorough and systematic coverage of management and organizational theory and practice. It will focus on the basic roles, skills and functions of management with special attention to managerial responsibility for effective and efficient achievement of goals. Additionally, students will be introduced to social responsibility, managerial ethics, and the ever-increasing importance of the current demand in organizations that their managers understand the concepts of strategic and tactical organizational planning and design.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MGTDE320 — Human Resources for the Healthcare Professional

This course exposes students to the breadth of human resources management topics. The primary topics are the functions of human resources such as job analysis and planning, recruiting, staffing, orientation and training, performance appraisal, career planning, compensating, and motivating. A wide variety of secondary topics will also be covered in this course to include learning principles, human resource development interventions, employee orientation and socialization, performance management, coaching, diversity, and employee counseling. The situational context of the workforce and the legal issues in employment decisions will also be studied.

Prerequisite: None 50 Hours 4.0 Quarter Credits

MIS300 — Information Technology for the Healthcare Professional

This course introduces the business applications of information technology and evaluates the operating characteristics and organizational implications of business information systems from the viewpoint of management. Emphasis will be placed on the discussion of strategic information planning, organizational change, systems-based decision making, social, legal, and ethical awareness in the study of technology integration will be also be analyzed.

Prerequisite: None 50 Hours 4.0 Quarter Credits

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

MM301 — Storyboarding

Students will learn how to interpret a story, via script form, and draw the story into storyboard panels. The course will cover history, terminology, camera direction, scene interpretation, composition, symbology and types of storyboarding (such as feature film, animation and commercial).

Prerequisite: Associate of Arts in Graphic Design or satisfactory completion of courses ART111 — EM253 **50 Hours** **3.5 Quarter Credits**

MM302 — Digital Video/Motion Graphics

Adobe After Effects and Final Cut Pro — This class covers the digital video editing programs most frequently used in the multimedia design industry. Students develop the necessary skills required to enter the field of digital video and are able to define and utilize the appropriate time base, compiling, animation, editing, and compression and output skills used in creating motion graphics.

Prerequisite: Associate of Arts in Graphic Design or satisfactory completion of courses ART111 — EM253 **50 Hours** **3.5 Quarter Credits**

MM303 — Introduction to Website and Mobile Development

In this course, students will learn the fundamentals of Web Design using HTML5, and CSS3 and Basic Mobile App Development using LiveCode Authoring software. Topics will span the history of HyperText Markup Languages, Internet Publishing, and Object-Oriented Programming and User-Interface/User-Experience (UI/UX) Design trends. Emphasis will be placed on the key concepts of Coding using Markup Languages, Integrated Development Environments/Authoring System, and User-Friendly Interface Design. Students will publish their multimedia portfolio as both a standards-compliant HTML5/CSS3 website coded by hand as well as an App Store-compatible application created with LiveCode Community.

Prerequisite: Associate of Arts in Graphic Design or satisfactory completion of courses ART111 — EM253 **100 Hours** **7.0 Quarter Credits**

MM304 — Flash Animation

In this course, students will learn the fundamentals 2D animation using Adobe Flash. Topics will include the history of 2D animation and digital animating and current trends. Emphasis will be placed on key, Flash Features, & animation. Students will design and create a 2D animation for their multimedia portfolio.

Prerequisite: Associate of Arts in Graphic Design or satisfactory completion of courses ART111 — EM253 **100 Hours** **7.0 Quarter Credits**

MM305 — 3D Modeling and Animation

Maya 3D — This class covers understanding and utilizing the basic tools and commands necessary to create 3D projects. Attention is given to the particular design challenges encountered while working in three dimensions. Students are introduced to 3D animation and scene building.

Prerequisite: Associate of Arts in Graphic Design or satisfactory completion of courses ART111 — EM253 **100 Hours** **7.0 Quarter Credits**

MM306 — Figure Drawing 2

This course is a continuation of Figure Drawing with emphasis on the gesture using live models. The student will learn anatomy, muscle and bone structure of the human body. The student will develop skills in using the following media: Conte crayon, pencil, and charcoal. At the end of the course, the student will have executed a fully rendered drawing.

Prerequisite: Associate of Arts in Graphic Design or satisfactory completion of courses ART111 — EM253 **50 Hours** **3.5 Quarter Credits**

MM307 — Anatomy & Sculpting

This course continues to build the student's drawing skills with a particular emphasis on depicting anatomy, both through drawing and sculpture

Prerequisite: Associate of Arts in Graphic Design or satisfactory completion of courses ART111 — EM253 **50 Hours** **3.5 Quarter Credits**

MM350 — Portfolio Preparation

Interactive course focusing on the individual student's needs dealing with preparing oneself for the job market. Interviewing techniques, resume production, personal letterhead, professional business practices, portfolio development, self-marketing tools, appropriate methods for contacting potential employers, personal dress, and attitudes related to the interview process will be covered.

Prerequisite: All preceding Multimedia courses **100 Hours** **7.0 Quarter Credits**

MTH101 — Introduction to Algebra

Math 101 focuses on the use of rational and irrational numbers in algebra. Students will become proficient in computing with integers, fractions, decimals, the order of operations, and basic radical expressions. The topic areas in algebra include, but are not limited to, basic set theory, the classification of the real number system, the addition, subtraction and multiplication of polynomials, solving linear equations, solving linear inequalities, ratios, rates, and proportional reasoning. Math 101 includes the application of dimensional analysis to perform unit conversions in both the English and SI units of measurement within a problem solving context.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

MTH102 — College Algebra

Math 102 includes topics from algebra. Algebra topics include the addition, subtraction, multiplication, and division of the real and complex numbers as well as polynomials. Additionally, Math 102 includes the solving of a variety of equations and inequalities, including, but not limited to, linear, absolute value, and quadratic equations. Math 102 includes the graphing of a variety of functions with an emphasis on linear and quadratic functions; functions notation will be applied in problem solving as well as in computations involving combinations of functions.

Prerequisite: None **60 Hours** **6.0 Quarter Credits**

MTH103 — Intermediate Algebra

Math 103 includes topics from algebra. Algebra topics include the addition, subtraction, multiplication, and division of the real and complex numbers as well as polynomials. Additionally, MTH103 includes the solving of a variety of equations and inequalities, including, but not limited to, linear, absolute value, and quadratic equations. MTH103 includes the graphing of a variety of functions with an emphasis on linear and quadratic functions; functions notation will be applied in problem solving as well as in computations involving combinations of functions.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

MTHDE101 — Introduction to Algebra

Math 101 focuses on the use of rational and irrational numbers in algebra. Students will become proficient in computing with integers, fractions, decimals, the order of operations, and basic radical expressions. The topic areas in algebra include, but are not limited to, basic set theory, the classification of the real number system, the addition, subtraction and multiplication of polynomials, solving linear equations, solving linear inequalities, ratios, rates, and proportional reasoning. Math 101 includes the application of dimensional analysis to perform unit conversions in both the English and SI units of measurement within a problem solving context.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

MTHDE102 — College Algebra

Math 102 includes topics from algebra. Algebra topics include the addition, subtraction, multiplication, and division of the real and complex numbers as well as polynomials. Additionally, Math 102 includes the solving of a variety of equations and inequalities, including, but not limited to, linear, absolute value, and quadratic equations. Math 102 includes the graphing of a variety of functions with an emphasis on linear and quadratic functions; functions notation will be applied in problem solving as well as in computations involving combinations of functions.

Prerequisite: None **60 Hours** **6.0 Quarter Credits**

MX251 — Externship

The Externship experience provides the student with the opportunity to practice the skills they have been taught in school. It is a real world scenario in which the student will work with patients, doctors, and other members of the healthcare delivery team. This hands-on experience gives the student on-the-job training that would be impossible to provide in a classroom setting. The Externship Site Supervisor will complete weekly evaluations tracking the student's progress, as well as a final evaluation at the completion of the student's hours. The Externship Coordinator will monitor the student's progress, along with the Externship Site Supervisor, with on-site visits being performed.

Prerequisite: Completion of all coursework with a cumulative 2.0 GPA.
160 Hours **5.0 Quarter Credits**

OTA100 – Anatomy & Physiology for Occupational Therapy Assistants

This course provides the student with a working knowledge of the structure and function of the human body and mechanisms for maintaining homeostasis within it. The course includes the study of the Integumentary, Skeletal, Muscular, Nervous, Cardiac, and Respiratory systems.

Prerequisites: None **50 hours** **3.5 Quarter Credits**

OTA110 – Kinesiology I

This is the first of two courses in kinesiology and builds upon previously learned information from anatomy and physiology. This course identifies joint types and positions, and analyzes muscle function and biomechanics. This course creates understanding the functional movement of the neck, trunk, and lower extremity.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants
50 hours **3.5 Quarter Credits**

OTA120 – Neuroscience

This is an introductory course on neuroscience. It explores the relationship between the functions of the brain and human behavior. The effects of heredity and experience to shape nervous system responses and adaptations are examined. Students are introduced to medical conditions which are caused by or influenced by neurological pathologies or malformation.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants
50 hours **5.0 Quarter Credits**

OTA130 – Medical Terminology & Conditions

This is an introductory course on medical conditions and terminology. Students acquire medical vocabulary needed to understand medical charts and professional literature. Medical conditions which affect occupational performance and are likely to be treated by occupational therapy practitioners are presented. Students gain a basic understanding of conditions' symptoms, causes, prognoses, and impact on occupation.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience
50 hours 5.0 Quarter Credits

OTA140 – Activity Analysis

This course teaches students to analyze a task, activity, or occupation by breaking it down into its component parts. The analysis consists of the task, activity, or occupation itself as well as analysis of the person performing it. Students learn to analyze the client factors and performance skills required to perform the action. They also learn how to grade, modify, or adapt the task, activity, or occupation to increase occupational performance as well as to select interventions to promote health, establish or restore skills, maintain skills, compensate for skill loss, and prevent disability. Objective, descriptive language utilizing the Occupational Therapy Practice Framework, to support occupational therapy documentation is emphasized.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA210 – Kinesiology II
50 hours 5.0 Quarter Credits

OTA150 – Foundations of Occupational Therapy

This course introduces students to the history and current practice of occupational therapy. Content includes the historical, scientific, philosophical, and sociopolitical forces affecting the evolution of occupational therapy practice. Theories and frames of reference used in the occupational therapy process are covered. Students learn the role of the occupational therapy assistant during the occupational therapy process and as part of the interprofessional team in traditional or emerging practice areas.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA210 – Kinesiology II
50 hours 5.0 Quarter Credits

OTA160 – Pediatrics Conditions I

This course introduces students to pediatric occupational therapy conditions. Topics include child development, common neurodevelopmental disorders, and mental health. Students learn the clinical presentation of genetic, heritable, and developmental conditions. Applied learning, based on compensation, remediation, prevention, and health promotion, is stressed through case studies and practical experiences. A variety of frames of reference are applied including developmental, biomechanical, rehabilitation, Dunn's model of sensory processing, operant conditioning, motor learning, and CO-OP. The PEO model as an overarching model is used to ensure clinical reasoning is occupation based. Skills with assistive technology, data collection, assessments, and documentation are reviewed and built upon.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA170 – Theory in a Practice Profession, OTA180 – Assistive Technology & Environmental Adaptation, OTA190 – Data Collections, OTA200 – Psychosocial Health, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions
50 hours 4.0 Quarter Credits

OTA170 – Theory in a Practice Profession

This course provides instruction in the theories, practice models, and frames of reference used in occupational therapy practice. Students learn to apply the PEO model as an overarching theoretical basis of practice in conjunction with various frames of reference. The course emphasizes occupation--based clinical reasoning using a top-down systems approach to promote health, wellness, and participation.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA140 – Activity Analysis, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions
50 hours 5.0 Quarter Credits

OTA180 – Assistive Technology & Environmental Adaptation

This is an introductory course in assistive technology, and environmental adaptation and modification. Students learn to select and apply low and high technology assistive technology to promote independence, performance, safety, and participation, and to compensate for deficits. Environmental adaptation and modification are made via understanding the principles of Universal Design, activity analysis, the Americans with Disabilities Act (ADA), and the PEOP model. Functional mobility and community mobility, access, and participation is promoted.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA140 – Activity Analysis, OTA170 – Theory in a Practice Profession, OTA190 – Data Collections, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions
 50 hours 5.0 Quarter Credits

OTA190 – Data Collections

This course introduces students to the process of collecting clinically relevant data as part of the COTA's role in the occupational therapy process. Principles of evidence-based therapy including formulating clinical questions, database searching, and ranking evidence are covered. Students also learn to collect and report on clinical data gathered from standardized assessments, clinical observations, and outcome measures. Aspects of ethical and legal practice related to supervision and billing are explored.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA140 – Activity Analysis, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions
 50 hours 4.0 Quarter Credits

OTA200 – Psychosocial Health

This course introduces students to the treatment of psychosocial health in occupational therapy. It prepares the learner to engage in health promotion and prevention of symptoms of dysfunction, as well as creating interventions for those with mental illness as psychosocial dysfunction. Learners develop competency with data collection, applying evidence, and utilizing frames of reference to promote improved occupational performance for individuals, groups, and populations. Learners consider

how environmental adaptations and assistive technology affect health. The PEOP model is used an overarching model to ensure clinical reasoning occupation based. Ethical treatment and client rights are discussed and explored. Applied learning is stressed through case studies and simulation. Data collection, cognitive and fall assessments, and documentation are reviewed.

Prerequisites: OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA140 – Activity Analysis, OTA170 – Theory in a Practice Profession, OTA190 – Data Collections, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions
 50 hours 4.0 Quarter Credits

OTA210 – Kinesiology II

This is the second course in kinesiology and builds upon previously learned information. This course focuses on understanding the functional movement of the upper extremity. Motor Learning principles are introduced so the student can effectively apply kinesiology principles to affect change in clients.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience
 50 hours 3.5 Quarter Credits

OTA220 – Hand & Upper Extremity Conditions

This course introduces students to the treatment of orthopedic, muscular, and neurological hand and upper extremity injuries typically addressed in the outpatient setting. Students learn assessment of clinical signs and symptoms including proactive testing. Biomechanical interventions including soft tissue mobilization, joint ranging, splinting, and application of physical agent modalities are learned and practiced. Ergonomic principles to prevent musculoskeletal disorders are learned and practiced. Applied learning is stressed through case studies and simulation. The PEOP model is used an overarching model to ensure clinical reasoning occupation based. Data collection, assessments, and documentation are reviewed.

Prerequisites: OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA140 – Activity Analysis, OTA170 – Theory in a Practice Profession, OTA180 – Assistive Technology & Environmental Adaptation, OTA190 – Data Collections, OTA200 – Psychosocial Health, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions
 50 hours 3.5 Quarter Credits

OTA230 – Neurological Conditions

This course introduces students to the treatment of neurological insults typically addressed in the hospital, skilled nursing, and home health settings. Students learn clinical presentations of cerebral vascular accidents, traumatic brain injury, and spinal cord injury. Applied learning, based on compensation and remediation, is stressed through case studies and simulation. Learners consider the evidence and benefits of employing emerging technologies and strategies, and the ethics of providing interventions which are not supported by evidence. Motor interventions consistent with dynamic systems theory are applied. The PEOP model is used as an overarching model to ensure clinical reasoning occupation based. Data collection, assessments, and documentation are reviewed.

Prerequisites: OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA140 – Activity Analysis, OTA170 – Theory in a Practice Profession, OTA180 – Assistive Technology & Environmental Adaptation, OTA190 – Data Collections, OTA200 – Psychosocial Health, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions

50 hours 3.5 Quarter Credits

OTA240 – Cognitive & Neurodegenerative Conditions

This course introduces students to the treatment of neurodegenerative conditions as well as treatment of the cognitive, visual perceptual, and praxis impairments secondary to neurological conditions and insults. Students learn the clinical presentations of various hereditary and acquired neurological conditions. Applied learning, based on compensation, remediation, and health promotion, is stressed through case studies and simulation. Evidence-based interventions, strategies, and technologies are learned using the PEOP model as an overarching model to ensure clinical reasoning is occupation based. Data collection, cognitive and fall assessments, and documentation are reviewed.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA170 – Theory in a Practice Profession, OTA180 – Assistive Technology & Environmental Adaptation, OTA190 – Data Collections, OTA200 – Psychosocial Health, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions

50 hours 4.0 Quarter Credits

OTA250 – Interprofessional Collaboration & Fieldwork I

This course explores the effects of culture on the practice of occupational therapy. Students acquire increased skill in effectively working with clients from varied backgrounds in an interprofessional setting. In addition to didactic learning students also participate in a Level I Fieldwork experience.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA1690 – Pediatrics Conditions I, OTA170 – Theory in a Practice Profession, OTA180 – Assistive Technology & Environmental Adaptation, OTA190 – Data Collections, OTA200 – Psychosocial Health, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions, OTA240 – Cognitive & Neurodegenerative Conditions

86 hours 5.0 Quarter Credits

OTA260 – Pediatrics Conditions II

This is the second course on pediatric conditions and builds on information from the initial course. Topics include play, positioning, oral motor skills, orthotics, early intervention, and school-based therapy. Students learn the clinical presentations of a variety of lower incident genetic, developmental, and heritable disorders. The importance of client centered therapy in the natural environment is emphasized. Applied learning, based on compensation, remediation, prevention, and health promotion, is stressed through case studies and practical experiences. A variety of frames of reference and models are applied including developmental, biomechanical, rehabilitation, Dunn’s model of sensory processing, operant conditioning, mindfulness, motor learning, constraint induced movement therapy, the Educational Framework for Child Success, and CO-OP. The PEOP model as an overarching model is used to ensure clinical reasoning is occupation based. Skills with assistive technology, data collection, assessments, and documentation are reviewed and built upon.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA1690 – Pediatrics Conditions I, OTA170 – Theory in a Practice Profession, OTA180 – Assistive Technology & Environmental Adaptation, OTA190 – Data Collections, OTA200 – Psychosocial Health, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions, OTA240 – Cognitive & Neurodegenerative Conditions

50 hours 4.0 Quarter Credits

OTA270 – Community-Based Wellness and Access

This course is designed for the learner to explore service delivery outside of the traditional hospital or medical clinical setting. Approaches to intervention include health promotion, maintenance of health, modification, and prevention. Therapy outcomes emphasize prevention, health and wellness, quality of life, participation, and well-being. Students apply previously acquired knowledge to consider how to serve populations and systems, as well as how to advocate for the power of occupational therapy. Justice, access, and ethical provision of services are explored. Leadership, business, and academic skills are incorporated to prepare students for future professional roles.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA1690 – Pediatrics Conditions I, OTA170 – Theory in a Practice Profession, OTA180 – Assistive Technology & Environmental Adaptation, OTA190 – Data Collections, OTA200 – Psychosocial Health, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions, OTA240 – Cognitive & Neurodegenerative Conditions, OTA250 – Interprofessional Collaboration & Fieldwork I, OTA260 – Pediatrics Conditions II
 50 hours 5.0 Quarter Credits

OTA275 – Occupational Therapy Interventions

This course provides students the opportunity to practice the occupational therapy process on multiple clients across the lifespan. Learners use case studies and simulations to refine theory and apply skills learned in previous coursework. Clinical skills, data collection, documentation, therapeutic use of self, and professionalism skills are strengthened and refined. An emphasis is building the pace of the simulations to what would be expected in a real world clinic.

Prerequisites: OTA100 – Anatomy & Physiology for Occupational Therapy Assistants, OTA110 – Kinesiology I, OTA120 – Neuroscience, OTA130 – Medical Terminology & Conditions, OTA1690 – Pediatrics Conditions I, OTA170 – Theory in a Practice Profession, OTA180 – Assistive Technology & Environmental Adaptation, OTA190 – Data Collections, OTA200 – Psychosocial Health, OTA210 – Kinesiology II, OTA220 – Hand & Upper Extremity Conditions, OTA230 – Neurological Conditions, OTA240 – Cognitive & Neurodegenerative Conditions, OTA250 – Interprofessional Collaboration & Fieldwork I, OTA260 – Pediatrics Conditions II
 50 hours 5.0 Quarter Credits

OTA280 – Level II Fieldwork A-1

This course provides students the ability to practice skills in a professional setting. Students are supervised by a licensed occupational therapy practitioner in a practice setting. Students provide occupational therapy services for clients beginning with highly structured supervision and close monitoring and gradually moving towards the level of structure and monitoring expected of a new graduate.

Prerequisites: all program core courses
 165 hours 5.5 Quarter Credits

OTA285 – Level II Fieldwork A-2

This course provides students the ability to practice skills in a professional setting. Students are supervised by a licensed occupational therapy practitioner in a practice setting. Students provide occupational therapy services for clients beginning with highly structured supervision and close monitoring and gradually moving towards the level of structure and monitoring expected of a new graduate.

Prerequisites: all program core courses
 180 hours 6.5 Quarter Credits

OTA290 – Level II Fieldwork B-1

This course provides students the ability to practice skills in a professional setting. Students are supervised by a licensed occupational therapy practitioner in a practice setting. Students provide occupational therapy services for clients beginning with highly structured supervision and close monitoring and gradually moving towards the level of structure and monitoring expected of a new graduate.

Prerequisites: all program core courses
 165 hours 5.5 Quarter Credits

OTA295 – Level II Fieldwork B-2

This course provides students the ability to practice skills in a professional setting. Students are supervised by a licensed occupational therapy practitioner in a practice setting. Students provide occupational therapy services for clients beginning with highly structured supervision and close monitoring and gradually moving towards the level of structure and monitoring expected of a new graduate.

Prerequisites: all program core courses
 180 hours 6.5 Quarter Credits

PLATT COLLEGE
**COURSE
 DESCRIPTIONS**

PHS101 — Physics

Physics 101 is an introductory class designed to provide a foundational knowledge in a variety of topic areas in Physics. The course contains a comprehensive study of measurement, density, an introduction to Newton's laws of motion, gravity, the conservations of energy, work, power, and momentum. The course additionally includes topics in heat and temperature, electricity, sound, and light. All topics studied include an emphasis on problem solving, dimensional analysis, and the application of mathematics in each topic area.

Co-requisite: MTH 101 or MTH 102 or Equivalent
50 Hours **5.0 Quarter Credits**

POL305 — American Government

A study of American government and its constitutional basis, how it operates, and the influence of American institutions on the national and state legislative body. A daily student lead review of current events and how they affect our perception of the government.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

POLDE305 — American Government

A study of American government and its constitutional basis, how it operates, and the influence of American institutions on the national and state legislative body. A daily student lead review of current events and how they affect our perception of the government.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

PSY101 — Psychology

This survey course covers a broad spectrum of major psychological theories and theorists. Topics covered include, but are not limited to the biological basis of behavior, states of consciousness, personality, stress, psychological disorders, and social psychology. Students participate through student led reviews of current research, self-evaluations, and other in-class projects.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

PSYDE101 — Psychology

This survey course covers a broad spectrum of major psychological theories and theorists. Topics covered include, but are not limited to the biological basis of behavior, states of consciousness, personality, stress, psychological disorders, and social psychology. Students participate through student led reviews of current research, self-evaluations, and other in-class projects.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

RT100 - Introduction to Respiratory Therapy

The student will receive an introduction to the profession of respiratory therapy. The student will learn the history and scope of practice of respiratory care. An in-depth examination of the cardiovascular and pulmonary systems will be given, including the physical principles governing those systems. Students will also learn basic medical terminology.

Pre-requisite: None **40 hours** **3.5 Quarter Credits**

RT105 - Pulmonary Pathophysiology I

The student will learn about the physical gas laws and how they relate to gas flow within the pulmonary system.

Pre-requisite: None **40 hours** **3.5 Quarter Credits**

RT110 - Cardiovascular Anatomy and Physiology

Students will learn the anatomy and physiology of the cardiovascular system. Disorders of the cardiovascular system will be discussed as well as the common pharmacological agents that are used to treat the disorders. The students will be certified in Basic Life Support.

Pre-requisite: None **40 hours** **3.5 Quarter Credits**

RT115 – Pulmonary Pathophysiology II

The student will be introduced to the principles of ventilation and gas exchange within the pulmonary and cardiac systems.

Pre-requisite: None **40 hours** **3.0 Quarter Credits**

RT120 – Blood Gas Interpretation

The student will learn to calculate blood gas parameters, interpret those parameters and evaluate the patient need for oxygen therapy.

Pre-requisite: None **35 hours** **3.0 Quarter Credits**

RT125 – Pathophysiology

The student will receive an introduction to the common pathophysiological disorders affecting the respiratory system.

Pre-requisite: None **50 hours** **4.0 Quarter Credits**

PLATT COLLEGE
**COURSE
 DESCRIPTIONS**

RT130 – Pharmacology RT

The student will learn the medications commonly used in the treatment of pulmonary disorders, their actions, indications, contraindications and hazards.

Pre-requisite: None 35 hours 3.0 Quarter Credits

RT135 – Patient Assessment

This course will provide an introduction to the theory of the hospital experience. The student will learn the physical methods of patient assessment.

Pre-requisite: None 35 hours 3.0 Quarter Credits

RT140 - Airway Management

The student will be introduced to techniques in airway management including artificial airways, tracheostomy tubes, postural drainage and secretion mobilization techniques.

Pre-requisite: None 50 hours 4.0 Quarter Credits

RT145 – Medical Gas Therapy

The student will be introduced to medical gas systems, use of bulk and tank oxygen, gas mixtures, and regulators. The student will learn about the use of medical gases on patients and their indications, contraindications and hazards.

Pre-requisite: None 35 hours 2.5 Quarter Credits

RT150 – Humidity and Aerosol Therapy

The student will be introduced to humidification of medical gasses and the delivery of aerosols along with their indications, contraindications and hazards.

Pre-requisite: None 35 hours 3.0 Quarter Credits

RT155 Lung Expansion Therapy

The student will receive an overview of pulmonary diseases that cause atelectasis and learn about the devices used for lung expansion therapy. The student will practice infection control techniques and learn sterile processing procedures.

Pre-requisite: None 55 hours 4.0 Quarter Credits

RT160 - Clinical Rotation I

This course is an intern module in which the student will be assigned to a clinical site. There, under preceptorship, the student will begin the practice of the therapies mastered in the laboratory. Case studies and simulations of the patients treated will be presented to the class for review and critique on a weekly basis.

Pre-requisite: None 150 hours 6.0 Quarter Credits

RT200 – Introduction of Ventilatory Support

The pathophysiology of respiratory failure will be discussed. Methods of providing ventilatory support to the patient in respiratory failure, including the various modes of mechanical ventilation, and the monitoring and management of patients receiving ventilatory support will be presented. Students will receive certification in Advanced Cardiac Life Support according to American Heart Association guidelines.

Pre-requisite: None 60 hours 4.5 Quarter Credits

RT205 – Modes of Ventilatory Support

The student will be introduced to modes of mechanical ventilation used to treat various disease states, surgical interventions and trauma.

Pre-requisite: None 60 hours 5.0 Quarter Credits

RT210 – Monitoring of Ventilatory Support

This course instructs the student on the basic methods of monitoring mechanically ventilated patients, discusses the normal parameters for intubation and extubation of patients and the use of monitoring devices.

Pre-requisite: None 60 hours 4.5 Quarter Credits

RT215 – Management of Ventilatory Support

This course will familiarize the student with methods and factors used to determine a patients ability to be weaned from mechanical ventilation along with the parameters used to place and discontinue patients on Non Invasive Positive Pressure Ventilation. The student will also be trained in Advanced Cardiac Life Support thru the American Heart Association methods.

Pre-requisite: None 60 hours 4.5 Quarter Credits

RT220 - Clinical Rotation II

This course is a continuation of RT215, in which the students will be assigned to a clinical site. There, under preceptorship, the student will practice the initiation, management, and discontinuation of ventilatory support that were mastered in the laboratory. Case studies and simulations of the patients receiving ventilatory support will be presented to the class for review and critique on a weekly basis.

Pre-requisite: None 150 hours 6.0 Quarter Credits

RT225 - Clinical rotation III

This course is a continuation of RT215, in which the students will be assigned to a clinical site. There, under preceptorship, the student will practice the initiation, management, and discontinuation of ventilatory support that were mastered in the laboratory. Case studies and simulations of the patients receiving ventilatory support will be presented to the class for review and critique on a weekly basis.

Pre-requisite: None 150 hours 6.0 Quarter Credits

RT230 – Pre-Natal Development and Birth

The development of the embryo and fetus will be reviewed. The process of labor and delivery and the resuscitation of the newborn in the delivery room will be studied. The unique pathophysiological states associated with the newborn and the modes of therapy to treat those states will be discussed. Laboratory practice of the modalities will be included. Common pathophysiological disorders of the pediatric patient will be presented. Modes of treatment of these disorders will be discussed and practiced in the laboratory setting. Students will receive certification for Neonatal-Pediatric Resuscitation certification and Pediatric Advanced Life Support according to the guidelines of the American Academy of Pediatrics.

Pre-requisite: None 40 hours 3.5 Quarter Credits

RT235 – Neonatal Respiratory Care

The student will learn about the ventilatory and oxygenation needs of neonates, there indications, contraindications and hazards.

Pre-requisite: None 30 hours 2.5 Quarter Credits

RT240 – Pediatric Respiratory Care

In this course, the student will learn about the common disease processes associated with pediatric development, acute trauma and their associated therapies.

Pre-requisite: None 30 hours 2.5 Quarter Credits

RT245 - Clinical Rotation IV

This course is a continuation of RT240, in which the students will be assigned to a clinical site. There, under preceptorship, the student will practice those procedures and modalities mastered in the laboratory setting. Case studies and simulations of the patients receiving care will be presented for review and critique on a weekly basis.

Pre-requisite: None 150 hours 6.0 Quarter Credits

RT250 - Non-Acute Care Respiratory Therapy

The student will be introduced to the concepts of pulmonary rehabilitation and disease management. The various philosophies of improving both pulmonary function and stamina in the activities of daily living for patients with pulmonary disease will be presented.

Pre-requisite: None 75 hours 5.0 Quarter Credits

RT255 - Clinical Rotation V

This course is a continuation of RT250, in which the student will be given a clinical assignment. There, under preceptorship, the student will observe and practice those procedures and techniques discussed previously. Case studies and

simulations of the patients receiving care will be presented for review and critique on a weekly basis. This rotation can be based on previously learned/unlearned procedures as required by the school given site availability.

Pre-requisite: None 58 hours 2.0 Quarter Credits

RT260 - Clinical Rotation VI

The students will complete 72 hours of clinical experience while under the supervision of a clinical preceptor. Students will need to complete 15 hours in the classroom setting to review their clinical experience.

Pre-requisite: None 87 hours 3.0 Quarter Credits

RT265 – Final Review

Students will be preparing for the post-graduate examinations of the National Board for Respiratory Care.

Pre-requisite: None 50 hours 4.5 Quarter Credits

RTDE310 — Advanced Topics in Respiratory Therapy Critical Care 1

The students will study the current perspectives in pathophysiology as they relate to the diseases commonly encountered in the intensive care setting. The current approaches to management of the critically ill patient, including pharmacological and ventilator management, will be included.

Prerequisite: Pass the TMC exam at the high cut score and CSE exam.
100 Hours 8.0 Quarter Credits

RTDE311 — Advanced Topics in Respiratory Therapy Critical Care 2

The students will study the assessment of the critically ill patient. The hemodynamic, ventilatory, and nutritional assessment and monitoring of the patient will be included along with strategies for correction of instability in these areas.

Prerequisite: Pass the TMC exam at the high cut score and CSE exam.
100 Hours 8.0 Quarter Credits

RTDE312 — Advanced Topics in Respiratory Therapy Critical Care 3

Specialized areas within the critical care setting will be discussed. These include stabilization and transport of the critically ill patient. Students will develop patient simulation case studies, relevant to their assigned topics.

Prerequisite: Pass the TMC exam at the high cut score and CSE exam.
100 Hours 8.0 Quarter Credits

RTDE313 — Advanced Topics in Respiratory Therapy Critical Care 4

The students will be introduced to the concepts of performing research in the areas of critical care respiratory therapy. The criteria and techniques necessary for attaining validity in the performance of research along with the format of presenting research completed will be presented.

Prerequisite: Pass the TMC exam at the high cut score and CSE exam.
100 Hours 8.0 Quarter Credits

RTDE350 — Specialty Topics in RT Management

The student will study the key managerial aspects of supervising a Respiratory Therapy Department including: supervision of staff, identifying and developing the right team, interaction with other departments, and a general orientation to the respiratory therapy Supervisor's/Manager's specific duties, e.g., evaluation of new products and procedures, quality control, budgeting, and time and motion studies.

Prerequisite: Pass the TMC exam at the high cut score and CSE exam.
50 Hours 4.0 Quarter Credits

RTDE420 — Respiratory Therapy Capstone

The capstone project is a culmination of the knowledge gained in B.S.R.T. Program. The objective of the approved projects is to improve healthcare outcomes in the clinical setting. These evidence based projects may address necessary changes in the healthcare delivery system, modification procedures to aid the quality improvement processes, health care organizational changes, ways of improving the state of healthcare delivery at the local, regional and national level. The project will include approval of the project, the problem statement and background information, project objectives and expected outcomes, and evaluation plan with methodology and measures included will be evaluated.

Prerequisite: Pass the TMC exam at the high cut score and CSE exam.
100 Hours 8.0 Quarter Credits

SOC101 – Sociology

This class provides an overview of sociology and its application to everyday life. Emphasis is placed on understanding the major theories, concepts, and terminology. Students will explore topics such as culture, inequality, social structure, deviance, and social institutions.

Prerequisite: None 50 Hours 5.0 Quarter Credits

SOC302 — Ethics

A brief overview of the major Ethical theories and philosophies is provided as ground work for discussing relevant ethical issues. These issues may include, but are not limited to Business Ethics, Media Ethics, Death and Dying, and Love and Relationships. Lecture will be supplemented with student led discussions, appropriate media, and special projects.

Prerequisite: None 50 Hours 5.0 Quarter Credits

SOC321 — Organizational Sociology

This course examines organizational behavior, through a study of the origins and operations of formal bureaucratic organizations. The organization's place in modern society; and its relations to other organizations and to individuals is also considered. Topics include key issues in the sociology of organizations, major organizational theories, leadership, and authority.

Prerequisite: Completion of 25.0 Quarter Credits of lower-division general education
50 Hours 5.0 Quarter Credits

SOCDE101 – Sociology

This class provides an overview of sociology and its application to everyday life. Emphasis is placed on understanding the major theories, concepts, and terminology. Students will explore topics such as culture, inequality, social structure, deviance, and social institutions.

Prerequisite: None 50 Hours 5.0 Quarter Credits

SOCDE302 — Ethics

A brief overview of the major Ethical theories and philosophies is provided as ground work for discussing relevant ethical issues. These issues may include, but are not limited to Business Ethics, Media Ethics, Death and Dying, and Love and Relationships. Lecture will be supplemented with student led discussions, appropriate media, and special projects.

Prerequisite: None 50 Hours 5.0 Quarter Credits

SOCDE321 — Organizational Sociology

This course examines organizational behavior, through a study of the origins and operations of formal bureaucratic organizations. The organization's place in modern society; and its relations to other organizations and to individuals is also considered. Topics include key issues in the sociology of organizations, major organizational theories, leadership, and authority.

Prerequisite: Completion of 25.0 Quarter Credits of lower-division general education
50 Hours 5.0 Quarter Credits

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

SPC101 — Public Speaking

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Informative and Persuasive Speaking.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

SPC102 — Speech 1

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Informative Speaking.

Prerequisite: None **30 Hours** **3.0 Quarter Credits**

SPC103 — Speech 2

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Persuasive Speaking.

Prerequisite: None **30 Hours** **3.0 Quarter Credits**

SPC105 — Interpersonal Communications

Students learn the various theories and techniques of interpersonal communications. Topics include: process and functions of communication, relationship development, communication strategies, interpersonal language skills, listening and response skills and managing conflict.

Prerequisite: None **30 Hours** **3.0 Quarter Credits**

SPCDE101 — Public Speaking

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Informative and Persuasive Speaking.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

SPCDE102 — Speech 1

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Informative Speaking.

Prerequisite: None **30 Hours** **3.0 Quarter Credits**

STA301 – Statistics

STA301 is a foundational course in statistics that includes topics such as data types, elements of experimental design, central tendency, frequency distributions, dot plots, stem and leaf plots, histograms, and pie charts. STA301 includes counting principles, basic probability, conditional probability, and probability distributions. The course contains an emphasis on computing the variance and standard deviation of data sets and probability distributions along with computing expected values and confidence intervals. Various descriptive and inferential techniques are developed and applied with the aid of appropriate technology tools.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

STADE301 – Introductory Statistics

STADE301 is a foundational course in statistics that includes topics such as data types, elements of experimental design, central tendency, frequency distributions, dot plots, stem and leaf plots, histograms, and pie charts. STADE301 includes counting principles, basic probability, conditional probability, and probability distributions. The course contains an emphasis on computing the variance and standard deviation of data sets and probability distributions along with computing expected values and confidence intervals. Various descriptive and inferential techniques are developed and applied with the aid of appropriate technology tools.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

VCG302 — History of Graphic Design and Advertising

Advertising is a creative industry that has transformed many commercial works into cultural touchstones; graphic design combined with marketing is a powerful tool that can both promote products and corporations, as well as embed icons in world consciousness. Any good student of graphic design needs to know their history; it is both a rich resource and a basis for evolution in design.

Prerequisite: Associate in Graphic Design or equivalent
50 Hours **3.5 Quarter Credits**

VCG303 — Commercial Illustration and Life Drawing

Students will learn illustration that encompasses advertising, and editorial needs, including adapting work for the limitations of printing processes.

Prerequisite: Associate in Graphic Design or equivalent
 50 Hours 3.5 Quarter Credits

VCG304 — Advanced Typography and Font Creation

This class furthers the students' knowledge of typographic principles begun in introductory Typography. The investigation of typography in product design to communicate with and have an impact on an audience, as well as information hierarchy, is emphasized through typographic design using font creation software.

Prerequisite: Associate in Graphic Design or equivalent
 50 Hours 3.5 Quarter Credits

VCG305 — Branding, Logos, and Packaging

A company's brand may be its most valuable asset. Keeping up with marketplace trends in branding is essential for a company's survival and a designer's relevance and marketability. Logos are key to popularizing a brand. Package design is an equally important tool in a designer's arsenal, vital for the products of many companies, and is one area that will remain central to print graphics.

Prerequisite: Associate in Graphic Design or equivalent
 50 Hours 3.5 Quarter Credits

VCG351 — Marketing Dynamics and Strategies

A coherent marketing strategy defines the marketability of a product and the differentiating features of its brand and deliverables. In this class students will learn how to professionally define a product's unique marketing strategy, and create deliverables for its implementation, as well as reflect on the marketing of their own design firms.

Prerequisite: Associate in Graphic Design or equivalent
 50 Hours 3.5 Quarter Credits

VCG352 — Prepress and Business Ethics

Traditional printing techniques are discussed in detail, including an analysis of current and next-generation digital layout and print production processes. From concept and planning through digital workflow, color management, font and image usage, to file formats, proofing, paper selection, signatures and extent, printing techniques, finishes, post production, and distribution are addressed. Further, issues such as pricing, legal rights and ethics in relation to the work of graphic artists are discussed.

Prerequisite: Associate in Graphic Design or equivalent
 50 Hours 3.5 Quarter Credits

VCG353 — Art Direction and Team Projects

Students will learn the duties and obligations involved as an art director in a design firm, including design, delegation and people management. Included projects will be team efforts, under the direction of an art director for each creation.

Prerequisite: Associate in Graphic Design or equivalent
 50 Hours 3.5 Quarter Credits

VCG354 — Photography and Videography

Members of design teams may be required to design, manage and direct photo shoots as well as video elements for clients' commercial needs. This course helps prepare students for running such shoots, including visual design, lighting elements, and communicating with photographers.

Prerequisite: Associate in Graphic Design or equivalent
 50 Hours 3.5 Quarter Credits

VCG405 — Advanced Project

Each student will design a long-form project, a commercial representation of a product or corporation, and design all materials and peripherals for the project and corporation. Student will alternatively work as an extern in a design firm of their own discovery, to learn the structure, processes and workflow of a business environment.

Prerequisite: Associate in Graphic Design or equivalent
 50 Hours 3.5 Quarter Credits

VCG406 — 2D Print Portfolio Development

In this course students create an interactive portfolio demonstrating the students' skills at design. Focus in this course will be on presentation of student work and other knowledge needed in order to get a job within the design industry.

Prerequisite: Associate in Graphic Design or equivalent
 50 Hours 3.5 Quarter Credits

VT101A — Introduction to Veterinary Technology

Orientation to the program, and a survey of the role of the veterinary technician in the workplace. Survey of employment opportunities and areas of specialization. Ethics and professionalism. Laws and regulations governing veterinary technicians. Introduction to basic animal care skills and clinical procedures. Visit to local veterinary clinic or hospital to familiarize students with future work environment.

Prerequisite: None 50 Hours 4.0 Quarter Credits

VT102A — Veterinary Medical Terminology

This course covers word parts, directional terminology, and analysis of common veterinary terms.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VT102C — Veterinary Medical Calculations

This course reviews mathematics required as part of clinical medical calculations utilized in preparation and administration of drugs, dosage determinations, intravenous fluid infusion, and prescription dispensing. Subjects covered include review of calculations involving fractions, decimals, ratios and proportions, unit conversions, and algebraic equations.

Prerequisite: None **30 Hours** **3.0 Quarter Credits**

VT103A — Veterinary Anatomy & Physiology I

Comparative veterinary anatomy and physiology for veterinary technicians. This course covers the clinically relevant veterinary anatomy and physiology including a discussion of the similarities and differences among the major domestic species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and the pathophysiology of disease.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VT104B — Veterinary Anatomy & Physiology II

Comparative anatomy and physiology for veterinary technicians. This course covers the clinically relevant anatomy and physiology of the major domestic animals and includes a discussion of the similarities and differences among the species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and pathophysiology of disease.

Prerequisite: VT103A **50 Hours** **3.5 Quarter Credits**

VT105B – Veterinary Anatomy and Physiology III

Comparative anatomy and physiology for veterinary technicians. This course covers the clinically relevant anatomy and physiology of the major domestic animals and includes a discussion of the similarities and differences among the species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and pathophysiology of disease.

Prerequisite: VT104A **25 Hours** **1.5 Quarter Credits**

VT106B — Veterinary Pharmacology

This course introduces the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VT107B – Veterinary Pharmacology II

This course continues to introduce students to the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: VT101A, VT105B, VT106B
25 Hours **1.5 Quarter Credits**

VT 108B – Equine Nursing

Introduction to the equine species will be given in this course. Review of basic anatomy, physiology will be done. Identifying different breeds, nutrition and husbandry will be presented. Various clinical techniques and restraint techniques will be taught and demonstrated by the students. Equine parasitology and diseases will also be covered.

Prerequisite: None **33 Hours** **2.5 Quarter Credits**

VT 109A – Lab Animal Nursing

An orientation to the use of animals in research and to the role of the veterinary technician and the biotechnologist in a biomedical research animal facility. Regulations affecting the use of animals in research will be discussed, including the Animal Welfare Act, USDA, FDA, and IACUC requirements. Proper methods of restraint, husbandry, nursing techniques, and housing needs for the common species of laboratory animals. Appropriate anesthesia, analgesia and euthanasia methods are discussed.

Prerequisite: None **28 Hours** **2.0 Quarter Credits**

VT110A — Veterinary Clinical Pathology

This course provides the fundamental studies of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

PLATT COLLEGE
**COURSE
DESCRIPTIONS**

VT111A — Veterinary Parasitology

Study of animal parasites. This course focuses on life cycle, vectors, and methods of transmission, identification, and prevention and treatment of parasitic disease in animals.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VT 112A – Veterinary Clinical Pathology II

This course continues to provide the fundamental study of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: None **25 Hours** **1.5 Quarter Credits**

VT120 — Veterinary Clinical Techniques I

This course begins the student's clinical training. Students are introduced to principles of husbandry and medical care of common animal species, including: physical examination, grooming, injections, feeding, housing and restraint. The course includes a hands-on component focusing on the practical application of animal care skills and principles of animal care and management using techniques and knowledge learned in the veterinary technology classroom.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VT121 — Veterinary Clinical Techniques II

This course continues the student's clinical training. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures.

Prerequisite: VT120 **50 Hours** **3.5 Quarter Credits**

VT122B — Small Animal Nursing I

This course covers a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VT123B — Small Animal Nursing II

This course continues to cover a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered.

Prerequisite: VT122B **50 Hours** **4.0 Quarter Credits**

VT125 – Veterinary Clinical Techniques III

This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Topics covered include: venipuncture and blood collection techniques, catheterization, fluid therapy, physical examination, basic dental care procedures, wound management, and emergency care. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures.

Prerequisite: VT121 **25 Hours** **1.5 Quarter Credits**

VT130B — Veterinary Anesthesia and Surgical Nursing I

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VT131B — Veterinary Anesthesia and Surgical Nursing II

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: VT130B **50 Hours** **3.5 Quarter Credits**

VT142A — Veterinary Hospital Management and Client Communication

Principles and practice of veterinary office management for veterinary technology students. Client relations, receptionist skills, telephone techniques and personnel management. Generation and maintenance of correspondence, medical records, legal forms and hospital logs. Basic bookkeeping, accounting and financial management principles. Marketing and public relations. Professional ethics and professionalism. Use of computers for data entry, patient record management and inventory control. Use of practice management software. State and federal laws as they apply to the veterinary practice. The objective of this course is to provide the student with critical client communication and customer service skills. These skills complement the technical learning provided in the program and are essential to becoming a member of a client-facing healthcare delivery team. The course emphasizes experiential learning and focuses on providing the student with experience handling common client interaction situations such as explanation of technical knowledge to a client, working with a concerned client, conflict resolution, and answering questions on commonly requested medications and treatments.

Prerequisite: None **25 Hours** **2.0 Quarter Credits**

VT150B — Veterinary Diagnostic Imaging

Introduction to the principles of veterinary radiography for veterinary technician students, including radiographic terminology, physics of X-ray production and interaction with matter, occupational safety and radiation protection, radiographic exposure factors and patient positioning required for production of diagnostic films, processing of radiographic film. Discussion of equipment materials and special radiographic studies common in veterinary practice. Basic ultrasound procedures are also presented.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VT160A — Animal Nutrition

Fundamentals of energy and non-energy producing nutrients and their sources and functions. Integration of concepts including digestion, absorption, and metabolism with application to normal and therapeutic nutritional needs.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VT170C — Exotic Animal Nursing

Basic understanding of the care, husbandry, clinical procedures, and medical concerns of rabbits, ferrets, guinea pigs, chinchillas, small rodents, birds, snakes, lizards, turtles. Emphasis on clinically relevant materials and activities.

Prerequisite: None **25 Hours** **2.0 Quarter Credits**

VT171A — Large Animal Nursing

The Large Animal Nursing course provides focused study of large animal nursing skills including physical exam, clinical procedures, husbandry requirements, reproduction and preventive care. The technician's role in food animal medicine. Species covered include bovine, ovine, porcine, caprine and camelid.

Prerequisite: None **25 Hours** **2.0 Quarter Credits**

VT200A — Veterinary Clinical Externship I

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. The site of the preceptorship is approved by the veterinary technology program in consultation with the student and the veterinary professionals. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team. The course includes a weekly seminar in which the externship experience is reviewed and skills are reinforced. Concurrent enrollment in VT200b required.

Prerequisite: VT101A – VT171A **120 Hours** **4.0 Quarter Credits**

VT200.B – Veterinary Technician Seminar

This seminar course will serve as an on-campus addition to the students' first off-campus externship in VT200a. Students will discuss their experiences and challenges of working in a clinic. Concepts and skills will be reviewed and reinforced. Weekly objectives will be assessed in accordance with AVMA requirements.

Prerequisite: VT200A **25 Hours** **2.0 Quarter Credits**

VT201A — Veterinary Clinical Externship II

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team.

Prerequisite: VT200.B **120 Hours** **4.0 Quarter Credits**

VT202A — Veterinary Clinical Externship III

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team.

Prerequisite: VT201A **120 Hours** **4.0 Quarter Credits**

VT203.B — Veterinary Technician License Preparation

Review of pertinent subject matter in preparation for the California State and National Veterinary Technician Examination. Includes lecture, group study, and laboratory components.

Prerequisite: VT202A **50 Hours** **3.5 Quarter Credits**

VTAR DE 101- Basic Sciences, Terminology and Calculations for Veterinary Technicians

Introductory course covering basic fundamentals in biology, microbiology, chemistry, basic math, and animal anatomy and physiology. Lectures will cover basic cell biology, mathematical equations and beginning algebra, chemical equations, reactions, and the periodic table, microbial identification, basics of animal disease, and anatomy and physiology of major organ systems in higher mammals. Course also covers an introduction to word parts, directional terminology, and analysis of common veterinary terms. Additional topics include mathematics required as part of clinical medical calculations utilized in preparation and administration of drugs, dosage determinations, intravenous fluid infusion, and prescription dispensing. Subjects covered include review of calculations involving fractions, decimals, ratios and proportions, unit conversions, and algebraic equations.

Prerequisite: None **65 Clock Hours**

VTAR DE 102- Dentistry and Pharmacology for Veterinary Technicians

Basic dental anatomy and charting. Reviews of small and large animal dental anatomy and dental formulas. Dental pathology and prophylaxis procedures will be covered. Basic, simple extraction technique and instrumentation will be also discussed. Additional course content includes an introduction to the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview

of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs. This course uses a case-based approach to pharmacology and reviews basic animal diseases and nursing while discussing drugs used in the treatment of disease.

Prerequisite: None **65 Clock Hours**

VTAR DE 103- Surgical Nursing and Anesthesia for Veterinary Technicians

This course covers the physiology of the respiratory, cardiovascular, and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents will be covered. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory. Students will learn anesthetic monitoring, anesthetic instrumentation, and recovery. Also, all aspects of surgical nursing will be covered including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, sterilization procedures and application of bandages, splints and cast techniques. In addition, pain assessment, scoring, and interventions will be discussed.

Prerequisite: None **65 Clock Hours**

VTAR DE 104- Small and Large Animal Nursing, Pathology, and Radiology for Veterinary Technicians

This course covers a case and disease based approach to nursing technique and procedure in the small animal patient. Disease processes commonly seen in small animal patients will be broken up into various anatomical systems. Zoonotic diseases will be discussed. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional course content includes an introduction to the principles of veterinary radiography for veterinary technician students, including radiographic terminology, physics of X-ray production and interaction with matter, occupational safety and radiation protection, radiographic exposure factors and patient positioning required for production of diagnostic films, processing of radiographic film. Discussion of equipment materials and special radiographic studies common in veterinary practice. Basic ultrasound procedures are also presented. Course also covers fundamental studies of laboratory techniques and procedures involved in evaluating veterinary clinical samples such as hematology, urinalysis, hemostasis, and biochemistry. Finally, the study of animal parasites and life cycles, vectors, methods of transmission, identification and prevention and treatment of parasitic diseases is covered.

Prerequisite: None **65 Clock Hours**

VTAR DE 105- Emergency/Critical Care Nursing and License Exam Preparation for Veterinary Technicians

Introduction to the emergency and critical care medicine for veterinary technicians. Common diseases seen in emergency practice will be presented. Advanced clinical procedures such as IV catheter placement, relief hole procedure for IV placement, and CPR and advanced life support techniques will be discussed. Review of pertinent subject matter in preparation for the California State Veterinary Technician Examination. Disease processes (including zoonotic), laboratory techniques, parasitology, radiology, pharmacology and anesthesia/surgical nursing concepts will be reviewed. Students will take multiple timed practice tests and test taking strategies will be presented.

Prerequisite: None **65 Clock Hours**

VTDE101 — Introduction to Veterinary Technology

Orientation to the program, and a survey of the role of the veterinary technician in the workplace. Survey of employment opportunities and areas of specialization. Ethics and professionalism. Laws and regulations governing veterinary technicians. Introduction to basic animal care skills and clinical procedures.

Prerequisite: None **40 Hours** **4.0 Quarter Credits**

VTDE102 — Veterinary Medical Terminology and Calculations

This course reviews mathematics required as part of clinical medical calculations utilized in preparation and administration of drugs, dosage determinations, intravenous fluid infusion, and prescription dispensing. Subjects covered include review of calculations involving fractions, decimals, ratios and proportions, unit conversions, and algebraic equations. This course also covers word parts, directional terminology, and analysis of common veterinary terms.

Prerequisite: None **50 Hours** **4.5 Quarter Credits**

VTDE103 — Veterinary Anatomy & Physiology I

Comparative veterinary anatomy and physiology for veterinary technicians. This course covers the clinically relevant veterinary anatomy and physiology including a discussion of the similarities and differences among the major domestic species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and the pathophysiology of disease.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE104B — Veterinary Anatomy & Physiology II / III

Comparative anatomy and physiology for veterinary technicians. This course covers the clinically relevant anatomy and physiology of the major domestic animals and includes a discussion of the similarities and differences among the species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and pathophysiology of disease.

Prerequisite: VTDE103 **75 Hours** **6.0 Quarter Credits**

VTDE106 — Veterinary Pharmacology I

This course introduces the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

VTDE107 – Veterinary Pharmacology II

Part 2 of a 2-part course introducing the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: VTDE106 **25 Hours** **2.5 Quarter Credits**

VTDE109A – Lab Animal and Exotic Animal Nursing

An orientation to the use of animals in research and to the role of the veterinary technician and the biotechnologist in a biomedical research animal facility. Regulations affecting the use of animals in research will be discussed, including the Animal Welfare Act, USDA, FDA, and IACUC requirements. Proper methods of restraint, husbandry, nursing techniques, and housing needs for the common species of laboratory animals. Appropriate anesthesia, analgesia and euthanasia methods are discussed. Basic understanding of the care, husbandry, clinical procedures, and medical concerns of rabbits, ferrets, guinea pigs, chinchillas, small rodents, birds, snakes, lizards, turtles. Emphasis on clinically relevant materials and activities.

Prerequisite: None **35 Hours** **3.0 Quarter Credits**

VTDE110 — Veterinary Clinical Pathology

This course provides the fundamental studies of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: None 40 Hour 3.5 Quarter Credits

VTDE111 — Veterinary Parasitology

Study of animal parasites. This course focuses on life cycle, vectors, and methods of transmission, identification, and prevention and treatment of parasitic disease in animals.

Prerequisite: None 35 Hours 3.0 Quarter Credits

VTDE112 – Veterinary Clinical Pathology II

This course continues to provide the fundamental study of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: None 20 Hours 1.5 Quarter Credits

VTDE120 — Veterinary Clinical Techniques I

This course begins the student's clinical training. Students are introduced to principles of husbandry and medical care of common animal species, including: physical examination, grooming, injections, feeding, housing and restraint. The course includes a hands-on component focusing on the practical application of animal care skills and principles of animal care and management using techniques and knowledge learned in the veterinary technology classroom.

Prerequisite: None 30 Hours 3.0 Quarter Credits

VTDE121A — Veterinary Clinical Techniques II / III

This course continues the student's clinical training. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures. This course completes the pre-clinical training of the veterinary technology student, covering both large and

small animals. Topics covered include: venipuncture and blood collection techniques, catheterization, fluid therapy, physical examination, basic dental care procedures, wound management, and emergency care. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures.

Prerequisite: VTDE120 45 Hours 4.0 Quarter Credits

VTDE122 — Small Animal Nursing I

This course covers a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered.

Prerequisite: None 30 Hours 2.5 Quarter Credits

VTDE123 — Small Animal Nursing II

This course continues to cover a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered.

Prerequisite: VTDE122 30 Hours 2.5 Quarter Credits

VTDE130 — Veterinary Anesthesia and Surgical Nursing I

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: None 35 Hours 3.0 Quarter Credits

VTDE131 — Veterinary Anesthesia and Surgical Nursing II

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: VTDE130 **35 Hours** **3.0 Quarter Credits**

VTDE141A — Veterinary Hospital Management and Client Communication and Customer Service

Principles and practice of veterinary office management for veterinary technology students. Client relations, receptionist skills, telephone techniques and personnel management. Generation and maintenance of correspondence, medical records, legal forms and hospital logs. Basic bookkeeping, accounting and financial management principles. Marketing and public relations. Professional ethics and professionalism. Use of computers for data entry, patient record management and inventory control. Use of practice management software. State and federal laws as they apply to the veterinary practice. The objective of this course is to provide the student with critical client communication and customer service skills. These skills complement the technical learning provided in the program and are essential to becoming a member of a client-facing healthcare delivery team. The course emphasizes experiential learning and focuses on providing the student with experience handling common client interaction situations such as explanation of technical knowledge to a client, working with a concerned client, conflict resolution, and answering questions on commonly requested medications and treatments.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

VTDE150 — Veterinary Diagnostic Imaging

Introduction to the principles of veterinary radiography for veterinary technician students, including radiographic terminology, physics of X-ray production and interaction with matter, occupational safety and radiation protection, radiographic exposure factors and patient positioning required for production of diagnostic films, processing of radiographic film. Discussion of equipment materials and special radiographic studies common in veterinary practice. Basic ultrasound procedures are also presented.

Prerequisite: None **40 Hours** **3.5 Quarter Credits**

VTDE160 — Animal Nutrition

Fundamentals of energy and non-energy producing nutrients and their sources and functions. Integration of concepts including digestion, absorption, and metabolism with application to normal and therapeutic nutritional needs.

Prerequisite: None **50 Hours** **4.5 Quarter Credits**

VTDE171A – Equine and Large Animal Nursing

Introduction to the equine species will be given in this course. Review of basic anatomy, physiology will be done. Identifying different breeds, nutrition and husbandry will be presented. Various clinical techniques and restraint techniques will be taught and demonstrated by the students. Equine parasitology and diseases will be also be covered. The Large Animal Nursing course provides focused study of large animal nursing skills including physical exam, clinical procedures, husbandry requirements, reproduction and preventive care. The technician's role in food animal medicine. Species covered include bovine, ovine, porcine, caprine and camelid.

Prerequisite: None **50 Hours** **5.0 Quarter Credits**

VTDE200A — Veterinary Clinical Externship I

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. The site of the preceptorship is approved by the veterinary technology program in consultation with the student and the veterinary professionals. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team. The course includes a weekly seminar in which the externship experience is reviewed and skills are reinforced. Concurrent enrollment in VTDE200B required.

Prerequisite: VT101DE **120 Hours** **4.0 Quarter Credits**

VTDE200B – Veterinary Technician Seminar

This seminar course will serve as an on-campus addition to the students' first off-campus externship in VT200a. Students will discuss their experiences and challenges of working in a clinic. Concepts and skills will be reviewed and reinforced. Weekly objectives will be assessed in accordance with AVMA requirements.

Prerequisite: VTDE101 **25 Hours** **3.0 Quarter Credits**

VTDE201 — Veterinary Clinical Externship II

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team.

Prerequisite: VTDE101 – VTDE171A, VTDE200A & VTDE200B
120 Hours **4.0 Quarter Credits**

VTDE202 — Veterinary Clinical Externship III

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team

Prerequisite: VTDE101 – VTDE201
120 Hours **4.0 Quarter Credits**

VTDE203 — Veterinary Technician License Preparation

Review of pertinent subject matter in preparation for the California State and National Veterinary Technician Examination. Includes lecture, group study, and laboratory components.

Prerequisite: VTDE101 — VTDE202
50 Hours **4.0 Quarter Credits**

VTDE250A – Veterinary Clinical Skills Seminar (On-site)

This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Hands-on experience including: husbandry and medical care of common animal species, physical examination, grooming, injections, feeding, housing and restraint, performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection, catheterization, fluid therapy, anesthesia, physical examination, basic dental care procedures, wound management, and emergency care and other routine veterinary clinical procedures. Part one of a three-part course.

Prerequisite: VTDE101 **120 Hours** **6.0 Quarter Credits**

VTDE255A – Veterinary Externship Preparation I

This course focuses on preparing the student for their externship rotation including professional development, site selection, safety and policy overviews, review of objectives and student and college roles in a successful rotation. Part one of a two-part course.

Prerequisite: VTDE101 **65 Hours** **3.0 Quarter Credits**

WDPC100 - Fundamentals of Web Development

This course provides an introduction to the terms and technologies and the fundamental methods, concepts and techniques of semantic and validated Web development and aesthetic Web design. HTML5 and CSS3 technologies are covered.

Prerequisite: None **60 Clock Hours**

WDPC110 - Introduction to Scripting

Introduction to Client-side Procedural and Object Oriented Scripting. The fundamentals of writing JavaScript and implementation of JavaScript Libraries such as JQuery are covered and provides the basics of creating cross-platform interactive sites.

Prerequisite: WDPC100 - Fundamentals of Web Development
60 Clock Hours

WDPC115 - Intermediate Scripting

This course approaches intermediate scripting solutions using advanced JavaScript Libraries to create cross-platform Interactive User Interfaces (Uis) The React.js library will be introduced to create Industry Standard Interfaces. JSON and Node.js will be introduced to provide fundamental knowledge of Client-Server Data Exchange and Server-side Run-time Environments.

Prerequisite: WDPC110 - Introduction to Scripting
60 Clock Hours

WDPC120 - Introduction to Web Frameworks

This course introduces the Bootstrap framework toolkit for front-end development. This framework enables developers & designers to build fully responsive websites for Mobile and Desktop application using the Bootstrap open-source front-end component library. Advanced HTML, CSS, JavaScript, JQuery and introduction to the Sass (Syntactically Awesome Style Sheets) CSS extension language

Prerequisite: WDPC110 - Introduction to Scripting
60 Clock Hours

WDPC125 - Intermediate Web Frameworks

This course introduces Angular.js, a JavaScript based front-end framework developed by Google. Angular.js provides a structural framework for creating cross-platform applications for web, mobile web, and native mobile and native desktop.

Prerequisite: WDPC110 - Introduction to Scripting

60 Clock Hours

WDPC135 - Web Standards

Web standards are rules and guidelines established by the World Wide Web Consortium (W3C) developed to promote consistency in the design code which makes up a web page. Web Standards covers the importance of proper design and scripting to provide compliance with Web Accessibility (508 Standard) and to provide efficiency for search engines to properly access and index web pages.

Prerequisite: WDPC110 - Introduction to Scripting

60 Clock Hours

WDPC140 - Introduction to Wordpress

This course is designed to cover the framework of Wordpress. Wordpress provides flexible blogging and an open-source content management system (CMS) to assist in Web site management. Its flexibility allows the developer to work with social media APIs to create simple social media applications.

Prerequisite: WDPC110 - Introduction to Scripting

60 Clock Hours

WDPC145 - Developer Tools

An Introduction to Google's (AdWords, Google Analytics, Push Notifications) and Amazon's (Amazon Web Services) developer tools. The introduction of these concepts provides the new developer with useful tools and resources to debug, manage and develop their web environment.

Prerequisite: WDPC115 - Intermediate Scripting

60 Clock Hours

WDPC155 - Introduction to Graphics and Typography

The first part of this course covers the importance of organizing, preparing, placing and manipulating graphics in page design as well as content for the web. The second section covers typographic terminology and the application of type as a communication tool. Deductive and strategic thinking processes are taught and applied as tools for problem solving. The history of typography, major type families, the study of basic letter forms and typographic contrast are examined for skill building towards the understanding of type as a visual language.

Prerequisite: None

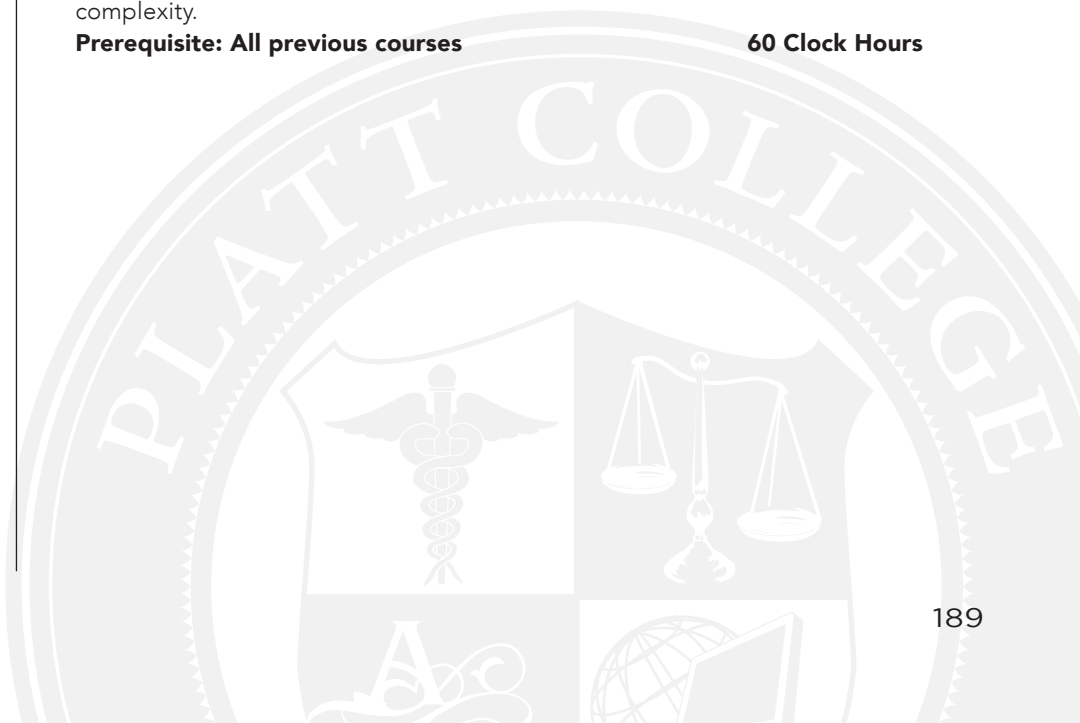

60 Clock Hours

WDPC200 – Web Development Programming and Coding Capstone

The Senior Project requires the student to develop a responsive, interactive multi-page website using the concepts covered in the program. The site must include frameworks and follow all web standards. Successful completion of the course is based on completed milestones, website production and website complexity.

Prerequisite: All previous courses

60 Clock Hours

Note:

- Bachelor's degree completion programs require the completion of a minimum of 180 credit hours. Credit hours may be earned through this program and the completion of programs prior to enrollment, typically through an Associate's degree program which is a prerequisite for entry.
- Tuition - Estimated charges for the period of attendance and the entire program
- Books & Supplies - In select courses, textbooks and/or supplies are classroom copies, which must be returned in good condition at the end of the course. Additional fees will be assessed for failure to return these books and/or supplies.
- Additional Fees as applicable are: \$25.00 return check fee; \$5.00 replacement ID card fee; \$10.00 replacement parking card fee (Alhambra only); \$10.00 Official Transcript and/or Diploma reprint fee

DISCLAIMER: Except as expressly provided in California Education Code Section 94898, Platt College reserves the right to modify policies, course schedules, curricula or courses within reason due to exigent circumstances, program upgrades and/or content changes, and to cancel programs of study, modes of delivery, upcoming start dates or individual courses as it deems necessary. If a course or program is cancelled the school may schedule course completion at a later date or refund all monies paid for the cancelled course or program if the student does not wish to continue with the program at the later date. All Platt College programs are not available at all locations, please see an Admissions Representative form more information on specific enrollment information.

Tuition Payment Policy

Each Program’s tuition and book charges are billed by term throughout the program.

- All charges are due within 7 calendar days of the start of the payment period and/or term.
- Tuition and charges may vary by term.
- Students may request a copy of their student ledger card from Student Accounts to view and review all current and previous charges and payments that have been made to their account.
- Students are responsible for repaying the loan amounts, plus any interest that have been incurred as of the date of withdrawal.

Student Tuition Recovery Fund (STRF):

You must pay the state-imposed assessment for the Student Tuition Recovery Fund (STRF) if all of the following applies to you:

1. You are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition either by cash, guaranteed student loans, or personal loans.
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if either of the following applies:

1. You are not a California resident, or are not enrolled in a residency program
2. Your total charges are paid by a third party, such as an employer, government program or other payer, and you have no separate agreement to repay the third party

The State of California created the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by students in an educational program who are California residents, or are enrolled in a residency program attending certain schools regulated by the Bureau for Private Postsecondary Education.

You may be eligible for STRF if you are a California resident or are enrolled in a residency program, prepaid tuition, paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The school closed before the course of instruction was completed.
2. The school's failure to pay refunds or charges on behalf of a student to a third party for license fees or any other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school.
3. The school's failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs.
4. There was a material failure to comply with the Act or this Division within 30 days before the school closed or, if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau.
5. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

Articulation Agreements: Platt College currently has an articulation agreement with Trinity Law School.

- Information regarding accreditation and comparable programs may be obtained from the Accrediting Commission of Career Schools and Colleges, 2101 Wilson Boulevard • Suite 302 • Arlington • VA • 22201, 703.247.4212

Any questions a student may have regarding this catalog addendum that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 1747 North Market Blvd, Suite 225, Sacramento, CA 95834, www.bppe.ca.gov, toll-free telephone number (888) 370-7589 or by fax (916) 263-1897.

Platt College reserves the right to update and modify the Catalog and Catalog Addendum as needed. In addition, Platt College will update the Catalog and Catalog Addendum annually, each summer.

PROFESSIONAL LICENSURE DISCLOSURE

For the following programs offered at Platt College we have determined that our curriculum meets the state of California educational requirements for licensure or certification. These programs are designed to lead to professional licensure or certification in the state of California.

Respiratory Therapy, Associate of Science (Offered at Platt College Ontario and Platt College Alhambra ONLY)

Occupational Therapy Assistant, Associate of Science (Offered at Platt College Anaheim ONLY)

Vocational Nursing, Diploma (Offered at Platt College Alhambra ONLY)

Vocational Nursing, Associate of Science (Offered at Platt College Alhambra ONLY)

Certified Nurse Assistant, Certificate (Offered at Platt College Anaheim and Platt College Alhambra ONLY)

Hemodialysis, Certificate (Offered at Platt College Anaheim and Platt College Alhambra ONLY)

Not all programs are offered at all locations. Please check with the Platt College Admissions team regarding program availability.

Platt College has not yet made a determination as to whether our program curriculum meets educational requirements for the following states: Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

Tracking Student Location

At the time of enrollment all enrolling students provide their current address which includes the state they reside in as part of completing the Enrollment Agreement. All students are required to notify the school immediately should their address, phone number or email address change. Students should contact their Academic Dean or the campus Registrar to update this information. Updates to such information is entered in the Campus Nexus, the student database system. Campus Nexus tracks both the previous contact information and the new contact information.

Platt College - Alhambra is approved to offer distance education in the following states:

- Arizona
- California
- Colorado
- Florida
- Idaho
- Massachusetts
- Nevada
- Utah
- Virginia

Platt College - Completion and Graduation Rates by Campus

Completion /Graduation Rates:

The completion and graduation rates listed below represent a cohort of certificate or degree seeking, first-time, full-time undergraduate students who entered Platt College for the first time September 1, 2015- August 31, 2016. These rates are calculated at 150% of normal time for completion and match the data provided to the National Center for Education Statistics' IPEDS surveys.

Hybrid Learning Faculty

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Jose Soto-Leyva	All CJ Courses	B.S. Public Administration with an Emphasis in Criminal Justice, California A.S. GENERAL EDUCATION	2022
Melvin Merrill	All Business Management courses	Bachelor of Science, Business University of Phoenix 2012 Master of Science, Organizational Leadership National University 2014	2016
Kimberly O'Hara Nunez	All English Courses Speech All Ethics Courses American Government History of Business Psychology	Master of Art in History from Cal Poly Pomona (2003) BA in Speech Communication from Emerson College (1994)	2005
Lindsey Thomas	All English Courses	Master of Arts - English (2010) Cal State Poly Pomona Bachelor of Arts – English (2008) UC Santa Barbara	2016

Updates Effective as of 11/8/2021

- **2020-2021 Platt College Course Catalog will be effect until 12/31/2021.**
- **Add verbiage to page 33 for Respiratory Therapy**
“The Respiratory Therapy program goals are to prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRTs).”

Updates effective 02.28.2022

- Prerequisites from the following Information Technology courses:
 - o IT103 – Desktop Hardware and Software II
 - o IT104 – Desktop Operating Systems
 - o IT106 – Linux Operating Systems
 - o IT115 – Introduction to Programming
 - o IT120 – Cloud Fundamentals
 - o IT200 – Networking Essentials
 - o IT213 – Routing Protocols and Concepts
 - o IT215 – Introduction to Mobile Devices
 - o IT220 – LAN Technologies
 - o IT221 – WAN Technologies
 - o IT225 – Introduction to Microsoft Exchange and Web Services
 - o IT235 – Network Security
 - o IT245 – Introduction to Databases

Updates effective 04.01.2022

- Remove PHS101 from page 33 of the catalog for the Respiratory Therapy Associates in Science program
- Update VTDE AS program information from page 88 of the catalog (remove old program information and replace with new program information listed below)

Associate of Science in Veterinary Technology DE

Upon successful completion of the program of instruction, the graduate will be awarded an Associate of Science in Veterinary Technology provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0(C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Associate of Science in Veterinary Technology DE Program Information

1773 Hours / 120 Quarter Credit Hours / Approximately 19 months

Core Courses

VTDE101A – Introduction to Veterinary Technology	4.0 Quarter Credits
VTDE102A – Veterinary Medical Terminology	4.0 Quarter Credits
VTDE103A – Veterinary Anatomy & Physiology I	3.5 Quarter Credits
VTDE104C – Veterinary Anatomy & Physiology II / III	5.0 Quarter Credits
VTDE106A – Veterinary Pharmacology I	4.0 Quarter Credits
VTDE107A – Veterinary Pharmacology II	1.5 Quarter Credits
VTDE109B – Lab Animal Nursing and Exotic Animal Nursing	4.0 Quarter Credits
VTDE110A – Veterinary Clinical Pathology	3.5 Quarter Credits
VTDE 111A – Veterinary Parasitology	3.5 Quarter Credits
VTDE112A – Veterinary Clinical Pathology II	1.5 Quarter Credits
VTDE120A – Veterinary Clinical Techniques I	3.5 Quarter Credits
VTDE121B – Veterinary Clinical Techniques II / III	3.5 Quarter Credits
VTDE122A – Small Animal Nursing I	4.0 Quarter Credits
VTDE123A – Small Animal Nursing II	4.0 Quarter Credits
VTDE130A – Veterinary Anesthesia & Surgical Nursing I	3.5 Quarter Credits
VTDE 131A – Veterinary Anesthesia & Surgical Nursing II	3.5 Quarter Credits
VTDE141B – Veterinary Hospital Management & Client Communication & Customer Service	2.0 Quarter Credits
VTDE150A – Veterinary Diagnostic Imaging	3.5 Quarter Credits
VTDE160A – Animal Nutrition	3.5 Quarter Credits
VTDE171B – Equine and Large Animal Nursing	4.5 Quarter Credits
VTDE200A- Veterinary Clinical Externship I	4.0 Quarter Credits
VTDE200.B – Veterinary Technician Seminar	2.0 Quarter Credits
VTDE201 – Veterinary Clinical Externship II	4.0 Quarter Credits
VTDE202 – Veterinary Clinical Externship III	4.0 Quarter Credits
VTDE203B – Veterinary Technician License Preparation	3.5 Quarter Credits
VTDE250B – Veterinary Clinical Skills Seminar I / II / III	6.5 Quarter Credits
VTDE204 – Medical Calculations	3.0 Quarter Credits

General Education Courses

BIODE103A- General Biology & Microbiology	5.0 Quarter Credits
CHMDE103A- General Chemistry	5.0 Quarter Credits
MTHDE103A- College Algebra	5.0 Quarter Credits
ENGDE101 - English Composition	5.0 Quarter Credits
SPCDE105- Interpersonal Communication	3.0 Quarter Credits
Program Total	120 Quarter Credits

Course Descriptions:

VTDE101A — Introduction to Veterinary Technology

Orientation to the program, and a survey of the role of the veterinary technician in the workplace. Survey of employment opportunities and areas of specialization. Ethics and professionalism. Laws and regulations governing veterinary technicians. Introduction to basic animal care skills and clinical procedures.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE102A — Veterinary Medical Terminology

This course covers word parts, directional terminology, and analysis of common veterinary terms.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE103A — Veterinary Anatomy & Physiology I

Comparative veterinary anatomy and physiology for veterinary technicians. This course covers the clinically relevant veterinary anatomy and physiology including a discussion of the similarities and differences among the major domestic species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and the pathophysiology of disease.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VTDE104C — Veterinary Anatomy & Physiology II / III

Comparative anatomy and physiology for veterinary technicians. This course covers the clinically relevant anatomy and physiology of the major domestic animals and includes a discussion of the similarities and differences among the species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and pathophysiology of disease.

Prerequisite: VTDE103 **75 Hours** **5.0 Quarter Credits**

VTDE106A — Veterinary Pharmacology I

This course introduces the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE107A – Veterinary Pharmacology II

Part 2 of a 2-part course introducing the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: VTDE106 **25 Hours** **1.5 Quarter Credits**

VTDE109B – Lab Animal and Exotic Animal Nursing

An orientation to the use of animals in research and to the role of the veterinary technician and the biotechnologist in a biomedical research animal facility. Regulations affecting the use of animals in research will be discussed, including the Animal Welfare Act, USDA, FDA, and IACUC requirements. Proper methods of restraint, husbandry, nursing techniques, and housing needs for the common species of laboratory animals. Appropriate anesthesia, analgesia and euthanasia methods are discussed. Basic understanding of the care, husbandry, clinical procedures, and medical concerns of rabbits, ferrets, guinea pigs, chinchillas, small rodents, birds, snakes, lizards, turtles. Emphasis on clinically relevant materials and activities.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE110A — Veterinary Clinical Pathology

This course provides the fundamental studies of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: None

50 Hours 3.5 Quarter Credits

VTDE111A — Veterinary Parasitology

Study of animal parasites. This course focuses on life cycle, vectors, and methods of transmission, identification, and prevention and treatment of parasitic disease in animals.

Prerequisite: None

50 Hours 3.5 Quarter Credits

VTDE112A – Veterinary Clinical Pathology II

This course continues to provide the fundamental study of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: VTDE110

25 Hours 1.5 Quarter Credits

VTDE120A — Veterinary Clinical Techniques I

This course begins the student's clinical training. Students are introduced to principles of husbandry and medical care of common animal species, including: physical examination, grooming, injections, feeding, housing and restraint. The course includes a hands-on component focusing on the practical application of animal care skills and principles of animal care and management using techniques and knowledge learned in the veterinary technology classroom.

Prerequisite: None

50 Hours 3.5 Quarter Credits

VTDE121B — Veterinary Clinical Techniques II / III

This course continues the student's clinical training. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures. This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Topics covered include: venipuncture and blood collection techniques, catheterization, fluid therapy, physical examination, basic dental care procedures, wound management, and emergency care. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures.

Prerequisite: VTDE120

50 Hours 3.5 Quarter Credits

VTDE122A — Small Animal Nursing I

This course covers a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered. **Prerequisite: None**

50 Hours 4.0 Quarter Credits

VTDE123A — Small Animal Nursing II

This course continues to cover a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered.

Prerequisite: VTDE122

50 Hours 4.0 Quarter Credits

VTDE130A — Veterinary Anesthesia and Surgical Nursing I

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE131A — Veterinary Anesthesia and Surgical Nursing II

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: VTDE130

50 Hours

3.5 Quarter Credits

VTDE141B — Veterinary Hospital Management and Client Communication and Customer Service

Principles and practice of veterinary office management for veterinary technology students. Client relations, receptionist skills, telephone techniques and personnel management. Generation and maintenance of correspondence, medical records, legal forms and hospital logs. Basic bookkeeping, accounting and financial management principles. Marketing and public relations. Professional ethics and professionalism. Use of computers for data entry, patient record management and inventory control. Use of practice management software. State and federal laws as they apply to the veterinary practice. The objective of this course is to provide the student with critical client communication and customer service skills. These skills complement the technical learning provided in the program and are essential to becoming a member of a client-facing healthcare delivery team. The course emphasizes experiential learning and focuses on providing the student with experience handling common client interaction situations such as explanation of technical knowledge to a client, working with a concerned client, conflict resolution, and answering questions on commonly requested medications and treatments.

Prerequisite: None

25 Hours

2.0 Quarter Credits

VTDE150A — Veterinary Diagnostic Imaging

Introduction to the principles of veterinary radiography for veterinary technician students, including radiographic terminology, physics of X-ray production and interaction with matter, occupational safety and radiation protection, radiographic exposure factors and patient positioning required for production of diagnostic films, processing of radiographic film. Discussion of equipment materials and special radiographic studies common in veterinary practice. Basic ultrasound procedures are also presented.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE160A — Animal Nutrition

Fundamentals of energy and non-energy producing nutrients and their sources and functions. Integration of concepts including digestion, absorption, and metabolism with application to normal and therapeutic nutritional needs.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE171B – Equine and Large Animal Nursing

Introduction to the equine species will be given in this course. Review of basic anatomy, physiology will be done. Identifying different breeds, nutrition and husbandry will be presented. Various clinical techniques and restraint techniques will be taught and demonstrated by the students. Equine parasitology and diseases will be also be covered. The Large Animal Nursing course provides focused study of large animal nursing skills including physical exam, clinical procedures, husbandry requirements, reproduction and preventive care. The technician's role in food animal medicine. Species covered include bovine, ovine, porcine, caprine and camelid.

Prerequisite: None

58 Hours

4.5 Quarter Credits

VTDE200A — Veterinary Clinical Externship I

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. The site of the preceptorship is approved by the veterinary technology program in consultation with the student and the veterinary professionals Opportunity for learning and practical application of the

knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team. The course includes a weekly seminar in which the externship experience is reviewed and skills are reinforced. Concurrent enrollment in VTDE200B required.

Prerequisite: VT101DE

120 Hours

4.0 Quarter Credits

VTDE200.B – Veterinary Technician Seminar

This seminar course will serve as an on-campus addition to the students' first off-campus externship in VT200a. Students will discuss their experiences and challenges of working in a clinic. Concepts and skills will be reviewed and reinforced. Weekly objectives will be assessed in accordance with AVMA requirements.

Prerequisite: VTDE101

25 Hours

2.0 Quarter Credits

VTDE201 — Veterinary Clinical Externship II

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team.

Prerequisite: VTDE101 – VTDE171A, VTDE200A & VTDE200B

120 Hours

4.0 Quarter Credits

VTDE202 — Veterinary Clinical Externship III

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team

Prerequisite: VTDE101 – VTDE201

120 Hours

4.0 Quarter Credits

VTDE203B — Veterinary Technician License Preparation

Review of pertinent subject matter in preparation for the California State and National Veterinary Technician Examination. Includes lecture, group study, and laboratory components.

Prerequisite: VTDE101 — VTDE201

50 Hours

3.5 Quarter Credits

VTDE250B – Veterinary Clinical Skills Seminar (On-site)

This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Hands-on experience including: husbandry and medical care of common animal species, physical examination, grooming, injections, feeding, housing and restraint, performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection, catheterization, fluid therapy, anesthesia, physical examination, basic dental care procedures, wound management, and emergency care and other routine veterinary clinical procedures. Part one of a three-part course.

Prerequisite: VTDE101 – VTDE171A

120 Hours

6.5 Quarter Credits

VTDE204 – Medical Calculations

This course reviews mathematics required as part of clinical medical calculations utilized in preparation and administration of drugs, dosage determinations, intravenous fluid infusion, and prescription dispensing. Subjects covered include review of calculations involving fractions, decimals, ratios and proportions, unit conversions, and algebraic equations.

Prerequisite: VTDE101

30 Hours

3.0 Quarter Credits

BIODE103A – General Biology & Microbiology

This course is designed to provide the student with a foundation in basic biology. The student will gain a basic understanding of the foundations of life, classifications of species, and animal cell and tissue function.

Prerequisite: None

50 Hours

5.0 Quarter Credits

CHMDE103A – General Chemistry

This course provides an introduction to the principles of chemistry, including inorganic chemistry, organic chemistry, and biochemistry. Topics covered include atomic structure, bonding and nomenclature, gas laws, solutions, acids and bases, pH and equilibrium, organic and biochemical structure and reactions, and nuclear chemistry.

Prerequisite: None

30 Hours

3.0 Quarter Credits

MTHDE103A – College Algebra

This course includes topics from algebra. Algebra topics include the addition, subtraction, multiplication, and division of the real and complex numbers as well as polynomials. Additionally, it includes the solving of a variety of equations and inequalities, including, but not limited to, linear, absolute value, and quadratic equations. It also includes the graphing of a variety of functions with an emphasis on linear and quadratic functions; functions notation will be applied in problem solving as well as in computations involving combinations of functions. Geometry topics include, but are not limited to, the properties of parallel and perpendicular lines, perimeter, area, volume, theorems about triangles and various polygons, Pythagorean Theorem, and right triangle trigonometry.

Prerequisite: None

50 Hours

5.0 Quarter Credits

ENGDE101 – English Composition

Students will focus on college-level writing skills with particular emphasis on structure, organization and coherence with special attention to persuasive writing and novel analysis. The course will cover a targeted review of sentence mechanics, grammar and punctuation through a combination of lecture and directed exercises. The ENG 102 course is specific to DMS, Respiratory Therapy and Veterinary Technology Programs.

Prerequisite: None

50 Hours

5.0 Quarter Credits

SPCDE105 – Interpersonal Communications

Students learn the various theories and techniques of interpersonal communications. Topics include: process and functions of communication, relationship development, communication strategies, interpersonal language skills, listening and response skills and managing conflict.

Prerequisite: None

30 Hours

3.0 Quarter Credits

Updates effective as of 05/04/2022

Associate of Arts in Business Management (Hybrid Program)

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Arts in Business Management, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C). In addition, all students must meet with Career Services and complete and sign all documentation prior to being approved for graduation.

Program Total **103 Quarter Credits**

Course Descriptions:
BM100 – Introduction to Business Management

This course introduces the student to the basic business management concepts and techniques used in organizing and maintaining an effectively run business or department. An overview of personnel management, budgeting, staffing, and evaluation of work flow will be discussed.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM125 – Introduction to Accounting

This course is designed to introduce an understanding of accounting principles along with a working knowledge of GAAP and the accounting process. Students learn to work with financial statements, reconciliation and balance sheets.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM205 – Human Resource Management

This course is designed to introduce students to the various topics covered by human resources management. The primary topics are the functions of human resources such as job analysis and planning, recruiting, staffing, orientation and training, performance appraisal, career planning, compensating, and motivating. A wide variety of secondary topics will also be covered in this course to include learning principles, human resource development interventions, employee orientation and socialization, performance management, coaching, diversity, and employee counseling.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM215 – Business Finance

This course is designed to provide students with the foundations of finance and financial reporting with emphasis on business corporations. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM220 – Business Marketing and eMarketing

This course is designed to provide students with an introduction to contemporary marketing theories and eMarketing theories and implementation. Topics covered will include identifying market opportunity, product development, promotion planning, pricing decisions and channels of distribution.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM221 – Critical Thinking and Decision Making

This course is designed to help prepare students to deal rationally, creatively, and effectively with the ever-increasing challenges and problems in the business world. Students will learn techniques to develop their practical and analytical abilities.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM226 – Consumer Finance

This course is designed to prepare students to understand the fundamentals of personal finances and personal financial management. Students will learn about budgeting, banking, financial transactions, and consumer credit.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE106 – Managing Diversity in the Workplace

This course is designed to give students the basic knowledge and understanding of diversity in the workplace and how to manage it. Students will also explore various races, ethnicity, languages, cultures, and other things that brings diversity to the workplace.

Prerequisite: None
5.0 Quarter Credits

50 Hours

BMDE111 – Entrepreneurship in the eCommerce Age

This course is designed to provide students with knowledge on how to develop business ideas for their own business and develop a mission and vision. Students will also understand the principles of buying and selling goods and services online

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE120 – Business Communications

This course is designed to introduce practical communication skills, including the mechanics and principles of effective business writing and research methods and compiling reports. Focus is on an understanding of writing styles appropriate to the business world and on speaking and presentation styles appropriate to the key activities in the business world.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE135 – Ethics and Professionalism

This course is designed to provide students with an understanding of ethics and professionalism in the workplace. Students will cover the relationship between management, employees and customers within the workplace. Techniques on how to encourage and maintain ethics and professionalism in the workplace will be covered.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE200 – Business Law

This course is designed to provide the student with information on the essentials of the nature of law and the functions of the judicial system in the business environment. An overview of legal characteristics of a sole proprietorship, partnerships, limited liability companies and corporations are discussed.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE210 – Business Operations

This course is designed to provide students with concepts, techniques and tools to design, analyze, and improve business operations. The course will cover topics such as forecasting, product design, quality control, inventory and management.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE230 – Business Management Capstone

This course is designed to provide students with the opportunity to develop a business plan that will apply theories and techniques taught throughout the program.

Prerequisite: All business management program courses

50 Hours

5.0 Quarter Credits

CJ140—Introduction to Report Writing

This course examines the role of report writing as it relates to police work. Students will gain an objective look at all aspects of investigations and how they are documented in various report forms. Students will actively participate in discussions and role play situations with the goal of investigating a situation and documenting it on the proper police forms. Interview and interrogation techniques will be explained and students will demonstrate their ability to differentiate between these two types of police practices.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ145—Corrections 1

This course will examine the historical development and present philosophies in the handling of those adjudged to be law violators. Federal, state, and local correctional systems will be studied, including prison/jail architecture and its impact on safety and prison organization. Various sentencing/presentencing/release aspects such as--the bail process and bail schedules, probation and intermediate sanctions, parole and prisoner reentry--are examined. A study is then made of the various clients within, and the differences between, the adult and juvenile correctional systems.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ155—Private Security 1

This course coincides with the California State Bureau of Security and Investigative Services mandated security officer training curriculum including: Powers to Arrest, Terrorism/Weapons of Mass Destruction, Public Relations, Observation and Documentation, Officer Safety, Crime Scene preservation, Communication, Legal Aspects, Courtroom Demeanor, and Introduction to Security Supervision. Successful completion of this course should result in the subject mastery required to sit for the State of California Guard Card test.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5.0 Quarter Credits

CJ165—Introduction to Criminal Law

This course will be an overview of the criminal justice system in America, with an emphasis on criminal procedures and California statutes including: a basic study of laws of arrest, relevant Constitutional amendments, the federal and state court systems, basic pre-trial procedures and motions, the elements of a crime/corpus delicti, initial and felony arraignments, search and seizure applications and exceptions, Miranda admonition and waivers, grand jury indictment/true Bill, confessions and Beheler admonitions, felony preliminary hearings, as well as a study of Murder which covers 1st and 2nd degree homicide, voluntary and involuntary manslaughter, and Watson Murder as it applies to DUI cases.

Prerequisite: None

50 Hours

4.5 Quarter Credits

CJ175—Criminology 1

This course will define criminology; describe the roles, duties, and impact of criminologists on the criminal justice system; define the basics of an anti-social personality; compare the classical, biological, psychological, psychiatric, social structure, social process, and social development theories of criminology; consider methods of applying scientific study to criminal activity; and relate criminology theory and practice to careers in law enforcement. Where criminology theories come from will also be studied, as will how various theories interact and/or cancel each other out—as well as evaluating the central theme and question of free will versus determinism as the primary causal factor of criminal behavior.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ185—Criminal Investigation

This course will provide an introduction to criminal investigation, including crime scene protection and processing procedures, inductive and deductive reasoning, identification and collection of evidence, case preparation, interview/interrogation strategies and tactics, criminal intelligence and surveillance operations, undercover operations and confidential informant management, death investigations, and basic preliminary investigation of crimes against property and crimes against persons with consideration of identifying suspects, establishing elements of specific crimes, and then connecting suspects to those crimes. Legal issues affecting criminal investigation will also be studied with an emphasis on search warrant preparation.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ210—Intermediate Criminal Law

This course is an overview of the criminal justice system in America, with an emphasis on California criminal procedures and statutes including: crimes against persons such as assault with a deadly weapon and sex crimes, property crimes such as burglary and grand theft auto, social crimes such as narcotics offenses and prostitution, crimes of treason such as sedition and espionage, and crimes against the state such as perjury and obstruction of justice. Available criminal defenses insanity, duress, and mistake of law/fact are also considered.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5.0 Quarter Credits

CJ230—Advanced Report Writing

This course will teach proper law enforcement report writing and field note taking and the role each plays in effective, successful criminal prosecutions. The preparation of clear, concise, and accurate reports will be stressed with an emphasis on: elements of composition, syntax, grammar, punctuation, spelling and knowledge of law enforcement abbreviations. Crimes against property and crimes against persons will be covered including: robbery, burglary, auto theft, and assault with a deadly weapon—as well as narcotics offenses, sexual offenses, white collar crimes, and criminal gang injunctions. Practice in arrest and crime report writing is emphasized and proficiency must be demonstrated, as well as an understanding of the importance exemplary report preparation.

Prerequisite: CJ140 – Introduction to Report Writing

50 Hours

4.0 Quarter Credits

CJ245—Introduction to Forensics

This course applies scientific methodology to crime scene investigation and crime solving, including an analysis of crime scene investigation, securing and protection of a crime scene, keeping a homicide log, the initial walk through of a homicide scene, crime scene photography, crime scene reconstruction, physical evidence collection and packaging, autopsy methodology, rigor mortis and livor mortis, maintaining the chain of custody, fingerprint collection and identification techniques, tool mark identification, ballistic/firearms evidence identification and collection, gunpowder residue, and castings of tires and shoeprints. Several of these forensic techniques will be practiced until proficiency is demonstrated.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ250—Advanced Forensics

This course will continue the application of scientific methodology to crime scene investigation and crime solving, including blood spatter analysis techniques and documentation, a study of illicit drug types and tests, metabolism and absorption of drugs and alcohol, trace evidence identification and collection, arson and explosives investigation, toxicology and blood analysis, poison absorption rates, document examination and questioned document investigation. DNA analysis techniques are also studied, including mitochondrial DNA, familial DNA, and biological stain analysis—as well as DNA application to sexual crime investigations. Several of these techniques will be practiced until proficiency is demonstrated. Additionally, using the forensics techniques mastered in Introduction to Forensics and Advanced Forensics, the students will respond to and process a homicide scene as if they were actual law enforcement personnel.

Prerequisite: CJ245 – Introduction to Forensics

50 Hours

4.0 Quarter Credits

CJDE200—Corrections 2

This course examines the handling of special offenders, including drug addicted, mentally ill, aging, sex offender, HIV/AIDS infected, and violent offenders within the various Federal, state, and local correctional systems. The daily routine, responsibilities, and duties of correctional officers will be studied—as well as the unique concerns of correctional managers as they relate to inmates and prison staff. The everyday prison life of inmates is addressed, including rehabilitation/educational opportunities, discipline, prison gangs, and interaction with vocational prison staff. In addition, Constitutional cases affecting issues of capital punishment, cruel and unusual punishment, and prisoner rights are presented.

Prerequisite: CJ145 – Corrections 1

50 Hours

4.5 Quarter Credits

CJDE205—Private Security 2

This course will examine the various business models and environments of the private security industry such as uniformed private security officer, fixed post versus mobile foot or vehicular patrol techniques, corporate uniformed security and corporate investigative security functions, corporate and retail shrinkage due to internal and external theft, sub rosa / undercover security operations for varied clients, cyber security for corporate and retail, and consulting opportunities as they relate to physical security. Students will also learn and hone basic job interviewing, and soft skills required in the security industry.

Prerequisite: CJ155 – Private Security 1

50 Hours

4.0 Quarter Credits

CJDE215—Introduction to Juvenile Justice

This course examines prevalent patterns of juvenile delinquency, relates these patterns to theories of child and adolescent development, and considers various theories regarding the cause of juvenile criminal behavior. In addition, this course surveys the roles of the police, courts, and juvenile probation in regards to California's balanced and restorative justice system. California Welfare and Institution 330 dependent child, 601 status offender, and 602 delinquent offender Codes are also studied—as well as Dennis H juvenile detention hearings, Gladys R delinquency hearings for offenders under 14 years of age, and Edsel P fitness hearings to determine waiver of serious juvenile offenders to adult court. Court cases pertinent to the areas of the juvenile justice system that are covered are also discussed.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJDE220—Criminology 2

This course will initially examine social conflict theories of criminology such as critical, left-realist, feminist criminology, postmodern, peacemaking, and convict criminology, comparing them to previously learned criminology theories. The course emphasis then shifts to applying the many criminology theories to a variety of crimes and the individuals who commit them. The irony of crimes committed by persons ranging from the affluent to the deprived is related by typologies of murder, gangs-related crime, robbery, burglary, auto theft, arson, sexual offenses,

narcotics offenses, crimes against children, fraud, computer crimes, embezzlement, receiving stolen property, terrorism, corporate/white collar crime, insider trading, gambling, prostitution, money laundering, and public corruption.

Prerequisite: CJ175 – Criminology 1

50 Hours 4.5 Quarter Credits

CJ226—Contemporary Terrorism 1

This course will examine the influence and impact of international and domestic terrorism on the criminal justice system—and to a lesser degree the impact of contemporary legal, civic, and political issues. A comparison of several terrorism definitions will be explored as they relate to violence as the terrorists’ operational mechanism, the desire for publicity, asymmetrical tactics, and ideological/religious/cultural relevance. A post World War II history of international terrorism culminates in the 9/11 attack and the failure of U.S. intelligence to “connect the dots.” A partial worldwide geopolitical study of terrorist groups, their methods, and histories will be examined—ending in Europe.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours 4.5 Quarter Credits

CJ240—Contemporary Terrorism 2

This course continues the worldwide geopolitical study of terrorist groups, their methods, and histories in North Africa and the Middle East; the Persian Gulf; Northeast, Central and Southern Africa; Southern and Southeast Asia; the Pacific Rim; and Latin America and South America. An additional examination of counterterrorism agencies, methods, hostage rescue techniques, risk analysis, impact of The Patriot Act, aviation security, cyber security, impact of the Patriot Act—as well as state-of-the-art weaponry and technology and personal protection techniques—will also occur. Students will also learn how the Intelligence Community--partnered with cutting edge intelligence gathering techniques such as metadata, open-source intelligence, and mathematics-based crime forecasting—hopes to identify and project terrorist threats deep into the future.

Prerequisite: CJ226 – Contemporary Terrorism 1

50 Hours 4.0 Quarter Credits

ENGDE101 — English

Students will learn effective college-level essay writing skills with a focus on structure and development, including organization and coherence with special attention to persuasive writing. In addition, a targeted review of sentence mechanics, grammar and punctuation will be covered through a combination of lecture and directed exercises.

Prerequisite: None

50 Hours 5.0 Quarter Credits

IT101 – Computer Applications

This course is designed to increase proficiency in the use of basic computer use, common word processing, spreadsheet, and presentation application software. Topics include the production of business documents, reports, and presentations. Upon successful completion of this course, students will be able to identify basic components of a computer, and prepare documents using word processing, spreadsheets, and presentation software.

Prerequisite: None

50 hours 4.5 Quarter Credits

MTH101 — Introduction to Algebra

This course focuses on the use of rational and irrational numbers in algebra and geometry. Students will become proficient in computing with integers, fractions, decimals, the order of operations, and basic radical expressions. The topic areas in algebra include, but are not limited to, basic set theory, the classification of the real number system, the addition, subtraction, and multiplication of polynomials, solving linear equations, solving linear inequalities, ratios, rates, and proportional reasoning. This course includes the application of dimensional analysis to perform unit conversions in both the English and SI units of measurement within a problem-solving context. Additionally, it includes an introduction to polynomial functions with an emphasis on linear functions and their graphs.

Prerequisite: None

50 Hours 5.0 Quarter Credits

SPC101 — Public Speaking

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Informative and Persuasive Speaking.

Prerequisite: None

50 Hours 5.0 Quarter Credits

PSYDE101 — Psychology

This survey course covers a broad spectrum of major psychological theories and theorists. Topics covered include but are not limited to the biological basis of behavior, states of consciousness, personality, stress, psychological disorders, and social psychology. Students participate through student led reviews of current research, self-evaluations, and other in-class projects.

Prerequisite: None

50 Hours

5.0 Quarter Credits

SOCDE101 – Sociology

This class provides an overview of sociology and its application to everyday life. Emphasis is placed on understanding the major theories, concepts, and terminology. Students will explore topics such as culture, inequality, social structure, deviance, and social institutions.

Prerequisite: none

50 Hours

5.0 Quarter Credits

Update effective as of 05/10/2022

- Platt College will no longer offer the Hemodialysis program.

Updates Effective as of 07/15/2022
Medical Administrative Specialist (Associate of Science) Hybrid

Medical Administrative Specialists perform a variety of tasks necessary to running a smooth, effective medical office. These individuals focus on many administrative procedures of medical offices, outpatient clinics, hospitals, and other health care facilities. Some of these skills include billing, coding, scheduling, transcription, office finance, human resources and computer skills. Medical Administrative Specialist students will learn the skills that may lead to becoming an office manager in a clinical setting.

Vocational Objective

The intent of the Medical Administrative Specialist programs is to provide an enriched learning opportunity that will prepare the student for entry-level employment in the health care industry. Students in the Medical Administrative Specialist programs will graduate with a professional knowledge, skills, and practical experience in the health services field acquired during their studies at Platt College. Employment opportunities open to the graduates of the Medical Administrative Specialist programs include Medical Administrative Assistant, Podiatric Medical Administrative Assistant, and Ophthalmic Medical Administrative Assistant. Industries that will be interested in these graduates include, but are not limited to, ambulatory settings such as medical offices, clinics, nursing homes, medical supply companies, home health agencies, insurance companies, pharmaceutical companies.

Industry Occupations

Perform secretarial duties using specific knowledge of medical terminology and hospital, clinic, or laboratory procedures. Duties may include scheduling appointments, billing patients, and compiling and recording medical charts, reports, and correspondence.

Associate of Science in Medical Administrative Specialist

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Science; Medical Administrative Specialist provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Associate of Science in Medical Administrative Specialist Program Information

1210 Hours / 90 Quarter Credit Hours / Approximately 15 months

Course Description

IAHC 101 — Introduction to Allied Health Careers

This introductory course provides an essential foundation for students beginning their course of study in the Allied Health Field. Students will gain familiarity with key medical terminology concepts and learn the use of prefixes, suffixes, and word roots to build their medical vocabulary. Students will also learn the basics of human anatomy and physiology, including the fundamental organization of the human body and its ten body systems. Key principles of professionalism, responsibilities, ethics, scope of practice, and legal implications of working in the healthcare field will be discussed. Finally, students will be introduced to the current principles of HIPPA policies and regulations.

Prerequisite: None**50 Hours****4.0 Quarter Credits****IT101 – Computer Applications**

This course is designed to increase proficiency in the use of basic computer use, common word processing, spreadsheet, and presentation application software. Topics include the production of business documents, reports, and presentations. Upon successful completion of this course, students will be able to identify basic components of a computer, and prepare documents using word processing, spreadsheets, and presentation software.

Prerequisite: None**50 hours****4.5 Quarter Credits****MAS104 — Introduction to Medical Transcription**

This course introduces the student to medical transcription and training in the various types and styles of equipment, report formats, and the standards of operation within the transcription field. Medical terminology and the need for accuracy will be stressed. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

MASDE105 — Medical Terminology

This course introduces the student to pharmaceutical and medical billing terms, pharmaceutical abbreviations, and procedures. Students will receive the knowledge necessary to communicate information between pharmacists and physicians regarding prescription medications. The major emphasis is on the classifications, spelling, and pronunciation of the most commonly ordered prescription medications. The study of symbols and systems of measurement used in prescriptions will also be covered. Course includes more detailed and advanced study of the derivatives of medical terms, symbols, and signs. Presents an in-depth study of the correlation between medical vocabulary and the application of those terms to the anatomy and physiology of the body, related diseases, conditions and treatment. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

MASDE106 — Human Resources, Risk Management and Employability

This course introduces the student to human resources and risk management in the medical environment. Students will be introduced to basic human resource functions including classifying and reclassifying existing positions, interviewing and hiring employees, counseling employees, benefits, work hours and overtime. Students will learn to identify the sources of liability in an office based medical practice, specify strategies to reduce exposure to office liability, discuss various methods to address compliance issues related to an office based medical practice and describe liability issues related to employment in the office based medical practice. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MASDE107 – Advanced EHR

This course will cover the advanced topics in the field of electronic records. Such topics may include, but are not limited to: health data structure, standards across the board and various types of data collection methods. Students will also learn the importance of electronic health record maintenance, privacy, security and confidentiality. They will discuss the financial management side of insurances and billing.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

MASDE110 – Anatomy and Physiology

Upon completion of this subject, the student will have practical knowledge about the structural levels of organization, anatomical components, and physiology. The student will also learn about Medical Terminology and relationships related to various body organs and anatomical directions, planes, and body cavities. The student will have a clear understanding of the anatomy and physiology of a typical cell, tissues, organs, systems of the human body and homeostasis and its importance in the human body.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MASDE152 — Medical Office Procedures

General administrative procedures are introduced. Areas of study include receptionist duties, appointment scheduling, records management, financial arrangements, communications, telephone procedures, and correspondence management. This course addresses basic principles, terms and concepts of business structure including those in the medical field. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MASDE155 — Medical Computerized Office

This class provides an overview of sociology and its application to everyday life. Emphasis is placed on understanding the major concepts, and terminology. Students will explore topics such as culture, inequality, social structure, deviance, and social institutions.

Prerequisite: none

50 Hours

5.0 Quarter Credits

Note:

- Bachelor's degree completion programs require the completion of a minimum of 180 credit hours. Credit hours may be earned through this program and the completion of programs prior to enrollment, typically through an Associate's degree program which is a prerequisite for entry.
- Tuition - Estimated charges for the period of attendance and the entire program
- Books & Supplies - In select courses, textbooks and/or supplies are classroom copies, which must be returned in good condition at the end of the course. Additional fees will be assessed for failure to return these books and/or supplies.
- Additional Fees as applicable are: \$25.00 return check fee; \$5.00 replacement ID card fee; \$10.00 replacement parking card fee (Alhambra only); \$10.00 Official Transcript and/or Diploma reprint fee

DISCLAIMER: Except as expressly provided in California Education Code Section 94898, Platt College reserves the right to modify policies, course schedules, curricula or courses within reason due to exigent circumstances, program upgrades and/or content changes, and to cancel programs of study, modes of delivery, upcoming start dates or individual courses as it deems necessary. If a course or program is cancelled the school may schedule course completion at a later date or refund all monies paid for the cancelled course or program if the student does not wish to continue with the program at the later date. All Platt College programs are not available at all locations, please see an Admissions Representative form more information on specific enrollment information.

Criminal Justice, Associate of Arts (Hybrid)	\$4,949.00	\$351.00	\$80.00	\$5,380.00

Tuition Payment Policy

Each Program’s tuition and book charges are billed by term throughout the program.

- All charges are due within 7 calendar days of the start of the payment period and/or term.
- Tuition and charges may vary by term.
- Students may request a copy of their student ledger card from Student Accounts to view and review all current and previous charges and payments that have been made to their account.
- Students are responsible for repaying the loan amounts, plus any interest that have been incurred as of the date of withdrawal.

Student Tuition Recovery Fund (STRF):

You must pay the state-imposed assessment for the Student Tuition Recovery Fund (STRF) if all of the following applies to you:

1. You are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition either by cash, guaranteed student loans, or personal loans.
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if either of the following applies:

1. You are not a California resident, or are not enrolled in a residency program
2. Your total charges are paid by a third party, such as an employer, government program or other payer, and you have no separate agreement to repay the third party

The State of California created the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by students in an educational program who are California residents, or are enrolled in a residency program attending certain schools regulated by the Bureau for Private Postsecondary Education.

You may be eligible for STRF if you are a California resident or are enrolled in a residency program, prepaid tuition, paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The school closed before the course of instruction was completed.
2. The school’s failure to pay refunds or charges on behalf of a student to a third party for license fees or any other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school.
3. The school’s failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs.
4. There was a material failure to comply with the Act or this Division within 30 days before the school closed or, if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau.
5. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

Articulation Agreements: Platt College currently has an articulation agreement with Trinity Law School.

- Information regarding accreditation and comparable programs may be obtained from the Accrediting Commission of Career Schools and Colleges, 2101 Wilson Boulevard • Suite 302 • Arlington • VA • 22201, 703.247.4212

Any questions a student may have regarding this catalog addendum that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 1747 North Market Blvd, Suite 225, Sacramento, CA 95834, www.bppe.ca.gov, toll-free telephone number (888) 370-7589 or by fax (916) 263-1897.

Platt College reserves the right to update and modify the Catalog and Catalog Addendum as needed. In addition, Platt College will update the Catalog and Catalog Addendum annually, each summer.

PROFESSIONAL LICENSURE DISCLOSURE

For the following programs offered at Platt College we have determined that our curriculum meets the state of California educational requirements for licensure or certification. These programs are designed to lead to professional licensure or certification in the state of California.

Respiratory Therapy, Associate of Science (Offered at Platt College Ontario and Platt College Alhambra ONLY)

Occupational Therapy Assistant, Associate of Science (Offered at Platt College Anaheim ONLY)

Vocational Nursing, Diploma (Offered at Platt College Alhambra ONLY)

Vocational Nursing, Associate of Science (Offered at Platt College Alhambra ONLY)

Certified Nurse Assistant, Certificate (Offered at Platt College Anaheim and Platt College Alhambra ONLY)

Hemodialysis, Certificate (Offered at Platt College Anaheim and Platt College Alhambra ONLY)

Not all programs are offered at all locations. Please check with the Platt College Admissions team regarding program availability.

Platt College has not yet made a determination as to whether our program curriculum meets educational requirements for the following states: Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

Tracking Student Location

At the time of enrollment all enrolling students provide their current address which includes the state they reside in as part of completing the Enrollment Agreement. All students are required to notify the school immediately should their address, phone number or email address change. Students should contact their Academic Dean or the campus Registrar to update this information. Updates to such information is entered in the Campus Nexus, the student database system. Campus Nexus tracks both the previous contact information and the new contact information.

Platt College - Alhambra is approved to offer distance education in the following states:

- Arizona
- California
- Colorado
- Florida
- Idaho
- Massachusetts
- Nevada
- Utah
- Virginia

Platt College - Completion and Graduation Rates by Campus

Completion /Graduation Rates:

The completion and graduation rates listed below represent a cohort of certificate or degree seeking, first-time, full-time undergraduate students who entered Platt College for the first time September 1, 2015- August 31, 2016. These rates are calculated at 150% of normal time for completion and match the data provided to the National Center for Education Statistics' IPEDS surveys.

PLATT COLLEGE CAMPUSES	ALHAMBRA	ONTARIO	RIVERSIDE	ANAHEIM

Criminal Justice, AA (Hybrid)	Required	Verbal: 205 Quantitative: 215	N/A	NA	NA	NA	Distance Education Online Assessment
Business Management, AA (Hybrid)	Required	Verbal: 205 Quantitative: 215	N/A	NA	NA	NA	Distance Education Online Assessment

* Due to the COVID-19 Pandemic students enrolling in the following programs: Occupational Therapy- AS, Diagnostic Medical Sonography- AS, Diagnostic Medical Sonography- BS, Respiratory Therapy- AS, and Respiratory Therapy DE- BS between the start dates of April 20, 2020 – November 22, 2021 were required to complete the Wonderlic (BST) entrance exam and achieve a minimum score of 278 Verbal and 292 Quantitative with an overall minimum total score of 680. During the COVID-19 Pandemic students were not required to complete the HESI entrance exam. Therefore, students re-entering their original program that tested under the COVID-19 Pandemic entrance test requirements will not be required to retest and their original test scores will remain valid through December 31, 2024. After December 31, 2024 COVID-19 Pandemic test scores will no longer remain valid and any student applying to re-enter will be required to retest.

Vaccination Policy

Vaccinations may be required prior to the start of a clinical assignment or off-campus clinical instruction exercise. Students will be notified in advance if a particular course or clinical assignment will require any specific immunizations. Students will be responsible for obtaining all immunizations. The following programs have vaccination requirements:

Program	Vaccination	Required By
Respiratory Therapy	MMR Varicella (Chickenpox) Hep B TB Influenza T-DAP COVID-19 (maybe dependent on-site placement)	1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation
Diagnostic Medical Sonography	Hep B MMR Varicella (Chickenpox) T-DAP Influenza TB COVID-19 (maybe dependent on-site placement)	3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 6 months prior to Clinical Rotation
Medical Assisting	Hepatitis B TB COVID-19 (maybe dependent on-site placement)	6 months prior to Extern 1 – 3 months prior to Extern
Medical Administrative Specialist	Hepatitis B TB COVID-19 (maybe dependent on-site placement)	6 months prior to Extern 1 – 3 months prior to Extern
Vocational Nursing	MMR Varicella (Chickenpox) Hep B TB Influenza T-DAP COVID-19 (maybe dependent on-site placement)	1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation
Certified Nurse Assistant	TB Influenza COVID-19 (maybe dependent on-site placement)	Prior to Extern Prior to Extern
Veterinary Technology	T-DAP COVID-19 (maybe dependent on-site placement)	Beginning Core Coursework

	Rabies	Prior to Core Courses
Veterinary Technology DE	T-DAP COVID-19 (maybe dependent on-site placement) Rabies	Module 12 Prior to Core Courses
Occupational Therapy Assistant	MMR Varicella (Chickenpox) Hep B TB Influenza T-DAP COVID-19 (maybe dependent on-site placement)	1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation

Campus Faculty include Full-Time and Adjunct Faculty

General Education Department

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Edward Ussery	Math Physics Anatomy and Physiology Chemistry Microbiology	Master of Medical Science – Harvard Medical School (2008) BS – Mechanical Engineering – University of California, Los Angeles (1989)	2015
Kendrick Kim	Psychology Sociology	ABD – Psychology, Grand Canyon University (2017) Master of Science, Criminal Justice – California State University, Long Beach (2008) Bachelor of Arts, Sociology - California State University, Long Beach (2003)	2017
Benjamin Tran	Biology Chemistry	Doctor of Education, USC (2017) MS of Neuroscience, USC (2004)	2018
Mona Yousef	Anatomy and Physiology Chemistry Microbiology All Pharmacy Tech Courses	Doctor of Medicine, Ain Shams University (1989)	2018
Amir Navab Irani	All Math, Algebra, Physics courses	Masters Mathematics, University of Hertfordshire (2016) Masters Nuclear Engineering, University of Missouri (1983)	2018

Veterinary Technology Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Beth Barlow	All Veterinary Technology core coursework	Associate in Science, Animal Health Technology, San Diego Mesa College (1990)	2021
Shawn Chojnacki-Nelson	All Veterinary Technology core coursework	Bachelor of Science in General Biology and Zoology, Humboldt State University (1999) AAS, Veterinary Technology, Bel-Rea Institute of Animal Technology (2000)	2017
Vicky Gary	All Veterinary Technology core coursework	AS, Animal Science, Mt. San Antonio College (1996) AS, Business, Citrus College (1991) Credential, Career and Technical Education Teaching, UC Riverside (2010)	2017
Maria Rojas-Nunez	All Veterinary Technology core coursework	Bachelor of Science in Animal Health California State Polytechnic University, Pomona (2010)	2018

Rebecca Rodriguez	All Veterinary Technology core coursework	Bachelor of Science in Animal Health California State Polytechnic University, Pomona (2010)	2018
Arial Gerdts	All Veterinary Technology core coursework	Bachelor of Science in Animal Health Sciences, CA State Polytechnic Institute (2017)	2021
Rebecca Rosenberg, DVM	All Veterinary Technology core coursework	Doctor Veterinary Medicine Cornell University 2008 BS Molecular and Cellular Biology University of California 2004	2022

Diagnostic Medical Sonography Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Mili Mehta	All DMS courses	MS – Education / Secondary Teacher Education (2013) BS – Business Management Diploma – DMS	2016
Mark Yousef	All DMS Courses	Bachelor of Medicine and Surgery Ain Shams University, Cairo Egypt (1976) Ultrasound Technology Certification (2009)	2016
Margarita Licon	All DMS Courses	AS, Liberal Studies - Fullerton College (1992) Certificate, Diagnostic Medical Sonography - Orange Coast College (1997)	2015
Oscar Bautista DMS Program Director		Doctor of Medicine – Centros De Estudios – Mexico (1989) Ultrasound Technology Certification – Newbridge (1999)	2019
Brian Bell DMS Clinical Director		AAS, Allied Health Career with a major in Diagnostic Medical Sonography – Volunteer State Community College, Gallatin, TN (2002)	2019

Health and Fitness Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Clarence Chaney	All HFT Courses	Master in Exercise Science – University of CA (2011)	2018

		BA in Science in Sports Medicine - University of Penn. (2010)	
		AA of Arts in Physical Education – Compton College (1992)	

Information Technology Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
David Liu	All IT Courses All Web Development Programming & Coding Courses	Bachelor of Arts – Business Economics, UC Riverside, (1995)	2017
Jack Chang	All IT courses	Bachelor of Science, computer Science – (1986)	2018
Phil Blende	IT course	Master of Arts in Management in Management - University of Redlands Master of Business Administration in Business Administration - University of Redlands Bachelor of Science in Technical Management - DeVry University	2020
Joseph Morgan	All IT	M S in Information Technology American Intercontinental University 2007	2021

Health Care Management Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Shannon Vance-Songne	All HCM courses	Master of Science Health Care Administration – Colorado State University (2018)	2019
Andrea Cook	HCM classes	Master’s in healthcare administration West Coast College (2020) BS in Healthcare Administration California State University (2000)	2021
Ronald Byrum	HCM class	Master’s in healthcare administration California State University (2007)	2021
Gianni Monshat	HCM class	Master of Science in Global Health Northwestern University 2018 BA in Healthcare Grand View University 2014	2022

Rebecca Hopwood	HCM class	Doctoral in Healthcare Administration University of Phoenix 2011 Master in Public Administration Penn State 1987 BA in Psychology Penn State 1973	2022
-----------------	-----------	---	------

Certified Nursing Assistant Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Alicia Wang – Program Director	Entire program	Stanbridge University, CA – Diploma in Vocational Nurse (2016) Fanshawe College, London, Ontario – Personal Support Worker (2006)	2018
Elisabetta Panciza	Entire program	Saddleback College – Liberal Arts Degree (2019) Stanbridge University – Diploma in Vocational Nurse (2017) Southern California College of Medical & Dental Careers – Medical Assistant (1986)	2022

Occupational Therapy Assistant Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Dr. Natalie Ang – Program Director	All OTA program courses	MA Occupational Therapy - University of Southern CA, Los Angeles CA (1997) (Post Professional) Occupational Therapy Doctorate, Pediatric Science - Rocky Mountain University of Health Professions, Provo Utah (2013)	2018
Erinn Askin – Fieldwork Coordinator	All OTA program courses	BA Communication – University of California Santa Barbara (2008) MA Occupational Science / Occupational Therapy – University of Southern California (2010)	2020

Cindy Garcia	All OTA program courses	AA Occupational Therapy Assistant - Santa Ana College, Santa Ana CA (2012) BA Liberal Arts - California State University Fullerton, Fullerton CA (1980)	2019
Paul Pettyjohn	All OTA program courses	BS in Occupational Therapy, Texas Tech University (1997) BA in Zoology, University of Montana (1993)	2020
Robbie Mezher	All OTA program courses	MS of Occupational Therapy, Stanbridge University (2016) MBA University of Phoenix (2008)	2020
Nicole Leonetti	OTA 100 Anatomy/physiology OTA 110 & 210 Kinesiology I & II OTA 120 Neuroscience OTA 230 Neurological Conditions OTA 240 Cognitive & Neurodegenerative Conditions. OTA 190 Data Collection	Master of Occupational Therapy, Concordia University Wisconsin (2016) Bachelors Bachelor of Arts in Psychology and Anthropology, University of San Diego (2011)	2021

Hybrid Learning Faculty

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Jose Soto-Leyva	All CJ Courses	B.S. Public Administration with an Emphasis in Criminal Justice, California A.S. GENERAL EDUCATION	2022
Melvin Merrill	All Business Management courses	Bachelor of Science, Business University of Phoenix 2012 Master of Science, Organizational Leadership National University 2014	2016
Kimberly O'Hara Nunez	All English Courses Speech All Ethics Courses American Government History of Business Psychology	Master of Art in History from Cal Poly Pomona (2003) BA in Speech Communication from Emerson College (1994)	2005
Lindsey Thomas	All English Courses	Master of Arts - English (2010) Cal State Poly Pomona Bachelor of Arts – English (2008) UC Santa Barbara	2016

Updates Effective as of 11/8/2021

- **2020-2021 Platt College Course Catalog will be effect until 12/31/2021.**
- **Add verbiage to page 33 for Respiratory Therapy**
“The Respiratory Therapy program goals are to prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRTs).”

Updates effective 02.28.2022

- Prerequisites from the following Information Technology courses:
 - o IT103 – Desktop Hardware and Software II
 - o IT104 – Desktop Operating Systems
 - o IT106 – Linux Operating Systems
 - o IT115 – Introduction to Programming
 - o IT120 – Cloud Fundamentals
 - o IT200 – Networking Essentials
 - o IT213 – Routing Protocols and Concepts
 - o IT215 – Introduction to Mobile Devices
 - o IT220 – LAN Technologies
 - o IT221 – WAN Technologies
 - o IT225 – Introduction to Microsoft Exchange and Web Services
 - o IT235 – Network Security
 - o IT245 – Introduction to Databases

Updates effective 04.01.2022

- Remove PHS101 from page 33 of the catalog for the Respiratory Therapy Associates in Science program
- Update VTDE AS program information from page 88 of the catalog (remove old program information and replace with new program information listed below)

Associate of Science in Veterinary Technology DE

Upon successful completion of the program of instruction, the graduate will be awarded an Associate of Science in Veterinary Technology provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0(C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Associate of Science in Veterinary Technology DE Program Information

1773 Hours / 120 Quarter Credit Hours / Approximately 19 months

Core Courses

VTDE101A – Introduction to Veterinary Technology	4.0 Quarter Credits
VTDE102A – Veterinary Medical Terminology	4.0 Quarter Credits
VTDE103A – Veterinary Anatomy & Physiology I	3.5 Quarter Credits
VTDE104C – Veterinary Anatomy & Physiology II / III	5.0 Quarter Credits
VTDE106A – Veterinary Pharmacology I	4.0 Quarter Credits
VTDE107A – Veterinary Pharmacology II	1.5 Quarter Credits
VTDE109B – Lab Animal Nursing and Exotic Animal Nursing	4.0 Quarter Credits
VTDE110A – Veterinary Clinical Pathology	3.5 Quarter Credits
VTDE 111A – Veterinary Parasitology	3.5 Quarter Credits
VTDE112A – Veterinary Clinical Pathology II	1.5 Quarter Credits
VTDE120A – Veterinary Clinical Techniques I	3.5 Quarter Credits
VTDE121B – Veterinary Clinical Techniques II / III	3.5 Quarter Credits
VTDE122A – Small Animal Nursing I	4.0 Quarter Credits
VTDE123A – Small Animal Nursing II	4.0 Quarter Credits
VTDE130A – Veterinary Anesthesia & Surgical Nursing I	3.5 Quarter Credits
VTDE 131A – Veterinary Anesthesia & Surgical Nursing II	3.5 Quarter Credits
VTDE141B – Veterinary Hospital Management & Client Communication & Customer Service	2.0 Quarter Credits
VTDE150A – Veterinary Diagnostic Imaging	3.5 Quarter Credits
VTDE160A – Animal Nutrition	3.5 Quarter Credits
VTDE171B – Equine and Large Animal Nursing	4.5 Quarter Credits
VTDE200A- Veterinary Clinical Externship I	4.0 Quarter Credits
VTDE200.B – Veterinary Technician Seminar	2.0 Quarter Credits
VTDE201 – Veterinary Clinical Externship II	4.0 Quarter Credits
VTDE202 – Veterinary Clinical Externship III	4.0 Quarter Credits
VTDE203B – Veterinary Technician License Preparation	3.5 Quarter Credits
VTDE250B – Veterinary Clinical Skills Seminar I / II / III	6.5 Quarter Credits
VTDE204 – Medical Calculations	3.0 Quarter Credits

General Education Courses

BIODE103A- General Biology & Microbiology	5.0 Quarter Credits
CHMDE103A- General Chemistry	5.0 Quarter Credits
MTHDE103A- College Algebra	5.0 Quarter Credits
ENGDE101 - English Composition	5.0 Quarter Credits
SPCDE105- Interpersonal Communication	3.0 Quarter Credits
Program Total	120 Quarter Credits

Course Descriptions:

VTDE101A — Introduction to Veterinary Technology

Orientation to the program, and a survey of the role of the veterinary technician in the workplace. Survey of employment opportunities and areas of specialization. Ethics and professionalism. Laws and regulations governing veterinary technicians. Introduction to basic animal care skills and clinical procedures.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE102A — Veterinary Medical Terminology

This course covers word parts, directional terminology, and analysis of common veterinary terms.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE103A — Veterinary Anatomy & Physiology I

Comparative veterinary anatomy and physiology for veterinary technicians. This course covers the clinically relevant veterinary anatomy and physiology including a discussion of the similarities and differences among the major domestic species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and the pathophysiology of disease.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VTDE104C — Veterinary Anatomy & Physiology II / III

Comparative anatomy and physiology for veterinary technicians. This course covers the clinically relevant anatomy and physiology of the major domestic animals and includes a discussion of the similarities and differences among the species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and pathophysiology of disease.

Prerequisite: VTDE103 **75 Hours** **5.0 Quarter Credits**

VTDE106A — Veterinary Pharmacology I

This course introduces the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE107A – Veterinary Pharmacology II

Part 2 of a 2-part course introducing the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: VTDE106 **25 Hours** **1.5 Quarter Credits**

VTDE109B – Lab Animal and Exotic Animal Nursing

An orientation to the use of animals in research and to the role of the veterinary technician and the biotechnologist in a biomedical research animal facility. Regulations affecting the use of animals in research will be discussed, including the Animal Welfare Act, USDA, FDA, and IACUC requirements. Proper methods of restraint, husbandry, nursing techniques, and housing needs for the common species of laboratory animals. Appropriate anesthesia, analgesia and euthanasia methods are discussed. Basic understanding of the care, husbandry, clinical procedures, and medical concerns of rabbits, ferrets, guinea pigs, chinchillas, small rodents, birds, snakes, lizards, turtles. Emphasis on clinically relevant materials and activities.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE110A — Veterinary Clinical Pathology

This course provides the fundamental studies of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE111A — Veterinary Parasitology

Study of animal parasites. This course focuses on life cycle, vectors, and methods of transmission, identification, and prevention and treatment of parasitic disease in animals.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE112A – Veterinary Clinical Pathology II

This course continues to provide the fundamental study of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: VTDE110

25 Hours

1.5 Quarter Credits

VTDE120A — Veterinary Clinical Techniques I

This course begins the student's clinical training. Students are introduced to principles of husbandry and medical care of common animal species, including: physical examination, grooming, injections, feeding, housing and restraint. The course includes a hands-on component focusing on the practical application of animal care skills and principles of animal care and management using techniques and knowledge learned in the veterinary technology classroom.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE121B — Veterinary Clinical Techniques II / III

This course continues the student's clinical training. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures. This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Topics covered include: venipuncture and blood collection techniques, catheterization, fluid therapy, physical examination, basic dental care procedures, wound management, and emergency care. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures.

Prerequisite: VTDE120

50 Hours

3.5 Quarter Credits

VTDE122A — Small Animal Nursing I

This course covers a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered. **Prerequisite: None**

50 Hours

4.0 Quarter Credits

VTDE123A — Small Animal Nursing II

This course continues to cover a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered.

Prerequisite: VTDE122

50 Hours

4.0 Quarter Credits

VTDE130A — Veterinary Anesthesia and Surgical Nursing I

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE131A — Veterinary Anesthesia and Surgical Nursing II

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: VTDE130

50 Hours

3.5 Quarter Credits

VTDE141B — Veterinary Hospital Management and Client Communication and Customer Service

Principles and practice of veterinary office management for veterinary technology students. Client relations, receptionist skills, telephone techniques and personnel management. Generation and maintenance of correspondence, medical records, legal forms and hospital logs. Basic bookkeeping, accounting and financial management principles. Marketing and public relations. Professional ethics and professionalism. Use of computers for data entry, patient record management and inventory control. Use of practice management software. State and federal laws as they apply to the veterinary practice. The objective of this course is to provide the student with critical client communication and customer service skills. These skills complement the technical learning provided in the program and are essential to becoming a member of a client-facing healthcare delivery team. The course emphasizes experiential learning and focuses on providing the student with experience handling common client interaction situations such as explanation of technical knowledge to a client, working with a concerned client, conflict resolution, and answering questions on commonly requested medications and treatments.

Prerequisite: None

25 Hours

2.0 Quarter Credits

VTDE150A — Veterinary Diagnostic Imaging

Introduction to the principles of veterinary radiography for veterinary technician students, including radiographic terminology, physics of X-ray production and interaction with matter, occupational safety and radiation protection, radiographic exposure factors and patient positioning required for production of diagnostic films, processing of radiographic film. Discussion of equipment materials and special radiographic studies common in veterinary practice. Basic ultrasound procedures are also presented.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE160A — Animal Nutrition

Fundamentals of energy and non-energy producing nutrients and their sources and functions. Integration of concepts including digestion, absorption, and metabolism with application to normal and therapeutic nutritional needs.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE171B – Equine and Large Animal Nursing

Introduction to the equine species will be given in this course. Review of basic anatomy, physiology will be done. Identifying different breeds, nutrition and husbandry will be presented. Various clinical techniques and restraint techniques will be taught and demonstrated by the students. Equine parasitology and diseases will be also be covered. The Large Animal Nursing course provides focused study of large animal nursing skills including physical exam, clinical procedures, husbandry requirements, reproduction and preventive care. The technician's role in food animal medicine. Species covered include bovine, ovine, porcine, caprine and camelid.

Prerequisite: None

58 Hours

4.5 Quarter Credits

VTDE200A — Veterinary Clinical Externship I

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. The site of the preceptorship is approved by the veterinary technology program in consultation with the student and the veterinary professionals Opportunity for learning and practical application of the

knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team. The course includes a weekly seminar in which the externship experience is reviewed and skills are reinforced.

Concurrent enrollment in VTDE200B required.

Prerequisite: VT101DE

120 Hours

4.0 Quarter Credits

VTDE200.B – Veterinary Technician Seminar

This seminar course will serve as an on-campus addition to the students' first off-campus externship in VT200a. Students will discuss their experiences and challenges of working in a clinic. Concepts and skills will be reviewed and reinforced. Weekly objectives will be assessed in accordance with AVMA requirements.

Prerequisite: VTDE101

25 Hours

2.0 Quarter Credits

VTDE201 — Veterinary Clinical Externship II

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team.

Prerequisite: VTDE101 – VTDE171A, VTDE200A & VTDE200B

120 Hours

4.0 Quarter Credits

VTDE202 — Veterinary Clinical Externship III

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team

Prerequisite: VTDE101 – VTDE201

120 Hours

4.0 Quarter Credits

VTDE203B — Veterinary Technician License Preparation

Review of pertinent subject matter in preparation for the California State and National Veterinary Technician Examination. Includes lecture, group study, and laboratory components.

Prerequisite: VTDE101 — VTDE201

50 Hours

3.5 Quarter Credits

VTDE250B – Veterinary Clinical Skills Seminar (On-site)

This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Hands-on experience including: husbandry and medical care of common animal species, physical examination, grooming, injections, feeding, housing and restraint, performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection, catheterization, fluid therapy, anesthesia, physical examination, basic dental care procedures, wound management, and emergency care and other routine veterinary clinical procedures. Part one of a three-part course.

Prerequisite: VTDE101 – VTDE171A

120 Hours

6.5 Quarter Credits

VTDE204 – Medical Calculations

This course reviews mathematics required as part of clinical medical calculations utilized in preparation and administration of drugs, dosage determinations, intravenous fluid infusion, and prescription dispensing. Subjects covered include review of calculations involving fractions, decimals, ratios and proportions, unit conversions, and algebraic equations.

Prerequisite: VTDE101

30 Hours

3.0 Quarter Credits

BIODE103A – General Biology & Microbiology

This course is designed to provide the student with a foundation in basic biology. The student will gain a basic understanding of the foundations of life, classifications of species, and animal cell and tissue function.

Prerequisite: None

50 Hours

5.0 Quarter Credits

CHMDE103A – General Chemistry

This course provides an introduction to the principles of chemistry, including inorganic chemistry, organic chemistry, and biochemistry. Topics covered include atomic structure, bonding and nomenclature, gas laws, solutions, acids and bases, pH and equilibrium, organic and biochemical structure and reactions, and nuclear chemistry.

Prerequisite: None

30 Hours

3.0 Quarter Credits

MTHDE103A – College Algebra

This course includes topics from algebra. Algebra topics include the addition, subtraction, multiplication, and division of the real and complex numbers as well as polynomials. Additionally, it includes the solving of a variety of equations and inequalities, including, but not limited to, linear, absolute value, and quadratic equations. It also includes the graphing of a variety of functions with an emphasis on linear and quadratic functions; functions notation will be applied in problem solving as well as in computations involving combinations of functions. Geometry topics include, but are not limited to, the properties of parallel and perpendicular lines, perimeter, area, volume, theorems about triangles and various polygons, Pythagorean Theorem, and right triangle trigonometry.

Prerequisite: None

50 Hours

5.0 Quarter Credits

ENGDE101 – English Composition

Students will focus on college-level writing skills with particular emphasis on structure, organization and coherence with special attention to persuasive writing and novel analysis. The course will cover a targeted review of sentence mechanics, grammar and punctuation through a combination of lecture and directed exercises. The ENG 102 course is specific to DMS, Respiratory Therapy and Veterinary Technology Programs.

Prerequisite: None

50 Hours

5.0 Quarter Credits

SPCDE105 – Interpersonal Communications

Students learn the various theories and techniques of interpersonal communications. Topics include: process and functions of communication, relationship development, communication strategies, interpersonal language skills, listening and response skills and managing conflict.

Prerequisite: None

30 Hours

3.0 Quarter Credits

Updates effective as of 05/04/2022

Associate of Arts in Business Management (Hybrid Program)

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Arts in Business Management, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C). In addition, all students must meet with Career Services and complete and sign all documentation prior to being approved for graduation.

Course Descriptions:

BM100 – Introduction to Business Management

This course introduces the student to the basic business management concepts and techniques used in organizing and maintaining an effectively run business or department. An overview of personnel management, budgeting, staffing, and evaluation of work flow will be discussed.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM125 – Introduction to Accounting

This course is designed to introduce an understanding of accounting principles along with a working knowledge of GAAP and the accounting process. Students learn to work with financial statements, reconciliation and balance sheets.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM205 – Human Resource Management

This course is designed to introduce students to the various topics covered by human resources management. The primary topics are the functions of human resources such as job analysis and planning, recruiting, staffing, orientation and training, performance appraisal, career planning, compensating, and motivating. A wide variety of secondary topics will also be covered in this course to include learning principles, human resource development interventions, employee orientation and socialization, performance management, coaching, diversity, and employee counseling.

Prerequisite: None
Quarter Credits

50 Hours

5.0

BM215 – Business Finance

This course is designed to provide students with the foundations of finance and financial reporting with emphasis on business corporations. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM220 – Business Marketing and eMarketing

This course is designed to provide students with an introduction to contemporary marketing theories and eMarketing theories and implementation. Topics covered will include identifying market opportunity, product development, promotion planning, pricing decisions and channels of distribution.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM221 – Critical Thinking and Decision Making

This course is designed to help prepare students to deal rationally, creatively, and effectively with the ever-increasing challenges and problems in the business world. Students will learn techniques to develop their practical and analytical abilities.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM226 – Consumer Finance

This course is designed to prepare students to understand the fundamentals of personal finances and personal financial management. Students will learn about budgeting, banking, financial transactions, and consumer credit.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE106 – Managing Diversity in the Workplace

This course is designed to give students the basic knowledge and understanding of diversity in the workplace and how to manage it. Students will also explore various races, ethnicity, languages, cultures, and other things that brings diversity to the workplace.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE111 – Entrepreneurship in the eCommerce Age

This course is designed to provide students with knowledge on how to develop business ideas for their own business and develop a mission and vision. Students will also understand the principles of buying and selling goods and services online

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE120 – Business Communications

This course is designed to introduce practical communication skills, including the mechanics and principles of effective business writing and research methods and compiling reports. Focus is on an understanding of writing styles appropriate to the business world and on speaking and presentation styles appropriate to the key activities in the business world.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE135 – Ethics and Professionalism

This course is designed to provide students with an understanding of ethics and professionalism in the workplace. Students will cover the relationship between management, employees and customers within the workplace. Techniques on how to encourage and maintain ethics and professionalism in the workplace will be covered.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE200 – Business Law

This course is designed to provide the student with information on the essentials of the nature of law and the functions of the judicial system in the business environment. An overview of legal characteristics of a sole proprietorship, partnerships, limited liability companies and corporations are discussed.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE210 – Business Operations

This course is designed to provide students with concepts, techniques and tools to design, analyze, and improve business operations. The course will cover topics such as forecasting, product design, quality control, inventory and management.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE230 – Business Management Capstone

This course is designed to provide students with the opportunity to develop a business plan that will apply theories and techniques taught throughout the program.

Prerequisite: All business management program courses

50 Hours

5.0 Quarter Credits

CJ140—Introduction to Report Writing

This course examines the role of report writing as it relates to police work. Students will gain an objective look at all aspects of investigations and how they are documented in various report forms. Students will actively participate in discussions and role play situations with the goal of investigating a situation and documenting it on the proper police forms. Interview and interrogation techniques will be explained and students will demonstrate their ability to differentiate between these two types of police practices.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ145—Corrections 1

This course will examine the historical development and present philosophies in the handling of those adjudged to be law violators. Federal, state, and local correctional systems will be studied, including prison/jail architecture and its impact on safety and prison organization. Various sentencing/presentencing/release aspects such as--the bail process and bail schedules, probation and intermediate sanctions, parole and prisoner reentry--are examined. A study is then made of the various clients within, and the differences between, the adult and juvenile correctional systems.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ155—Private Security 1

This course coincides with the California State Bureau of Security and Investigative Services mandated security officer training curriculum including: Powers to Arrest, Terrorism/Weapons of Mass Destruction, Public Relations, Observation and Documentation, Officer Safety, Crime Scene preservation, Communication, Legal Aspects, Courtroom Demeanor, and Introduction to Security Supervision. Successful completion of this course should result in the subject mastery required to sit for the State of California Guard Card test.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5.0 Quarter Credits

CJ165—Introduction to Criminal Law

This course will be an overview of the criminal justice system in America, with an emphasis on criminal procedures and California statutes including: a basic study of laws of arrest, relevant Constitutional amendments, the federal and state court systems, basic pre-trial procedures and motions, the elements of a crime/corpus delicti, initial and felony arraignments, search and seizure applications and exceptions, Miranda admonition and waivers, grand jury indictment/true Bill, confessions and Beheler admonitions, felony preliminary hearings, as well as a study of Murder which covers 1st and 2nd degree homicide, voluntary and involuntary manslaughter, and Watson Murder as it applies to DUI cases.

Prerequisite: None

50 Hours

4.5 Quarter Credits

CJ175—Criminology 1

This course will define criminology; describe the roles, duties, and impact of criminologists on the criminal justice system; define the basics of an anti-social personality; compare the classical, biological, psychological, psychiatric, social structure, social process, and social development theories of criminology; consider methods of applying scientific study to criminal

activity; and relate criminology theory and practice to careers in law enforcement. Where criminology theories come from will also be studied, as will how various theories interact and/or cancel each other out—as well as evaluating the central theme and question of free will versus determinism as the primary causal factor of criminal behavior.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ185—Criminal Investigation

This course will provide an introduction to criminal investigation, including crime scene protection and processing procedures, inductive and deductive reasoning, identification and collection of evidence, case preparation, interview/interrogation strategies and tactics, criminal intelligence and surveillance operations, undercover operations and confidential informant management, death investigations, and basic preliminary investigation of crimes against property and crimes against persons with consideration of identifying suspects, establishing elements of specific crimes, and then connecting suspects to those crimes. Legal issues affecting criminal investigation will also be studied with an emphasis on search warrant preparation.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ210—Intermediate Criminal Law

This course is an overview of the criminal justice system in America, with an emphasis on California criminal procedures and statutes including: crimes against persons such as assault with a deadly weapon and sex crimes, property crimes such as burglary and grand theft auto, social crimes such as narcotics offenses and prostitution, crimes of treason such as sedition and espionage, and crimes against the state such as perjury and obstruction of justice. Available criminal defenses insanity, duress, and mistake of law/fact are also considered.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5.0 Quarter Credits

CJ230—Advanced Report Writing

This course will teach proper law enforcement report writing and field note taking and the role each plays in effective, successful criminal prosecutions. The preparation of clear, concise, and accurate reports will be stressed with an emphasis on: elements of composition, syntax, grammar, punctuation, spelling and knowledge of law enforcement abbreviations. Crimes against property and crimes against persons will be covered including: robbery, burglary, auto theft, and assault with a deadly weapon—as well as narcotics offenses, sexual offenses, white collar crimes, and criminal gang injunctions. Practice in arrest and crime report writing is emphasized and proficiency must be demonstrated, as well as an understanding of the importance exemplary report preparation.

Prerequisite: CJ140 – Introduction to Report Writing

50 Hours

4.0 Quarter Credits

CJ245—Introduction to Forensics

This course applies scientific methodology to crime scene investigation and crime solving, including an analysis of crime scene investigation, securing and protection of a crime scene, keeping a homicide log, the initial walk through of a homicide scene, crime scene photography, crime scene reconstruction, physical evidence collection and packaging, autopsy methodology, rigor mortis and livor mortis, maintaining the chain of custody, fingerprint collection and identification techniques, tool mark identification, ballistic/firearms evidence identification and collection, gunpowder residue, and castings of tires and shoeprints. Several of these forensic techniques will be practiced until proficiency is demonstrated.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ250—Advanced Forensics

This course will continue the application of scientific methodology to crime scene investigation and crime solving, including blood spatter analysis techniques and documentation, a study of illicit drug types and tests, metabolism and absorption of drugs and alcohol, trace evidence identification and collection, arson and explosives investigation, toxicology and blood analysis, poison absorption rates, document examination and questioned document investigation. DNA analysis techniques are also studied, including mitochondrial DNA, familial DNA, and biological stain analysis—as well as DNA application to sexual crime investigations. Several of these techniques will be practiced until proficiency is demonstrated. Additionally, using the forensics techniques mastered in Introduction to Forensics and Advanced Forensics, the students will respond to and process a homicide scene as if they were actual law enforcement personnel.

Prerequisite: CJ245 – Introduction to Forensics

50 Hours

4.0 Quarter Credits

CJDE200—Corrections 2

This course examines the handling of special offenders, including drug addicted, mentally ill, aging, sex offender, HIV/AIDS infected, and violent offenders within the various Federal, state, and local correctional systems. The daily routine, responsibilities, and duties of correctional officers will be studied--as well as the unique concerns of correctional managers as they relate to inmates and prison staff. The everyday prison life of inmates is addressed, including rehabilitation/educational opportunities, discipline, prison gangs, and interaction with vocational prison staff. In addition, Constitutional cases affecting issues of capital punishment, cruel and unusual punishment, and prisoner rights are presented.

Prerequisite: CJ145 – Corrections 1

50 Hours 4.5 Quarter Credits

CJDE205—Private Security 2

This course will examine the various business models and environments of the private security industry such as uniformed private security officer, fixed post versus mobile foot or vehicular patrol techniques, corporate uniformed security and corporate investigative security functions, corporate and retail shrinkage due to internal and external theft, sub rosa / undercover security operations for varied clients, cyber security for corporate and retail, and consulting opportunities as they relate to physical security. Students will also learn and hone basic job interviewing, and soft skills required in the security industry.

Prerequisite: CJ155 – Private Security 1

50 Hours 4.0 Quarter Credits

CJDE215—Introduction to Juvenile Justice

This course examines prevalent patterns of juvenile delinquency, relates these patterns to theories of child and adolescent development, and considers various theories regarding the cause of juvenile criminal behavior. In addition, this course surveys the roles of the police, courts, and juvenile probation in regards to California's balanced and restorative justice system. California Welfare and Institution 330 dependent child, 601 status offender, and 602 delinquent offender Codes are also studied—as well as Dennis H juvenile detention hearings, Gladys R delinquency hearings for offenders under 14 years of age, and Edsel P fitness hearings to determine waiver of serious juvenile offenders to adult court. Court cases pertinent to the areas of the juvenile justice system that are covered are also discussed.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours 4.5 Quarter Credits

CJDE220—Criminology 2

This course will initially examine social conflict theories of criminology such as critical, left-realist, feminist criminology, postmodern, peacemaking, and convict criminology, comparing them to previously learned criminology theories. The course emphasis then shifts to applying the many criminology theories to a variety of crimes and the individuals who commit them. The irony of crimes committed by persons ranging from the affluent to the deprived is related by typologies of murder, gangs-related crime, robbery, burglary, auto theft, arson, sexual offenses, narcotics offenses, crimes against children, fraud, computer crimes, embezzlement, receiving stolen property, terrorism, corporate/white collar crime, insider trading, gambling, prostitution, money laundering, and public corruption.

Prerequisite: CJ175 – Criminology 1

50 Hours 4.5 Quarter Credits

CJ226—Contemporary Terrorism 1

This course will examine the influence and impact of international and domestic terrorism on the criminal justice system—and to a lesser degree the impact of contemporary legal, civic, and political issues. A comparison of several terrorism definitions will be explored as they relate to violence as the terrorists' operational mechanism, the desire for publicity, asymmetrical tactics, and ideological/religious/cultural relevance. A post World War II history of international terrorism culminates in the 9/11 attack and the failure of U.S. intelligence to "connect the dots." A partial worldwide geopolitical study of terrorist groups, their methods, and histories will be examined—ending in Europe.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours 4.5 Quarter Credits

CJ240—Contemporary Terrorism 2

This course continues the worldwide geopolitical study of terrorist groups, their methods, and histories in North Africa and the Middle East; the Persian Gulf; Northeast, Central and Southern Africa; Southern and Southeast Asia; the Pacific Rim; and Latin America and South America. An additional examination of counterterrorism agencies, methods, hostage rescue techniques, risk analysis, impact of The Patriot Act, aviation security, cyber security, impact of the Patriot Act—as well as state-of-the-art weaponry and technology and personal

protection techniques—will also occur. Students will also learn how the Intelligence Community--partnered with cutting edge intelligence gathering techniques such as metadata, open-source intelligence, and mathematics-based crime forecasting—hopes to identify and project terrorist threats deep into the future.

Prerequisite: CJ226 – Contemporary Terrorism 1

50 Hours

4.0 Quarter Credits

ENGDE101 — English

Students will learn effective college-level essay writing skills with a focus on structure and development, including organization and coherence with special attention to persuasive writing. In addition, a targeted review of sentence mechanics, grammar and punctuation will be covered through a combination of lecture and directed exercises.

Prerequisite: None

50 Hours

5.0 Quarter Credits

IT101 – Computer Applications

This course is designed to increase proficiency in the use of basic computer use, common word processing, spreadsheet, and presentation application software. Topics include the production of business documents, reports, and presentations. Upon successful completion of this course, students will be able to identify basic components of a computer, and prepare documents using word processing, spreadsheets, and presentation software.

Prerequisite: None

50 hours

4.5 Quarter Credits

MTH101 — Introduction to Algebra

This course focuses on the use of rational and irrational numbers in algebra and geometry. Students will become proficient in computing with integers, fractions, decimals, the order of operations, and basic radical expressions. The topic areas in algebra include, but are not limited to, basic set theory, the classification of the real number system, the addition, subtraction, and multiplication of polynomials, solving linear equations, solving linear inequalities, ratios, rates, and proportional reasoning. This course includes the application of dimensional analysis to perform unit conversions in both the English and SI units of measurement within a problem-solving context. Additionally, it includes an introduction to polynomial functions with an emphasis on linear functions and their graphs.

Prerequisite: None

50 Hours

5.0 Quarter Credits

SPC101 — Public Speaking

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Informative and Persuasive Speaking.

Prerequisite: None

50 Hours

5.0 Quarter Credits

PSYDE101 — Psychology

This survey course covers a broad spectrum of major psychological theories and theorists. Topics covered include but are not limited to the biological basis of behavior, states of consciousness, personality, stress, psychological disorders, and social psychology. Students participate through student led reviews of current research, self-evaluations, and other in-class projects.

Prerequisite: None

50 Hours

5.0 Quarter Credits

SOCDE101 – Sociology

This class provides an overview of sociology and its application to everyday life. Emphasis is placed on understanding the major theories, concepts, and terminology. Students will explore topics such as culture, inequality, social structure, deviance, and social institutions.

Prerequisite: none

50 Hours

5.0 Quarter Credits

-

Update effective as of 05/10/2022

- Platt College will no longer offer the Hemodialysis program.

Updates Effective as of 07/15/2022

Medical Administrative Specialist (Associate of Science) Hybrid

Medical Administrative Specialists perform a variety of tasks necessary to running a smooth, effective medical office. These individuals focus on many administrative procedures of medical offices, outpatient clinics, hospitals, and other health care facilities. Some of these skills include billing, coding, scheduling, transcription, office finance, human resources and computer skills. Medical Administrative Specialist students will learn the skills that may lead to becoming an office manager in a clinical setting.

Vocational Objective

The intent of the Medical Administrative Specialist programs is to provide an enriched learning opportunity that will prepare the student for entry-level employment in the health care industry. Students in the Medical Administrative Specialist programs will graduate with a professional knowledge, skills, and practical experience in the health services field acquired during their studies at Platt College. Employment opportunities open to the graduates of the Medical Administrative Specialist programs include Medical Administrative Assistant, Podiatric Medical Administrative Assistant, and Ophthalmic Medical Administrative Assistant. Industries that will be interested in these graduates include, but are not limited to, ambulatory settings such as medical offices, clinics, nursing homes, medical supply companies, home health agencies, insurance companies, pharmaceutical companies.

Industry Occupations

Perform secretarial duties using specific knowledge of medical terminology and hospital, clinic, or laboratory procedures. Duties may include scheduling appointments, billing patients, and compiling and recording medical charts, reports, and correspondence.

Associate of Science in Medical Administrative Specialist

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Science; Medical Administrative Specialist provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Associate of Science in Medical Administrative Specialist Program Information

1210 Hours / 90 Quarter Credit Hours / Approximately 15 months

Core Courses

IAHC101 – Introduction to Allied Health Careers	4.0 Quarter Credits
IT101 – Computer Applications	4.5 Quarter Credits
MAS104 – Introduction to Medical Transcription	3.5 Quarter Credits
MASDE105 –Medical Terminology	3.5 Quarter Credits
MASDE106 – Human Resources, Risk Management and Employability	4.0 Quarter Credits
MASDE107 - Advanced EHR	3.5 Quarter Credits
MASDE110 – Anatomy & Physiology	4.0 Quarter Credits
MAS140 – Medical Billing and Coding – ICD-10	3.5 Quarter Credits
MAS142 – Medical Billing and Coding – CPT	3.5 Quarter Credits
MAS144 – Medical Billing and Coding – HCPCS	3.5 Quarter Credits
MASDE152 – Medical Office Procedures	4.0 Quarter Credits

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

MASDE106 — Human Resources, Risk Management and Employability

This course introduces the student to human resources and risk management in the medical environment. Students will be introduced to basic human resource functions including classifying and reclassifying existing positions, interviewing and hiring employees, counseling employees, benefits, work hours and overtime. Students will learn to identify the sources of liability in an office based medical practice, specify strategies to reduce exposure to office liability, discuss various methods to address compliance issues related to an office based medical practice and describe liability issues related to employment in the office based medical practice. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MASDE107 – Advanced EHR

This course will cover the advanced topics in the field of electronic records. Such topics may include, but are not limited to: health data structure, standards across the board and various types of data collection methods. Students will also learn the importance of electronic health record maintenance, privacy, security and confidentiality. They will discuss the financial management side of insurances and billing.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

MASDE110 – Anatomy and Physiology

Upon completion of this subject, the student will have practical knowledge about the structural levels of organization, anatomical components, and physiology. The student will also learn about Medical Terminology and relationships related to various body organs and anatomical directions, planes, and body cavities. The student will have a clear understanding of the anatomy and physiology of a typical cell, tissues, organs, systems of the human body and homeostasis and its importance in the human body.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MASDE152 — Medical Office Procedures

General administrative procedures are introduced. Areas of study include receptionist duties, appointment scheduling, records management, financial arrangements, communications, telephone procedures, and correspondence management. This course addresses basic principles, terms and concepts of business structure including those in the medical field. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MASDE155 — Medical Computerized Office

Students develop skills in entering, editing, analyzing, and retrieving patient data using specialized medical software. This course also includes hands-on use of the software for insurance billing, coding of diseases, medical records, and related medical information. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

MASDE162 — Certification Preparation Seminar

Students will prepare for the national certification exam in the following areas of competence: medical insurance and billing procedures, terminology, the claims process, CPT coding, ICD-9-CM and HCPCS Level II Coding. Exam topics will be reviewed in depth including: CMS-1500 claims forms, confidentiality and ethics, Blue plans, disability, HIPSS, Medicaid and Medicare, OSHA, and TRICARE.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MX251 — Externship

The Externship experience provides the student with the opportunity to practice the skills they have been taught in school. It is a real world scenario in which the student will work with patients, doctors, and other members of the healthcare delivery team. This hands-on experience gives the student on-the-job training that would be impossible to provide in a classroom setting. The Externship Site Supervisor will complete weekly evaluations tracking the student's progress, as well as a final evaluation at the completion of the student's hours. The Externship Coordinator will monitor the student's progress, along with the Externship Site Supervisor, with on-site visits being performed.

Prerequisite: Completion of all coursework with a cumulative 2.0 GPA. 160 Hours 5.0 Quarter Credits

ENGDE101 — English

Students will learn effective college-level essay writing skills with a focus on structure and development, including organization and coherence with special attention to persuasive writing. In addition, a targeted review of sentence mechanics, grammar and punctuation will be covered through a combination of lecture and directed exercises.

Prerequisite: None 50 Hours 5.0 Quarter Credits

MTH101 — Introduction to Algebra

This course focuses on the use of rational and irrational numbers in algebra and geometry. Students will become proficient in computing with integers, fractions, decimals, the order of operations, and basic radical expressions. The topic areas in algebra include, but are not limited to, basic set theory, the classification of the real number system, the addition, subtraction, and multiplication of polynomials, solving linear equations, solving linear inequalities, ratios, rates, and proportional reasoning. This course includes the application of dimensional analysis to perform unit conversions in both the English and SI units of measurement within a problem-solving context. Additionally, it includes an introduction to polynomial functions with an emphasis on linear functions and their graphs.

Prerequisite: None 50 Hours 5.0 Quarter Credits

SPC101 — Public Speaking

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Informative and Persuasive Speaking.

Prerequisite: None 50 Hours 5.0 Quarter Credits

PSYDE101 — Psychology

This survey course covers a broad spectrum of major psychological theories and theorists. Topics covered include but are not limited to the biological basis of behavior, states of consciousness, personality, stress, psychological disorders, and social psychology. Students participate through student led reviews of current research, self-evaluations, and other in-class projects.

Prerequisite: None 50 Hours 5.0 Quarter Credits

SOCDE101 – Sociology

This class provides an overview of sociology and its application to everyday life. Emphasis is placed on understanding the major theories, concepts, and terminology. Students will explore topics such as culture, inequality, social structure, deviance, and social institutions.

Prerequisite: none 50 Hours 5.0 Quarter Credits

Updates effective as of 8/1/2022

- Tuition changes for Respiratory Therapy AS program

Updates effective as of 8/15/2022

- Wonderlic test scores for Veterinary Technology (residential and DE) and Diagnostic Medical Sonography (AS / BS)

Note:

- Bachelor's degree completion programs require the completion of a minimum of 180 credit hours. Credit hours may be earned through this program and the completion of programs prior to enrollment, typically through an Associate's degree program which is a prerequisite for entry.
- Tuition - Estimated charges for the period of attendance and the entire program
- Books & Supplies - In select courses, textbooks and/or supplies are classroom copies, which must be returned in good condition at the end of the course. Additional fees will be assessed for failure to return these books and/or supplies.
- Additional Fees as applicable are: \$25.00 return check fee; \$5.00 replacement ID card fee; \$10.00 replacement parking card fee (Alhambra only); \$10.00 Official Transcript and/or Diploma reprint fee

DISCLAIMER: Except as expressly provided in California Education Code Section 94898, Platt College reserves the right to modify policies, course schedules, curricula or courses within reason due to exigent circumstances, program upgrades and/or content changes, and to cancel programs of study, modes of delivery, upcoming start dates or individual c courses as it deems necessary. If a course or program is cancelled the school may schedule course completion at a later date or refund all monies paid for the cancelled course or program if the student does not wish to continue with the program at the later date. All Platt College programs are not available at all locations, please see an Admissions Representative form more information on specific enrollment information.

Tuition Payment Policy

Each Program's tuition and book charges are billed by term throughout the program.

- All charges are due within 7 calendar days of the start of the payment period and/or term.
- Tuition and charges may vary by term.
- Students may request a copy of their student ledger card from Student Accounts to view and review all current and previous charges and payments that have been made to their account.
- Students are responsible for repaying the loan amounts, plus any interest that have been incurred as of the date of withdrawal.

Student Tuition Recovery Fund (STRF):

You must pay the state-imposed assessment for the Student Tuition Recovery Fund (STRF) if all of the following applies to you:

1. You are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition either by cash, guaranteed student loans, or personal loans.
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if either of the following applies:

1. You are not a California resident, or are not enrolled in a residency program
2. Your total charges are paid by a third party, such as an employer, government program or other payer, and you have no separate agreement to repay the third party

The State of California created the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by students in an educational program who are California residents, or are enrolled in a residency program attending certain schools regulated by the Bureau for Private Postsecondary Education.

You may be eligible for STRF if you are a California resident or are enrolled in a residency program, prepaid tuition, paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The school closed before the course of instruction was completed.
2. The school's failure to pay refunds or charges on behalf of a student to a third party for license fees or any other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school.
3. The school's failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs.
4. There was a material failure to comply with the Act or this Division within 30 days before the school closed or, if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau.
5. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

Articulation Agreements: Platt College currently has an articulation agreement with Trinity Law School.

- Information regarding accreditation and comparable programs may be obtained from the Accrediting Commission of Career Schools and Colleges, 2101 Wilson Boulevard • Suite 302 • Arlington • VA • 22201, 703.247.4212

Any questions a student may have regarding this catalog addendum that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 1747 North Market Blvd, Suite 225, Sacramento, CA 95834, www.bppe.ca.gov, toll-free telephone number (888) 370-7589 or by fax (916) 263-1897.

Platt College reserves the right to update and modify the Catalog and Catalog Addendum as needed. In addition, Platt College will update the Catalog and Catalog Addendum annually, each summer.

PROFESSIONAL LICENSURE DISCLOSURE

For the following programs offered at Platt College we have determined that our curriculum meets the state of California educational for licensure or certification. These programs are designed to lead to professional licensure or certification in the state of California.

Respiratory Therapy, Associate of Science (Offered at Platt College Ontario and Platt College Alhambra ONLY)

Occupational Therapy Assistant, Associate of Science (Offered at Platt College Anaheim ONLY)

Vocational Nursing, Diploma (Offered at Platt College Alhambra ONLY)

Vocational Nursing, Associate of Science (Offered at Platt College Alhambra ONLY)

Certified Nurse Assistant, Certificate (Offered at Platt College Anaheim and Platt College Alhambra ONLY)

Hemodialysis, Certificate (Offered at Platt College Anaheim and Platt College Alhambra ONLY)

Not all programs are offered at all locations. Please check with the Platt College Admissions team regarding program availability.

Platt College has not yet made a determination as to whether our program curriculum meets educational requirements for the following states: Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

Tracking Student Location

At the time of enrollment all enrolling students provide their current address which includes the state they reside in as part of completing the Enrollment Agreement. All students are required to notify the school immediately should their address, phone number or email address change. Students should contact their Academic Dean or the campus Registrar to update this information. Updates to such information is entered in the Campus Nexus, the student database system. Campus Nexus tracks both the previous contact information and the new contact information.

Platt College - Alhambra is approved to offer distance education in the following states:

- Arizona
- California
- Colorado
- Florida
- Idaho
- Massachusetts
- Nevada
- Utah
- Virginia

Platt College - Completion and Graduation Rates by Campus

Completion /Graduation Rates:

The completion and graduation rates listed below represent a cohort of certificate or degree seeking, first-time, full-time undergraduate students who entered Platt College for the first time September 1, 2015- August 31, 2016. These rates are calculated at 150% of normal time for completion and match the data provided to the National Center for Education Statistics' IPEDS surveys.

* Due to the COVID-19 Pandemic students enrolling in the following programs: Occupational Therapy- AS, Diagnostic Medical Sonography- AS, Diagnostic Medical Sonography- BS, Respiratory Therapy- AS, and Respiratory Therapy DE- BS between the start dates of April 20, 2020 – November 22, 2021 were required to complete the Wonderlic (BST) entrance exam and achieve a minimum score of 278 Verbal and 292 Quantitative with an overall minimum total score of 680. During the COVID-19 Pandemic students were not required to complete the HESI entrance exam. Therefore, students re-entering their original program that tested under the COVID-19 Pandemic entrance test requirements will not be required to retest and their original test scores will remain valid through December 31, 2024. After December 31, 2024 COVID-19 Pandemic test scores will no longer remain valid and any student applying to re-enter will be required to retest.

Vaccination Policy

Vaccinations may be required prior to the start of a clinical assignment or off-campus clinical instruction exercise. Students will be notified in advance if a particular course or clinical assignment will require any specific immunizations. Students will be responsible for obtaining all immunizations. The following programs have vaccination requirements:

Program	Vaccination	Required By
Respiratory Therapy	MMR Varicella (Chickenpox) Hep B TB Influenza T-DAP COVID-19 (maybe dependent on-site placement)	1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation
Diagnostic Medical Sonography	Hep B MMR Varicella (Chickenpox) T-DAP Influenza TB COVID-19 (maybe dependent on-site placement)	3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 6 months prior to Clinical Rotation
Medical Assisting	Hepatitis B TB COVID-19 (maybe dependent on-site placement)	6 months prior to Extern 1 – 3 months prior to Extern
Medical Administrative Specialist	Hepatitis B TB COVID-19 (maybe dependent on-site placement)	6 months prior to Extern 1 – 3 months prior to Extern
Vocational Nursing	MMR Varicella (Chickenpox) Hep B TB Influenza T-DAP COVID-19 (maybe dependent on-site placement)	1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation
Certified Nurse Assistant	TB Influenza COVID-19 (maybe dependent on-site placement)	Prior to Extern Prior to Extern
Veterinary Technology	T-DAP COVID-19 (maybe dependent on-site placement)	Beginning Core Coursework

	Rabies	Prior to Core Courses
Veterinary Technology DE	T-DAP	Module 12
	COVID-19 (maybe dependent on-site placement)	
	Rabies	Prior to Core Courses
Occupational Therapy Assistant	MMR	1 month prior to Clinical Rotation
	Varicella (Chickenpox)	1 month prior to Clinical Rotation
	Hep B	1 month prior to Clinical Rotation
	TB	1 month prior to Clinical Rotation
	Influenza	1 month prior to Clinical Rotation
	T-DAP	1 month prior to Clinical Rotation
	COVID-19 (maybe dependent on-site placement)	

Campus Faculty include Full-Time and Adjunct Faculty

Rita Luce	RT215A, RT215B, RT225A – clinical	AS Respiratory Therapy – Platt College – 2013 BS Respiratory Therapy – 2015	2018
Alfred Tostado	All RT Courses – clinical	Certificate in Respiratory Therapy – East Los Angeles – 1977 Associate of Science – 1997	2017
Julius Autry	All RT Courses – theory	Bachelor of Vocational Education from Cal State University – Long Beach – 1974 Associate of Arts from Santa Monica College - 1973	2012
Shannon Holmes	All RT Courses – clinical	Associate of Arts in Liberal Arts from Copper Mountain College – 2004 Associate of Arts in Respiratory Therapy from Victor Valley College - 2007	2015
Elizabeth Maria Salazar	All RT Courses – Clinical	Bachelor of Science in Health Administration from Cal State University, Northridge – 2014 Certificate in Achievement in Respiratory Therapy – 2004 Associate of Science in Respiratory Therapy – 2004 Associate of Arts in Library Arts – 2002	2013

		Skill Certificate in Emergency Department Assistant – 2001 from East Los Angeles Community College	
Dan Choi	All RT Courses – Clinical	AS from Concorde Career College BS in Rt from San Joaquin Valley College	2021
Jennifer Tronson	All RT Courses – Clinical	AS in RT from Victor Valley College BS in RT and Masters of Educational Technology from Boise State University	2021

Hybrid Learning Faculty

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Jose Soto-Leyva	All CJ Courses	B.S. Public Administration with an Emphasis in Criminal Justice, California A.S. GENERAL EDUCATION	2022
Melvin Merrill	All Business Management courses	Bachelor of Science, Business University of Phoenix 2012 Master of Science, Organizational Leadership National University 2014	2016
Kimberly O'Hara Nunez	All English Courses Speech All Ethics Courses American Government History of Business Psychology	Master of Art in History from Cal Poly Pomona (2003) BA in Speech Communication from Emerson College (1994)	2005
Lindsey Thomas	All English Courses	Master of Arts - English (2010) Cal State Poly Pomona Bachelor of Arts – English (2008) UC Santa Barbara	2016

Updates Effective as of 11/8/2021

- **2020-2021 Platt College Course Catalog will be effect until 12/31/2021.**
- **Add verbiage to page 33 for Respiratory Therapy**
“The Respiratory Therapy program goals are to prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRTs).”

Updates effective 02.28.2022

- Prerequisites from the following Information Technology courses:
 - IT103 – Desktop Hardware and Software II
 - IT104 – Desktop Operating Systems
 - IT106 – Linux Operating Systems
 - IT115 – Introduction to Programming
 - IT120 – Cloud Fundamentals
 - IT200 – Networking Essentials
 - IT213 – Routing Protocols and Concepts
 - IT215 – Introduction to Mobile Devices
 - IT220 – LAN Technologies
 - IT221 – WAN Technologies
 - IT225 – Introduction to Microsoft Exchange and Web Services
 - IT235 – Network Security
 - IT245 – Introduction to Databases

Updates effective 04.01.2022

- Remove PHS101 from page 33 of the catalog for the Respiratory Therapy Associates in Science program
- Update VTDE AS program information from page 88 of the catalog (remove old program information and replace with new program information listed below)

Associate of Science in Veterinary Technology DE

Upon successful completion of the program of instruction, the graduate will be awarded an Associate of Science in Veterinary Technology provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0(C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Associate of Science in Veterinary Technology DE Program Information

1773 Hours / 120 Quarter Credit Hours / Approximately 19 months

Core Courses

VTDE101A – Introduction to Veterinary Technology	4.0 Quarter Credits
VTDE102A – Veterinary Medical Terminology	4.0 Quarter Credits
VTDE103A – Veterinary Anatomy & Physiology I	3.5 Quarter Credits
VTDE104C – Veterinary Anatomy & Physiology II / III	5.0 Quarter Credits
VTDE106A – Veterinary Pharmacology I	4.0 Quarter Credits
VTDE107A – Veterinary Pharmacology II	1.5 Quarter Credits
VTDE109B – Lab Animal Nursing and Exotic Animal Nursing	4.0 Quarter Credits
VTDE110A – Veterinary Clinical Pathology	3.5 Quarter Credits
VTDE 111A – Veterinary Parasitology	3.5 Quarter Credits
VTDE112A – Veterinary Clinical Pathology II	1.5 Quarter Credits
VTDE120A – Veterinary Clinical Techniques I	3.5 Quarter Credits
VTDE121B – Veterinary Clinical Techniques II / III	3.5 Quarter Credits
VTDE122A – Small Animal Nursing I	4.0 Quarter Credits
VTDE123A – Small Animal Nursing II	4.0 Quarter Credits
VTDE130A – Veterinary Anesthesia & Surgical Nursing I	3.5 Quarter Credits
VTDE 131A – Veterinary Anesthesia & Surgical Nursing II	3.5 Quarter Credits
VTDE141B – Veterinary Hospital Management & Client Communication & Customer Service	2.0 Quarter Credits
VTDE150A – Veterinary Diagnostic Imaging	3.5 Quarter Credits
VTDE160A – Animal Nutrition	3.5 Quarter Credits
VTDE171B – Equine and Large Animal Nursing	4.5 Quarter Credits
VTDE200A- Veterinary Clinical Externship I	4.0 Quarter Credits
VTDE200.B – Veterinary Technician Seminar	2.0 Quarter Credits
VTDE201 – Veterinary Clinical Externship II	4.0 Quarter Credits
VTDE202 – Veterinary Clinical Externship III	4.0 Quarter Credits
VTDE203B – Veterinary Technician License Preparation	3.5 Quarter Credits
VTDE250B – Veterinary Clinical Skills Seminar I / II / III	6.5 Quarter Credits
VTDE204 – Medical Calculations	3.0 Quarter Credits

General Education Courses

BIODE103A- General Biology & Microbiology	5.0 Quarter Credits
CHMDE103A- General Chemistry	5.0 Quarter Credits
MTHDE103A- College Algebra	5.0 Quarter Credits
ENGDE101 - English Composition	5.0 Quarter Credits
SPCDE105- Interpersonal Communication	3.0 Quarter Credits
Program Total	120 Quarter Credits

Course Descriptions:

VTDE101A — Introduction to Veterinary Technology

Orientation to the program, and a survey of the role of the veterinary technician in the workplace. Survey of employment opportunities and areas of specialization. Ethics and professionalism. Laws and regulations governing veterinary technicians. Introduction to basic animal care skills and clinical procedures.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE102A — Veterinary Medical Terminology

This course covers word parts, directional terminology, and analysis of common veterinary terms.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE103A — Veterinary Anatomy & Physiology I

Comparative veterinary anatomy and physiology for veterinary technicians. This course covers the clinically relevant veterinary anatomy and physiology including a discussion of the similarities and differences among the major domestic species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and the pathophysiology of disease.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VTDE104C — Veterinary Anatomy & Physiology II / III

Comparative anatomy and physiology for veterinary technicians. This course covers the clinically relevant anatomy and physiology of the major domestic animals and includes a discussion of the similarities and differences among the species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and pathophysiology of disease.

Prerequisite: VTDE103 **75 Hours** **5.0 Quarter Credits**

VTDE106A — Veterinary Pharmacology I

This course introduces the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE107A – Veterinary Pharmacology II

Part 2 of a 2-part course introducing the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: VTDE106 **25 Hours** **1.5 Quarter Credits**

VTDE109B – Lab Animal and Exotic Animal Nursing

An orientation to the use of animals in research and to the role of the veterinary technician and the biotechnologist in a biomedical research animal facility. Regulations affecting the use of animals in research will be discussed, including the Animal Welfare Act, USDA, FDA, and IACUC requirements. Proper methods of restraint, husbandry, nursing techniques, and housing needs for the common species of laboratory animals. Appropriate anesthesia, analgesia and euthanasia methods are discussed. Basic understanding of the care, husbandry, clinical procedures, and medical concerns of rabbits, ferrets, guinea pigs, chinchillas, small rodents, birds, snakes, lizards, turtles. Emphasis on clinically relevant materials and activities.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE110A — Veterinary Clinical Pathology

This course provides the fundamental studies of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE111A — Veterinary Parasitology

Study of animal parasites. This course focuses on life cycle, vectors, and methods of transmission, identification, and prevention and treatment of parasitic disease in animals.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE112A – Veterinary Clinical Pathology II

This course continues to provide the fundamental study of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: VTDE110

25 Hours

1.5 Quarter Credits

VTDE120A — Veterinary Clinical Techniques I

This course begins the student's clinical training. Students are introduced to principles of husbandry and medical care of common animal species, including: physical examination, grooming, injections, feeding, housing and restraint. The course includes a hands-on component focusing on the practical application of animal care skills and principles of animal care and management using techniques and knowledge learned in the veterinary technology classroom.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE121B — Veterinary Clinical Techniques II / III

This course continues the student's clinical training. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures. This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Topics covered include: venipuncture and blood collection techniques, catheterization, fluid therapy, physical examination, basic dental care procedures, wound management, and emergency care. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures.

Prerequisite: VTDE120

50 Hours

3.5 Quarter Credits

VTDE122A — Small Animal Nursing I

This course covers a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered. **Prerequisite: None**

50 Hours

4.0 Quarter Credits

VTDE123A — Small Animal Nursing II

This course continues to cover a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered.

Prerequisite: VTDE122

50 Hours

4.0 Quarter Credits

VTDE130A — Veterinary Anesthesia and Surgical Nursing I

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE131A — Veterinary Anesthesia and Surgical Nursing II

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: VTDE130

50 Hours

3.5 Quarter Credits

VTDE141B — Veterinary Hospital Management and Client Communication and Customer Service

Principles and practice of veterinary office management for veterinary technology students. Client relations, receptionist skills, telephone techniques and personnel management. Generation and maintenance of correspondence, medical records, legal forms and hospital logs. Basic bookkeeping, accounting and financial management principles. Marketing and public relations. Professional ethics and professionalism. Use of computers for data entry, patient record management and inventory control. Use of practice management software. State and federal laws as they apply to the veterinary practice. The objective of this course is to provide the student with critical client communication and customer service skills. These skills complement the technical learning provided in the program and are essential to becoming a member of a client-facing healthcare delivery team. The course emphasizes experiential learning and focuses on providing the student with experience handling common client interaction situations such as explanation of technical knowledge to a client, working with a concerned client, conflict resolution, and answering questions on commonly requested medications and treatments.

Prerequisite: None

25 Hours

2.0 Quarter Credits

VTDE150A — Veterinary Diagnostic Imaging

Introduction to the principles of veterinary radiography for veterinary technician students, including radiographic terminology, physics of X-ray production and interaction with matter, occupational safety and radiation protection, radiographic exposure factors and patient positioning required for production of diagnostic films, processing of radiographic film. Discussion of equipment materials and special radiographic studies common in veterinary practice. Basic ultrasound procedures are also presented.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE160A — Animal Nutrition

Fundamentals of energy and non-energy producing nutrients and their sources and functions. Integration of concepts including digestion, absorption, and metabolism with application to normal and therapeutic nutritional needs.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE171B – Equine and Large Animal Nursing

Introduction to the equine species will be given in this course. Review of basic anatomy, physiology will be done. Identifying different breeds, nutrition and husbandry will be presented. Various clinical techniques and restraint techniques will be taught and demonstrated by the students. Equine parasitology and diseases will be also be covered. The

Large Animal Nursing course provides focused study of large animal nursing skills including physical exam, clinical procedures, requirements, reproduction and preventive care. The technician's role in food animal medicine. Species covered include bovine, ovine, porcine, caprine and camelid.

Prerequisite: None

58 Hours

4.5 Quarter Credits

VTDE200A — Veterinary Clinical Externship I

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. The site of the preceptorship is approved by the veterinary technology program in consultation with the student and the veterinary professionals Opportunity for learning and practical application of the

knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team. The course includes a weekly seminar in which the externship experience is reviewed and skills are reinforced. Concurrent enrollment in VTDE200B required.

Prerequisite: VT101DE

120 Hours

4.0 Quarter Credits

VTDE200.B – Veterinary Technician Seminar

This seminar course will serve as an on-campus addition to the students' first off-campus externship in VT200a. Students will discuss their experiences and challenges of working in a clinic. Concepts and skills will be reviewed and reinforced. Weekly objectives will be assessed in accordance with AVMA requirements.

Prerequisite: VTDE101

25 Hours

2.0 Quarter Credits

VTDE201 — Veterinary Clinical Externship II

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team.

Prerequisite: VTDE101 – VTDE171A, VTDE200A & VTDE200B

120 Hours

4.0 Quarter Credits

VTDE202 — Veterinary Clinical Externship III

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team

Prerequisite: VTDE101 – VTDE201

120 Hours

4.0 Quarter Credits

VTDE203B — Veterinary Technician License Preparation

Review of pertinent subject matter in preparation for the California State and National Veterinary Technician Examination. Includes lecture, group study, and laboratory components.

Prerequisite: VTDE101 — VTDE201

50 Hours

3.5 Quarter Credits

VTDE250B – Veterinary Clinical Skills Seminar (On-site)

This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Hands-on experience including: husbandry and medical care of common animal species, physical examination, grooming, injections, feeding, housing and restraint, performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection, catheterization, fluid therapy, anesthesia, physical examination, basic dental care procedures, wound management, and emergency care and other routine veterinary clinical procedures. Part one of a three-part course.

Prerequisite: VTDE101 – VTDE171A Credits

120 Hours

6.5

VTDE204 – Medical Calculations

This course reviews mathematics required as part of clinical medical calculations utilized in preparation and administration of drugs, dosage determinations, intravenous fluid infusion, and prescription dispensing. Subjects covered include review of calculations involving fractions, decimals, ratios and proportions, unit conversions, and algebraic equations.

Prerequisite: VTDE101

30 Hours

3.0 Quarter Credits

BIODE103A – General Biology & Microbiology

This course is designed to provide the student with a foundation in basic biology. The student will gain a basic understanding of the foundations of life, classifications of species, and animal cell and tissue function.

Prerequisite: None

50 Hours

5.0 Quarter Credits

CHMDE103A – General Chemistry

This course provides an introduction to the principles of chemistry, including inorganic chemistry, organic chemistry, and biochemistry. Topics covered include atomic structure, bonding and nomenclature, gas laws, solutions, acids and bases, pH and equilibrium, organic and biochemical structure and reactions, and nuclear chemistry.

Prerequisite: None

30 Hours

3.0 Quarter Credits

MTHDE103A – College Algebra

This course includes topics from algebra. Algebra topics include the addition, subtraction, multiplication, and division of the real and complex numbers as well as polynomials. Additionally, it includes the solving of a variety of equations and inequalities, including, but not limited to, linear, absolute value, and quadratic equations. It also includes the graphing of a variety of functions with an emphasis on linear and quadratic functions; functions notation will be applied in problem solving as well as in computations involving combinations of functions. Geometry topics include, but are not limited to, the properties of parallel and perpendicular lines, perimeter, area, volume, theorems about triangles and various polygons, Pythagorean Theorem, and right triangle trigonometry.

Prerequisite: None

50 Hours

5.0 Quarter Credits

ENGDE101 – English Composition

Students will focus on college-level writing skills with particular emphasis on structure, organization and coherence with special attention to persuasive writing and novel analysis. The course will cover a targeted review of sentence mechanics, grammar and punctuation through a combination of lecture and directed exercises. The ENG 102 course is specific to DMS, Respiratory Therapy and Veterinary Technology Programs.

Prerequisite: None

50 Hours

5.0 Quarter Credits

SPCDE105 – Interpersonal Communications

Students learn the various theories and techniques of interpersonal communications. Topics include: process and functions of communication, relationship development, communication strategies, interpersonal language skills, listening and response skills and managing conflict.

Prerequisite: None

30 Hours

3.0 Quarter Credits

Class Sessions

Classes meet Monday through Friday and are completed in five-week modules.

Morning Classes	7:45 am -12:45 pm	Afternoon Classes (VT)	1:30 pm – 6:30 pm
Morning Classes (DMS)	7:45 am – 1:45 pm	Afternoon Classes (DMS)	4:00 pm – 10:00 pm
		Evening Classes	5:45 pm – 10:45 pm
<i>For Vocational Nursing core courses only – classes meet a minimum of Monday / Wednesday or Tuesday / Thursday and Saturday and or Sunday and are completed in 10-week modules. Times may vary based on clinical site hours.</i>

Note:

- Bachelor's degree completion programs require the completion of a minimum of 180 credit hours. Credit hours may be earned through this program and the completion of programs prior to enrollment, typically through an Associate's degree program which is a prerequisite for entry.
-  Tuition - Estimated charges for the period of attendance and the entire program
- Books & Supplies - In select courses, textbooks and/or supplies are classroom copies, which must be returned in good condition at the end of the course. Additional fees will be assessed for failure to return these books and/or supplies.
- Additional Fees as applicable are: \$25.00 return check fee; \$5.00 replacement ID card fee; \$10.00 replacement parking card fee (Alhambra only); \$10.00 Official Transcript and/or Diploma reprint fee

DISCLAIMER: Except as expressly provided in California Education Code Section 94898, Platt College reserves the right to modify policies, course schedules, curricula or courses within reason due to exigent circumstances, program upgrades and/or content changes, and to cancel programs of study, modes of delivery, upcoming start dates or individual courses as it deems necessary. If a course or program is cancelled the school may schedule course completion at a later date or refund all monies paid for the cancelled course or program if the student does not wish to continue with the program at the later date. All Platt College programs are not available at all locations, please see an Admissions Representative form more information on specific enrollment information.

Tuition Payment Policy

Each Program’s tuition and book charges are billed by term throughout the program.

- All charges are due within 7 calendar days of the start of the payment period and/or term.
- Tuition and charges may vary by term.
- Students may request a copy of their student ledger card from Student Accounts to view and review all current and previous charges and payments that have been made to their account.
- Students are responsible for repaying the loan amounts, plus any interest that have been incurred as of the date of withdrawal.

Student Tuition Recovery Fund (STRF):

You must pay the state-imposed assessment for the Student Tuition Recovery Fund (STRF) if all of the following applies to you:

1. You are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition either by cash, guaranteed student loans, or personal loans.
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if either of the following applies:

1. You are not a California resident, or are not enrolled in a residency program
2. Your total charges are paid by a third party, such as an employer, government program or other payer, and you have no separate agreement to repay the third party

The State of California created the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by students in an educational program who are California residents, or are enrolled in a residency program attending certain schools regulated by the Bureau for Private Postsecondary Education.

You may be eligible for STRF if you are a California resident or are enrolled in a residency program, prepaid tuition, paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The school closed before the course of instruction was completed.
2. The school's failure to pay refunds or charges on behalf of a student to a third party for license fees or any other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school.
3. The school's failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs.
4. There was a material failure to comply with the Act or this Division within 30 days before the school closed or, if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau.
5. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

Articulation Agreements: Platt College currently has an articulation agreement with Trinity Law School.

- Information regarding accreditation and comparable programs may be obtained from the Accrediting Commission of Career Schools and Colleges, 2101 Wilson Boulevard • Suite 302 • Arlington • VA • 22201, 703.247.4212

Any questions a student may have regarding this catalog addendum that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 1747 North Market Blvd, Suite 225, Sacramento, CA 95834, www.bppe.ca.gov, toll-free telephone number (888) 370-7589 or by fax (916) 263-1897.

Platt College reserves the right to update and modify the Catalog and Catalog Addendum as needed. In addition, Platt College will update the Catalog and Catalog Addendum annually, each summer.

PROFESSIONAL LICENSURE DISCLOSURE

For the following programs offered at Platt College we have determined that our curriculum meets the state of California educational licensure or certification. These programs are designed to lead to professional licensure or certification in the state of California.

Respiratory Therapy, Associate of Science (Offered at Platt College Ontario and Platt College Alhambra ONLY)

Occupational Therapy Assistant, Associate of Science (Offered at Platt College Anaheim ONLY)

Vocational Nursing, Diploma (Offered at Platt College Alhambra ONLY)

Vocational Nursing, Associate of Science (Offered at Platt College Alhambra ONLY)

Certified Nurse Assistant, Certificate (Offered at Platt College Anaheim and Platt College Alhambra ONLY)

Hemodialysis, Certificate (Offered at Platt College Anaheim and Platt College Alhambra ONLY)

Not all programs are offered at all locations. Please check with the Platt College Admissions team regarding program availability.

Platt College has not yet made a determination as to whether our program curriculum meets educational requirements for the following states: Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

Tracking Student Location

At the time of enrollment all enrolling students provide their current address which includes the state they reside in as part of completing the Enrollment Agreement. All students are required to notify the school immediately should their address, phone number or email address change. Students should contact their Academic Dean or the campus Registrar to update this information. Updates to such information is entered in the Campus Nexus, the student database system. Campus Nexus tracks both the previous contact information and the new contact information.

Platt College - Alhambra is approved to offer distance education in the following states:

- Arizona
- California
- Colorado
- Florida
- Idaho
- Massachusetts
- Nevada
- Utah
- Virginia

Platt College - Completion and Graduation Rates by Campus

Completion /Graduation Rates:

The completion and graduation rates listed below represent a cohort of certificate or degree seeking, first-time, full-time undergraduate students who entered Platt College for the first time September 1, 2015- August 31, 2016. These rates are calculated at 150% of normal time for completion and match the data provided to the National Center for Education Statistics' IPEDS surveys.

PLATT COLLEGE CAMPUSES	ALHAMBRA	ONTARIO	RIVERSIDE	ANAHEIM

* Due to the COVID-19 Pandemic students enrolling in the following programs: Occupational Therapy- AS, Diagnostic Medical Sonography- AS, Diagnostic Medical Sonography- BS, Respiratory Therapy- AS, and Respiratory Therapy DE- BS between the start dates of April 20, 2020 – November 22, 2021 were required to complete the Wonderlic (BST) entrance exam and achieve a minimum score of 278 Verbal and 292 Quantitative with an overall minimum total score of 680. During the COVID-19 Pandemic students were not required to complete the HESI entrance exam. Therefore, students re-entering their original program that tested under the COVID-19 Pandemic entrance test requirements will not be required to retest and their original test scores will remain valid through December 31, 2024. After December 31, 2024 COVID-19 Pandemic test scores will no longer remain valid and any student applying to re-enter will be required to retest.

Vaccination Policy

Vaccinations may be required prior to the start of a clinical assignment or off-campus clinical instruction exercise. Students will be notified in advance if a particular course or clinical assignment will require any specific immunizations. Students will be responsible for obtaining all immunizations. The following programs have vaccination requirements:

Program	Vaccination	Required By
Respiratory Therapy	MMR Varicella (Chickenpox) Hep B TB Influenza T-DAP COVID-19 (maybe dependent on-site placement)	1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation 1 – 3 month(s) prior to Clinical Rotation
Diagnostic Medical Sonography	Hep B MMR Varicella (Chickenpox) T-DAP Influenza TB COVID-19 (maybe dependent on-site placement)	3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 3 months prior to Clinical Rotation 6 months prior to Clinical Rotation
Medical Assisting	Hepatitis B TB COVID-19 (maybe dependent on-site placement)	6 months prior to Extern 1 – 3 months prior to Extern
Medical Administrative Specialist	Hepatitis B TB COVID-19 (maybe dependent on-site placement)	6 months prior to Extern 1 – 3 months prior to Extern
Vocational Nursing	MMR Varicella (Chickenpox) Hep B TB Influenza T-DAP COVID-19 (maybe dependent on-site placement)	1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation
Certified Nurse Assistant	TB Influenza COVID-19 (maybe dependent on-site placement)	Prior to Extern Prior to Extern
Veterinary Technology	T-DAP COVID-19 (maybe dependent on-site placement)	Beginning Core Coursework

	Rabies	Prior to Core Courses
Veterinary Technology DE	T-DAP COVID-19 (maybe dependent on-site placement) Rabies	Module 12 Prior to Core Courses
Occupational Therapy Assistant	MMR Varicella (Chickenpox) Hep B TB Influenza T-DAP COVID-19 (maybe dependent on-site placement)	1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation 1 month prior to Clinical Rotation

Campus Faculty include Full-Time and Adjunct Faculty

General Education Department

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Tamara Gwinn	English Art History	Bachelor of Arts, Creative Writing University of California, Riverside 2011 Master of Fine Arts, Creative Writing Chapman University 2015	2016
Carolyn Burge	Psychology Sociology	Master of Arts in Human Resource Management, National University - 2015 Master of Arts in Organizational Management, Ashford University – 2011 Bachelor of Arts in Psychology, California State University, San Bernardino - 2008	2019
Sara Khair	Math, Statistics	Master of Arts in Mathematics, Cal State University- Fullerton, 2018 Bachelor of Arts in Mathematics, Cal State University- Fullerton, 2016 Associate in Science in Biological Physical Science, Citrus College, 2012 Associate of Arts, Citrus College, 2012	2021
Ivonne Morales	Anatomy & Physiology, Biology, Chemistry, Math, Physics	Master of Biomedical Sciences, Cal Baptist University, 2020 Bachelor of Science in Biology, UC San Diego, 2019 Associate of Arts in Social and Behavioral Studies, Riverside Community College, 2016	2021
Erick Zamora	Psychology, Sociology	Master of Science in Applied Psychology, Sacred Heart University, 2017 Bachelor of Science in Psychology, University of Phoenix, 2015	2022
Kenneth Laboy	CHM, BIO, MTH	Master of Science in Biochemistry, Loma Linda University, 2016 Bachelor of Science in Biochemistry and Pre-Medicine, La Sierra University, 2013 Letter of Recognition in Building Trades Electricity, Montgomery College, 2008	2022
Tabetha Garcia	PSY, SOC	Master of Science in Counseling Psychology, California Baptist University, 2016 Bachelor of	2022

		Arts in Psychology, California State University, San Bernardino, 2012	
Mitchell Kopitch	ENG	Master of Fine Arts, University of Washington, 2018 Bachelor of Arts in English/Writing, Azusa Pacific University, 2015	2022

Medical Assisting and Medical Administrative Specialist Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Flory Barillas	All MA and MAS Courses	Bachelor of Science, Applied Management Everest College 2014 Associates of Arts, Liberal Arts and Sciences Chaffey College, 2007	2015
Jonette Yazzie	All MA / MAS Courses	Medical Assisting – Bryman College – 1974	2018
Alice Gutierrez	All MA / MAS courses	Associate of Arts in Business Administration – American InterContinental University – 2011 Medical Assisting Diploma – National Education Center – 1991	2018
Ulysses Pantoja	All MA / MAS courses	Bachelor of Science in Health Sciences – Purdue University Global (2018) Medical Assisting Diploma – Fontana Adult School (2006)	2018
Megan King	All MA Courses	Associate of Arts in Liberal Arts and Biological and Physical Sciences, San Bernardino Valley College, Graduated 05/2017 Certificate in Medical Assisting, Concorde Career College, Graduated 06/2009	2019
Yamila Vera	All MA and MAS Courses	Bachelor in Healthcare Administration, Purdue University Global 2018 Associate of Science - Medical Administrative Assistant / Medical Billing – Concorde Career College, San Bernardino – 2006	2020
Maria Camacho	All MA/ MAS Courses	Associate of Science in Medical Administrative Specialist, Platt College, 2017 Medical Assistant Diploma, Career Networks Institute, 2001	2022

Healthcare Management Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
-----------------	----------------	------------------------	-----------------------------

Melinda Muganzo	Healthcare Management Courses	Bachelor of Science, Business Administration Oakwood College 1984 Master of Business Administration Florida Metropolitan University, 1992 Certificate of Executive Leadership Claremont Graduate University, 2006	2016
Ulysses Pantoja	All HCM Courses	Bachelor of Science in Health Sciences – Purdue University Global (2018) Medical Assisting Diploma – Fontana Adult School (2006)	2018
Flory Barillas	All HCM Courses	Bachelor of Science, Applied Management Everest College 2014 Associates of Arts, Liberal Arts and Sciences Chaffey College, 2007	2015
Alane Sanchez	All BM and HCM	Master of Science in Business Administration/Finance, Aspen University, 2019 Bachelor of Arts in Organizational Leadership, California Baptist University, 2016	2019

Criminal Justice Programs

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Timothy Harris	All Criminal Justice Courses	Associates of Arts, Criminal Justice Los Angeles Southwest Junior College, 1985 Bachelor of Science, Public Administration Criminal Justice California State University, Dominguez Hills 1990 Master of Science, Organizational Leadership National University 2007	2016
Alma Gomez	All Criminal Justice Courses	Bachelor of Science in Criminal Justice, San Diego State University – 1997	2019
Dr. Liam Doyle	All Criminal Justice Courses	Doctor of Education in Organizational Change and Leadership, USC (2021) Master of Business Administration in Finance, University of Redlands – 2018 Bachelor of Science in Management, University of Phoenix – 2016 Associate of Science in Administration of Justice, Riverside Community College - 2009	2019
Jose Barr	All Criminal Justice Courses	Master of Business Administration, Universitas Regisiana Societatis Jesu – 2009 Bachelor of Science in Criminal Justice Administration, University of Phoenix - 2006	2019

Robert Cultrera	All Criminal Justice Courses	Master of Science in Justice Administration with a specialization in Law Enforcement Management, University of the Cumberland, 2015 Bachelor of Science in Business Administration, King University, 2013	2021
Felix Medina	All CJ	Master of Science in Criminal Justice, Grand Canyon University, 2022 Bachelor of Science in Public Safety and Emergency, Grand Canyon University, 2019	2022

Business Management Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Dr. Samuel Gibbs	All Business Management courses	Bachelor of Science, Business Management University of Phoenix 2006 Master of Administration University of Phoenix 2007 Doctorate of Management in Organizational Leadership University of Phoenix 2011	2015
Melvin Merrill	All Business Management courses	Bachelor of Science, Business University of Phoenix 2012 Master of Science, Organizational Leadership National University 2014	2016
Michael Bishai	All Business Management courses	Master of Business Administration/1980 Sam Houston State University Bachelor of Science in Accounting/1978 Loma Linda University	2017
Carolyn Burge	All Business Management Courses	Master of Arts in Human Resource Management, National University - 2015 Master of Arts in Organizational Management, Ashford University – 2011 Bachelor of Arts in Psychology, California State University, San Bernardino - 2008	2019

Veterinary Technology Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Jaime Wallin, Program Director	All Veterinary Technology Courses	Associate of Science – RVT (2008) Mt. Sac	2016

Siobhan McDowell	All Veterinary Technology Courses	Associate of Science in Veterinary Technology, Platt College, 2022 Registered Veterinary Technician (RVT) License # 6874 Bachelor of Science in Animal Science/2002 California Polytechnic State University	2017
Emeri Acosta	All Veterinary Technology Courses	Bachelor of Science, Concentration in Animal Health Science, California State Polytechnic University, 2016	2020
Sonya Perez	All Veterinary Technology Courses	Associates in Registered Veterinary Technology Mt. San Antonio College December 2013	2020
Dr. Trudy Golub-Sowers, Veterinary Clinical Director	All VT	Doctor of Veterinary Medicine, Western University of Health Sciences, 2009 Bachelor of Science in Biology, Cal Polytechnic University, 1991	2021

Diagnostic Medical Sonography Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Benjamin Keplinger, DMS Program Director	All DMS Courses	BS Computer Information Systems, Chapman University, Orange, CA, 2005 AAS Radiologic Technology, Community College of the Air Force, Montgomery, AL, 1996	2017
Mahjabeen Basheer	All DMS Courses	Bachelor of Medicine and Surgery University of Peshawar, Pakistan 1980	2014
Syed Shah	All DMS Courses	Bachelor of Science - University of Punjab 1994	2013
Bushra Meraj	All DMS Courses	Bachelor of Medicine/Bachelor of Surgery University of Karachi, Pakistan 1996	2017
Suzanne Ibrahim	All DMS Courses	M, Sc. Master Degree in Pediatrics, 1988 Bachelor's Degree in Medicine & Surgery, 1980 RDMS Obstetrics & Gynecology, 2012 RDMS Abdomen, 2013 RCS Echocardiography, 2013	2017
Robert Calvillo	All DMS courses	Associates Degree – Ultrasound, West Coast College - 2015	2020
Larry Balderrama	DMS101 – DMS107	Certificate in DMS, Modern Technology, Anaheim, CA (2002)	2021

Tricia Hill	DMS101 – DMS107	Ultrasound Certification – Cypress College, Cypress, CA Associate of Radiology Science – Mount San Antonio College, Walnut, CA	2021
-------------	-----------------	---	------

Information Technology Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Saul Ochoa	All IT Courses	Associate of Arts in Computer Technology, Los Angeles Community College (1985)	2018
Deb Gray	All IT Courses	Master of Science in Information Technology, Capella University – 2012	2019
Adam Doty	All IT Courses	MBA – University of California – Irvine (2013) BS Computer Science and engineering – University of LaVerne (2007)	2021

Vocational Nursing Program

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Kisha Alvarado, Director of Nursing	All LVN program courses	Vocational Nursing Certification, Casa Loma College, 1995 Associate of Science in Nursing, College of the Canyons, 2003 Bachelor of Science in Nursing, Western Governors University, 2011 Master of Science in Nursing, Western Governors University, 2014	2022
Patricia Regalado	All LVN program courses	LVN – St Phillips College, San Antonio, TX (2005) Associate degree Nursing – RN, Baptists Health System of School of Health Professionals, San Antonio, TX (2009) Bachelor of Science in Nursing – University of Texas (2011) Graduate Certificate – Nursing Educator – University of Texas (2014) Master of Science in Nursing – University of Texas (2014)	2021
Ian Rodriguez	All VN Courses	Bachelor of Science in Nursing, West Coast University, 2018	2022

Ramon Torres	All VN Courses	Master of Business Administration/IT Management, Western Governors University, 2014 Bachelor of Science in Health Informatics, Western Governors University, 2013 Associate of Science in Nursing, Mt. San Antonio College	2022
Gale Wasif	All VN Courses	Bachelor of Science in Nursing, University of Phoenix, 2013	2022
Rosalind Washington Tillman	All VN Courses	Master of Business Administration/Healthcare Management, University of Phoenix, 2010, Bachelor of Science in Business Management, University of Phoenix, 2006 Associate of Science in Nursing, LA Trade Technical College, 1998, Certificate in Vocational Nursing, LA Trade Technical College, 1989	2022

Hybrid Learning Faculty

Instructor Name	Courses Taught	Degree Earned and Year	Year Hired at Platt College
Jose Soto-Leyva	All CJ Courses	B.S. Public Administration with an Emphasis in Criminal Justice, California A.S. GENERAL EDUCATION	2022
Melvin Merrill	All Business Management courses	Bachelor of Science, Business University of Phoenix 2012 Master of Science, Organizational Leadership National University 2014	2016
Kimberly O'Hara Nunez	All English Courses Speech All Ethics Courses American Government History of Business Psychology	Master of Art in History from Cal Poly Pomona (2003) BA in Speech Communication from Emerson College (1994)	2005
Lindsey Thomas	All English Courses	Master of Arts - English (2010) Cal State Poly Pomona Bachelor of Arts – English (2008) UC Santa Barbara	2016

Updates Effective as of 11/8/2021

- **2020-2021 Platt College Course Catalog will be effect until 12/31/2021.**
- **Add verbiage to page 33 for Respiratory Therapy**
“The Respiratory Therapy program goals are to prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRTs).”

Updates effective 02.28.2022

- Prerequisites from the following Information Technology courses:
 - IT103 – Desktop Hardware and Software II
 - IT104 – Desktop Operating Systems
 - IT106 – Linux Operating Systems
 - IT115 – Introduction to Programming
 - IT120 – Cloud Fundamentals
 - IT200 – Networking Essentials
 - IT213 – Routing Protocols and Concepts
 - IT215 – Introduction to Mobile Devices
 - IT220 – LAN Technologies
 - IT221 – WAN Technologies
 - IT225 – Introduction to Microsoft Exchange and Web Services
 - IT235 – Network Security
 - IT245 – Introduction to Databases

Updates effective 04.01.2022

- Remove PHS101 from page 33 of the catalog for the Respiratory Therapy Associates in Science program
- Update VTDE AS program information from page 88 of the catalog (remove old program information and replace with new program information listed below)

Associate of Science in Veterinary Technology DE

Upon successful completion of the program of instruction, the graduate will be awarded an Associate of Science in Veterinary Technology provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum, cumulative grade point average of 2.0(C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Associate of Science in Veterinary Technology DE Program Information

1773 Hours / 120 Quarter Credit Hours / Approximately 19 months

Core Courses

VTDE101A – Introduction to Veterinary Technology	4.0 Quarter Credits
VTDE102A – Veterinary Medical Terminology	4.0 Quarter Credits
VTDE103A – Veterinary Anatomy & Physiology I	3.5 Quarter Credits
VTDE104C – Veterinary Anatomy & Physiology II / III	5.0 Quarter Credits
VTDE106A – Veterinary Pharmacology I	4.0 Quarter Credits
VTDE107A – Veterinary Pharmacology II	1.5 Quarter Credits
VTDE109B – Lab Animal Nursing and Exotic Animal Nursing	4.0 Quarter Credits
VTDE110A – Veterinary Clinical Pathology	3.5 Quarter Credits
VTDE 111A – Veterinary Parasitology	3.5 Quarter Credits
VTDE112A – Veterinary Clinical Pathology II	1.5 Quarter Credits
VTDE120A – Veterinary Clinical Techniques I	3.5 Quarter Credits
VTDE121B – Veterinary Clinical Techniques II / III	3.5 Quarter Credits
VTDE122A – Small Animal Nursing I	4.0 Quarter Credits
VTDE123A – Small Animal Nursing II	4.0 Quarter Credits
VTDE130A – Veterinary Anesthesia & Surgical Nursing I	3.5 Quarter Credits
VTDE 131A – Veterinary Anesthesia & Surgical Nursing II	3.5 Quarter Credits
VTDE141B – Veterinary Hospital Management & Client Communication & Customer Service	2.0 Quarter Credits
VTDE150A – Veterinary Diagnostic Imaging	3.5 Quarter Credits
VTDE160A – Animal Nutrition	3.5 Quarter Credits
VTDE171B – Equine and Large Animal Nursing	4.5 Quarter Credits
VTDE200A- Veterinary Clinical Externship I	4.0 Quarter Credits
VTDE200.B – Veterinary Technician Seminar	2.0 Quarter Credits
VTDE201 – Veterinary Clinical Externship II	4.0 Quarter Credits
VTDE202 – Veterinary Clinical Externship III	4.0 Quarter Credits
VTDE203B – Veterinary Technician License Preparation	3.5 Quarter Credits
VTDE250B – Veterinary Clinical Skills Seminar I / II / III	6.5 Quarter Credits
VTDE204 – Medical Calculations	3.0 Quarter Credits

General Education Courses

BIODE103A- General Biology & Microbiology	5.0 Quarter Credits
CHMDE103A- General Chemistry	5.0 Quarter Credits
MTHDE103A- College Algebra	5.0 Quarter Credits
ENGDE101 - English Composition	5.0 Quarter Credits
SPCDE105- Interpersonal Communication	3.0 Quarter Credits
Program Total	120 Quarter Credits

Course Descriptions:

VTDE101A — Introduction to Veterinary Technology

Orientation to the program, and a survey of the role of the veterinary technician in the workplace. Survey of employment opportunities and areas of specialization. Ethics and professionalism. Laws and regulations governing veterinary technicians. Introduction to basic animal care skills and clinical procedures.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE102A — Veterinary Medical Terminology

This course covers word parts, directional terminology, and analysis of common veterinary terms.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE103A — Veterinary Anatomy & Physiology I

Comparative veterinary anatomy and physiology for veterinary technicians. This course covers the clinically relevant veterinary anatomy and physiology including a discussion of the similarities and differences among the major domestic species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and the pathophysiology of disease.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VTDE104C — Veterinary Anatomy & Physiology II / III

Comparative anatomy and physiology for veterinary technicians. This course covers the clinically relevant anatomy and physiology of the major domestic animals and includes a discussion of the similarities and differences among the species. Emphasis is placed on the normal structure and function of the major organ systems as the foundation for understanding pathology and pathophysiology of disease.

Prerequisite: VTDE103 **75 Hours** **5.0 Quarter Credits**

VTDE106A — Veterinary Pharmacology I

This course introduces the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE107A – Veterinary Pharmacology II

Part 2 of a 2-part course introducing the basic principles of veterinary pharmacology. Preparation and dispensing of medications. Overview of the actions and interactions of the major classes of drugs, with emphasis on common veterinary uses of specific drugs.

Prerequisite: VTDE106 **25 Hours** **1.5 Quarter Credits**

VTDE109B – Lab Animal and Exotic Animal Nursing

An orientation to the use of animals in research and to the role of the veterinary technician and the biotechnologist in a biomedical research animal facility. Regulations affecting the use of animals in research will be discussed, including the Animal Welfare Act, USDA, FDA, and IACUC requirements. Proper methods of restraint, husbandry, nursing techniques, and housing needs for the common species of laboratory animals. Appropriate anesthesia, analgesia and euthanasia methods are discussed. Basic understanding of the care, husbandry, clinical procedures, and medical concerns of rabbits, ferrets, guinea pigs, chinchillas, small rodents, birds, snakes, lizards, turtles. Emphasis on clinically relevant materials and activities.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

VTDE110A — Veterinary Clinical Pathology

This course provides the fundamental studies of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VTDE111A — Veterinary Parasitology

Study of animal parasites. This course focuses on life cycle, vectors, and methods of transmission, identification, and prevention and treatment of parasitic disease in animals.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VTDE112A – Veterinary Clinical Pathology II

This course continues to provide the fundamental study of laboratory techniques and procedures involved in evaluating veterinary clinical samples. Areas of study include hematology, urinalysis, hemostasis, blood biochemistry and enzymology, serology, and cytology. The veterinary technician's role in sample collection, sample storage and handling, and performance of analytic procedures will be emphasized. Skills are developed in the use of laboratory equipment, laboratory safety and management, and quality control.

Prerequisite: VTDE110 **25 Hours** **1.5 Quarter Credits**

VTDE120A — Veterinary Clinical Techniques I

This course begins the student's clinical training. Students are introduced to principles of husbandry and medical care of common animal species, including: physical examination, grooming, injections, feeding, housing and restraint. The course includes a hands-on component focusing on the practical application of animal care skills and principles of animal care and management using techniques and knowledge learned in the veterinary technology classroom.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

VTDE121B — Veterinary Clinical Techniques II / III

This course continues the student's clinical training. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures. This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Topics covered include: venipuncture and blood collection techniques, catheterization, fluid therapy, physical examination, basic dental care procedures, wound management, and emergency care. Hands-on experience performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection and other routine veterinary clinical procedures.

Prerequisite: VTDE120 **50 Hours** **3.5 Quarter Credits**

VTDE122A — Small Animal Nursing I

This course covers a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered. **Prerequisite: None**

50 Hours **4.0 Quarter Credits**

VTDE123A — Small Animal Nursing II

This course continues to cover a case and disease based approach to nursing technique and procedure in the small animal patient. Students will learn how to effectively apply critical thinking skills, nursing interventions, and clinical procedures to affect a positive outcome in animal patients. Additional advanced clinical skills will be covered.

Prerequisite: VTDE122 **50 Hours** **4.0 Quarter Credits**

VTDE130A — Veterinary Anesthesia and Surgical Nursing I

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE131A — Veterinary Anesthesia and Surgical Nursing II

This course covers all aspects of surgical nursing including surgical assistance, aseptic technique and patient preparation, operating room procedures, surgical instrument use and care, suturing techniques, and sterilization procedures. Pain assessment, scoring, and interventions, in addition to bandaging techniques will also be covered. Also covered: Principles and practice of veterinary anesthesia. This course covers the physiology of the respiratory, cardiovascular and nervous systems as they are relevant to anesthesia. The pharmacology and uses of common pre-anesthetic and anesthetic agents. The veterinary technician's role in patient preparation, induction and maintenance of anesthesia, and post-anesthetic nursing is practiced in the laboratory.

Prerequisite: VTDE130

50 Hours

3.5 Quarter Credits

VTDE141B — Veterinary Hospital Management and Client Communication and Customer Service

Principles and practice of veterinary office management for veterinary technology students. Client relations, receptionist skills, telephone techniques and personnel management. Generation and maintenance of correspondence, medical records, legal forms and hospital logs. Basic bookkeeping, accounting and financial management principles. Marketing and public relations. Professional ethics and professionalism. Use of computers for data entry, patient record management and inventory control. Use of practice management software. State and federal laws as they apply to the veterinary practice. The objective of this course is to provide the student with critical client communication and customer service skills. These skills complement the technical learning provided in the program and are essential to becoming a member of a client-facing healthcare delivery team. The course emphasizes experiential learning and focuses on providing the student with experience handling common client interaction situations such as explanation of technical knowledge to a client, working with a concerned client, conflict resolution, and answering questions on commonly requested medications and treatments.

Prerequisite: None

25 Hours

2.0 Quarter Credits

VTDE150A — Veterinary Diagnostic Imaging

Introduction to the principles of veterinary radiography for veterinary technician students, including radiographic terminology, physics of X-ray production and interaction with matter, occupational safety and radiation protection, radiographic exposure factors and patient positioning required for production of diagnostic films, processing of radiographic film. Discussion of equipment materials and special radiographic studies common in veterinary practice. Basic ultrasound procedures are also presented.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE160A — Animal Nutrition

Fundamentals of energy and non-energy producing nutrients and their sources and functions. Integration of concepts including digestion, absorption, and metabolism with application to normal and therapeutic nutritional needs.

Prerequisite: None

50 Hours

3.5 Quarter Credits

VTDE171B – Equine and Large Animal Nursing

Introduction to the equine species will be given in this course. Review of basic anatomy, physiology will be done. Identifying different breeds, nutrition and husbandry will be presented. Various clinical techniques and restraint techniques will be taught and demonstrated by the students. Equine parasitology and diseases will be also be covered. The Large Animal Nursing course provides focused study of large animal nursing skills including physical exam, clinical procedures, husbandry requirements, reproduction and preventive care. The technician's role in food animal medicine. Species covered include bovine, ovine, porcine, caprine and camelid.

Prerequisite: None

58 Hours

4.5 Quarter Credits

VTDE200A — Veterinary Clinical Externship I

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. The site of the preceptorship is approved by the veterinary technology program in consultation with the student and the veterinary professionals Opportunity for learning and practical application of the

knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team. The course includes a weekly seminar in which the externship experience is reviewed and skills are reinforced. Concurrent enrollment in VTDE200B required.

Prerequisite: VT101DE

120 Hours

4.0 Quarter Credits

VTDE200.B – Veterinary Technician Seminar

This seminar course will serve as an on-campus addition to the students' first off-campus externship in VT200a. Students will discuss their experiences and challenges of working in a clinic. Concepts and skills will be reviewed and reinforced. Weekly objectives will be assessed in accordance with AVMA requirements.

Prerequisite: VTDE101

25 Hours

2.0 Quarter Credits

VTDE201 — Veterinary Clinical Externship II

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team.

Prerequisite: VTDE101 – VTDE171A, VTDE200A & VTDE200B

120 Hours

4.0 Quarter Credits

VTDE202 — Veterinary Clinical Externship III

Formal, structured off-campus clinical experience in licensed veterinary facilities, which serve as a means of instructing the student in practical, hands-on, clinical skills in all aspects of veterinary assisting. The student is under the direct supervision of one or more licensed veterinarians and/or credentialed veterinary technicians. Opportunity for learning and practical application of the knowledge, skills and attitudes required of a veterinary assistant. Exposure to varied methodologies and practice philosophies in a variety of clinical settings. Emphasis is on the role of the veterinary technician in the veterinary health care team

Prerequisite: VTDE101 – VTDE201

120 Hours

4.0 Quarter Credits

VTDE203B — Veterinary Technician License Preparation

Review of pertinent subject matter in preparation for the California State and National Veterinary Technician Examination. Includes lecture, group study, and laboratory components.

Prerequisite: VTDE101 — VTDE201

50 Hours

3.5 Quarter Credits

VTDE250B – Veterinary Clinical Skills Seminar (On-site)

This course completes the pre-clinical training of the veterinary technology student, covering both large and small animals. Hands-on experience including: husbandry and medical care of common animal species, physical examination, grooming, injections, feeding, housing and restraint, performing and assisting with routine clinical diagnostic and therapeutic procedures, including dermatologic and ophthalmologic procedures, blood and urine collection, catheterization, fluid therapy, anesthesia, physical examination, basic dental care procedures, wound management, and emergency care and other routine veterinary clinical procedures. Part one of a three-part course.

Prerequisite: VTDE101 – VTDE171A

120 Hours

6.5 Quarter Credits

VTDE204 – Medical Calculations

This course reviews mathematics required as part of clinical medical calculations utilized in preparation and administration of drugs, dosage determinations, intravenous fluid infusion, and prescription dispensing. Subjects covered include review of calculations involving fractions, decimals, ratios and proportions, unit conversions, and algebraic equations.

Prerequisite: VTDE101

30 Hours

3.0 Quarter Credits

BIODE103A – General Biology & Microbiology

This course is designed to provide the student with a foundation in basic biology. The student will gain a basic understanding of the foundations of life, classifications of species, and animal cell and tissue function.

Prerequisite: None

50 Hours

5.0 Quarter Credits

CHMDE103A – General Chemistry

This course provides an introduction to the principles of chemistry, including inorganic chemistry, organic chemistry, and biochemistry. Topics covered include atomic structure, bonding and nomenclature, gas laws, solutions, acids and bases, pH and equilibrium, organic and biochemical structure and reactions, and nuclear chemistry.

Prerequisite: None

30 Hours

3.0 Quarter Credits

MTHDE103A – College Algebra

This course includes topics from algebra. Algebra topics include the addition, subtraction, multiplication, and division of the real and complex numbers as well as polynomials. Additionally, it includes the solving of a variety of equations and inequalities, including, but not limited to, linear, absolute value, and quadratic equations. It also includes the graphing of a variety of functions with an emphasis on linear and quadratic functions; functions notation will be applied in problem solving as well as in computations involving combinations of functions. Geometry topics include, but are not limited to, the properties of parallel and perpendicular lines, perimeter, area, volume, theorems about triangles and various polygons, Pythagorean Theorem, and right triangle trigonometry.

Prerequisite: None

50 Hours

5.0 Quarter Credits

ENGDE101 – English Composition

Students will focus on college-level writing skills with particular emphasis on structure, organization and coherence with special attention to persuasive writing and novel analysis. The course will cover a targeted review of sentence mechanics, grammar and punctuation through a combination of lecture and directed exercises. The ENG 102 course is specific to DMS, Respiratory Therapy and Veterinary Technology Programs.

Prerequisite: None

50 Hours

5.0 Quarter Credits

SPCDE105 – Interpersonal Communications

Students learn the various theories and techniques of interpersonal communications. Topics include: process and functions of communication, relationship development, communication strategies, interpersonal language skills, listening and response skills and managing conflict.

Prerequisite: None

30 Hours

3.0 Quarter Credits

Updates effective as of 05/04/2022

Associate of Arts in Business Management (Hybrid Program)

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Arts in Business Management, provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C). In addition, all students must meet with Career Services and complete and sign all documentation prior to being approved for graduation.

Course Descriptions:

BM100 – Introduction to Business Management

This course introduces the student to the basic business management concepts and techniques used in organizing and maintaining an effectively run business or department. An overview of personnel management, budgeting, staffing, and evaluation of work flow will be discussed.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM125 – Introduction to Accounting

This course is designed to introduce an understanding of accounting principles along with a working knowledge of GAAP and the accounting process. Students learn to work with financial statements, reconciliation and balance sheets.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM205 – Human Resource Management

This course is designed to introduce students to the various topics covered by human resources management. The primary topics are the functions of human resources such as job analysis and planning, recruiting, staffing, orientation and training, performance appraisal, career planning, compensating, and motivating. A wide variety of secondary topics will also be covered in this course to include learning principles, human resource development interventions, employee orientation and socialization, performance management, coaching, diversity, and employee counseling.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM215 – Business Finance

This course is designed to provide students with the foundations of finance and financial reporting with emphasis on business corporations. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM220 – Business Marketing and eMarketing

This course is designed to provide students with an introduction to contemporary marketing theories and eMarketing theories and implementation. Topics covered will include identifying market opportunity, product development, promotion planning, pricing decisions and channels of distribution.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM221 – Critical Thinking and Decision Making

This course is designed to help prepare students to deal rationally, creatively, and effectively with the ever-increasing challenges and problems in the business world. Students will learn techniques to develop their practical and analytical abilities.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BM226 – Consumer Finance

This course is designed to prepare students to understand the fundamentals of personal finances and personal financial management. Students will learn about budgeting, banking, financial transactions, and consumer credit.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE106 – Managing Diversity in the Workplace

This course is designed to give students the basic knowledge and understanding of diversity in the workplace and how to manage it. Students will also explore various races, ethnicity, languages, cultures, and other things that brings diversity to the workplace.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE111 – Entrepreneurship in the eCommerce Age

This course is designed to provide students with knowledge on how to develop business ideas for their own business and develop a mission and vision. Students will also understand the principles of buying and selling goods and services online

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE120 – Business Communications

This course is designed to introduce practical communication skills, including the mechanics and principles of effective business writing and research methods and compiling reports. Focus is on an understanding of writing styles appropriate to the business world and on speaking and presentation styles appropriate to the key activities in the business world.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE135 – Ethics and Professionalism

This course is designed to provide students with an understanding of ethics and professionalism in the workplace. Students will cover the relationship between management, employees and customers within the workplace. Techniques on how to encourage and maintain ethics and professionalism in the workplace will be covered.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE200 – Business Law

This course is designed to provide the student with information on the essentials of the nature of law and the functions of the judicial system in the business environment. An overview of legal characteristics of a sole proprietorship, partnerships, limited liability companies and corporations are discussed.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE210 – Business Operations

This course is designed to provide students with concepts, techniques and tools to design, analyze, and improve business operations. The course will cover topics such as forecasting, product design, quality control, inventory and management.

Prerequisite: None

50 Hours

5.0 Quarter Credits

BMDE230 – Business Management Capstone

This course is designed to provide students with the opportunity to develop a business plan that will apply theories and techniques taught throughout the program.

Prerequisite: All business management program courses

50 Hours

5.0 Quarter Credits

CJ140—Introduction to Report Writing

This course examines the role of report writing as it relates to police work. Students will gain an objective look at all aspects of investigations and how they are documented in various report forms. Students will actively participate in discussions and role play situations with the goal of investigating a situation and documenting it on the proper police forms. Interview and interrogation techniques will be explained and students will demonstrate their ability to differentiate between these two types of police practices.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ145—Corrections 1

This course will examine the historical development and present philosophies in the handling of those adjudged to be law violators. Federal, state, and local correctional systems will be studied, including prison/jail architecture and its impact on safety and prison organization. Various sentencing/presentencing/release aspects such as--the bail process and bail schedules, probation and intermediate sanctions, parole and prisoner reentry--are examined. A study is then made of the various clients within, and the differences between, the adult and juvenile correctional systems.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ155—Private Security 1

This course coincides with the California State Bureau of Security and Investigative Services mandated security officer training curriculum including: Powers to Arrest, Terrorism/Weapons of Mass Destruction, Public Relations, Observation and Documentation, Officer Safety, Crime Scene preservation, Communication, Legal Aspects, Courtroom Demeanor, and Introduction to Security Supervision. Successful completion of this course should result in the subject mastery required to sit for the State of California Guard Card test.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5.0 Quarter Credits

CJ165—Introduction to Criminal Law

This course will be an overview of the criminal justice system in America, with an emphasis on criminal procedures and California statutes including: a basic study of laws of arrest, relevant Constitutional amendments, the federal and state court systems, basic pre-trial procedures and motions, the elements of a crime/corpus delicti, initial and felony arraignments, search and seizure applications and exceptions, Miranda admonition and waivers, grand jury indictment/true Bill, confessions and Beheler admonitions, felony preliminary hearings, as well as a study of Murder which covers 1st and 2nd degree homicide, voluntary and involuntary manslaughter, and Watson Murder as it applies to DUI cases.

Prerequisite: None

50 Hours 4.5

Quarter Credits

CJ175—Criminology 1

This course will define criminology; describe the roles, duties, and impact of criminologists on the criminal justice system; define the basics of an anti-social personality; compare the classical, biological, psychological, psychiatric, social structure, social process, and social development theories of criminology; consider methods of applying scientific study to criminal activity; and relate criminology theory and practice to careers in law enforcement. Where criminology theories come from will also be studied, as will how various theories interact and/or cancel each other out—as well as evaluating the central theme and question of free will versus determinism as the primary causal factor of criminal behavior.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours 4.5 Quarter Credits

CJ185—Criminal Investigation

This course will provide an introduction to criminal investigation, including crime scene protection and processing procedures, inductive and deductive reasoning, identification and collection of evidence, case preparation, interview/interrogation strategies and tactics, criminal intelligence and surveillance operations, undercover operations and confidential informant management, death investigations, and basic preliminary investigation of crimes against property and crimes against persons with consideration of identifying suspects, establishing elements of specific crimes, and then connecting suspects to those crimes. Legal issues affecting criminal investigation will also be studied with an emphasis on search warrant preparation.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours 4.5 Quarter Credits

CJ210—Intermediate Criminal Law

This course is an overview of the criminal justice system in America, with an emphasis on California criminal procedures and statutes including: crimes against persons such as assault with a deadly weapon and sex crimes, property crimes such as burglary and grand theft auto, social crimes such as narcotics offenses and prostitution, crimes of treason such as sedition and espionage, and crimes against the state such as perjury and obstruction of justice. Available criminal defenses insanity, duress, and mistake of law/fact are also considered.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours 4.5.0 Quarter Credits

CJ230—Advanced Report Writing

This course will teach proper law enforcement report writing and field note taking and the role each plays in effective, successful criminal prosecutions. The preparation of clear, concise, and accurate reports will be stressed with an emphasis on: elements of composition, syntax, grammar, punctuation, spelling and knowledge of law enforcement abbreviations. Crimes against property and crimes against persons will be covered including: robbery, burglary, auto theft, and assault with a deadly weapon—as well as narcotics offenses, sexual offenses, white collar crimes, and criminal gang injunctions. Practice in arrest and crime report writing is emphasized and proficiency must be demonstrated, as well as an understanding of the importance exemplary report preparation.

Prerequisite: CJ140 – Introduction to Report Writing

50 Hours 4.0 Quarter Credits

CJ245—Introduction to Forensics

This course applies scientific methodology to crime scene investigation and crime solving, including an analysis of crime scene investigation, securing and protection of a crime scene, keeping a homicide log, the initial walk through of a homicide scene, crime scene photography, crime scene reconstruction, physical evidence collection and packaging, autopsy methodology, rigor mortis and livor mortis, maintaining the chain of custody, fingerprint collection and identification techniques, tool mark identification, ballistic/firearms evidence identification and collection, gunpowder residue, and castings of tires and shoeprints. Several of these forensic techniques will be practiced until proficiency is demonstrated.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours 4.5 Quarter Credits

CJ250—Advanced Forensics

This course will continue the application of scientific methodology to crime scene investigation and crime solving, including blood spatter analysis techniques and documentation, a study of illicit drug types and tests, metabolism and absorption of drugs and alcohol, trace evidence identification and collection, arson and explosives investigation, toxicology and blood analysis, poison absorption rates, document examination and questioned document investigation. DNA analysis techniques are also studied, including mitochondrial DNA, familial DNA, and biological stain analysis—as well as DNA application to sexual crime investigations. Several of these techniques will be practiced until proficiency is demonstrated. Additionally, using the

forensics techniques mastered in Introduction to Forensics and Advanced Forensics, the students will respond to and process a homicide were actual law enforcement personnel.

Prerequisite: CJ245 – Introduction to Forensics

50 Hours

4.0 Quarter Credits

CJDE200—Corrections 2

This course examines the handling of special offenders, including drug addicted, mentally ill, aging, sex offender, HIV/AIDS infected, and violent offenders within the various Federal, state, and local correctional systems. The daily routine, responsibilities, and duties of correctional officers will be studied--as well as the unique concerns of correctional managers as they relate to inmates and prison staff. The everyday prison life of inmates is addressed, including rehabilitation/educational opportunities, discipline, prison gangs, and interaction with vocational prison staff. In addition, Constitutional cases affecting issues of capital punishment, cruel and unusual punishment, and prisoner rights are presented.

Prerequisite: CJ145 – Corrections 1

50 Hours

4.5 Quarter Credits

CJDE205—Private Security 2

This course will examine the various business models and environments of the private security industry such as uniformed private security officer, fixed post versus mobile foot or vehicular patrol techniques, corporate uniformed security and corporate investigative security functions, corporate and retail shrinkage due to internal and external theft, sub rosa / undercover security operations for varied clients, cyber security for corporate and retail, and consulting opportunities as they relate to physical security. Students will also learn and hone basic job interviewing, and soft skills required in the security industry.

Prerequisite: CJ155 – Private Security 1

50 Hours

4.0 Quarter Credits

CJDE215—Introduction to Juvenile Justice

This course examines prevalent patterns of juvenile delinquency, relates these patterns to theories of child and adolescent development, and considers various theories regarding the cause of juvenile criminal behavior. In addition, this course surveys the roles of the police, courts, and juvenile probation in regards to California’s balanced and restorative justice system. California Welfare and Institution 330 dependent child, 601 status offender, and 602 delinquent offender Codes are also studied—as well as Dennis H juvenile detention hearings, Gladys R delinquency hearings for offenders under 14 years of age, and Edsel P fitness hearings to determine waiver of serious juvenile offenders to adult court. Court cases pertinent to the areas of the juvenile justice system that are covered are also discussed.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJDE220—Criminology 2

This course will initially examine social conflict theories of criminology such as critical, left-realist, feminist criminology, postmodern, peacemaking, and convict criminology, comparing them to previously learned criminology theories. The course emphasis then shifts to applying the many criminology theories to a variety of crimes and the individuals who commit them. The irony of crimes committed by persons ranging from the affluent to the deprived is related by typologies of murder, gangs-related crime, robbery, burglary, auto theft, arson, sexual offenses, narcotics offenses, crimes against children, fraud, computer crimes, embezzlement, receiving stolen property, terrorism, corporate/white collar crime, insider trading, gambling, prostitution, money laundering, and public corruption.

Prerequisite: CJ175 – Criminology 1

50 Hours

4.5 Quarter Credits

CJ226—Contemporary Terrorism 1

This course will examine the influence and impact of international and domestic terrorism on the criminal justice system—and to a lesser degree the impact of contemporary legal, civic, and political issues. A comparison of several terrorism definitions will be explored as they relate to violence as the terrorists’ operational mechanism, the desire for publicity, asymmetrical tactics, and ideological/religious/cultural relevance. A post World War II history of international terrorism culminates in the 9/11 attack and the failure of U.S. intelligence to “connect the dots.” A partial worldwide geopolitical study of terrorist groups, their methods, and histories will be examined—ending in Europe.

Prerequisite: CJ165 – Introduction to Criminal Law

50 Hours

4.5 Quarter Credits

CJ240—Contemporary Terrorism 2

This course continues the worldwide geopolitical study of terrorist groups, their methods, and histories in North Africa and the Middle East; Northeast, Central and Southern Africa; Southern and Southeast Asia; the Pacific Rim; and Latin America and South America. An additional examination of counterterrorism agencies, methods, hostage rescue techniques, risk analysis, impact of The Patriot Act, aviation security, cyber security, impact of the Patriot Act—as well as state-of-the-art weaponry and technology and personal protection techniques—will also occur. Students will also learn how the Intelligence Community--partnered with cutting edge intelligence gathering techniques such as metadata, open-source intelligence, and mathematics-based crime forecasting—hopes to identify and project terrorist threats deep into the future.

Prerequisite: CJ226 – Contemporary Terrorism 1

50 Hours

4.0 Quarter Credits

ENGDE101 — English

Students will learn effective college-level essay writing skills with a focus on structure and development, including organization and coherence with special attention to persuasive writing. In addition, a targeted review of sentence mechanics, grammar and punctuation will be covered through a combination of lecture and directed exercises.

Prerequisite: None

50 Hours

5.0 Quarter Credits

IT101 – Computer Applications

This course is designed to increase proficiency in the use of basic computer use, common word processing, spreadsheet, and presentation application software. Topics include the production of business documents, reports, and presentations. Upon successful completion of this course, students will be able to identify basic components of a computer, and prepare documents using word processing, spreadsheets, and presentation software.

Prerequisite: None

50 hours

4.5 Quarter Credits

MTH101 — Introduction to Algebra

This course focuses on the use of rational and irrational numbers in algebra and geometry. Students will become proficient in computing with integers, fractions, decimals, the order of operations, and basic radical expressions. The topic areas in algebra include, but are not limited to, basic set theory, the classification of the real number system, the addition, subtraction, and multiplication of polynomials, solving linear equations, solving linear inequalities, ratios, rates, and proportional reasoning. This course includes the application of dimensional analysis to perform unit conversions in both the English and SI units of measurement within a problem-solving context. Additionally, it includes an introduction to polynomial functions with an emphasis on linear functions and their graphs.

Prerequisite: None

50 Hours

5.0 Quarter Credits

SPC101 — Public Speaking

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Informative and Persuasive Speaking.

Prerequisite: None

50 Hours

5.0 Quarter Credits

PSYDE101 — Psychology

This survey course covers a broad spectrum of major psychological theories and theorists. Topics covered include but are not limited to the biological basis of behavior, states of consciousness, personality, stress, psychological disorders, and social psychology. Students participate through student led reviews of current research, self-evaluations, and other in-class projects.

Prerequisite: None

50 Hours

5.0 Quarter Credits

SOCDE101 – Sociology

This class provides an overview of sociology and its application to everyday life. Emphasis is placed on understanding the major theories, concepts, and terminology. Students will explore topics such as culture, inequality, social structure, deviance, and social institutions.

Prerequisite: none

50 Hours

5.0 Quarter Credits

Update effective as of 05/10/2022

- Platt College will no longer offer the Hemodialysis program.

Updates Effective as of 07/15/2022

Medical Administrative Specialist (Associate of Science) Hybrid

Medical Administrative Specialists perform a variety of tasks necessary to running a smooth, effective medical office. These individuals focus on many administrative procedures of medical offices, outpatient clinics, hospitals, and other health care facilities. Some of these skills include billing, coding, scheduling, transcription, office finance, human resources and computer skills. Medical Administrative Specialist students will learn the skills that may lead to becoming an office manager in a clinical setting.

Vocational Objective

The intent of the Medical Administrative Specialist programs is to provide an enriched learning opportunity that will prepare the student for entry-level employment in the health care industry. Students in the Medical Administrative Specialist programs will graduate with a professional knowledge, skills, and practical experience in the health services field acquired during their studies at Platt College. Employment opportunities open to the graduates of the Medical Administrative Specialist programs include Medical Administrative Assistant, Podiatric Medical Administrative Assistant, and Ophthalmic Medical Administrative Assistant. Industries that will be interested in these graduates include, but are not limited to, ambulatory settings such as medical offices, clinics, nursing homes, medical supply companies, home health agencies, insurance companies, pharmaceutical companies.

Industry Occupations

Perform secretarial duties using specific knowledge of medical terminology and hospital, clinic, or laboratory procedures. Duties may include scheduling appointments, billing patients, and compiling and recording medical charts, reports, and correspondence.

Associate of Science in Medical Administrative Specialist

Upon successful completion of a program of instruction, the graduate will be awarded an Associate of Science; Medical Administrative Specialist provided all financial obligations to the school have been met and a minimum grade point average has been attained. To graduate, a student must attain a minimum cumulative grade point average of 2.0 (C) and meet all attendance requirements. In addition, all students must meet with Career Services and Financial Aid and must complete and sign all documentation prior to being approved for graduation.

Associate of Science in Medical Administrative Specialist Program Information

1210 Hours / 90 Quarter Credit Hours / Approximately 15 months

Core Courses

IAHC101 – Introduction to Allied Health Careers	4.0 Quarter Credits
IT101 – Computer Applications	4.5 Quarter Credits
MAS104 – Introduction to Medical Transcription	3.5 Quarter Credits
MASDE105 –Medical Terminology	3.5 Quarter Credits
MASDE106 – Human Resources, Risk Management and Employability	4.0 Quarter Credits
MASDE107 - Advanced EHR	3.5 Quarter Credits
MASDE110 – Anatomy & Physiology	4.0 Quarter Credits
MAS140 – Medical Billing and Coding – ICD-10	3.5 Quarter Credits
MAS142 – Medical Billing and Coding – CPT	3.5 Quarter Credits
MAS144 – Medical Billing and Coding – HCPCS	3.5 Quarter Credits
MASDE152 – Medical Office Procedures	4.0 Quarter Credits

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

MASDE106 — Human Resources, Risk Management and Employability

This course introduces the student to human resources and risk management in the medical environment. Students will be introduced to basic human resource functions including classifying and reclassifying existing positions, interviewing and hiring employees, counseling employees, benefits, work hours and overtime. Students will learn to identify the sources of liability in an office based medical practice, specify strategies to reduce exposure to office liability, discuss various methods to address compliance issues related to an office based medical practice and describe liability issues related to employment in the office based medical practice. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MASDE107 – Advanced EHR

This course will cover the advanced topics in the field of electronic records. Such topics may include, but are not limited to: health data structure, standards across the board and various types of data collection methods. Students will also learn the importance of electronic health record maintenance, privacy, security and confidentiality. They will discuss the financial management side of insurances and billing.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

MASDE110 – Anatomy and Physiology

Upon completion of this subject, the student will have practical knowledge about the structural levels of organization, anatomical components, and physiology. The student will also learn about Medical Terminology and relationships related to various body organs and anatomical directions, planes, and body cavities. The student will have a clear understanding of the anatomy and physiology of a typical cell, tissues, organs, systems of the human body and homeostasis and its importance in the human body.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MASDE152 — Medical Office Procedures

General administrative procedures are introduced. Areas of study include receptionist duties, appointment scheduling, records management, financial arrangements, communications, telephone procedures, and correspondence management. This course addresses basic principles, terms and concepts of business structure including those in the medical field. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MASDE155 — Medical Computerized Office

Students develop skills in entering, editing, analyzing, and retrieving patient data using specialized medical software. This course also includes hands-on use of the software for insurance billing, coding of diseases, medical records, and related medical information. Students will utilize the media resource center regularly in order to develop speed, accuracy and proficiency in abstracting data, data entry, billing and coding, transcription and form preparation in addition rooming skills and vital signs.

Prerequisite: None **50 Hours** **3.5 Quarter Credits**

MASDE162 — Certification Preparation Seminar

Students will prepare for the national certification exam in the following areas of competence: medical insurance and billing procedures, terminology, the claims process, CPT coding, ICD-9-CM and HCPCS Level II Coding. Exam topics will be reviewed in depth including: CMS-1500 claims forms, confidentiality and ethics, Blue plans, disability, HIPSS, Medicaid and Medicare, OSHA, and TRICARE.

Prerequisite: None **50 Hours** **4.0 Quarter Credits**

MX251 — Externship

The Externship experience provides the student with the opportunity to practice the skills they have been taught in school. It is a real world scenario in which the student will work with patients, doctors, and other members of the healthcare delivery team. This hands-on experience gives the student on-the-job training that would be impossible to provide in a classroom setting. The Externship Site Supervisor will complete weekly evaluations tracking the student's progress, as well as a final evaluation at the completion of the student's hours. The Externship Coordinator will monitor the student's progress, along with the Externship Site Supervisor, with on-site visits being performed.

Prerequisite: Completion of all coursework with a cumulative 2.0 GPA. 160 Hours 5.0 Quarter Credits

ENGDE101 — English

Students will learn effective college-level essay writing skills with a focus on structure and development, including organization and coherence with special attention to persuasive writing. In addition, a targeted review of sentence mechanics, grammar and punctuation will be covered through a combination of lecture and directed exercises.

Prerequisite: None 50 Hours 5.0 Quarter Credits

MTH101 — Introduction to Algebra

This course focuses on the use of rational and irrational numbers in algebra and geometry. Students will become proficient in computing with integers, fractions, decimals, the order of operations, and basic radical expressions. The topic areas in algebra include, but are not limited to, basic set theory, the classification of the real number system, the addition, subtraction, and multiplication of polynomials, solving linear equations, solving linear inequalities, ratios, rates, and proportional reasoning. This course includes the application of dimensional analysis to perform unit conversions in both the English and SI units of measurement within a problem-solving context. Additionally, it includes an introduction to polynomial functions with an emphasis on linear functions and their graphs.

Prerequisite: None 50 Hours 5.0 Quarter Credits

SPC101 — Public Speaking

Students learn to apply professional speaking techniques to deliver impromptu, extemporaneous, and rehearsed speeches. Attention is focused on speaking skills, listening skills, preparation and organization skills, and the importance of non-verbal communication. Special attention is paid to Informative and Persuasive Speaking.

Prerequisite: None 50 Hours 5.0 Quarter Credits

PSYDE101 — Psychology

This survey course covers a broad spectrum of major psychological theories and theorists. Topics covered include but are not limited to the biological basis of behavior, states of consciousness, personality, stress, psychological disorders, and social psychology. Students participate through student led reviews of current research, self-evaluations, and other in-class projects.

Prerequisite: None 50 Hours 5.0 Quarter Credits

SOCDE101 – Sociology

This class provides an overview of sociology and its application to everyday life. Emphasis is placed on understanding the major theories, concepts, and terminology. Students will explore topics such as culture, inequality, social structure, deviance, and social institutions.

Prerequisite: none 50 Hours 5.0 Quarter Credits

Updates effective as of 8/1/2022

- Tuition changes for Respiratory Therapy AS program

Updates effective as of 8/15/2022

- Wonderlic test scores for Veterinary Technology (residential and DE) and Diagnostic Medical Sonography (AS / BS)
